	How do I embed a video from my computer on a Lessons page?	444
	How do I embed a YouTube video on a Lessons Page?	450
	How do I embed an audio file on a Lessons page?	455
	How do I add a website link to a Lessons page?	460
	How do I add a file from Resources to a Lessons page?	464
	How do I add activities to a Lessons page?	473
	How do I add a question to a Lessons page?	484
	How do I allow comments to be posted on a Lessons page?	491
	How do I allow students to add content to Lessons?	494
	How do I reorder items on a Lessons page?	500
	How do I delete items on a Lessons page?	502
	How do I limit access to Lessons page items to groups?	505
	How do I add subpages to a Lessons page?	509
	How do I view the Index of Pages?	513
	How do I require completion of a Lessons item?	515
	How do I require completion of a Lessons page?	520
	How do I add additional top-level Lessons pages?	526
	How do I rename a Lessons page?	532
	How do I delete a top-level Lessons page?	533
	How do I delete a Lessons subpage?	536
	How do I export Lessons content?	539
	How do I import Lessons content?	541
Mess	ages	545
	What is the Messages tool?	546

	How do I view my messages?	547
	How do I send a message?	549
	How do I reply to a message?	554
	How do I create a Messages folder?	556
	How do I move a message?	558
	How do I delete a message?	560
	How do I determine who site participants can send a message to?	562
News	5	564
	What is the News tool?	565
	How do I add a News tool?	566
	How do I edit the News tool?	568
	How do I delete a News tool?	569
Podc	asts	570
	What is the Podcasts tool?	571
	How do I add a podcast?	573
	How do I subscribe to a podcast?	577
	How do I allow students to upload podcast files?	580
	How do I view or download an individual podcast?	582
Polls		583
	What is the Polls tool?	584
	How do I add a new poll?	586
	How do I take a poll?	593
	How do I view poll results?	595
	How do I modify Polls tool permissions?	596
Post	Em	598
	What is the PostEm tool?	
	How do I add PostEm feedback?	601
Profi	le	609
	What is the Profile tool?	
	How do I set up my profile?	611
	How do I post to my wall?	
	How do I add pictures to my profile picture gallery?	

	How do I search for and add connections?	.626
	How do I send a message to a connection in Profile?	.630
	How do I change my privacy settings?	.632
	How do I set my notification and other profile preferences?	.634
Resou	rces	.638
	What is the Resources tool?	.639
	How do I navigate the Resources tool?	.641
	How do I create folders?	.645
	How do I upload files?	.652
	How do I drag-and-drop files from my computer to a Resources folder?	.656
	How do I upload and unpack a zip file to a Resources folder?	.660
	How do I create a zip archive file in Resources?	.666
	How do I add a web link or URL?	.668
	How do I create a text document?	.672
	How do I create an HTML page?	.676
	How do I create a citation list?	.681
	How do I move a file or folder within Resources in the same site?	.689
	How do I copy a file or folder within Resources in the same site?	.697
	How do I copy a Resources file or folder from one site to another site?	.706
	How do I reorder files or folders within Resources?	.710
	How do I upload a new version of a file in Resources?	.714
	How do I hide files and folders?	.717
	How do I unhide files or folders?	.721
	How do I set the display of a Resources item to a specific time period?	.725
	How do I remove a file or folder in Resources?	.728
	How do I restore a removed file or folder in Resources?	.732
	How do I add and display contextual information about a file or folder?	.734
	How do I notify site participants that content has been added to Resources?	736
	How do I obtain the URL for a file or folder in Resources?	.737
	How do I make a link to a Resources folder appear in the Tool Menu?	.739
	How do I create a group folder in Resources?	.741
	How do I allow group members to upload content to a group Resources folder?	.744

How do I allow all students to upload content to a selected folder?	746
How do I make a file or folder publicly viewable?	748
What is the Resources quota?	750
How do I upload or download multiple resources?	751
Rich Text Editor	753
What is the Rich Text Editor?	754
What actions can I perform using the Rich Text Editor icons?	755
How do I create a link to a web site in a text box?	765
How do I create a link to a Resources item in a text box?	768
How do I create a link to an activity in a text box?	772
How do I embed an image in a text box?	775
How do I embed a linked web image in a text box?	783
How do I embed a YouTube video in a text box?	790
How do I add special characters to a text box?	794
How do I add/edit a table in a text box?	796
How do I add a content template to a text box?	801
How do I paste text from a Microsoft Word document to a text box?	803
How do I embed an mp4 video in a text box?	806
How do I embed an mp3 audio in a text box?	810
Roster	814
What is the Roster tool?	815
How do l view/search the roster?	816
How do I view roster photos and/or profiles?	817
How do I view group membership in the roster?	819
How do I edit Roster tool permissions?	821
Schedule	822
What is the Schedule/Calendar tool?	
How do I customize my Schedule/Calendar display?	824
How do I view calendar item details?	
How do I change the calendar view in the Schedule tool?	
How do I add items to the Schedule/Calendar?	
How do I edit a calendar item?	839

	How do I delete a calendar item?	842
	How do I print the Schedule/Calendar?	844
	How do I merge the Schedule/Calendar with another site?	846
	How do I import Schedule/Calendar entries from a file?	848
	How do I modify Schedule/Calendar permissions?	851
Searc	:h	852
	What is the Search tool?	853
	How do I perform a basic search?	854
	How do I perform an advanced search?	856
Section	on Info	862
	What is the Section Info tool?	863
	How are sections different than groups?	864
	How do I create a section?	865
	How do I edit a section?	868
	How do I delete a section?	870
	How do I add site members to a section?	872
	How do I add teaching assistants to a section?	874
Sign-l	Up	876
	What is the Sign-Up tool?	877
	What are Sign-Up meeting types?	878
	How do I view meetings in Sign-Up?	881
	How do I create a meeting?	883
	How do I edit a meeting?	890
	How do students or participants sign-up for meetings?	893
	How do I export meeting data?	896
	How can I use the Sign-Up tool in my site?	899
	How do I manually add users to meetings?	902
	How do I add meetings to the site Schedule or Calendar?	904
	How do I modify Sign-Up tool permissions?	907
Site Ir	nfo	910
	What is the Site Info tool?	911
	How do I edit the site information?	912

	How do I choose which tools will be available in my course?	915
	How do I rearrange or rename the items in the Tool Menu?	919
	How do I add users to my course or project?	923
	How do I remove users from my course or project?	927
	How do I add a class roster?	928
	How do I delete a class roster?	931
	How do I create groups?	932
	How do I link to a parent site?	938
	How do I control site access?	941
	How do I duplicate a site?	943
	How do I copy my content from one site to another?	944
	How do I import content from an archive file?	948
	What is the User Audit Log?	950
Stat	tistics	952
	What is the Statistics tool?	953
	How do I view summary reports in the Statistics tool?	954
	How do I create and run a report?	958
	How do I duplicate a report?	964
	How do I edit a report?	966
	How do I delete a report?	968
	How do I print a report?	969
	How do I export a report?	971
	How do I modify preferences in the Statistics tool?	973
Sylla	abus	975
	What is the Syllabus tool?	976
	How do I create a multi-part syllabus based on number of items needed?	977
	How do I add my syllabus as a file attachment?	983
	How do I create a syllabus using cut and paste from a document?	987
	How do I print the syllabus?	991
	How do I point my syllabus to a webpage?	993
	How do I create a multi-part syllabus by dates?	994
Test	ts & Quizzes	999

	What is the Tests & Quizzes tool?	1000
	How do I create an assessment in Tests & Quizzes?	1003
	How do I create a new assessment using markup text or cut and paste?	1010
	How do I add a new question (with the assessment builder)?	1014
	How do I create a multiple choice question?	1020
	How do I create a matching question?	1027
	How do I add a true/false question?	1032
	How do I create a short answer/essay question?	1037
	How do I add a fill in the blank question?	1041
	How do I add a numeric response question?	1046
	How do I add a calculated question?	1051
	How do I add an audio recording question?	1057
	How do I add a file upload question?	1061
	How do I add an extended matching items question?	1065
	How to I add multiple parts to an assessment?	1070
	How do I use assessment parts?	1075
	What is a question pool?	1080
	How do I add, copy, move, or remove a question pool?	1083
	How do I add a question to a question pool?	1089
	How do I copy questions from the question pool?	1092
	How do I set up a random question set?	1095
	How do I import and export assessments?	1099
	How do I import a question pool?	1103
	How do I share a question pool?	1105
	How do I create a survey?	1108
	How do I inspect and adjust the settings of an assessment?	1116
	How do I publish an assessment (i.e. test or quiz)?	1129
	How do I grade Tests & Quizzes?	1134
	What is the Tests & Quizzes Event Log?	1140
Web (	Content	1141
	What is the Web Content tool?	
	How do I create a Web Content link to a web site?	1144

	How do I create a Web Content link to a folder in Resources	1147
	How do I edit a Web Content link?	1151
	How do I delete a Web Content link?	1153
Wiki .		1156
	What is the Wiki tool?	1157
	How do I view wiki pages?	1158
	How do I search wiki pages?	1159
	How do I edit wiki pages?	1160
	How do I create a new wiki page?	1163
	How do I add images to a wiki page?	1165
	How do I add attachments to a wiki page?	1168
	How do I view wiki page info?	1172
	How do I watch or subscribe to a wiki?	1174
	How do I view wiki page history?	1175
	How do I set wiki permissions?	1176

# **About Help**

### **About Sakai Help**

Please note that the help documentation provided for Sakai is written for "out-of-the-box" (OOTB) Sakai. As such, it is designed to support the core tools available for this version.

The screen images incorporated into the documentation are all taken using the generic, OOTB Sakai theme or "skin".

Depending on local customizations, your individual instance of Sakai may have some differences in available tools, tool names, user roles, skins, or default permissions.

Also note that while all users have the ability to search and view all available help, your user account must have the necessary permissions in order to perform administrative or site management tasks. Help articles may describe features or settings that are not available to you, depending on your role within a site. See <a href="What are permissions and roles?">What are permissions and roles?</a> for more information.

### **Navigating Help**

You can navigate to any Help article by clicking on the title of a collection name in the contents pane on the left to expand the collection, and then clicking on the article title.

### **Searching Help**

You can search Help content by entering a search term or phrase in the search pane on the left, and clicking on the Search button. Search results are ranked by relevance.

### **Tool Help**

While using a tool, you can go directly to the Help for that tool by clicking on the Help icon in the tool title bar.

### **Additional Help Resources**

If the information you're looking for is not available here, try looking in the online <u>Sakai</u> <u>Community Wiki</u>.

# Accessibility

# **Accessibility Information**

Sakai is a Learning Management System created to assist faculty and students by providing online tools for communication, assessment, content delivery, etc.

Sakai is composed of sites, and each site has a number of tools selected by the site creator. There is also a special site, My Workspace, private to you, where you can access personal information and change your settings.

This document is assistive technology agnostic and will briefly describe the different areas of the interface, point out how they are implemented for accessibility, and go into more depth where extra assistance may be needed.

If you need specific help with your assistive technology, please contact your institution's office for Disability Student Services and/or Information Technology Services.

For additional information visit the **Accessibility Working Group** on the Confluence Wiki.

Note: The content depicted in images on this page may differ from what you experience, due to your institutions customization of Sakai.

### **Description of the Environment**

### **Portal Organization**

The portal consists of the following elements. They are always present:

- Quick access "Skip to..." links
- · Login/logout links
- List of favorite sites
- · List of tools for the current site
- Minimize tool navigation link
- Footer

### **Quick Access Links ("Skip to...")**

**Location**: The first three links on the page. They are announced by text-to speech software after the page title.

These links enable the user to reach frequently used areas of Sakai.

### **Login and Logout Links**

### **Login Link**

**Location**: the second link in the portal

This link will take you to a login screen if you are not logged in. After successful login you will be returned to Sakai.

#### **Logout Link**

**Location**: When logged in, the Logout link is the fifth link after the access key links.

This link will take you to a logout page.

### The list of Favorite Sites

• Location: at the top of the screen

Landmark: navigation ("Sites begin here")

• **Heading**: Level 1 ("Sites begin here")

Access key: [W]

Note: Access keys will be capitalized for clarity only.

This list contains the menu links to sites you most commonly use. Each menu link will either take you to the site, or if you Tab into the menu and press the Down arrow key, supply you with a submenu of that site's tools so that you can go straight to that tool on the selected site.

Using the Up and Down arrow keys, you can navigate the submenu to the site specific tool links. These links can be activated using the Enter key.

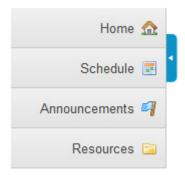

If you have a large number of favorite sites in this list, some sites will not be displayed due to space limitations. Any sites not displayed are contained in a submenu accessed via the More Sites link (not shown in screen capture), which is the last link in the favorite sites list.

The rest of the sites you may be a member of can be found in your My Workspace site, This site is always the first link in the favorite sites list, in the Worksite Setup tool.

### The List of Tools for the Current Site

Screen capture of Tools List

· Location: to the left of the screen

• Landmark: navigation ("Tools begin here")

• **Heading**: Level 1 ("Tools begin here")

Access key: [L]

Note: The Help tool will always be present as the last item in the tools list no matter what site you are on. This enables quick access to the Sakai help information.

### **Minimize Tool Navigation Link**

**Location**: right after the current site's tools list is a link to minimize the tools list.

The link text switches between "Expand Tool Navigation" and "Minimize tool navigation", depending on the state of the tools list.

Note: Using this link will have no effect on page navigation for users of screen reading software as all tools will still be available and announced.

### The Current Site or Current Tool Content Container.

The content comes right after the favorite sites list and the tools list.

• Location: to the right of the tool list.

· Landmark: main

• Heading: Level 1 "Content begins here"

Access key: [C]

For more details on this part of the portal, see the Content Container Details section

### **Footer Area**

**Location**: Bottom of the screen. After the content container.

Landmark: contentinfo

This area contains a list of three links: Gateway which takes you to the main page (similar to a homepage) of the current Sakai instance, Mobile View which takes you to the mobile version (simplified interface and supports smaller screen resolutions), and The Sakai Project which takes you to the Sakai project home page.

Note: These links may differ based on your institution's customization of Sakai.

This section also contains the copyright information and the current version of Sakai used on this server [e.g., sakai/trunk on Oracle - Built: 05/21/13 12:00 - Sakai Revision: 124764 (Kernel 1.4.0-SNAPSHOT)].

### **Portal navigation summary**

All major areas of the portal are announced by a heading level 1, consist of landmark areas, and can be accessed via access keys:

- Favorite Sites list
  - Landmark: navigation ("Sites begin here")
  - Access key: [W]
- Tools list
  - Landmark: navigation ("Tools begin here")
  - Access key: [L]
- Content
  - Landmark: mainAccess key: [C]

### **Content Container Details**

The content container will have the following elements:

- Content title
- Content area

### **Content Title**

The title is contained in a heading level 2 and briefly describes the purpose of the tool (usually the tool title).

The title may be preceded by a Reset link to return the content area to the initial state.

The title will be followed by a link that opens a new window with help documentation for that particular tool.

#### **Content Area**

The actual content of the tool is contained in an iframe. The iframe's title will match the name of the current tool

#### Organization of content area

The organization will vary with the tool, but will typically consist of:

- a toolbar for actions on the content (creating new items, navigating to other views)
- the content itself

Note: Most actions in a given tool will return the focus to the top of the content area, a few will reload the portal, returning you to the top of that instead.

### **Navigating content area summary**

All content areas are organized by heading levels. Links should all be unique and descriptive.

Most content views use some or all of these access keys:

- Delete, remove, or cancel Access key: [X]
- Edit or revise Access key: [E]
- Help Access key: [0]
- Refresh Access key: [U]
- Save Access key: [S]
- View or preview Access key: [V]

### Information on specific tools

The most common tools used in Sakai are Resources, Announcements and Assignments.

### Resources

This tool lists files and links that the site creator shares with the site users. The main screen lists these in a hierarchical structure. Each line in the table will list the title in the link to the item and other data associated with the item, as well as menus with actions that you can take on the item. These actions will depend on your access level.

Navigating: the hierarchical list is represented by heading levels. You can also navigate via link lists. If you tab into a menu link, pressing down arrow will disclose the menu and you can use

the up/down arrow keys to navigate the menu choices. If you are a site owner you will be able to create, revise and delete new items with these menus.

### Announcements

This tool contains communications from the site owner to the participants. To read a specific announcement navigate to its link and open it.

Navigating: It is a simple list with each item a heading level 4. Link lists will work well as well. If you are a site owner you will be able to create new announcements via the toolbar menu at the top of the tool, edit existing announcements via the "Edit" link associated with each one. You can delete announcements by selecting the checkbox associated with it, and then pressing Access key: [S]

### **Assignments**

Site owners set up assignments for participants with this tool. The initial screen lists the assignments as links in heading level 4.

If you are a student this will list the assignments available to you. Each assignment will reflect the status (open, in progress, completed). To start or revise an assignment follow its link to a form.

### Working with the rich text editor

All tools use a rich text editor to allow users to create content. You will find this editor while adding resources, creating announcements, responding to assignments, etc. To operate the rich text editor:

### **Basic Navigation**

- Tab or arrow down into the editor edit field to edit content. When you are done you can tab or arrow down out of the editor.
- Alt+F10 enters the toolbar or the tab list of the currently open dialog window.
- Shift+F10 Opens the context menu of an element inside the editing area.
- Alt+F11 enters the elements path.
- Alt+0 opens Help.

### **Navigating Toolbar**

- Alt+- (minus)- collapses and restores the toolbar.
- **Tab** and **Shift+Tab** move focus forward and backward among the toolbar button groups.

Sakai 10 Instructor Guide Page 22

- **Left Arrow** and **Right Arrow** move focus forward and backward among the toolbar buttons within a group, respectively.
- **Enter** and **Space** activates a selected toolbar feature.
- **Escape** puts the focus back to the editing area without executing any commands.

### **Navigating Dialog Window**

- Tab and Shift+Tab
  - when dialog window tabs are not in focus, these keyboard shortcuts move focus among input element of the dialog window.
  - when a dialog window tab is in focus, Tab and Shift+Tab cycle through dialog window tabs.
- **Left Arrow** and **Right Arrow** when a dialog window tab is in focus, the Left Arrow and Right Arrow keys can be used to cycle between tabs just like **Tab** and **Shift+Tab**.
- Enter
  - while inside the dialog window, when a single-line text input is in focus, is equivalent to pressing the **OK** button.
  - while inside the dialog window, when a dialog window tab is in focus, puts the focus back to the first input element inside that tab.
- **Escape** while inside the dialog window is equivalent to clicking the **Cancel** or **Close** buttons.

### **Navigating Context Menus**

- Tab, Shift+Tab cycle through menu items forward or Shift+Tab to cycle backwards.
- Down Arrow and Up Arrow can be used to cycle between menu items just like Tab and Shift+Tab, respectively.
- Right Arrow and Left Arrow
  - when the context menu item contains a submenu, the Right Arrow lets you enter the submenu.
  - to return to the parent context menu, use the Left Arrow.
- Enter and Space activate a menu item or open a submenu.
- Escape
  - Closes a context menu without executing any command.
  - When inside a submenu, closes the submenu and returns focus to the parent context menu. Press Esc again to close it.

### **Navigating Toolbar Drop-down Lists**

- **Down Arrow**, **Enter**, and **Space** enter the drop-down list once it is selected on the toolbar.
- Tab, Shift+Tab cycle through list items forward or Shift+Tab to cycle backwards.

Sakai 10 Instructor Guide

Page 23

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

- Down Arrow and Up Arrow can be used to cycle between list items just like Tab and Shift+Tab, respectively.
- **Enter** and **Space** activate a feature selected from the drop-down list and put the focus back to the editing area.
- **Escape** closes a drop-down list without introducing any changes.

### **Editor Hotkeys**

- When focus is in the editor you can use these shortcut keys:
  - Bold Control/Command b
  - Italics Control/Command i
  - Underline Control/Command u
- · To add a link
  - Highlight the link text (shift + arrow keys)
  - then press Control/Command + I
  - fill in the link information.

Note: For a complete list of all keyboard commands, please see the <u>CKEditor 3.x Accessibility Guide</u>.

# Instructions for enlarging screen elements, modifying colors/contrast

You can use the browser's zooming function to increase text size. Sakai will work well with up to 200% zoom.

If you need a higher level of magnification, or if you need to have the cursor/pointer augmented, you may be more comfortable using a third-party magnifier such as MAGic (which is available on all Sites computers) or ZoomText.

To change color and contrast settings use the operating system settings, browser settings, or your preferred browser plug ins.

### **Getting more help**

If you need further help, please contact your institution's local support center and ask to be directed to the unit that assists users with disabilities.

Sakai 10 Instructor Guide

Page 24

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/bu/4.0/

# **Rich Text Editor Accessibility Guidelines**

Sakai uses a single consistent Rich Text Editor across all areas where text can be added that is more than a few lines. This editor is based on the most recent stable version of the CKEditor.

When creating content using the rich text editor, it is important that the author follow the simple guidelines below to ensure that the content can be read and understood by all. Creating well structured and accessible content is a best practice that ensures content is compatible with assistive devices, robust enough to be copy and pasted to other contexts or presented in unanticipated contexts, and is a legal requirement in some jurisdictions.

The technical measure of the accessibility of the format of a web-based resource is the WCAG 2.0 standard from the W3C. The requirements of the WCAG 2.0 are summarized in the four letter acronym POUR:

- Perceivable Information must be presentable to users in ways they can perceive.
- Operable User interface components, navigation and structure must be operable.
- Understandable Information and the operation of user interface must be understandable, and structure elements are used in a meaningful way.
- Robust Content must be robust enough so that it can be interpreted reliably by a wide variety of technologies, including assistive technologies.

These relatively simple considerations make a big difference if applied when content is created. The W3C provides more information in their Introduction to Understanding WCAG 2.0.

### **Images**

Users with some disabilities will be unable to see images and/or comprehend what they are meant to convey.

### When to Add Alternative Text Descriptions for Images

- Simple image with "simple meaning" add descriptive alternative text of 10 to 169 character as outlined below. The alternative text should describe the educational/ informational purpose of the image
- Complex image with "rich meaning" add a paragraph above or below it that goes into more detail. Some pointers ("Next image," "Previous image") will help tie them together. If the image is referenced from elsewhere in the document, add a paragraph below it that can

Sakai 10 Instructor Guide Page 25

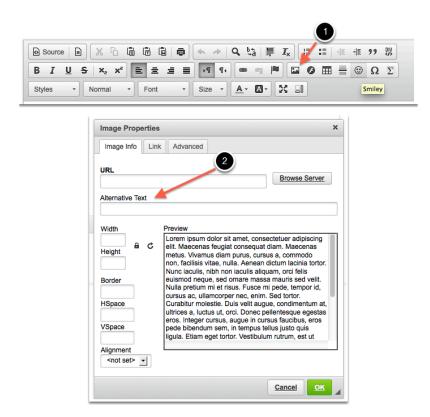

- serve as a caption, and then refer to it. If the longer alternative text is not feasible, create a link to an external Web page that contains an appropriate description.
- Decorative image if the image is purely decorative or used for visual formatting, the
  alternative text description should be left blank to hide it from users of assistive technology

### **Examples Text Alternatives**

- Alt Text: "Scientist in a lab filling a vial with fluid"
- Description in the text before or after the image: "Next/Previous image shows a female forensic scientist is filling a vial containing a small about of blood with fluid to denature the sample as part of the process of the PCR analysis method of DNA profiling. In the background is a centrifuge which will aid in the process of extracting the DNA from the sample of blood."
- Reference farther away in body
  - "... Figure 1.3 shows the correlation between the...."

[Image] Figure 1.3

### **Steps to Add Alternative Text**

- 1. Activate the "image" button on the toolbar.
- 2. Locate the "Alternative Text" input form control in the dialog that is loaded after you activate the button. Place the appropriate alternative text in the form field provided.

Sakai 10 Instructor Guide

Page 26

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/bu/4.0/

[Figures 1 and 2: CKEditor Menu and CKEditor Image Options Panel. For screen reader users working with the CKEditor see the link to ckeditor section>Accessibility Documentation

### **Document Structure**

Assistive technology users rely heavily on headings to navigate complex content. Structuring complex content will help all users parse it as well.

### When to Add Structure with Headings

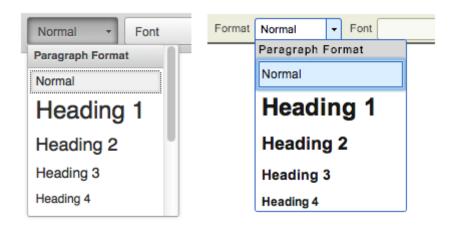

If a document can be outlined or you have an outline in mind when writing it, then adding headings will convey its structure. Some notes:

- Nest headings appropriately:
- Heading 1 > Heading 2
- Heading 2 > Heading 3, Heading 3
- Use short title-like headings that describe content that follows
- If the content you are creating is an HTML Resource start with a Heading 1, in all other cases start with a Heading 4, since the application is already using Heading 1 through Heading 3. Your content in these cases will always be a child of a pre-existing Heading 3.

### **Examples of Structure**

This document is an example.

### **Steps to add Headings**

Headings are available from the Format menu. This can look like one of the two examples above.

[Figure 3: CKEditor Format Menu. For screen reader users working with the CKEditor see the k to ckeditor section>Accessibility Documentation

Sakai 10 Instructor Guide

Page 27

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Note: the default size of the Headings can always be adjusted with the Size menu. The default size of some of the higher headings (h5 - h6) may need adjustment. Conversely, do not use headings for typographical effects.

### Using semantically helpful elements

Assistive technology users benefit when the page elements used have a relationship to the meaning they are trying to convey visually.

### Lists

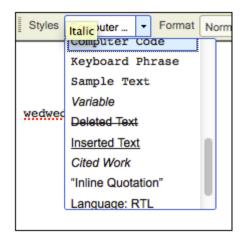

If you think of a vertical series of items as a list, you should include it in your page as a list. Select the lines involved and click on the numbered or bulleted list option.

[Figure 4: CKEditor List Buttons. For screen reader users working with the CKEditor see the link to ckeditor section>Accessibility Documentation

### **Paragraphs**

A paragraph (hit Enter or Return) is always more meaningful than a line break (hit Shift + Enter or Return).

### **Inline styles**

Using the right style to format a bit of text is very helpful as it "codes" it appropriately. These are all available in the "Styles" menu:

Sakai 10 Instructor Guide

Page 28
This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

- Cited work
- Inline Quotation
- Computer Code
- Sample text
- Inserted and Deleted text

If you are curious to see what these do, add one and switch to "Source View" - this is how a screen reader will "see" it. Inline quotation will use <q>, which will signify the opening of an inline quotation, very helpful. Cited Work will create an element that presents itself as such. Conversely, avoid using these special formats to achieve a typographical effect. Cited Work produces italic text. But it would be confusing to a screen reader if you used it just for that reason.

[Figure 5: CKEditor Styles Menu. For screen reader users working with the CKEditor see the <link to ckeditor section>Accessibility Documentation </link>]

### Do Not Use Color or Spatial Position to Convey Information

For Example, "click the green button on the left." Color blind users will not be able to distinguish the button. For screen reader users there is no notion of "left" - the best solution is to quote the target label:

Click on "Start Assignment," or Click "Save" button.

### **Use Adequate Color Contrast**

Many users will have visual impediments that will require good contrast in the documents you are producing. The best way to help these users is to make sure that the contrast between background and foreground has a ratio of 4.5:1 or higher. Leaving the defaults of the editor intact is best - as that will likely be black text on white, with a ratio of 21:1.

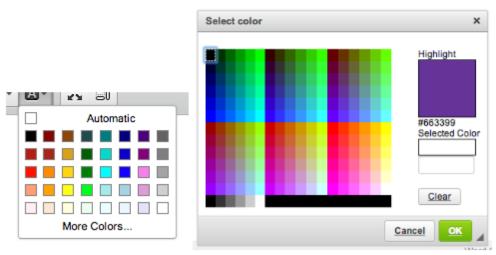

Sakai 10 Instructor Guide Page 29

### **Examples of Contrast**

Sample	Contrast ratio	Passes?
This is example text. <b>Some of it bolded.</b> Some of it italicized.	19.56:1	Yes
This is example text. <b>Some of it bolded.</b> Some of it italicized.	7.7:1	Sort of
This is example text. <b>Some of it bolded.</b> Some of it italicized.	5.48:1	No
This is example text. <b>Some of it bolded.</b> Some of it italicized.	16.63:1	Yes
This is example text. Some of it bolded. Some of it italicized.	20.62:1	Yes

### **Steps to Change Foreground and Background Colors**

If you need to edit the background color and the text color click on either control shown below (the buttons will look like one the choices below, with foreground color on the left and background color on the right).

In most cases the contrast will be obvious, but if you need to verify, click on the "More Colors" option, record the hex number for the color you have selected (starting with #) and check the two colors through an online tool such as <a href="WebAIM's Color Contrast Checker">WebAIM's Color Contrast Checker</a>.

Sakai 10 Instructor Guide

Page 30

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

[Figure 6: CKEditor text color and background buttons. For screen reader users working with the CKEditor see the keditor section > Accessibility Documentation

[Figures 7 and 8: CKEditor "More Color" options. For screen reader users working with the CKEditor see the k to ckeditor section>Accessibility Documentation

### **Using Tables**

Users of screen readers cannot read tables the same way sighted users do. Sighted users can tell at a glance what column and row a given cell is associated with, a screen reader user needs a properly coded table. To make tables usable we need to put in a little bit of work into them.

### **Examples of Tables: Simple table**

John	Tomiko
Game of Thrones	Crime and Punishment
Ender's Game	Brothers Karamazov
Farewell to Arms	Sound and Fury

Simple table: books read by 2 people. Only column headers are needed

### **Examples of Tables: Complex table**

	John	Tomiko
Week 1	Game of Thrones	Crime and Punishment
Week 2	Ender's Game	Brothers Karamazov
Week 3	Farewell to Arms	Sound and Fury

Complex table: books read by 2 people each week. Column and row headers needed.

In the second example a screen reader user will know that The Sound and the Fury was the book read by Tomiko on Week 3.

Sakai 10 Instructor Guide

Page 31

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### **Steps to Making Accessible Tables**

When adding a tables add a row and/or column to be used as a heading for each as appropriate. The table creation menu contains a Headers options that allows for selecting the first row, column or both.

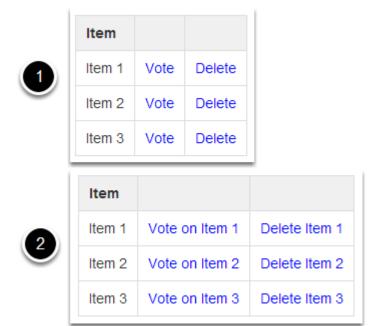

Add a Summary of the table. The table creation menu offers a line to add a summary that will inform readers of the content of the table. Good examples are: "Data from recent study," "Table of inputs and outputs" etc.

Tables should only be used for tabular data, not for layout.

[Figure 9: CKEditor table panel. For screen reader users working with the CKEditor see the to ckeditor section>Accessibility Documentation

### Links

### **Use Unique and Descriptive Link Text**

Assistive technology users use link lists to navigate content. This means they cannot rely on context to tell what a link does. This is why each link needs to be uniquely descriptive of what it does. The best place to uniquely identify a link is in the link text. Good examples are: "View Assignment 34," "Visit Entomological Society of America," etc.

- 1. In lists where each item has several links associated with it the temptation would be to do the first example shown above.
- 2. The second example shown above would be better, if a bit verbose.

### **Add Alternative Text for Image Links**

For every HTML web link embedded into the rich text editor that contains only an image and no textual content, concise and descriptive alternative text is mandatory (see above for instructions). The alternative text should describe the purpose of the link (e.g., The "destination" that the user will be taken to upon activation of the link.)

#### **Steps to Add Alternative Text**

- · Activate the "image" button on the toolbar.
- Locate the "Alternative Text" input form control in the dialog that is loaded after you activate the button
- Place the appropriate alternative text in the form control following the guidelines in the heuristics section.

### **Identify File Types in Links to Downloadable Files**

Assistive technology users will benefit from knowing what type of file it is they are downloading. When you link to a file in the Editor, include the information in the link text.

Example: essay (MS Word), report (PDF), presentation (MS Powerpoint).

### **Use Unique and Descriptive Page Titles**

Assistive technology users rely on page titles. You will only run across the need to specify this when you are creating an HTML page in the Resources tool. The title of the new document will be the same as the name of the item as it shows on the list.

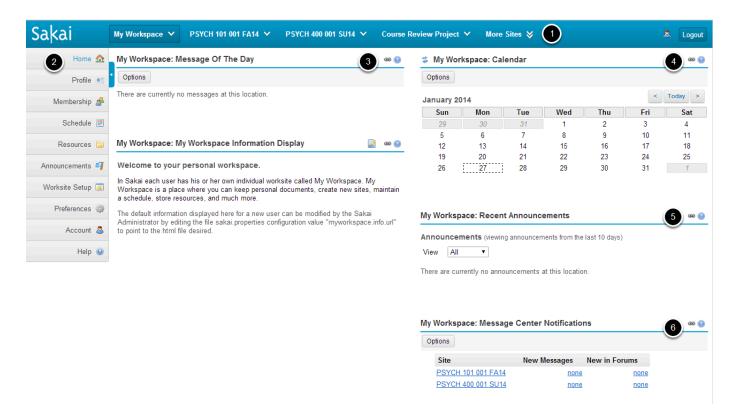

# **My Workspace**

# What is My Workspace?

When you log in to Sakai, you will immediately see My Workspace, your individual workspace in the system. My Workspace displays the Message of the Day as well as course announcements, calendar, and message notifications. You will also see links to account utilities, enrolled courses, and other system-wide resources.

Note: The default location and availability of items in My Workspace may be customized by your institution.

### **My Workspace Navigation and Display**

My Workspace consists of the following navigation and display elements:

- 1. Site Navigation across the top
- 2. The Tool Menu on the left
- 3. The Message of the Day
- 4. My Workspace: Calendar
- 5. My Workspace: Recent Announcements
- 6. My Workspace: Message Center Notifications

Sakai 10 Instructor Guide

Page 36

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/bu/4.0/

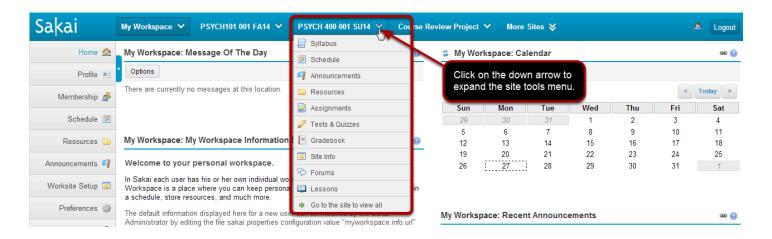

## What is Site Navigation?

## **Site Navigation**

The Site Navigation across the top of the screen allows to you access all of the Sakai sites in which you are enrolled. You may also return to My Workspace at any time by clicking on the **My Workspace** button on the left. There is also **Logout** button in the far right hand corner to exit the system.

#### Jump to site tools.

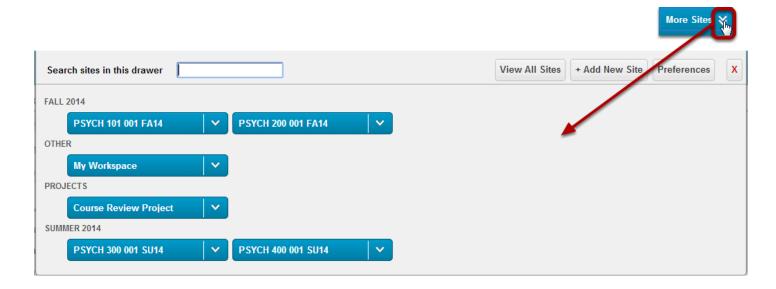

You may click on the down arrows next to each site name to expand the Tool Menu for that site. Selecting a tool from that list will take you directly to that area of the selected course.

Sakai 10 Instructor Guide

Page 38

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### More sites.

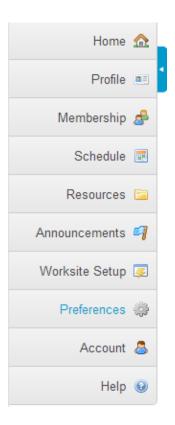

The top site navigation can only display a small number of sites. If you have many active sites, clicking the down arrows on the **More Sites** button will display all of your actives sites. Sites are grouped by academic term and type of site (i.e. course or project sites).

Note: Inactive or Archived sites will not display in the More Sites listing. You can access inactive sites from the Membership or Worksite Setup tools.

## What is the My Workspace Tool Menu?

## My Workspace Tool Menu.

The My Workspace Tool Menu contains links to user account information and preferences. These links include:

- Profile
- Membership
- Schedule
- Resources
- Announcements
- Worksite Setup
- Preferences
- Account
- Help

Note: You may also see links to system-wide resources in this menu if they have been added by your institution. Also note that the tools displayed in the Tool Menu will be different depending on which Sakai site you are currently viewing.

## **Collapsing/Expanding the Tool Menu**

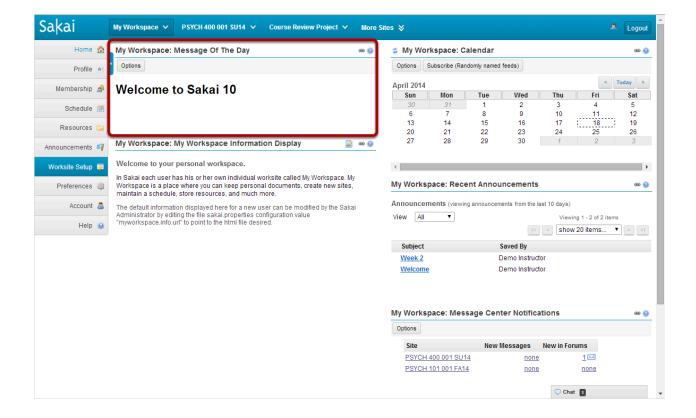

You may expand and collapse the Tool Menu by clicking on the arrow tab in the upper right portion of the menu. When the menu is collapsed, the menu links are represented by their associated icons.

# What is the My Workspace Message of the Day?

In the Home area of My Workspace, you will see announcements from your system administrator under "Message of the Day" (MOTD). The MOTD is typically used for system-wide announcements. Most institutions use this space to display messages about scheduled maintenance, system updates, and important dates and events.

#### View the MOTD.

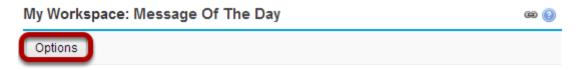

Sakai 10 Instructor Guide

Page 42

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **Select Options to customize display. (Optional)**

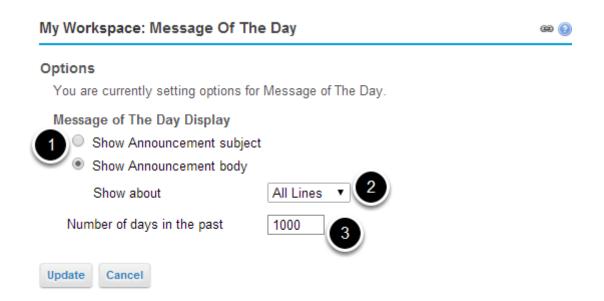

Sakai CLE - the collaboration and learning environment for educators, by educators

Open doors for students to learn and instructors to teach on their own terms

You may customize the appearance of the Message of the Day by selecting the **Options** button.

#### **MOTD Options**

- 1. You can choose to view just the subject line or the entire body of the message (default selection) by selecting the appropriate radio button.
- 2. You may also use the drop-down menu to select to view All, One, or Two lines of the message body.
- 3. You may also specify how many days in the past messages should be displayed. This is useful if you prefer to only see recently posted messages.

Sakai 10 Instructor Guide

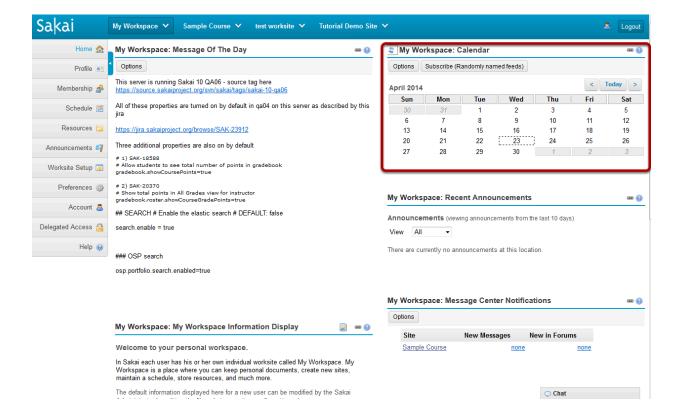

Page 43

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## What is the My Workspace Calendar?

The My Workspace Calendar shows events from all of the sites in which you are enrolled. In addition, you may also create individual, private calendar entries that are only visible to you from your My Workspace.

#### View Calendar.

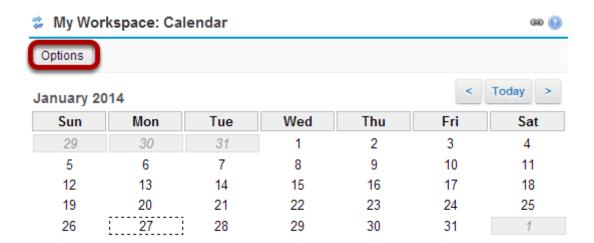

Sakai 10 Instructor Guide

Page 44

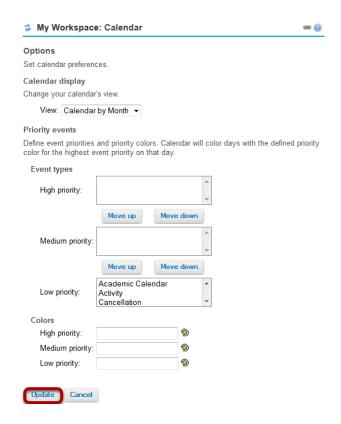

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## Click Options to customize calendar display. (Optional)

You may customize the appearance of your Calendar by selecting the **Options** button.

## Select custom preferences and Update.

Sakai 10 Instructor Guide

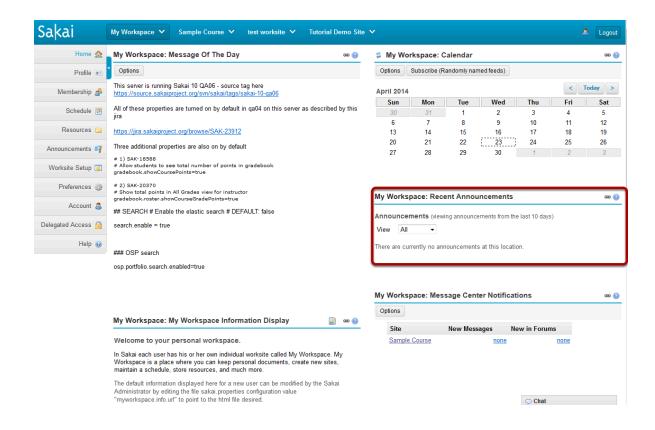

Page 45

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

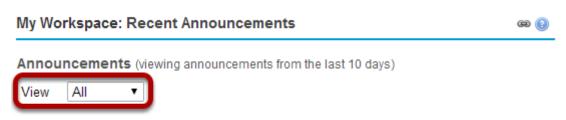

# What are the My Workspace Recent Announcements?

The Announcements area in My Workspace displays announcements from all of the sites in which you are enrolled. You may use the drop-down menu to view All items, Public items only, or items By Group. (You must be a member of a group in order to see group announcements.)

#### View recent announcements.

#### **Customize announcements display. (Optional)**

There are currently no announcements at this location.

You may select either **All**, **Public**, or **By Group** from the **View** drop-down menu to customize the display.

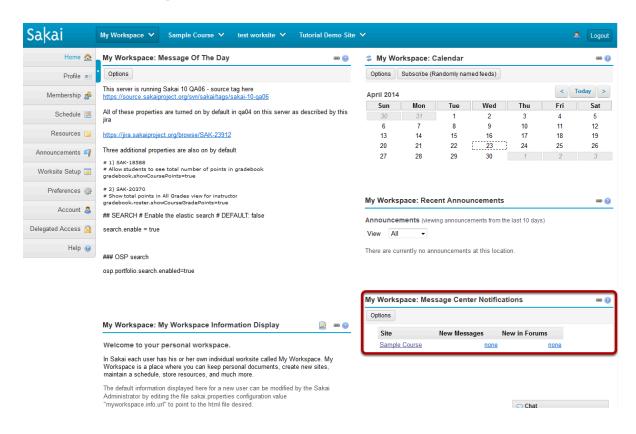

Note: By default, you will only see announcements that have been posted within the last 10 days in this location. (If you wish to see announcements posted within the past year, you should click on the Announcements link in the Tool Menu.)

## What are the My Workspace Message Center **Notifications?**

The Message Center in My Workspace displays the count of Messages and Forum posts for all of the sites in which you are enrolled. New messages are indicated by a number and envelope icon. If there are no new messages or posts, the word "none" will be displayed.

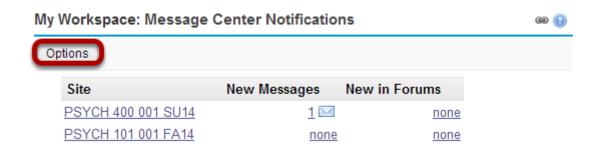

- Clicking on the title of the site will take you to the homepage for that site.
- Clicking on the New Messages indicator will take you directly to the Message Inbox for that site.
- Clicking on the New in Forums indicator will take you directly to the Forums for that site.

## View Message Center.

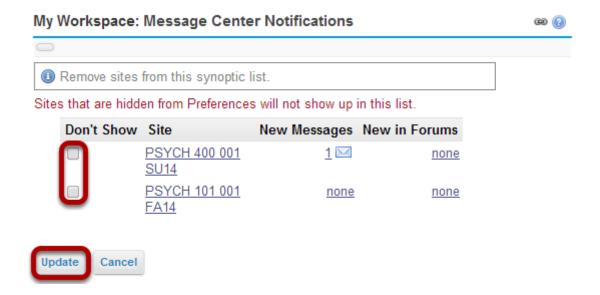

Sakai 10 Instructor Guide Page 48 This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

## **Customize message center display. (Optional)**

You may click on the **Options** button to customize the list of sites displayed in the Message Center area.

#### **My Workspace: Message Center Notifications - Display Options**

Click in the **Don't Show** box to place a check mark next to any sites that you prefer not to see in the Message Center list and then click **Update**. If you have already hidden sites in Preferences, they will not show up in this list.

Sakai 10 Instructor Guide

Page 49

This work is licensed under a Greeting Commons Attribution 4.0 Intl. License, http://greeting.commons.org/licenses/bu/4.0/

## What is Membership?

The Membership tool in My Workspace displays the list of sites in which a user is currently enrolled.

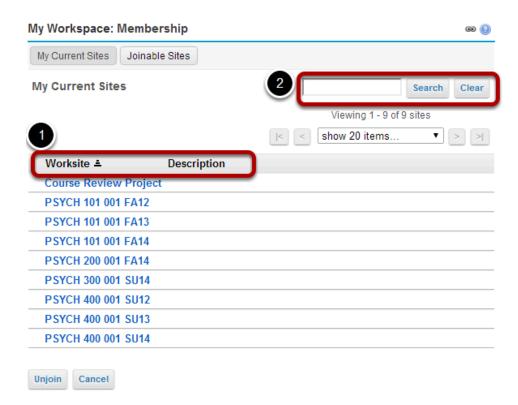

Users may search their enrolled courses or enroll in a joinable site from the Membership tool.

Note: Unpublished sites are only visible to site managers (i.e. instructors or admin users).

#### Go to Membership.

Click on the **Membership** tool in the Tool in My Workspace to access your list of sites.

## Viewing current sites.

You will see a list of all the sites in which you are currently enrolled.

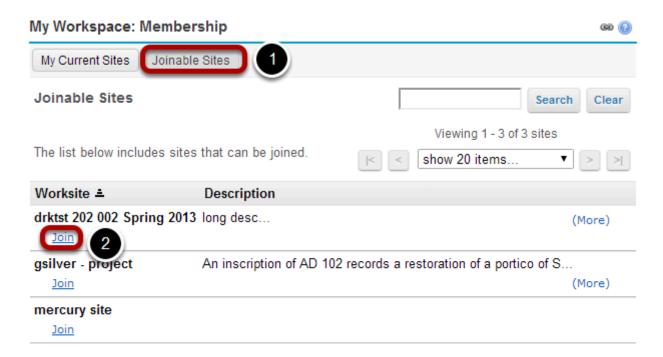

- 1. You may sort by Worksite or Description by clicking on the column heading.
- 2. You may also search your list of sites by keyword. This is useful if you have many sites and would like to limit the list by a specific criteria.

Sakai 10 Instructor Guide

Page 50

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## **Joining Sites.**

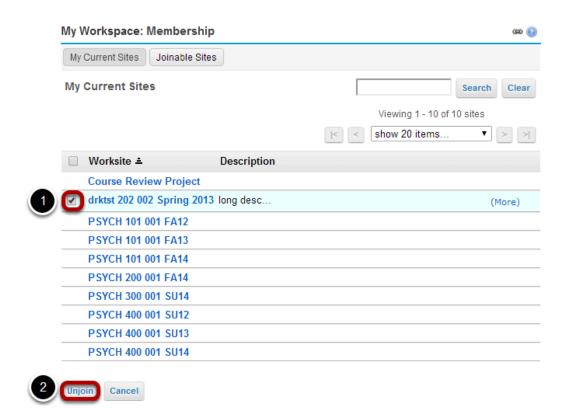

- 1. If you would like to view and join sites that are open for self-enrollment in the system, click on the Joinable Sites button.
- 2. You may click on the **Join** link to enroll yourself in any of the joinable sites listed.

Note: Joinable sites may or may not be available depending on the enrollment procedures determined by your institution.

Page 51 Sakai 10 Instructor Guide This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

#### Unjoining sites.

If you join a site by mistake, or you no longer wish to be a participant in that site, you may unenroll yourself from the site by:

- 1. Selecting the check box next to the site name.
- 2. Clicking on the **Unjoin** button.

Note: You may only unjoin, or unenroll, from sites in which you have self-enrolled.

Sakai 10 Instructor Guide

Page 52

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## How do I view and edit my account details?

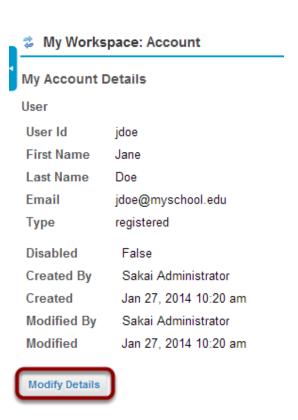

Your account details include your User Id, Name, Email, and Password for the system. In most cases, this information is automatically populated by your institution's student information system. However, if you have permission to change your Sakai password, this is where you would do it. You may also update your name and email address here if desired.

Note: If this information is being updated automatically by the institution, any changes you make here may be overwritten, depending on the user permissions allowed by your institution.

#### Go to Account to view and edit details.

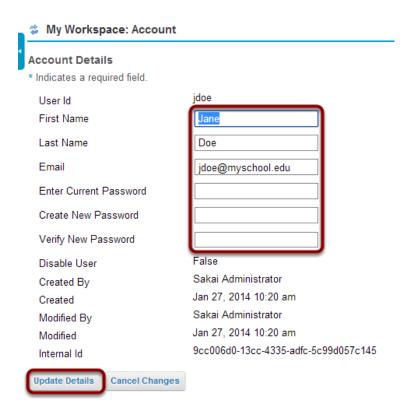

Click on the **Account** link in your My Workspace Tools Menu.

## Modifying account details.

Click on the **Modify Details** button.

#### Changing your name, email or password.

You may change any of the editable fields on this page. The password fields always appear blank upon accessing this screen. You may change your Sakai password by entering your current and new passwords in the fields provided. Changing your password here will change it for all of your sites on this system. Once you have entered your changes, select the **Update Details** button to save the change and return to My Workspace.

Note that your Sakai User Id cannot be changed. Your User Id can only be modified by a Sakai Administrator at your institution.

Sakai 10 Instructor Guide

Page 54

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

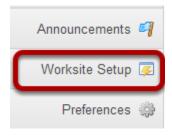

## What is Worksite Setup?

The Worksite Setup tool provides information about the sites to which you currently belong or may join. If you have a role that allows it, you can use this tool to make changes to information about the site, tools available in the site, and access to the site. You can also publish the site using the Worksite Setup tool.

Many of the functions of the Worksite Setup tool mirror those of the <u>Site Info</u> tool; Worksite Setup is available through My Workspace, whereas Site Info is available in each site.

If you don't have the appropriate permissions, you will only see the information about the site published by the site owner in Worksite Setup.

## To access this tool, click Worksite Setup from the Tool Menu in My Workspace.

Sakai 10 Instructor Guide

Page 55

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

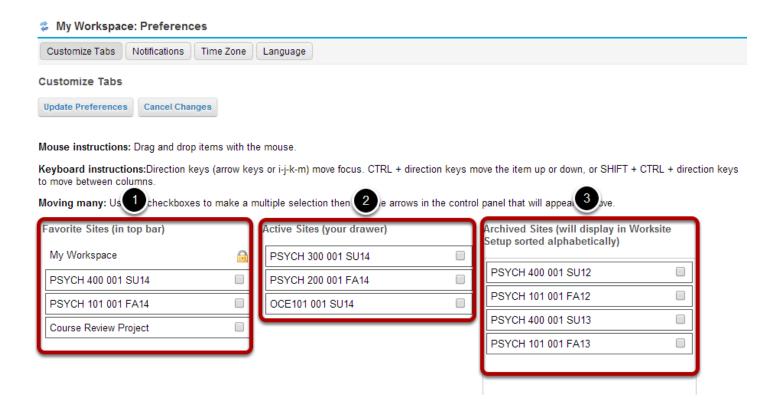

## What is the Preferences tool?

In <u>My Workspace</u>, you can set preferences for which sites appear in your navigation and which sites have their own tabs. You can also choose how often you receive email notifications of site activity, set your time zone, and select your language.

#### Go to Preferences.

Select the **Preferences** tool from the Tool Menu in My Workspace.

#### Customize tabs.

When you first enter the Preferences tool, you will be taken to the Customize Tabs information. On this screen, you can choose which sites are displayed as tabs in your navigation and active sites, and in what order they appear.

- 1. **Favorite Sites**: This list of sites appears on the left side of the screen. These are the sites which display as tabs in the top navigation bar of the system.
- 2. **Active Sites**: This list of sites appears in the middle of the screen. These are the sites which display in your site drawer when you click on More Sites in the top navigation bar.

Sakai 10 Instructor Guide

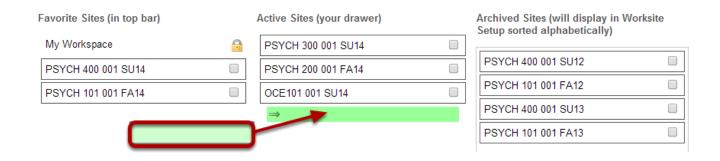

Page 56

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

3. **Archived Sites**: This list of sites appears on the right side of the screen. These sites will show up in your list of all enrolled sites in tools such as Worksite Setup and Membership; however, they do not appear in the top navigation bar or in your site drawer.

Note: Archived Sites are still active in the system, are still available to other enrolled users regardless of individual site display preferences.

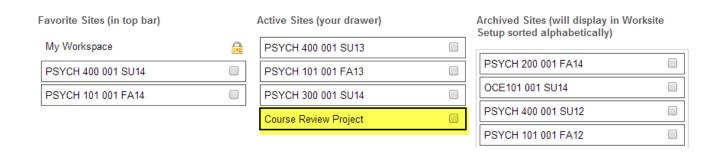

#### Moving a site with drag and drop.

You can use drag and drop to rearrange the order in which your sites appear, or move sites into or out of the favorites, active, or archived site lists.

Click on the site you want to move and then and drag it into the new location and release to drop it in place. (The color of the item and new location will change to green while you are dragging the item.)

#### Moving a site with the keyboard arrows.

You can also move sites using the keyboard arrow keys. Select the site you want to move, and then use CTRL + the direction keys (arrow keys or i-j-k-m) to move the item.

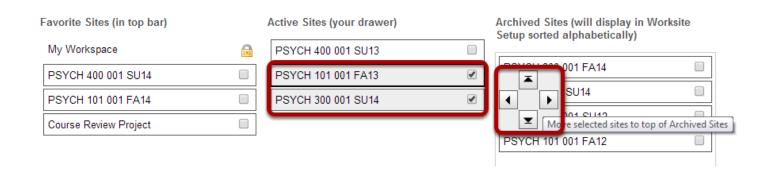

Note: The item currently selected will have a bold outline.

Sakai 10 Instructor Guide

Page 57

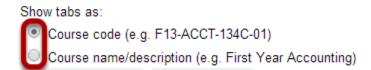

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Moving multiple sites.

If you would like to move several sites at once, you may also select more than one item by checking the boxes nest to each of the sites. A control panel with direction arrows will appear. Click on the direction arrow button to move the selected sites in the desired direction.

#### Select tab format.

You may also choose how you would like courses to be displayed in the tabs across the top. Select either the **Course code** or **Course name/description** radio button for your preferred format.

#### **Click Update Preferences.**

Once you have finished making changes to your sites and tabs, click **Update Preferences** to save your changes.

#### Notifications.

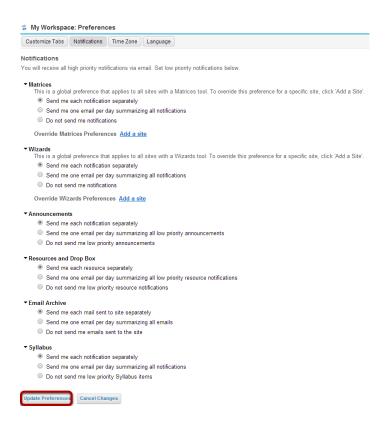

Sakai 10 Instructor Guide

Page 58
This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

To customize your notification settings, click the **Notifications** button.

#### Select notification preferences.

You may choose from the following three options for low priority email notifications in the Matrices (OSP), Wizards (OSP), Announcements, Resources and Drop Box, Email Archive, and Syllabus tools.

- · Send me each notification separately. (Default setting)
- Send me one email per day summarizing all notifications.
- Do not send me notifications.

If you change any of these settings, click **Update** to save your changes.

Note: These settings only apply to low priority items. High priority items will still be sent via email regardless of your settings here.

#### Time Zone.

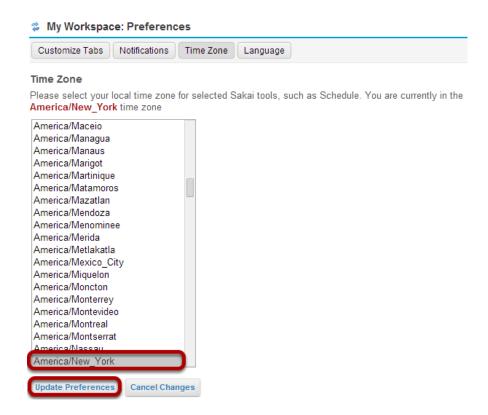

To set your local time zone, click the **Time Zone** button.

## What are the Resources in My Workspace?

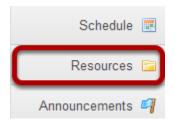

Resources are available in both My Workspace and course sites. The Resources tool is sitedependent; the content uploaded in the My Workspace area is private and visible only to the user (unless the user chooses to make items public).

The Resources tool in My Workspace serves as a personal file space for the user to save, store, and organize files.

The features and functionality of the Resources tool are the same in any site where the tool appears. Please refer to What is the Resources tool? for more information on how to manage files using this tool.

Note: Your institution may limit the user file storage quota and/or access to Resources in My Workspace.

## To access this tool, select Resources from the Tool Menu in My Workspace.

Tip: Users who would like to store large files in a single location may choose to store files in My Workspace and link to them from their other course sites, rather than uploading them to multiple locations.

## **Course and Project Sites**

## What are course sites?

A course site is the official worksite for a particular academic course for an institution and can be linked to a database (such as a registrar's) to automatically populate its roster.

Course sites usually contain a selection of tools and resources provided by the instructor so that students may access course materials, interact with other site participants, and submit work.

## Default participant roles for course sites.

The default participant roles in a course site are:

- **Instructor**: Instructors have full permissions throughout the site, including the ability to publish the site and set its global access. Instructors can read, revise, delete, and add both content and participants to a site.
- Teaching Assistant: Teaching Assistants can read, add, and revise most content in their sections.
- **Student**: Students can read content, and add content to a site where appropriate.

Note: Additional customized roles may be added by the system administrator.

Sakai 10 Instructor Guide

Page 64

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## What are project sites?

Project sites are designed to facilitate collaboration. You can invite anyone you wish to join your project site.

Project sites are typically worksites where a project director, team, or committee can make announcements, engage in online discussions, and share resources such as documents or links to other web sites. Project sites have all of the same tools available as course sites; however, they are typically not associated with credit course sections or academic terms.

## Default participant roles for project sites.

The default roles in project sites are:

- Maintain: The Maintain role has full permissions throughout the site, including the ability to
  publish the site and set its global access. The Maintain role can read, revise, delete, and add
  both content and participants to a site.
- **Access**: The Access role can read content and add content to a site where appropriate.

Note: Additional custom roles may be added by the system administrator.

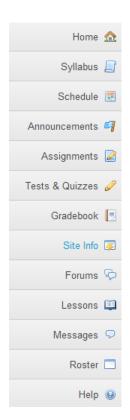

## How do I navigate in a site?

My Workspace is your individual online workspace. When you first log in, you go to My Workspace automatically. To return to your workspace after visiting other sites, click My Workspace in the upper left corner of the screen. Additional course and project sites appear as tabs across the top of the screen. Click a tab to go to the corresponding site.

It is strongly recommended that you use the site navigation, and not the back and forward buttons in your web browser, to navigate within a site.

Note: If you are not yet a member of any sites, you will see only a My Workspace tab at the top of the screen.

#### The Tool Menu.

The **Tool Menu** is a customizable column along the left side of the screen with links for each available tool (e.g., Announcements, Forums, etc.). The number of links will vary depending on which tools were chosen for a site. Menu colors and icons may also vary depending on the theme or skin chosen for your site.

Click the tool's name to go to the corresponding tool.

## The site Home page.

**Home** on the Tool Menu takes you to the home page for the site you're in. Home pages can contain a list of recent announcements, recent discussion items, calendar posts and other selected resources.

#### The Reset button.

When you're using a tool, the **Reset** button, located to the left of the tool's name, takes you back to the first page of that tool and resets the tool.

## Online help.

You can get help by clicking **Help** in the Tool Menu. You can also get contextual help by clicking the blue question mark icon in the upper right corner of each page.

## What is the Reset button?

The reset button returns you to the starting point of the tool you're using, as if you had entered the tool in a new session.

#### **Reset button location**

The reset button appears to the left of the name of the tool you're using and looks like two blue arrows pointing in opposite directions.

Note: If you return to the starting point of the tool before saving (e.g., before choosing to add, post, save as draft, etc.), you will lose any information you have entered.

## What does Unpublished Site mean?

By default, most sites in Sakai are Unpublished when they are first created. This gives instructors or course designers a chance to go in and edit the content of the site before it is available to students and other users. Some institutions publish all current courses automatically at the beginning of the academic term. Institutions may also unpublish courses from prior or future terms.

## **Unpublished Site Indicator**

If you see the Unpublished Site indicator above the Tool Menu in your site, that means your site is unpublished and is unavailable to students, teaching assistants, or other user roles which do not have editing permission.

If the Unpublished Site indicator does not appear, this means that your site has already been published.

Instructors always have access to both published and unpublished courses in which they are enrolled.

Click (**Publish Now**) to make your site available to all enrolled users. (Depending on the site publishing permissions established by your institution, you may or may not see this button.)

Note: You may also publish/unpublish your site from the Manage Access area in Site Info.

# How do I create a new course or project site?

If you have the appropriate permissions to create new course or project sites, you may do so from either Worksite Setup or the More Sites tab in My Workspace.

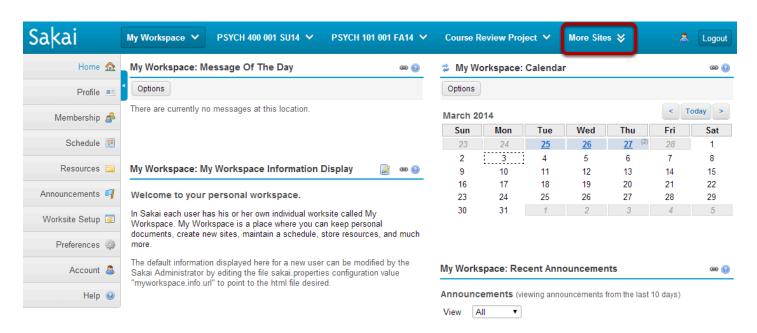

## Go to Worksite Setup.

Select the **Worksite Setup** tool from the Tool Menu in My Workspace.

#### Click New.

#### Or, go to More Sites.

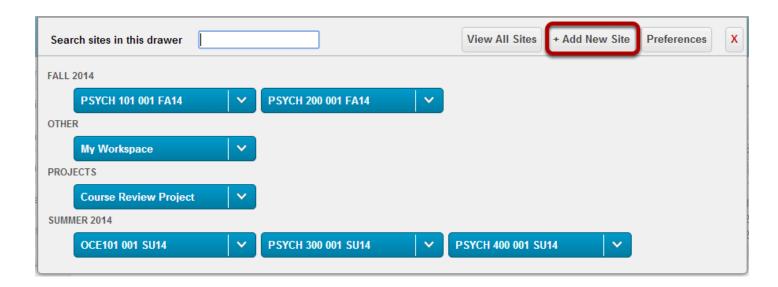

Click on the **More Sites** tab in My Workspace to view your active sites drawer.

Sakai 10 Instructor Guide

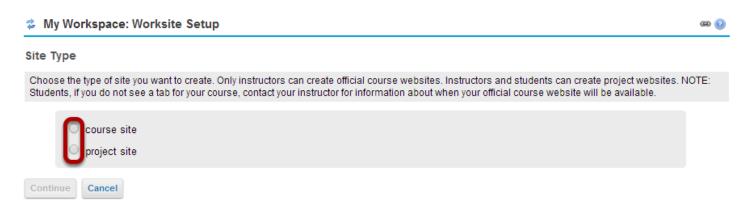

Page 70

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### From your sites drawer, click Add New Site.

## Select the type of site.

Choose either **course site** or **project site** depending in which type of site you want to create.

## For Course sites only.

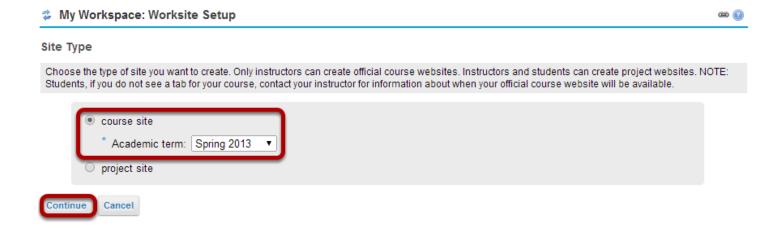

If you select to add a course site, there are some additional steps.

Sakai 10 Instructor Guide

Page 71

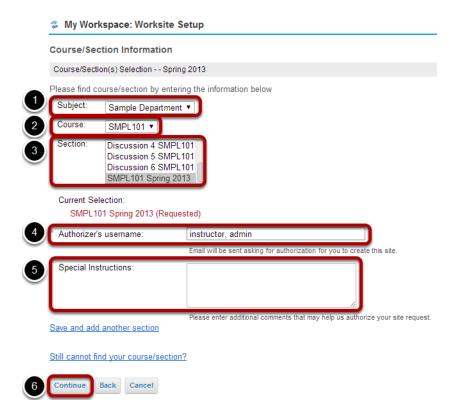

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Select the term.

Select a term from the drop-down menu and then click **Continue**.

#### **Enter course information.**

- 1. Select the Subject.
- 2. Select the Course.
- 3. Select the Section.
- 4. The authorizor's username will appear here. An email message requesting authorization to create the site will be sent to the user listed.

Sakai 10 Instructor Guide Page 72

- 5. You have the option of adding any information that may facilitate the authorization of your site request.
- 6. Click **Continue** to add the course site.

#### **Enter site information.**

#### Enter the site title.

\* Site Title

SMPL101 Spring 2013

#### Select site language.

Site Language

User Language (default)
Basque [eu] Basque
català - Espanya [ca\_ES] Catalan - Spain
Deutsch - Deutschland [de\_DE] German - Germany
English - Australia [en\_AU] English - Australia

If desired, you can change the default language for your site to any of the available languages listed. Languages in this list will vary depending upon the language pack(s) installed on your instance.

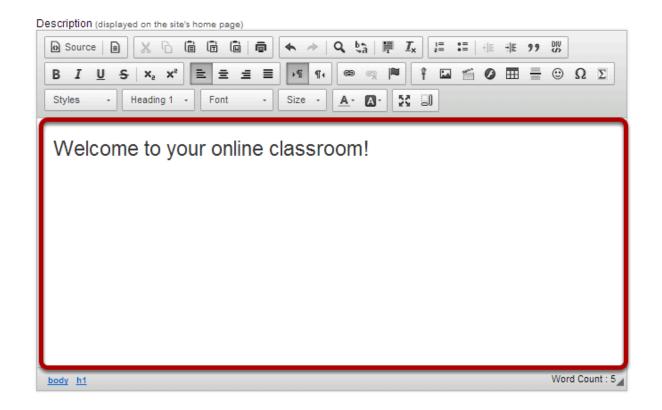

Click on the desired language to select it.

Sakai 10 Instructor Guide

Page 73

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/bu/4.0/

#### Enter a site description.

The information entered into the description area will appear on the site's home page. You may use the Rich Text Editor here to enter your description.

#### Enter a short description.

Short Description (displayed in publicly viewable list of sites. Max 80 characters) Intro Course

You may also enter a short description (with a maximum of 80 characters). This short description will display in the publicly viewable list of sites.

#### Select a theme.

Appearance (Theme) Site will display this theme. If your instance has a selection of themes or "skins" installed, you may select a theme from the drop-down menu. The theme controls the banners, colors and images displayed throughout your site.

#### Enter the site contact information.

Site Contact Name
 Site Contact Email

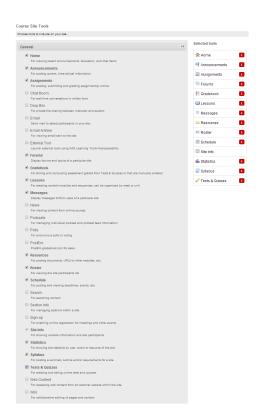

Enter the name and email address for the site contact. (This is typically the site creator, owner, or instructor.)

#### Click Continue.

Click **Continue** to save your changes.

#### Select site tools.

Sakai 10 Instructor Guide

Page 75

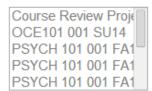

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Place a check mark next to any tools that you would like to use in this course site.

#### Re-use existing material.

Re-use Material from Other Sites You Own

- No. thanks.
- Yes, from these sites:

Note: To select more than one item, hold down the CTRL key (Windows) or the Apple key (Mac) and click your selections.

You may choose to re-use material from other sites that you own. Choose either **No** or **Yes** for this option. (If you select Yes, indicate the site(s) from which to copy content in the list shown below.)

#### Click Continue.

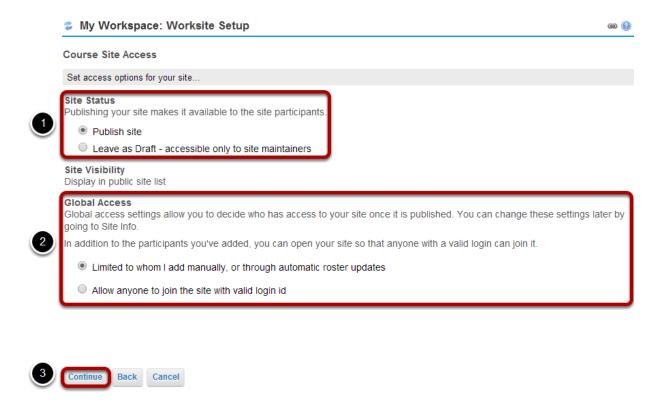

Sakai 10 Instructor Guide

Page 76

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

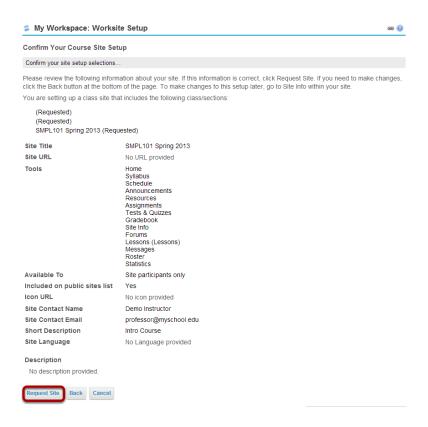

#### Configure site access.

- 1. Select to **Publish** the site, or **Leave as Draft** (i.e. unpublished). Unpublished sites are only visible to site owners, not other participants such as students.
- 2. Choose to make site access Limited to whom I add manually, or through automatic roster updates or Allow anyone to join the site with valid login id.
- 3. Click Continue.

## **Permissions and Roles**

#### What are Permissions and Roles?

#### **Permissions**

Permissions allow users to access certain features of a course or project site, depending on their roles, and on the decisions made by the site owner and the system administrator.

#### **Roles**

Roles are collections of permissions. Some roles allow users to simply access or read content, while other roles allow for advanced changes, such as adding participants, editing the site's content, and changing permissions for other roles.

When you create a worksite, or when one is created for you, you have the role with the most permissions and the broadest level of access. You can choose (within the limits established by the system administrator) which tools or functions (e.g., Forums, Schedule, Resources) you want the site to have. For many of these tools or functions, you can set permissions that allow or prevent users from seeing or performing certain tasks, depending on their roles.

Roles may vary in name, depending on the application. However, in general, the creator of a project site, or the instructor of a course site, has full permissions, and can add or delete content within a worksite.

A user who joins an existing site has a more limited role. The permissions of this role allow for interaction in the site (e.g., creating Chat messages), but do not allow for advanced tasks (e.g., uploading files into Resources or creating assignments).

However, each implementation of the application will be different. System administrators can decide during implementation which roles to install, and which permissions these roles will have.

#### Some things to remember:

- The availability of a tool in a worksite depends on the particular implementation of the system administrator. If you have broad rights to a worksite, and find that a tool is not available through Site Info, consult your administrator.
- The Resources and Drop Box tools share the same permissions set. You can modify them in the Resources tool.
- Default roles have default permissions. These defaults can be edited on the system level by the system administrator, and on the worksite level by anyone with full permissions to the site.
- All users are assigned the broadest role in their respective My Workspaces to give them editing control.

#### **Default participant roles**

The following default roles are available in course and project sites:

#### Course sites

- **Instructor**: Instructors have full permissions throughout the site, including the ability to publish the site and set its global access. Instructors can read, revise, delete, and add both content and participants to a site.
- Teaching Assistant: Teaching Assistants can read, add, and revise most content in their sections.
- **Student**: Students can read content, and add content to a site where appropriate.

#### **Project sites**

- **Maintain**: The Maintain role has full permissions throughout the site, including the ability to publish the site and set its global access. The Maintain role can read, revise, delete, and add both content and participants to a site.
- Access: The Access role can read content and add content to a site where appropriate.

#### **Custom roles.**

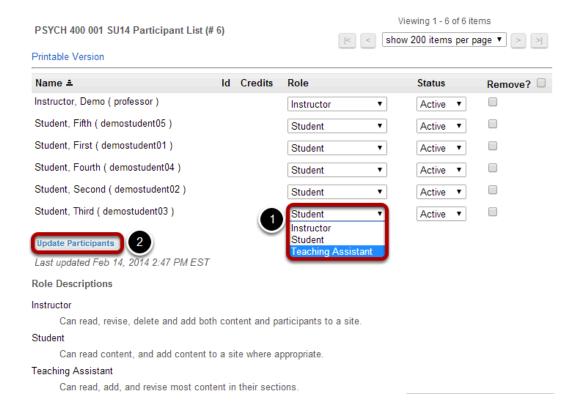

Many institutions create custom roles with specific sets of permissions for their local systems. Custom roles must be created by a system administrator using the Realms tool.

# How do I change participant roles within a site?

Note: To complete these steps, you must be assigned a role having the necessary permissions within the site.

#### Click Site Info in the Tool Menu of the relevant site.

# Change the role from the drop-down menu in the list of enrolled participants.

Below your site's information, you will see its participant list.

- 1. Next to the participant(s) whose role(s) you want to change, select the appropriate role(s) from the drop-down menu(s) under "Role".
- 2. Click **Update Participants** to save your change.

Sakai 10 Instructor Guide

Page 82

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### **Announcements**

#### What is the Announcements tool?

The Announcements tool allows for the delivery of messages to the entire class, to groups, or to specific sections within the class. Participants will see the Announcement message displayed in the Announcements area of their "My Workspace" tab, as well as within the course itself. These messages can be set to show immediately, or to show during specific dates. Email notifications can be sent to alert participants of the Announcement message.

#### To access this tool, select Announcements from the Tool Menu in your site.

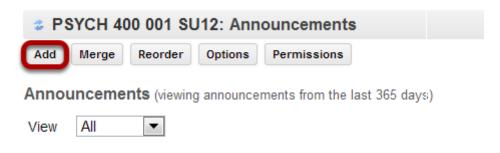

#### How do I add an announcement?

#### Go to the Announcements tool.

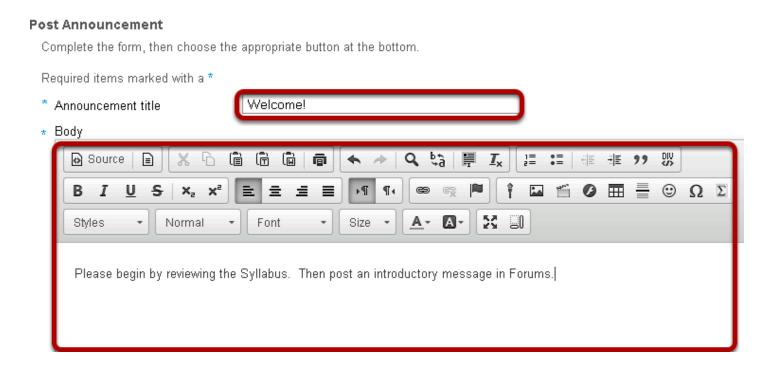

Select the **Announcements** tool from the Tool Menu of your site.

#### Click Add.

There are currently no announcements at this location.

#### Title your announcement and add content.

Give your announcement a title, and then enter the content of the announcement into the rich text editor. You may use the formatting options in the editor to modify the font size or color, add images or links, or embed other content.

Sakai 10 Instructor Guide Page 85

#### Determine who can view the announcement.

#### Access

- Only members of this site can see this announcement
- This announcement is publicly viewable
- Displays this announcement to selected groups only.

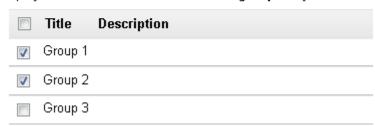

By default, all people enrolled in this site see the announcement.

Making the announcement "publicly viewable" means that you can send a link to the announcement to people outside the course, even outside your instance of Sakai, and the announcement will be viewable by them.

#### **Give announcement to group(s). (Optional)**

#### Access

- Only members of this site can see this announcement
- This announcement is publicly viewable
- Displays this announcement to selected groups only.

If you have created groups in your course, the option to display to groups is shown. Select the group(s) you want to see the announcement. Only these people will see this announcement.

#### Select when the announcement will be displayed.

#### Availability

- Show (Post and display this announcement immediately)
- Hide (Draft mode Do not display this announcement at this time)
- Specify Dates (Choose when this announcement will be displayed)

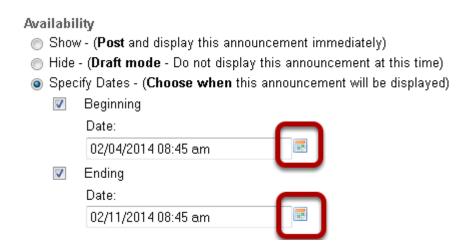

By default, the announcement is displayed immediately upon posting. You can also choose to hide it (saving as a draft until you are ready to post it), or you may specify dates when the announcement will be available.

Sakai 10 Instructor Guide

Page 86

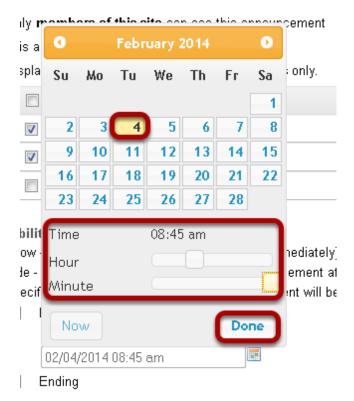

This words is listened and an a Constitution of Attribution 4.0 both Listened by the Management of Attribution 4.0 both Lis

#### Select availability dates. (Optional)

If you want the announcement to display during a specific time frame, choose **Specify Dates**. Select the box beside **Beginning** and/or **Ending** and click the calendar icon to insert the properly formatted date and time when the announcement will begin and/or end.

#### Use calendar icon to insert date and time.

Click the date on the calendar, and use the sliders to select the time. Then click **Done**.

Sakai 10 Instructor Guide

Page 87

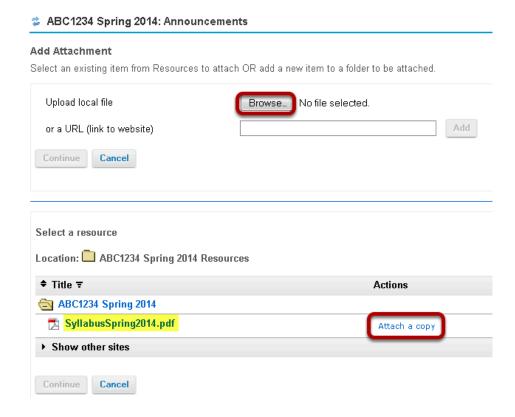

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Add attachments. (Optional)

Click the Add Attachments button

#### Browse for the file.

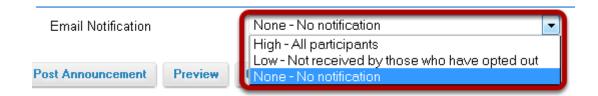

If the file is not already in your Resources in the course, click **Browse** to locate the file on your computer. Click **Continue** to attach the file.

If the file is in your Resources, click **Attach a copy** to the right of the file. Click **Continue** to attach the file.

Sakai 10 Instructor Guide

Page 88
This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Notify participants of announcement by email. (Optional)

By default, no email notification is sent. You may also select:

- **High All participants** to send an email to everyone in the course.
- Low Not received by those who have opted out to send to everyone *except* people who have intentionally changed their settings so that they don't receive low priority messages.

#### Click Post Announcement.

Sakai 10 Instructor Guide

This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

#### How do I edit an announcement?

#### Go to Announcements.

Select the **Announcements** tool from the Tool Menu of your site.

#### Click Edit below the title of the announcement.

Announcements (viewing announcements from the last 365 days)

View All 

Subject Saved By Modified Date

Welcome Feb 4, 2014 9:29 am

#### Make your edits.

Make edits based on the "How do I Add an Announcement" tutorial

#### How do I delete an announcement?

#### Go to Announcements.

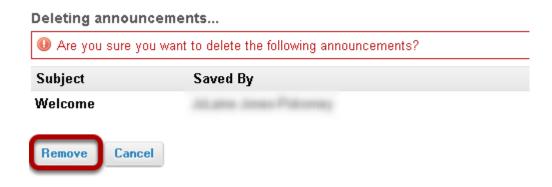

Select the **Announcements** tool from the Tool Menu of your site.

#### Select the announcement.

Select the check box in the "Remove?" column for the announcement you would like to delete, and then click **Update**.

#### Confirm deletion message.

Click **Remove**.

#### How do I merge announcements?

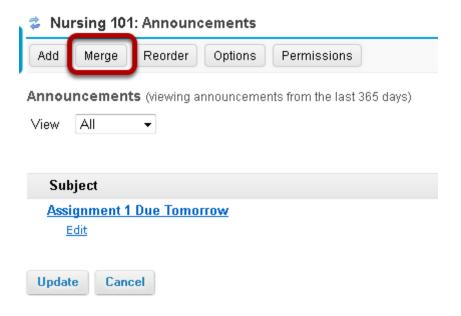

The function to merge announcements allows for a central course to push out announcements to other courses. For example, a Nursing Program includes twenty different courses. But a single Nursing Program Master course or project site could be used to push announcements out to all twenty of the Nursing Program courses. Announcements that are merged from the Master course cannot be edited or deleted in the Nursing Program courses. Those individual Nursing Program courses could create additional announcements that would apply to their specific course only. Those would appear in addition to the announcements merged from the Master Course.

#### Go to Announcements.

Note: To set up the Merge, you must be enrolled in both sites with an Instructor-Type role.

Select the **Announcements** tool from the Tool Menu in course that will receive the announcements.

#### Click Merge.

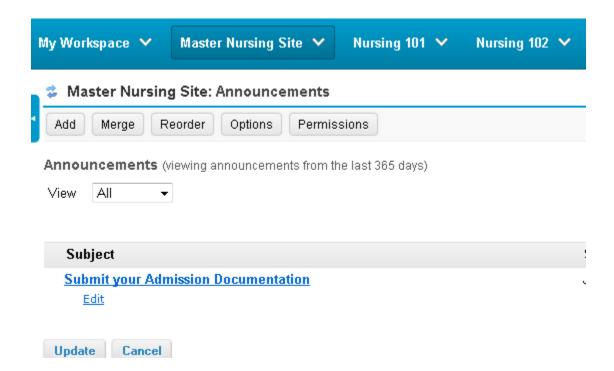

#### Select the course to merge from.

Check the box beside the course from which this course will draw its Announcements, and then click **Save**.

#### **Example: Master Site Announcements**

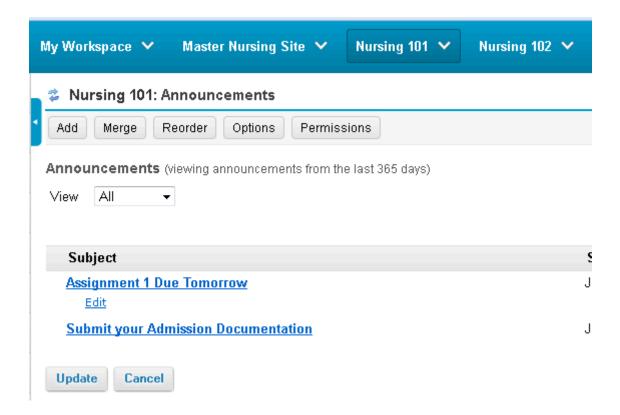

This image shows the Master Nursing Site with an announcement created.

Sakai 10 Instructor Guide

Page 93

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **Example: Merged Site Announcements**

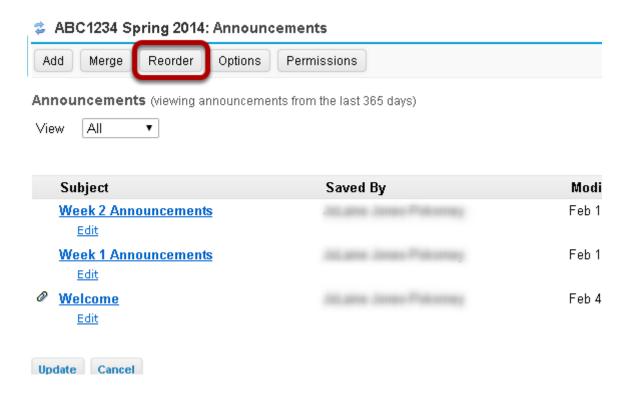

The Announcement shows up in the Nursing 101 Announcements list, but there is no "edit" option here. The "Assignment 1 Due Tomorrow" announcement was created inside the Nursing 101 course.

#### How do I reorder announcements?

#### Go to Announcements.

Select the **Announcements** tool from the Tool Menu of your site.

#### Click Reorder at the top of the screen.

Sakai 10 Instructor Guide

Page 95
This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

#### Drag and drop to re-order announcements.

# Reorder Announcements To reorder, drag and drop list items and then click Update. Undo last | Undo all Sort by subject | Sort by author | Sort by modified date Week 2 Announcements Week 1 Announcements Welcome Update Cancel

The announcement that you have selected will be green until it is dropped in its new location. It will turn blue for a few seconds before it reverts to the default gray color.

#### Click Update.

Sakai 10 Instructor Guide

Page 96

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **Auto-Sort Options**

There are three options that allow you to auto-sort the Announcements:

- 1. Sort by subject orders the announcements in alphabetical order according to the subject line
- 2. Sort by author orders the announcements in alphabetical order according to the person who created the announcement
- 3. Sort by modified date orders the announcements in order based the creation (or most recent modification) date.

When you click the link, an arrow icon appears beside it showing if the list is sorted smallest to largest, or largest to smallest. In the above illustration, the announcements are sorted by date, with the most recent at the top and the oldest at the bottom. If the link is clicked again, the arrow will icon points down showing that the oldest announcements are at the top and the newest ones are at the bottom of the list.

Sakai 10 Instructor Guide Page 97 This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

# How do I change Announcements tool permissions?

By default, students may only read announcements that have been posted by instructors and other instructor-type roles. But permissions can be changed so that students may create, edit, delete, and even access draft versions of the announcements not yet published.

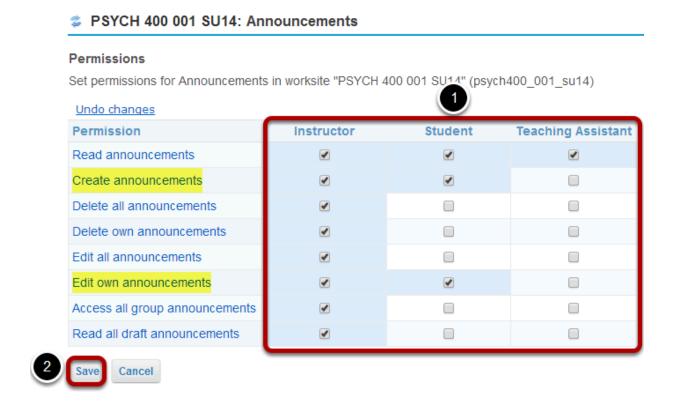

#### Go to Announcements.

Select the **Announcements** tool from the Tool Menu of your site.

#### Click Permissions.

#### Modify the permissions for the roles listed.

- 1. Check the box next to each permission you would like to allow for a given role. (Deselecting a box will remove the corresponding permission.)
- 2. Click **Save** to save your changes.

In the illustration above, students have been given access to create announcements, and they can edit an announcement that they created themselves, but not the announcements created by others.

Note: You may see different roles listed depending on the roles which exist in your site. A role must be present in the site in order for you to modify its permissions. For instance, in a project site, you will see role for Access (i.e. students/participants) and Maintain (i.e. site owners/instructors).

Sakai 10 Instructor Guide

Page 99

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# **Assignments**

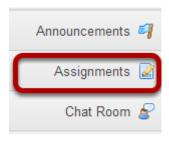

#### What is the Assignments tool?

The Assignments tool allows instructors to create, distribute, collect, and grade online assignments.

Assignments are typically private; student submissions are not visible to other users of the site. However, the instructor has the option to enable peer evaluation of assignments if desired.

Assignments may be submitted via file upload or in-line using the Rich Text Editor, depending on instructor preference.

#### To access this tool, select Assignments in the Tool Menu of your site.

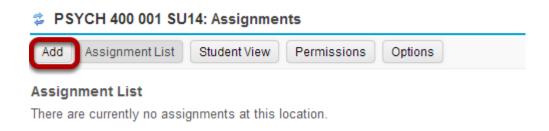

#### How do I add an assignment?

#### Go to the Assignment tool.

Select the **Assignments** tool from the Tools Menu in your site.

#### Click the Add button.

Click the **Add** button to add a new assignment.

#### Give your assignment a title.

## \* Title Assignment 1

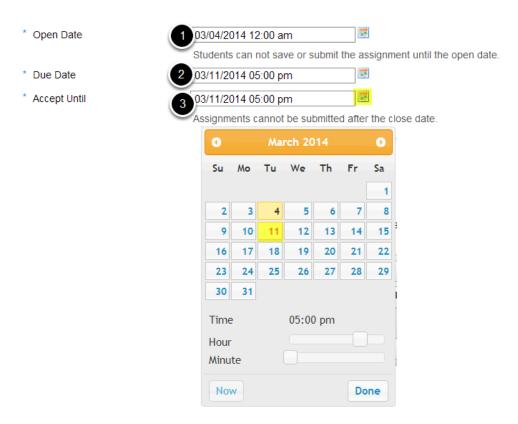

The title of your assignment should be something descriptive and unique, as this is the title students will see when they go to the Assignments tool to submit their work.

Sakai 10 Instructor Guide

Page 102

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Specify the availability.

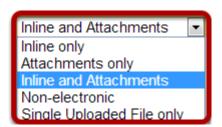

When you create a new assignment, the Open Date will default to the current day, and the Due Date and Accept Until dates will default to one week later. Change the dates using the calendar icon to bring up the date-picker pop-up calendar.

- 1. The **Open Date** for your assignment is when it becomes available for students.
- 2. The **Due Date** is the deadline to turn in the assignment.
- 3. The **Accept Until** date allows you to accept late submissions after the due date. (Late student submissions marked as late.) If you do not accept late submissions, you may leave the Due Date and Accept Until date the same.

Tip: Often, faculty like to set the time on the due date to 11:55 PM, as that is the latest time you can select on a given day. Selecting 12:00 AM will display the date as the next day, and this may confuse students about the actual due date if they assume they have all day to turn in their work.

#### Choose the submission format.

\* Student Submissions

Sakai 10 Instructor Guide

Page 103

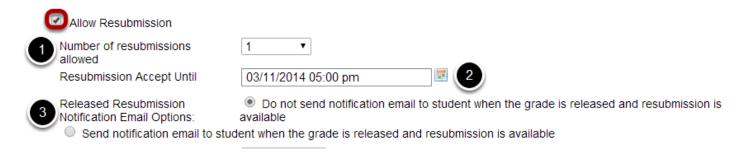

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

There are several submission formats that you may accept.

- **Inline and Attachments**: This is the default format and it allows students to either enter content into the rich text editor inline, or attach a file, or both.
- **Inline only**: Student may only submit a response by entering their content into the rich text editor. The attachment option is not available. This is a good option to choose if you want to be able to grade all of the responses online without having to download or open any files.
- **Attachments only:** This format removes the rich text editor option and leaves only the attachment option available.
- **Non-electronic**: This format choice is for assignments that you expect students to submit in person, but you want the option to view assignment details and/or grade the assignment in Sakai.
- **Single Uploaded File only:** If you want students to submit a file, but you only want a single file, this is the option to choose. (Both the Inline and Attachments and the Attachments only option allow students to upload and submit more than one file at a time.)

Choose your preferred format from the drop-down menu.

#### **Allow resubmission. (Optional)**

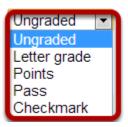

#### If you select **Allow Resubmission**, you may specify:

- 1. The number of resubmissions allowed for the class.
- 2. The deadline for resubmitting.
- 3. You may also select to notify students via email when the grade is released and resubmission is available.

Tip: You may also choose to allow resubmissions on an individual basis when you grade student submissions.

#### Choose the grade scale.

\* Grade Scale

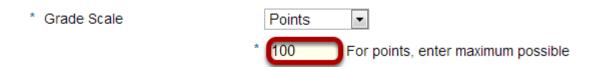

There are several grade scales to choose from:

- **Ungraded:** This is the default option. This will allow you to collect and view student submissions electronically, but does not allow for grading in Sakai.
- **Letter grade:** You may select this option if you like to grade your assignments by letter grade only.
- **Points:** Allows you to assign points to an assignment for grading. This is the option you should choose if you plan to send the assignment to the gradebook.
- Pass: Designates an assignment as pass/fail.
- **Checkmark:** Allows you to mark assignments with a checkmark for completion.

Select the assignment's grade scale from the drop-down menu.

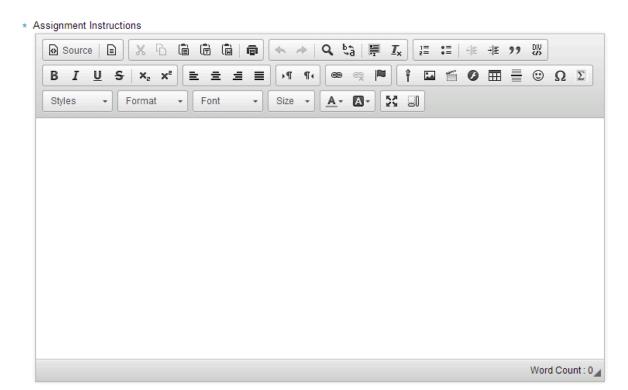

Note: The only grade scale option that can be added to the gradebook automatically is **Points**.

#### Enter maximum points.

If you select **Points** as the grade scale, you must enter a maximum number of points for the assignment.

#### Add assignment instructions.

Enter the instructions for the assignment into the <u>Rich Text Editor</u>. You may use the editor to format your assignment description, and add images, links, or other media if desired.

#### Hide due date from students. (Optional)

Hide due date from students

If you would prefer for students not to see the assignment due date, check the box next to the **Hide due date from students** option.

#### Add due date to Schedule. (Optional)

Add due date to Schedule

If you would like your assignment due date to be added automatically to the Schedule (a.k.a. Calendar) in your class, check the **Add due date to Schedule** box.

#### Add an announcement. (Optional)

Add an announcement about the open date to Announcements

If you would like an announcement to be automatically posted to the site regarding the open date for your assignment, check the **Add an announcement about the open date to Announcements** box.

Note: The announcement will be posted immediately when you post your assignment, regardless of the actual open date of the assignment itself. This option is best used to announce changes in a due date, or the availability of a newly posted item.

#### Add honor pledge. (Optional)

Add honor pledge

If you would like to add an honor pledge to your assignment, check the **Add honor pledge** box.

#### Student view of honor pledge.

Honor Pledge: I have neither given nor received aid on this assignment.	
(You must respond to submit your assignment.)	

When the honor pledge option is selected, students must accept the statement pictured above that reads "I have neither given nor received aid on this assignment" in order to submit their assignment.

#### **Grading**

#### Grading

- Do not add assignment to Gradebook
- Add Assignment to Gradebook
- Associate with existing Gradebook entry

The default selection is **Do not add assignment to Gradebook**, If you would like your assignment added to the gradebook, you may select either of the following options:

Sakai 10 Instructor Guide

Page 107

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/bu/4.0/

- Add assignment to Gradebook: This will create a new item in the gradebook with the same name as your assignment title.
- **Associate with existing Gradebook entry:** This option allows you to link your assignment to an existing gradebook item. This is useful if you have already created items in your gradebook and you want to use one of them, rather than creating a new assignment. You may only link an assignment to a single gradebook item, and vice versa.

Select the radio button for the gradebook option you would like to use.

Tip: Remember that you must have a Points grade scale in order to add the assignment to the gradebook!

#### Peer assessment. (Optional)

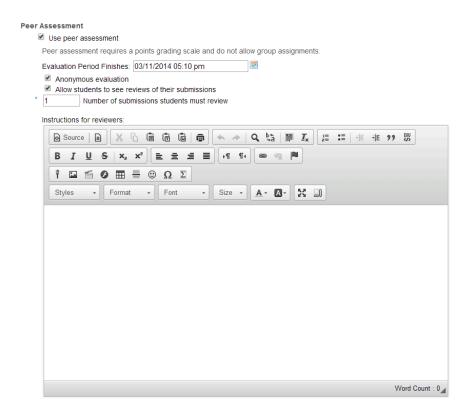

Peer Assessment

Use peer assessment

Peer assessment facilitates student peer review of assignments.

Note: You must be using a Points grade scale in order to enable peer review.

#### Peer assessment options.

If you select the **Peer Assessment** box, the settings will expand to show the additional options above. You may indicate the following items here:

Sakai 10 Instructor Guide

Page 108

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

- The evaluation period end date. (This date must be after the Accept Until date for the assignment.)
- · Whether or not reviews are anonymous.
- Whether or not students may see reviews of their own assignments.
- The number of reviews each student must complete.
- Instructions for reviewers.

#### Access.

## Access

- Are submissions for a group?
- Display to site
- Display to selected groups

You may display your assignment to everyone in the site (the default), or to selected groups.

Note: You must have existing groups in your site in order for the **Display to selected groups** option to appear.

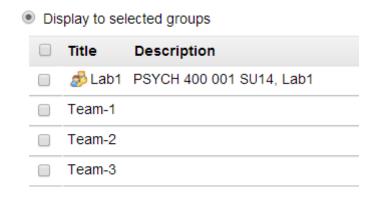

#### **Group submissions. (Optional)**

#### Access

Are submissions for a group?

If you check the box next to **Are submissions for a group?** it will allow any member of a group to submit an assignment on behalf of the group. By default, the same grade is applied to all group members when the item is graded. However, the instructor can also override the group grade for any individual member of the group.

#### **Group selections. (Optional)**

If you select the **Display to selected groups** option, the settings will expand to show a list of all existing groups in the site. Select one or more groups to display the assignment to those groups only.

Note: The display option only controls the visibility of the assignment for users in different groups. By default, each member of the group still submits an individual assignment, but this display setting allows you to identify different assignments for different groups or sections.

Tip: If you want students to submit one assignment per group, use the **Are submissions for a group?** option above.

#### Submission notification.

#### Released Grade Notification Email Options:

- Do not send notification email to student when the grade is released
- Send notification email to student when the grade is released

The default notification setting is **Do not send me notification emails for any student submissions**. If you would like to be notified, select either of the following two options:

- Send me a notification email for each student submission: This option will send a separate email for each student immediately upon submission.
- Send me one email per day summarizing notifications for student submissions: This option will send a digest email listing all student submissions for that day.

Choose the radio button for the notification setting you prefer.

Note: The notification email message will be sent to the external email address for your Sakai user account. It does not send the notification to the Sakai Messages tool.

#### Released grade notification.

#### Released Grade Notification Email Options:

- Do not send notification email to student when the grade is released
- Send notification email to student when the grade is released

The default notification setting is **Do not send notification email to student when the grade** is released.

If you would like students to be notified, select the radio button for **Send notification email to** student when the grade is released.

Note: The notification email message will be sent to the external email address for the student's Sakai user account. It does not send the notification to the Sakai Messages tool.

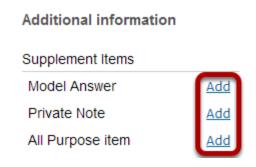

Sakai 10 Instructor Guide **Page 110** 

## **Attachments.** (Optional)

If you would like to attach any additional files to the assignment, such as a grading rubric or peer review rubric, click the **Add attachments** button to browse for and attach file/s.

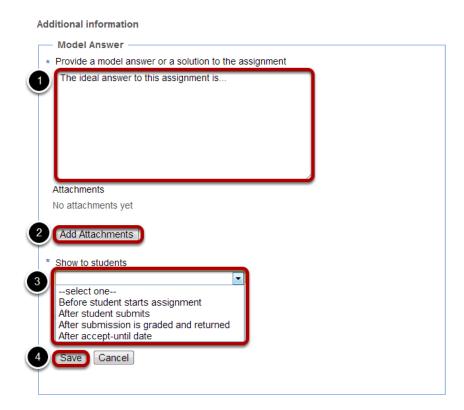

## **Additional information. (Optional)**

This section gives you the option of including additional information, such as a **Model Answer**, **Private Note**, or **All Purpose Item**.

Click the **Add** link to add any of these items.

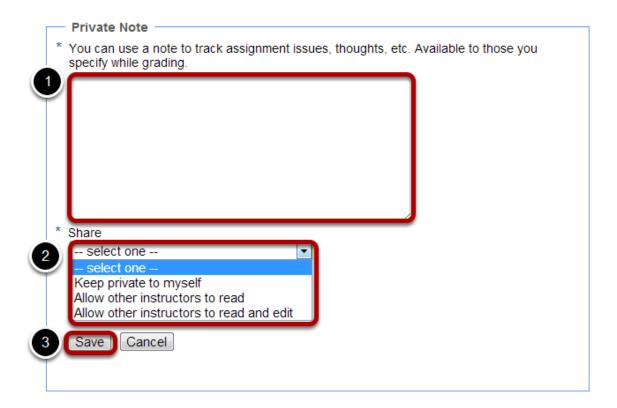

#### Model answer.

The model answer can provide an example of the ideal correct answer or solution for a particular assignment.

- 1. You may enter your model answer in the text box provided.
- 2. You may also click the **Add Attachments** button to browse for and select a file containing the model answer and/or solution.
- 3. Select when you would like the model answer to be displayed.
- 4. Click **Save** to save your changes.

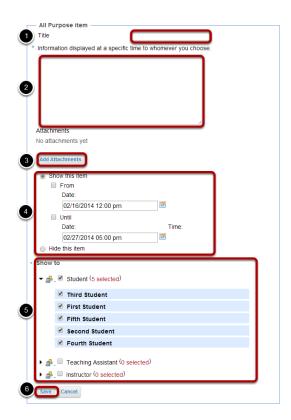

#### Private note.

If you would like to make any private notes which are not visible to students, you may enter them here.

- 1. Enter your notes in the space provided.
- 2. Select who can read and edit the notes from the drop-down menu.
- 3. Click **Save** to save your changes.

#### All purpose item.

You may also create an **All Purpose Item** which can be displayed based on specific dates or users.

- 1. Enter a **Title** for your item.
- 2. Enter the content of the item in the text box provided.
- 3. You may also click **Add Attachments** to browse for and attach file/s.
- 4. Select when the item should be displayed.
- 5. Choose which users can see the item.
- 6. Click **Save** to save your changes.

## Post your assignment.

Once you have entered all of your assignment settings, scroll down to the bottom and click **Post** to save your changes and post the assignment.

## How do I edit an existing assignment?

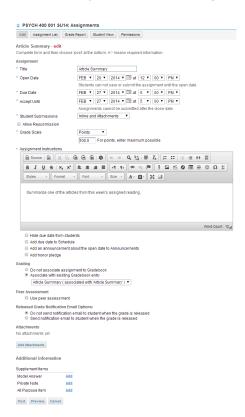

#### Go to Assignments.

Select the **Assignments** tool from the Tool Menu of your site.

## Select the Edit link for the assignment you want to edit.

## Make your changes to the assignment.

The assignment settings window will appear. Make any necessary changes. For more information on assignment settings, see <a href="How do I add an assignment?">How do I add an assignment?</a>

Sakai 10 Instructor Guide

## **Click Post.**

Click **Post** to save your changes.

## How do I delete an assignment?

## Go to Assignments.

Select the **Assignments** tool from the Tool Menu of your site.

### Select the assignment(s) you want to delete.

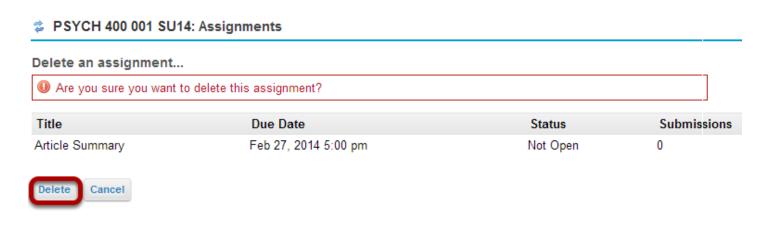

In the "Remove?" column, click to place a check in the box for the item(s) you want to delete.

#### Click Update.

Click the **Update** button at the bottom of the assignment listing.

#### Confirm the deletion.

Sakai 10 Instructor Guide

Page 117

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

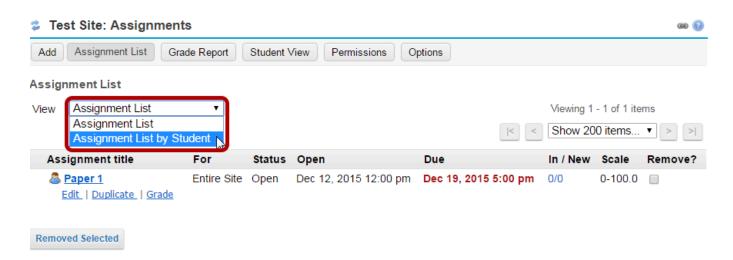

Click the **Delete** button to confirm the removal of the assignment(s) you have selected. Note: Removing as assignment with student submissions will also delete the submissions for that assignment.

# How do I submit an assignment on behalf of a student?

#### Go to Assignments.

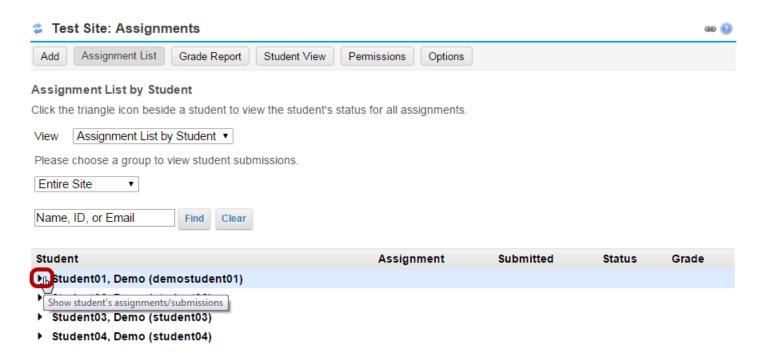

Select the **Assignments** tool from the Tool Menu in your site.

## From the View drop-down menu, select Assignment List by Student.

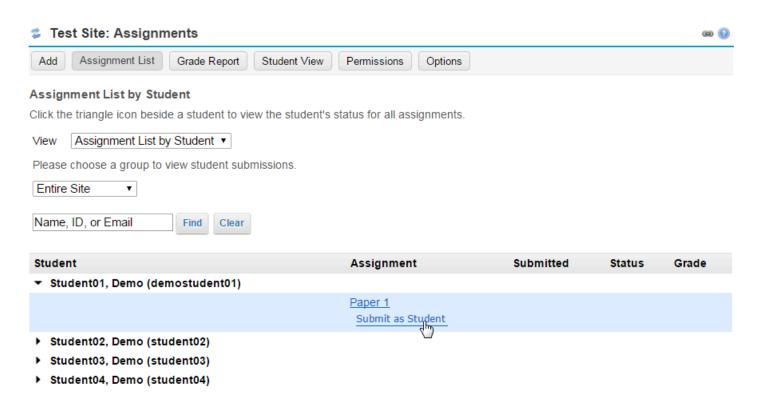

Click the **Grade** link for the assignment you would like to grade.

#### Select a student.

You will see a list of all the students in the class. Click on the triangle icon to the left of the student's name to expand and view submission information for that student.

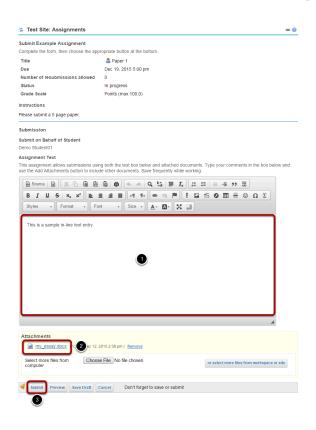

#### Click Submit as Student.

Sakai 10 Instructor Guide

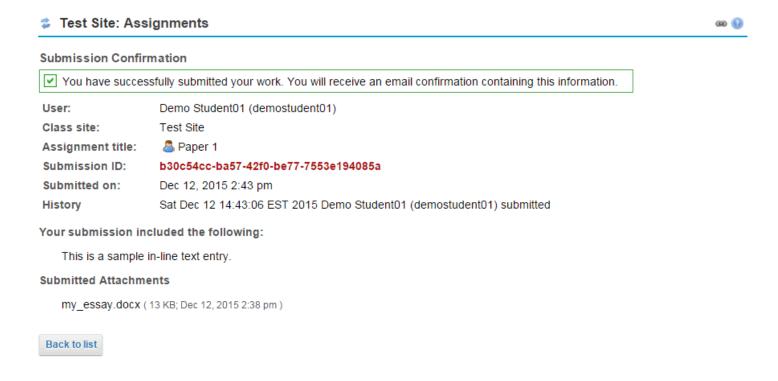

Page 120

## Submit the student assignment.

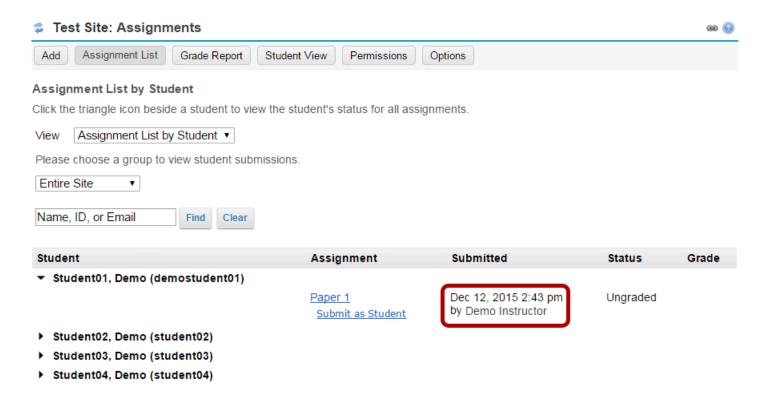

- 1. Enter an in-line submission (if applicable).
- 2. Attach a submission file (if applicable).
- 3. Click **Submit** to submit the student assignment.

## A submission confirmation will display.

## When you view the list, you will see the name of the instructor next to the submission.

Sakai 10 Instructor Guide

Page 122

## How do I grade an assignment?

### Go to Assignments.

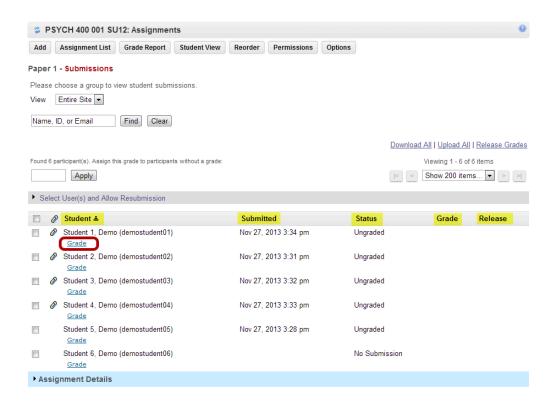

Select the **Assignments** tool from the Tool Menu in your site.

## Select the assignment to grade.

Click the **Grade** link for the assignment you would like to grade.

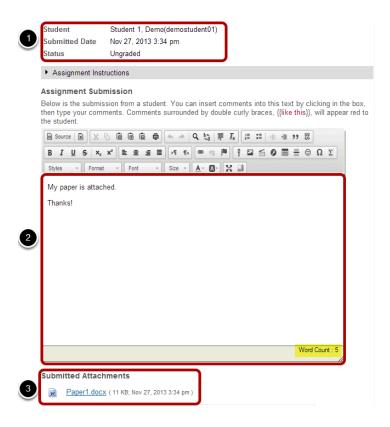

## Select a student to grade.

You will see a list of all the students in the class, along with the submission date, status, grade, and release columns for each student. You may sort by any of these columns by clicking on the title of the column if desired.

Click on the **Grade** link for the student submission that you would like to grade.

#### View student submission.

The student submission will be displayed at the top of the page.

- 1. The student's name, username, submission date, and graded status appear at the very top.
- 2. Next, under "Assignment Submission" the student's inline submission text (if applicable) is shown. Notice that the Word Count for inline submissions is displayed in the bottom right corner of the rich text editor.
- 3. Under "Submitted Attachments" any attached files will appear. The filename as well as the the file size and submission date are also shown.

Note: To view student file attachments, you will need to click on the filename to download and open the file.

#### Enter grade.

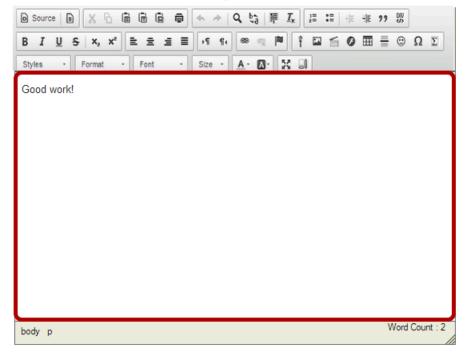

Enter the score for the student's assignment in the grade entry text box provided.

#### **Enter instructor comments.**

#### **Instructor Summary Comments**

Use the box below to enter additional summary comments about this submission.

If you would like to include additional comments along with the grade, you may enter them into the rich text editor under the "Instructor Summary Comments" section.

#### Return an attachment.

#### Attachments to Return with Grade

No attachments yet

If you would like to return a file attachment to the student with additional feedback, click on the **Add Attachments** button to browse for and select a file.

#### Allow resubmissions.

If you would like to allow the student to resubmit the assignment, you may check the **Allow Resubmission** box and specify the number of resubmissions allowed and the date until which they will be accepted.

Note: If you allowed resubmissions on the assignment when you created it, this information will be prepopulated with the default resubmission information for this assignment. However, you may override the default resubmission settings for an individual student by changing the information shown here.

#### Save grade.

If you are finished grading and would like to release the information to the student, click the **Save and Release to Student** button.

Alternately, if you would like to save the grade but wait and release to the student at a later date, you may select the **Save and Don't Release to Student** button instead.

Tip: Some faculty prefer to release all of the grades at one time when they have finished entering grades for the whole class.

#### Go to the next submission.

If you have more student submissions to grade and would like to go directly to the next submission in the list, click the **Next** button at the bottom of the page.

# How do I download assignments for grading offline?

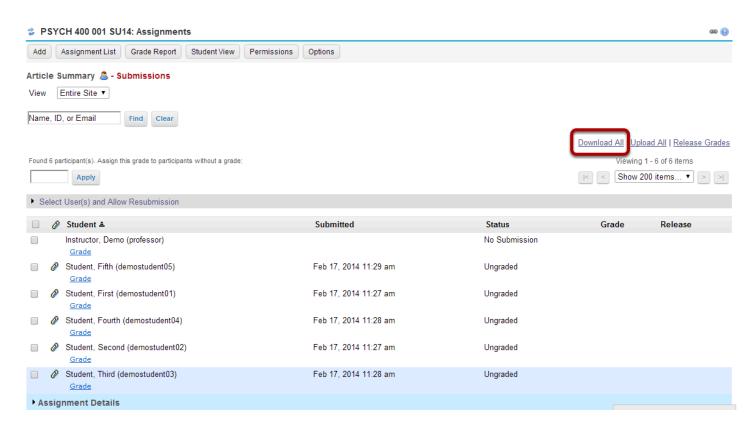

### Go to Assignments.

Select the **Assignments** tool from the Tool Menu of your site.

## Click the Grade link for the assignment to be graded.

#### Click the Download All link.

### Select the desired download options.

#### PSYCH 400 001 SU14: Assignments

#### Download All

Choose download options, and then click 'Download' at the bottom

- ✓ All
- Student submission text (original student submitted text, possibly containing instructor added comments)
- Student submission attachment(s)
- ✓ Grade file (grades.csv file at top level of archive)
- Feedback text (the inline comments with student submission)
- 🗹 Feedback comments (comments.txt file if available in student's folder. Comments are put into the Instructor Comments field for each student's submission)

You may choose "All" to select all of the download options, or select only some of them by placing a check mark next to an individual item or items. The options available for download are:

- All
- Student submission text (original student submitted text, possibly containing instructor added comments)
- Student submission attachment(s)
- Grade file (grades.csv file at top level of archive)
- Feedback text (the inline comments with student submission)
- Feedback comments (comments.txt file if available in student's folder. Comments are put into the Instructor Comments field for each student's submission)
- Feedback Attachment(s)

#### Download the submissions.

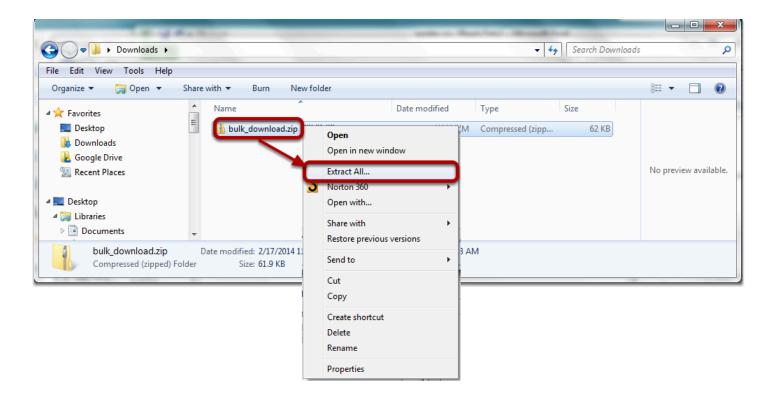

Click the **Download** button to save the files your computer. The assignment files will download as an archive file, or .zip file to your local computer.

Sakai 10 Instructor Guide

Page 129

This word is linear and an allow Constitution 4.0 let l. linear a letter (constitution and linear and letter).

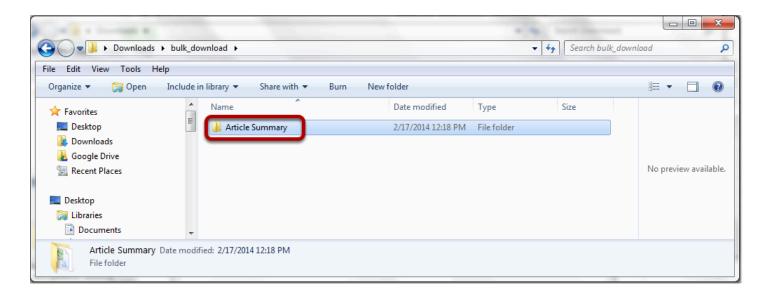

#### View archive.

The archive file has the default name of bulk\_download.zip.

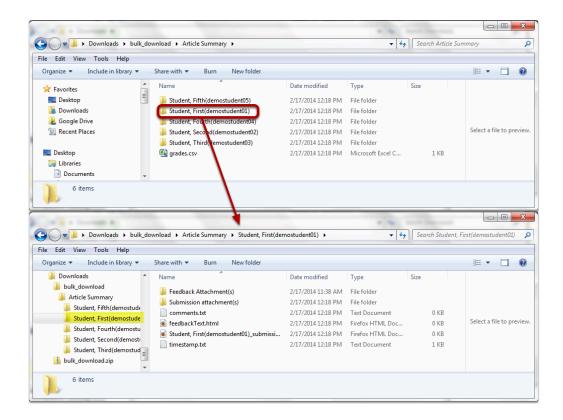

Extract the archive to a location on your computer. (You can do this by right-clicking on the file and selecting **Extract All** in Windows, or by using your preferred unzipping program on your computer.)

## View assignment folder.

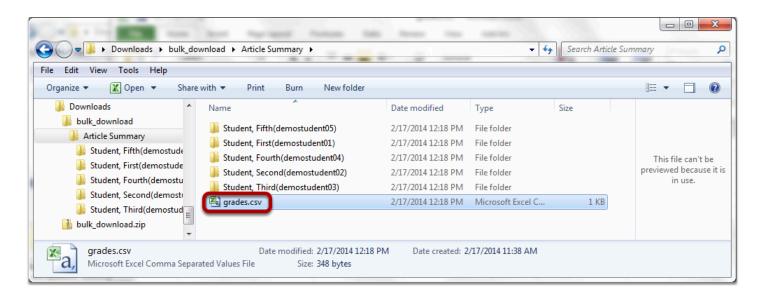

There will be a folder for each of the assignments in your course.

#### View student submissions.

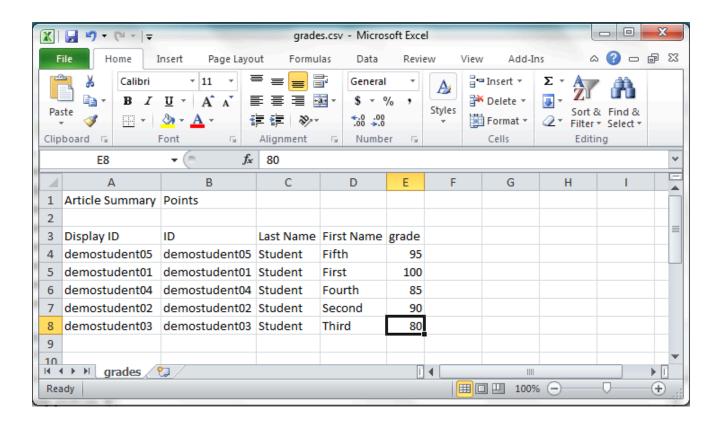

Within the assignment folder, there will be individual folders for each of the students in the site. Open a student folder to view his or her submissions, feedback, and comments.

#### Grade the submissions.

When you are ready to enter student grades, open the **grades.csv** file within the assignment folder.

#### Enter grades and comments into spreadsheet and save.

# How do I upload graded assignment submissions and feedback?

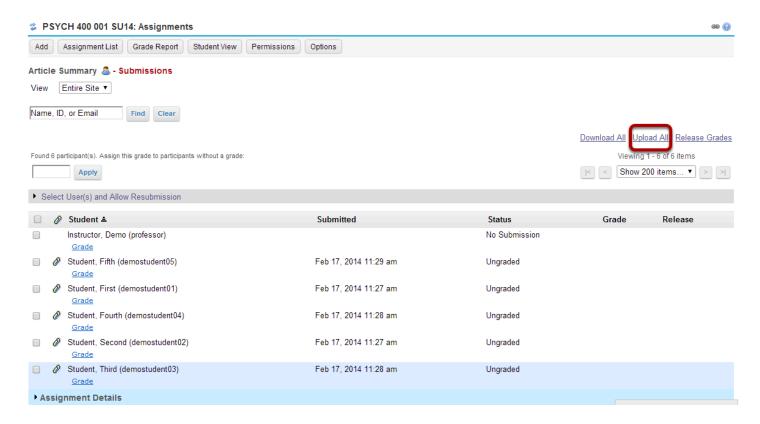

#### Go to Assignments.

Select the **Assignments** tool from the Tool Menu of your site.

## Click the Grade link for the assignment to be graded.

## Click the Upload All link.

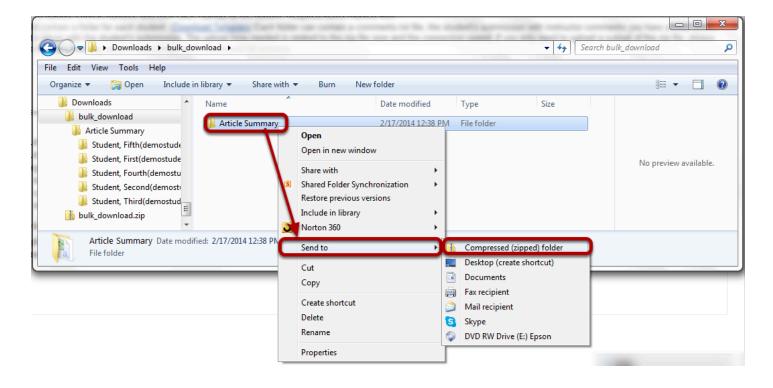

## Select the archive file containing grades and feedback.

Click the **Choose File** button to browse for and select the archive file on your local computer.

Note: The archive file needs to be in a specific format. It should contain a folder for the assignment and subfolders for each of the individual students. The easiest way to ensure that your file is in the correct format is to download the assignment submissions (or the template provided) directly from the Assignments tool in your site.

#### Create a zip file from the extracted folder on your computer.

If you have previously extracted the bulk\_download.zip file on your computer, and then edited or added to the assignment grades or feedback, you will need to create a new archive or zip file for upload which includes your changes.

You can create a zip file from a folder in Windows by right-clicking on the folder, and then selecting **Send to** and **Compressed (zipped) folder**. The zip file will have the same name as the folder you selected.

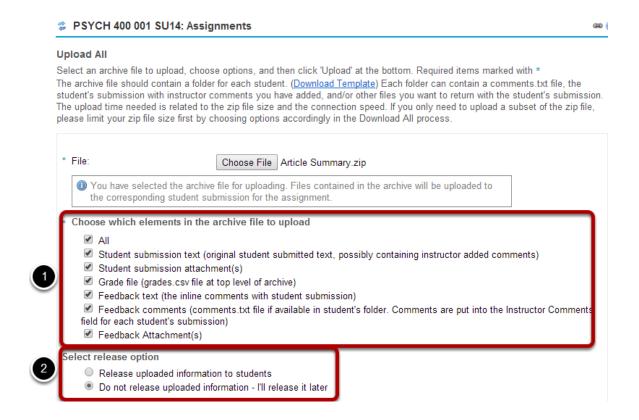

Tip: You can either compress/zip all existing assignment folders at once for upload, or just one assignment folder at a time.

Sakai 10 Instructor Guide

### Select the desired upload and release options.

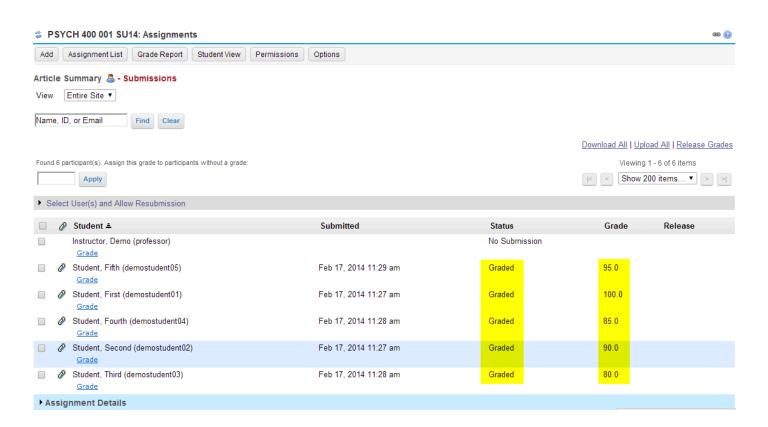

- 1. You may choose "All" to select all of the upload options, or select only some of them by placing a check mark next to an individual item or items. The options available for upload are:
- All
- Student submission text (original student submitted text, possibly containing instructor added comments)
- Student submission attachment(s)
- Grade file (grades.csv file at top level of archive)
- Feedback text (the inline comments with student submission)
- Feedback comments (comments.txt file if available in student's folder. Comments are put into the Instructor Comments field for each student's submission)
- Feedback Attachment(s)
- 2. Select the radio button to **Release uploaded information to students** if you want them to be able to see their grades and feedback right away. (If you would rather wait to release at a later date, select **Do not release uploaded information I'll release it later** instead.)

## **Click Upload**

Click the **Upload** button to upload your file.

#### View grades.

Once your upload is complete, you will be returned to the assignment grading screen. Notice that the grades have now been uploaded and the student submissions are marked as "Graded".

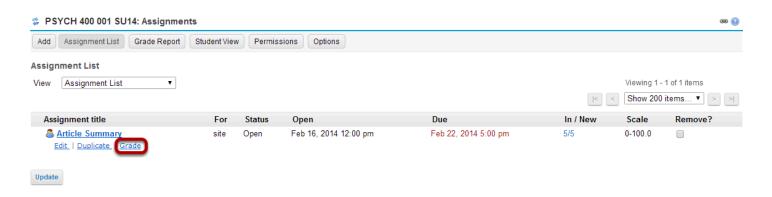

## How do I release assignment grades?

When you grade an assignment, students will not be able to view the grade and your feedback in the assignment area until you release their grades.

## Go to Assignments.

Select the **Assignments** tool from the Tool Menu of your site.

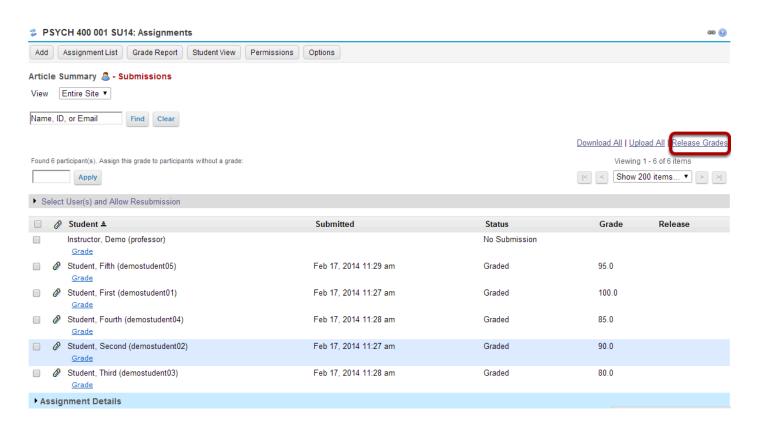

## Click the Grade link for the assignment with grades to be released.

## Chat

### What is the Chat Room tool?

The Chat Room is a real-time, text-only chat tool within a site. The Chat Room tool can be used for synchronous, unstructured conversations among site participants who are logged into the site at the same time. Only participants enrolled in the same site may chat using the Chat Room.

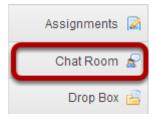

The Chat Room tool supports multiple rooms and the default room can be set by the site owner. For example, instructors may choose to create an "Online Office Hours" chat room for student questions and answers. Chat rooms for student groups can also be set up as a space to collaborate among group members across distances.

The Chat Room tool alerts users to other participants who have entered the same chat room. This way, users know who is available to talk.

Site owners can specify how many chat messages are archived and for how long, or they can allow participants to configure their own archive settings.

The Chat Room tool does not provide a way to chat privately. By default, all messages are visible to all participants.

# To access this tool, select Chat Room from the Tool Menu in your site.

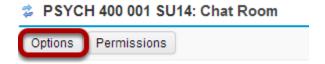

## How do I add a chat room?

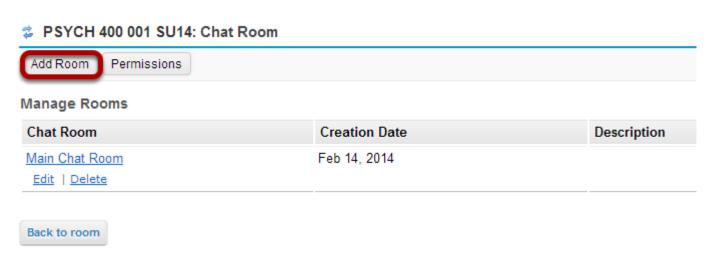

#### Go to Chat Room.

Select the **Chat Room** tool from the Tool Menu of your site.

## Click on Options.

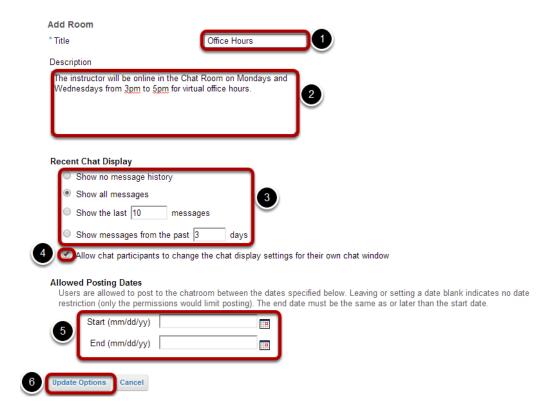

#### Click on Add Room.

Page 144 Sakai 10 Instructor Guide This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

#### Enter the room details.

- 1. A title is required for the new room.
- 2. You may enter a description of the room if desired. (Optional)
- 3. Select the number of messages you would like to be displayed in the message history.
- Check the box next to Allow chat participants to change the chat display settings for their own chat window if you would like to allow this ability. (Optional)
- 5. You may set a start and end date for the chat room. (Optional)
- 6. Click the **Update** button to save your details and add the room.

## How do I delete a chat room?

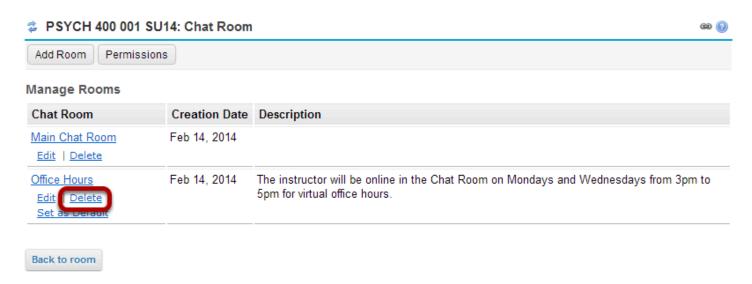

#### Go to Chat Room.

Select the **Chat Room** tool from the Tool Menu of your site.

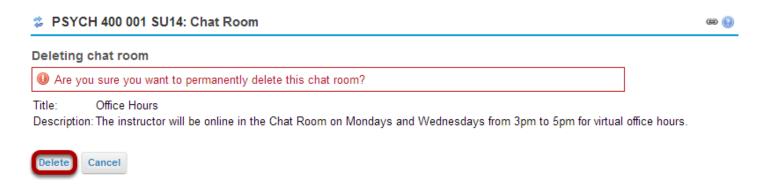

### Click on Options.

#### Click the Delete link for the room you want to remove.

#### Confirm the deletion.

Click the **Delete** button to confirm the removal of the chat room.

## How do I clear the chat history?

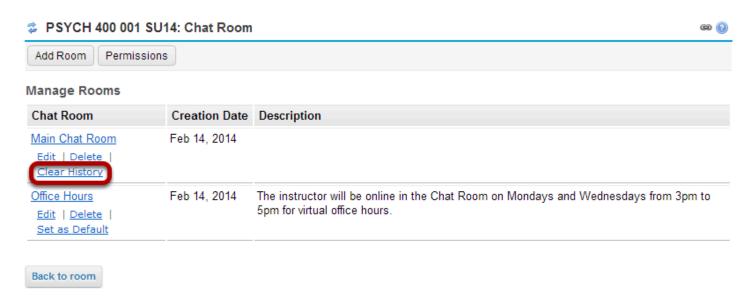

#### Go to Chat Room.

Select the **Chat Room** tool from the Tool Menu of your site.

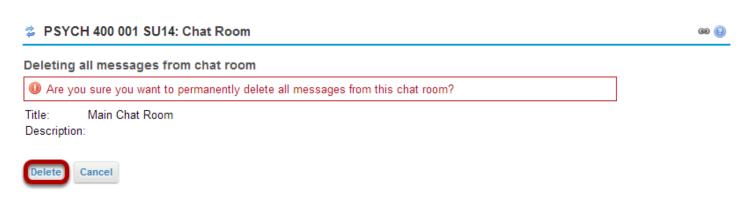

### Click on Options.

#### Click the Clear History link for the room you want to clear.

#### Confirm the deletion.

# How do I change the Chat Room tool permissions?

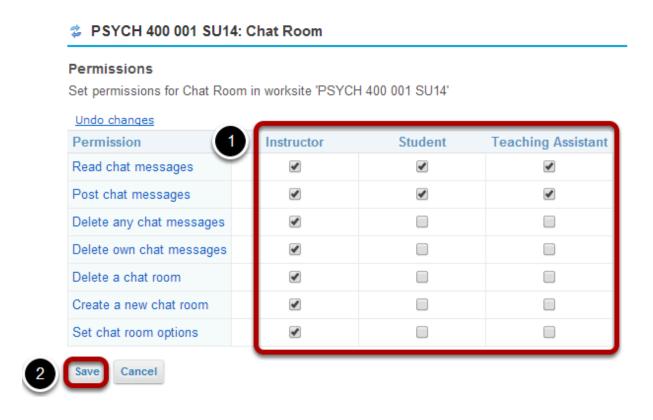

#### Go to Chat Room.

Select the **Chat Room** tool from the Tool Menu of your site.

#### Click Permissions.

#### Modify the permissions for the roles listed.

- 1. Check the box next to each permission you would like to allow for a given role. (Deselecting a box will remove the corresponding permission.)
- 2. Click **Save** to save your changes.

Note: You may see different roles listed depending on the roles which exist in your site. A role must be present in the site in order for you to modify its permissions.

Sakai 10 Instructor Guide

Page 149

# How do I read, post, or delete Chat Room messages?

#### Go to Chat Room.

Select the **Chat Room** tool from the Tool Menu in your site.

#### To read Chat Room messages:

- 1. When you click **Chat Room**, **y**ou will enter the default room (as specified by the site leader). To change rooms, click **Change Room** at the top, and select the room you'd like to enter.
- 2. To see who is presently in the room, look under "Users in Chat" on the right side of the screen.
- 3. Messages appear in chronological order, with the most recent at the bottom. Messages will always identify the sender.
- 4. To hide or display the date or time messages were posted, select the appropriate option from the "View" drop-down list: Time Only, Date and Time, Date Only, Neither Date nor Time, or ID Only.
- 5. To change how many messages you see, from the second drop-down list, select one of the following options: All Messages, Last 10 messages, Past 3 days, or Show no message history. (If you choose Show no message history, you will see only messages posted after you made this selection.)

Sakai 10 Instructor Guide

Page 150

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### To post Chat Room messages:

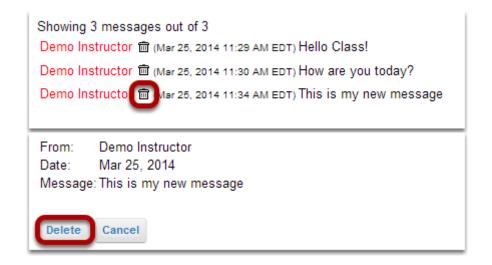

In the text box at the bottom of the window, type your message, and then click **Add message**.

Note: No one can see your message until you click **Add message**, but once you do, only an instructor or a participant with special permission can delete your message.

To discard a message that you haven't sent yet, click Clear.

#### To delete a Chat Room messages.

To delete a Chat Room message that you have sufficient permission to delete, click the trash can icon next to the posting, and then click **Delete**.

Note: If you don't see a trash can icon, you don't have permission to delete the message.

Tip: To permanently delete all messages from a chat room, click **Options**, and then click **Clear History**. Click **Delete** to confirm.

## **Drop Box**

## What is the Drop Box tool?

The Drop Box tool creates a folder for each student in the course. Students are only able to access their own folder. Students and instructors can both place files in the Drop Box folders.

The Drop Box mirrors the file management features and functionality of the Resources tool. See <u>What is the Resources tool?</u> for more information on how to add, upload, edit, and delete files and folders within Drop Box. (As with Resources, multiple files can also be uploaded using <u>Drag and Drop</u>.)

## To access this tool, select Drop Box from the Tool Menu in your site.

## **Example: Folders for each student**

Sakai 10 Instructor Guide

Page 153

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

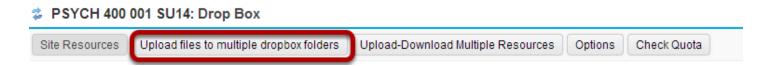

olders with the plus sign contain files.	

# How do I upload files to multiple dropbox folders?

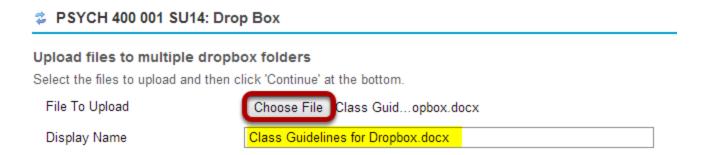

#### Go to Drop Box.

Select the **Drop Box** tool from the Tool Menu in your site.

#### Select Upload files to multiple dropbox folders.

## Select the file to be uploaded.

Click the **Choose File** button to browse for and locate the file on your local computer.

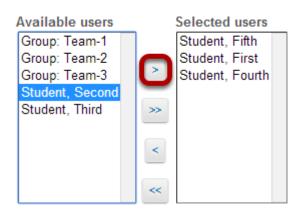

Optionally, you may also edit the display name of your file if you would like it to be different than the filename.

Sakai 10 Instructor Guide

Page 155

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## Select the destination folders for your file.

You will see a list of the student folders in your course Drop Box. Select the student name or group from the list of "Available users" on the left and use the arrow buttons to move the name or names over to the "Selected users" on the right.

## **Email notification. (Optional)**

Send an email notification to the student.

If you want students to be notified about the file upload, select the box next to **Send an email notification to the student**.

#### Click Continue.

## **Email**

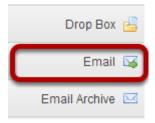

## What is the Email tool?

The Email tool allows user to send an email message to site participants by role, section, or group, and also provides a field for specifying non-site participant email addresses.

The Email tool works using the sender's external email address, which is specified in the user's account details. Typically, this email address is the user's institutional email.

Note: The Email tool can work in conjunction with the **Email Archive** tool to post email messages to the course archive.

## To access this tool, select the Email tool from the Tool Menu of your site.

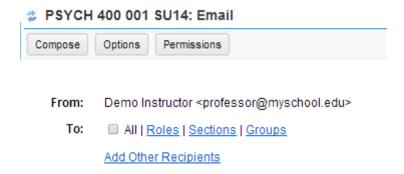

## How do I send an Email message?

#### Go to Email.

Select the **Email** tool from the Tool Menu of your site.

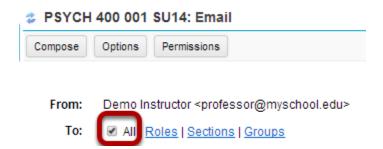

## Select the message recipients.

When you compose a message in the Email tool, you have the option to select recipients in the course by role, section, or group.

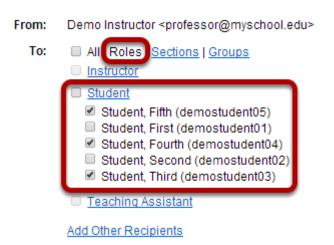

You may also add other recipients who are not enrolled in the course.

#### Select All.

Click to place a check mark next to **All** to send an email to everyone in the site.

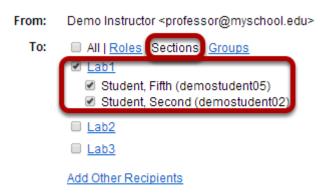

#### Choose recipients by role.

Click the **Roles** link to expand the list of roles within the site. You may also click on the link for a role (e.g. **Student**) to expand the list and show individual users.

Place a check mark next to the roles and/or individual recipients you would like to address in your message.

#### Choose recipients by section.

Click the **Sections** link to expand the list of existing sections within the site. You may also click on the link for a section (e.g. **Lab1**) to expand the list and show individual users in that section.

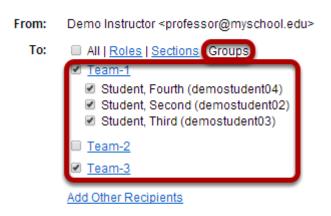

Place a check mark next to the sections you would like to address in your message.

Sakai 10 Instructor Guide

Page 160

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

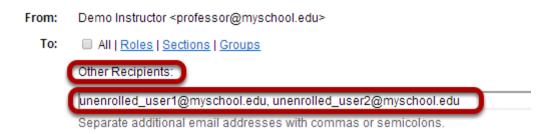

#### Choose recipients by group.

Click the **Groups** link to expand the list of existing groups within the site. You may also click on the link for a group (e.g. **Team-1**) to expand the list and show individual users in that group.

Place a check mark next to the groups you would like to address in your message.

#### Enter the email address for unenrolled user/s.

To send a message to a user who is not enrolled in the site, select the Other Recipients link and then enter the email address or addresses (separated by commas) into the text area provided.

## Enter a subject line.

Subject:	Welcome	

Give your email message a subject.

Sakai 10 Instructor Guide

Page 161

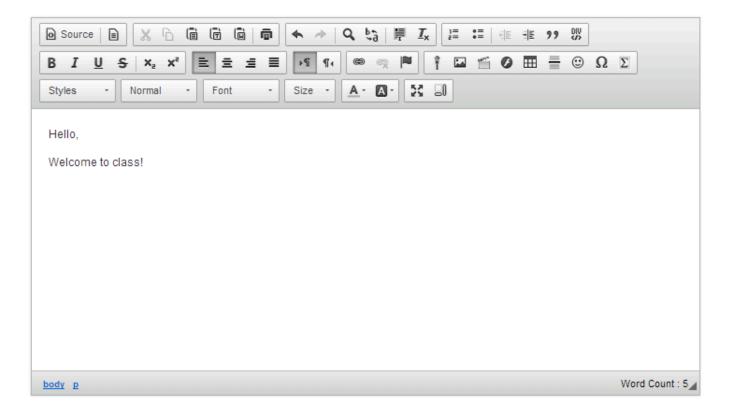

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## Add an attachment. (Optional)

Attach a file

Click the **Attach a file** link if you would like to browse for and attach a file to your email.

### Enter the message body text.

Use the Rich Text Editor to compose your message.

## Select to receive a copy. (Optional)

Send me a copy

If you would like to be copied on the email message, click the box next to **Send me a copy**.

## Select to add to Email Archive. (Optional)

Add to Email Archive, visible to all site participants

If you would like the email message to be added to the course Email Archive, click the box next to **Add to Email Archive**, **visible to all site participants**.

Note: This option only appears if the Email Archive tool is active in your site.

#### Click Send Mail.

The message will be sent using your external email address as specified for your user account in the system.

# How to I set the Email tool options for my site?

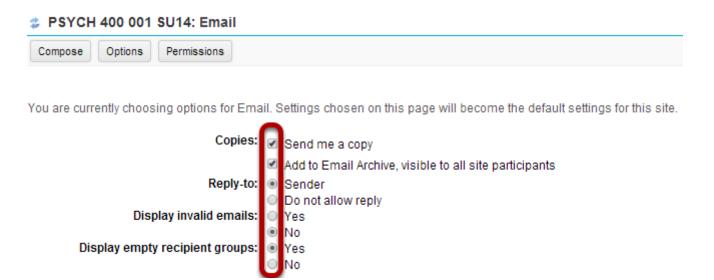

#### Go to Email.

Select the **Email** tool from the Tool Menu of your site.

#### Click the Options button.

#### Select the default settings.

Choose the desired default settings by selecting the check boxes or radio buttons next to the options you want. These settings will become the default Email tool setting for the entire site.

For example, you may want to check the box for **Send me a copy** and **Add to Email Archive** so that they are selected by default. (Individual users may still choose to de-select these two options when sending a message.)

#### **Click Update Defaults.**

Sakai 10 Instructor Guide

Page 164

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Click the <b>Update Defaults</b> button to save your changes.		

## How do I change the Email tool permissions?

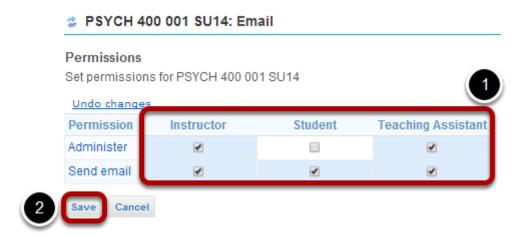

#### Go to Email.

Select the **Email** tool from the Tool Menu of your site.

#### Click the Permissions button.

#### Modify the permissions for the roles listed.

- 1. Check the box next to each permission you would like to allow for a given role. (Deselecting a box will remove the corresponding permission.)
- 2. Click **Save** to save your changes.

Note: You may see different roles listed depending on the roles which exist in your site. A role must be present in the site in order for you to modify its permissions.

## **Email Archive**

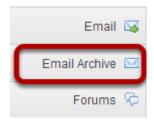

### What is the Email Archive tool?

The Email Archive tool allows site managers to specify an alias email address which essentially serves as a listserv for the site. By default, email you send to the site email address is copied to the email addresses of all site participants and owners. All email messages sent to your site's email address are stored in the Email Archive. You can use any email program to send mail to the email address listed at the top of your Email Archive page.

Site members can use <u>Preferences</u> in My Workspace to choose how often they want to receive email sent to the site's email address: either as it is sent, or in digest mode, with all posts for the day sent in a single email message.

Note: You cannot use Email Archive to send mail to particular individuals. To send messages to individual participants or a group, use either the <u>Messages</u> tool (for internal course mail) or the <u>Email</u> tool (for external institutional mail).

## To access this tool, select Email Archive from the Tool Menu in your site.

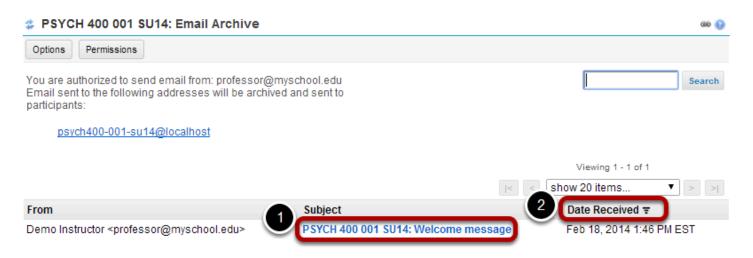

## **How do I view Email Archive messages?**

#### Go to Email Archive.

Select the **Email Archive** tool from the Tool Menu in your site.

## Viewing Email Archive messages.

- 1. Click on a message to view the message content.
- 2. Clicking a column header (From, Subject, or Date Received) will sort the email messages by that header. Click the header again to reverse the order.

Sakai 10 Instructor Guide

# How do I send messages to the Email Archive?

Note: You cannot use Email Archive to send mail to particular individuals. To send messages to individual participants or a group, use either the <u>Messages</u> tool (for internal course mail) or the <u>Email</u> tool (for external institutional mail).

#### Go to Email Archive.

Select the **Email Archive** tool from the Tool Menu in your site.

## Locate email address for sending messages to the archive.

- 1. Above the site address, you'll see a message telling you if you are authorized to send email. If this site is set up to accept mail only from site participants, you will also see the address from which you are authorized to send email; use this account to send messages to the site address.
- 2. On the Email Archive screen, under "Email sent to the following addresses will be archived and sent to participants", you'll see the site email address. Send email to your site's Email Archive address from your email account, just as you would to any other email address.

Sakai 10 Instructor Guide

## How do I modify the Email Archive options?

#### Go to Email Archive.

Select the **Email Archive** tool from the Tool Menu of your site.

#### **Click Options.**

#### Select the desired settings.

Choose the radio button for the settings you want to enable. You can customize the following settings:

- 1. Accept Messages From: You can choose to allow anyone to send mail to the Email Archive address, or to allow only site participants to send mail.
- 2. Set the reply-to address: You can set the reply-to address for messages sent through the archive so that users automatically reply to the original sender or to the Email Archive address.
- 3. Send messages to: You can choose to send email to site participants as well as archiving the messages, or you can choose to archive messages without emailing the site participants.

Sakai 10 Instructor Guide

Page 171

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Customize the site email address.

If you would like to customize the site email alias to make it easier to remember, you can modify the address here.

## Click Update Options to save your settings.

**Page 172** Sakai 10 Instructor Guide

# How do I change the Email Archive permissions?

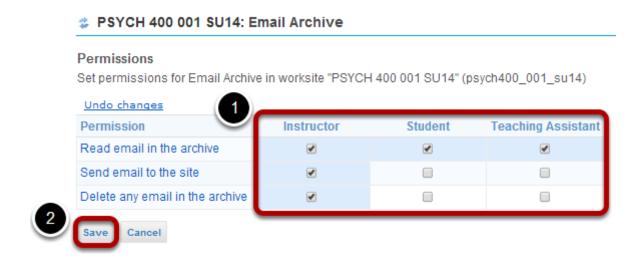

#### Go to Email Archive.

Select the **Email Archive** tool from the Tool Menu of your site.

#### Click the Permissions button.

### Modify the permissions for the roles listed.

- 1. Check the box next to each permission you would like to allow for a given role. (Deselecting a box will remove the corresponding permission.)
- Click Save to save your changes.

Note: You may see different roles listed depending on the roles which exist in your site. A role must be present in the site in order for you to modify its permissions.

## **External Tool (LTI)**

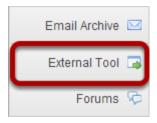

## What is the External Tool (LTI)?

The External Tool (LTI) allows you to include tools that support the IMS Basic Learning Tools Interoperability standard in your sites. The External Tool (LTI) launch protocol securely sends user, site, and role information to the external tool using the OAuth (www.oauth.net) security mechanism.

The site owner or the system administrator can configure this tool. If the system administrator pre-configures an External Tool, it appears in the list of tools like any other tool that can be added to the site by the site owner via <u>Edit Tools</u> in <u>Site Info</u>.

For more information or assistance, please contact your local support team. For more details on the technical aspects of the IMS LTI standard, go to <a href="https://www.imsglobal.org">www.imsglobal.org</a>.

## To access this tool, select External Tool (LTI) from the Tool Menu in your site.

# How do I configure the External Tool (LTI) settings?

#### Go to External Tool (LTI).

Select the External Tool (LTI) from the Tool Menu of your site.

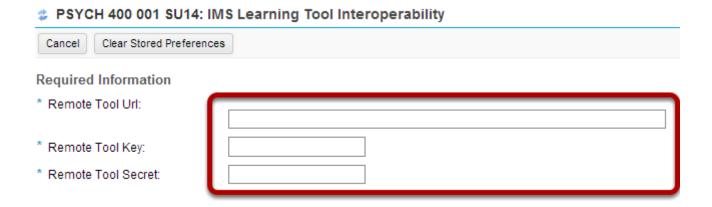

#### Click on Edit.

When you enter the External Tool initially, you will see a message saying that it has not yet been configured.

Click on the **Edit** icon in the upper right hand corner of the tool, near direct link and Help icons.

## **Configure the External Tool settings.**

The site owner can set up a link to any external tool by configuring the External Tool (LTI) manually. When you make arrangements with an external tool provider, they will provide you with a launch URL for the tool, key, and a secret. These values must be entered as part of the configuration of the tool. Make sure not to reveal these values to the other members of the site. Once you have entered these values into the tool, it can properly sign launch requests. Site members who are not site owners cannot see the configuration screen for the tool.

Sakai 10 Instructor Guide

Page 176

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Display options.

You can indicate the button text and tool title location here.

#### **Gradebook settings.**

If you want the tool to send information to the Gradebook, you can enter a gradebook item here.

#### **Launch window information. (Optional)**

Optional Launch Information	
Open in a New Window:	
Maximize Window Width:	
iFrame Height:	
Debug Launch: When Debug Launch is selected, the	e tool pauses before launching and displays launch data

You can select to open the tool in a new window, or set the iframe to a particular size. You may also opt to set it to "Debug Launch" which displays the launch data and can be helpful in troubleshooting the tool configuration.

Sakai 10 Instructor Guide

Page 177

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **User Information**

Releasing Roster Information
Send Names to the External Tool
Send Email Addresses to the External Tool These options allow you to control which information is released to the external tool. Some tools may require roster information to function.
Allow the External Tool to retrieve the course roster
Allow the External Tool to remotely install tools in Lessons

The External Tool (LTI) configuration also includes the ability to send or suppress user identity information to the external tool such as the user's name or email address. In addition, you can set the frame size, as well as the button and title text for the tool from the configuration screen. (If the tool you are working with was created by a system administrator, they may have already pre-configured and locked a number of the configuration options for the tool.)

#### **Storing Tool Settings. (Optional)**

#### Storing Tool Settings

Allow the External Tool to store and retrieve its settings

This allows the External Tool to store and retrieve its own settings in this placement. This only gives the tool access a scratch area to store and retrieve its own settings. It does not give the tool any access to any of the other setting.

This option allows the external tool to store and retrieve its own settings.

#### Splash Screen. (Optional)

# Splash Screen This text will be displayed to users before they are sent to the External Tool. You cannot use HTML in this field.

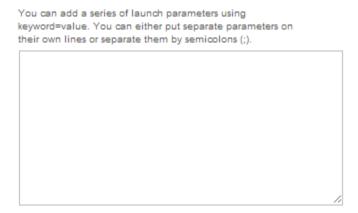

If you would like to display custom text to users before they are redirected to the external tool, you may enter it here.

**Page 178** Sakai 10 Instructor Guide

Note: This field is plan text only. HTML is not allowed.

#### **Custom launch parameters. (Optional)**

#### **Custom Launch Parameters**

If you would like to add custom launch parameters, you may do so here.

## Click Update Options to save your configuration settings.

Sakai 10 Instructor Guide

## **Forums**

# What is the Forums tool?

The Forums tool allows instructors or site leaders to create an unlimited number of discussion forums, and is integrated closely with other tools such as Resources and Gradebook.

A **Forum** is a mandatory category or grouping for topics. **Topics**, which are created within forums, are where participants can post conversations. A Conversation is the thread of messages in which participants post their contributions. A conversation can be created by instructors or students inside of a topic.

Some the features in the Forums tool include:

- Grading: Interactions can be assigned a point value and sent to the Gradebook with comments.
- Availability dates: Forums and topics can be released according to specified dates.
- Moderation: Instructors can choose to moderate messages posted to topics.
- Counts of unread posts at a glance: On your site's Home page (select Home on the site's menubar), you can see how many unread messages or posts you have in both Messages and Forums. From My Workspace, you can see these totals for all sites in which you are enrolled.
- **Email notifications**: Site members can elect to receive no email notification, notification for all new postings in a site, or notification for responses to conversations they've posted in. The default is to receive notifications about new postings in conversations to which you have contributed.
- **Statistics**: Forum statistics are available for site owners to determine the participation level of individual participants. You can also read all of a particular participant's posts using this feature.
- Post before reading option: The site owner (or another participant with the appropriate role) can enable participants to submit their posts to a topic before they have permission to read the responses of others.
- **Group awareness**: Site leaders can change forum and topic settings in combination with predefined groups to allow or deny access to specific discussions per group.
- Direct link to individual messages: Site leaders can copy a direct link to individual messages to use elsewhere.
- Composing messages: A rich-text editor allows rich text, plain text, and HTML editing. You can add attachments to any message by linking to files or web links in Resources.
- Quoted text: Use the Insert Original Text option to insert the previous post into your response.

Sakai 10 Instructor Guide **Page 181**  • **Email the author of a message**: Site leaders can directly email the author of a posting from within the Forums tool.

Note: A forum with the name of the site and a topic titled "General Discussion" are created by default.

# To access this tool, select Forums from the Tool Menu in your site.

Sakai 10 Instructor Guide

Page 182

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/bu/4.0/

# How do I create forums and topics?

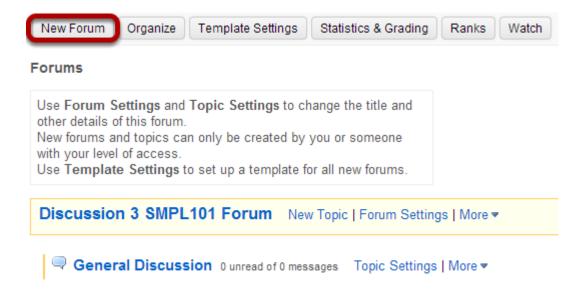

The **Forum** tool is organized by **Forums**, **Topics**, and **Conversations**.

- A **Forum** is a mandatory category or grouping for topics. There may be more than one Forum in the course or project site.
- **Topics** are required within Forums in order for site participants to be able to post, read, and reply to messages.
- Conversations are messages or threads of discussion posted within a Topic.

#### **Access the Forums**

Select the **Forums** tool from the Tool Menu.

#### Click New Forum.

By default, new sites are populated with a single forum titled after the name of the site, and containing one topic for General Discussion. The default forum and topic may be edited for posting messages, add more topics to the existing forum, or add a new forum.

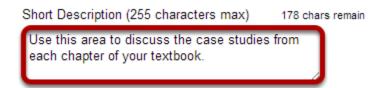

Click the **New Forum** button to add a new forum.

#### Title the Forum

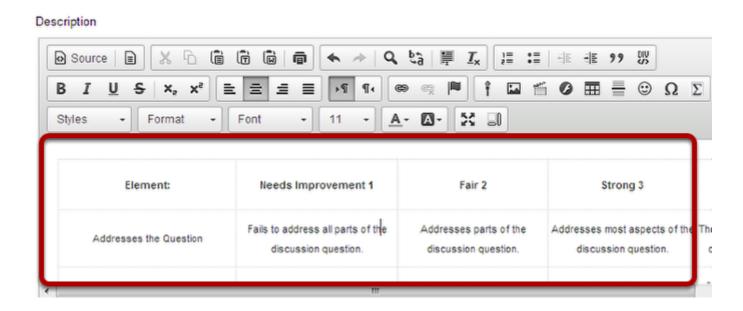

Forum titles are required. Name the forum a title to easily identify the types of topics expected within it. Remember that users post messages within topics, not forums. Forums are a grouping or classification of topics.

## **Enter a short description**

If desired, enter a description into the text box provided. The **Short Description** field only allows a maximum of 255 characters and does not allow formatting of text. This information is displayed to the user when they view the Forum tool.

# Enter a detailed description.

Sakai 10 Instructor Guide

Page 184

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

To provide more detailed instructions about the items in this forum, use the **Description** area to enter the information. This area includes the **Rich Text Editor** and allows for more advanced formatting options.

#### Add attachments

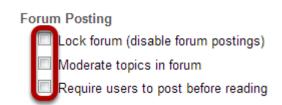

Additionally, file attachments to the forum. Click the **Add attachments** button to browse for and select a file.

#### View attachments

After a file is attached, the file name, file size, and file format will be displayed.

# Select forum posting options.

There are several forum posting options from which to choose. Remember, any settings selected here will apply to all of the topics within this forum by default. (However, these may be overridden the settings on an individual topic if desired.)

- **Lock forum:** This option locks the forum so users can no longer post messages. However, they can continue to read existing messages.
- **Moderate topics in forum:** This option means all messages posted within topics in this forum, must be approved by the instructor before other students can see them.

Sakai 10 Instructor Guide

Page 185

This work is licensed under a Greetive Commons Attribution 4.0 Intl. License, http://greetive.commons.org/licenses/bu/4.0/

Require users to post before reading: Selecting this option requires users to post their
own response first, before they can view other messages posted previously. This is a good
option to select if the Instructor wishes students to respond to a discussion prompt before
seeing other student responses.

# Select availability.

#### Availability

- Show immediately
- Specify dates to open (show) and/or close (hide)

The default option is to **Show Immediately**, or choose to **Specify dates to open (show) and/or close (hide)**.

Tip: Setting open and close dates at the forum level can be tricky because individual topics may also have specified dates. However, the forum must be visible in order for the topics within the forum to be available to students. Typically, instructors set open/close dates at the topic level only.

# **Select Read Options**

Mark All Messages in Conversations Read

The default option is to unchecked, allowing the user mark each post as read after reading. Selecting this option will mark all messages within a conversation, or thread, as read.

# **Specify Gradebook item**

#### Grading

Gradebook Item: You can associate a grade from the Gradebook to this forum, but there are no existing Gradebook items.

When grading forum posts, select a specific **Gradebook** item for the grades to be included in the Gradebook calculations.

Tip: Similar to open/close dates, associating with the Gradebook at the forum level is not always ideal because individual topics may also be graded. Faculty may prefer to grade discussions at the topic level.

Sakai 10 Instructor Guide

Page 186

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

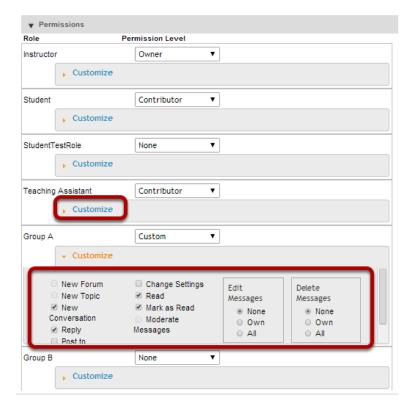

#### **Permissions**

In most cases, the default forum permissions are appropriate. By default, instructors are forum **Owners**, and all other site participants are **Contributors**. The forum owner may add and delete topics, modify permissions, edit the forum and topic descriptions, etc. Contributors may only read, post and reply to messages.

To modify the default permissions, click **Customize** to expand the permission settings.

#### **Modifying Permissions**

Forum permissions may be customized for different user roles, or for groups within the class. Select the drop-down menu next to each role/group to choose one of the pre-configured options (i.e. Author, Contributor, None, Non-editing Author, Owner, Reviewer),

Click the **Customize** button to the right to further expand the options and for more granular custom permissions.

Note: Group role permissions display once they are created.

Sakai 10 Instructor Guide

Page 187

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# Save and add topic.

Once completed, scroll to the bottom of the page and select the **Save Settings & Add Topic** button.

Note: All forums need at least one topic to be active

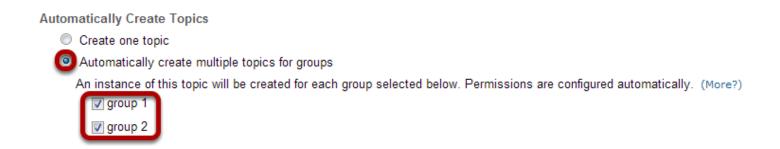

## **Topic Settings.**

Topic settings are identical to forum settings except these settings apply to a <u>single</u> topic, not all of the topics in the forum. Topics must be created within Forums in order for site participants to be able to post, read, and reply to messages.

An additional option within a Topic settings is Automatically create topics for groups

Tip: To keep all of the same settings that selected on the forum level, just specify a title and (optionally) a description for the new topic.

#### **Automatically create topics for groups**

To create multiple, private group topic areas, select the radio button for **Automatically create topics for groups** and then check the box next to each group for which a topic should be created. The Student role will automatically be set to the permission level of "None". Each group will be set to "Contributor" in their group's topic and "None" in other automatically created topics.

#### Save.

Sakai 10 Instructor Guide

Page 188

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

If this completes the topic/s to be added to this forum, click on the **Save** button at the bottom of the screen to save your topic settings. To add additional topics to this forum, click on the **Save Settings & Add Topic** button to add another topic.

# How do I organize forums and topics?

Forums may be rearranged to change the order in which discussions are listed.

#### Go to Forums.

Select the **Forums** tool from the Tool Menu of your site.

# **Select the Organize button**

### Select the appropriate number next to the Forum or Topic

The numeric pull down menu allows for reordering the Forum, Topic or both. Select the appropriate number for the order the content should appear.

Sakai 10 Instructor Guide

Page 190

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# **Click Save**

After you placed the forums and topics in the desired order, click **Save**.

# How do I add a new topic?

A Forum must contain a Topic for users to create a post. (See also How do I create Forums and Topics?)

#### Go to Forums.

Select the **Forums** tool from Tool Menu in your site.

## **Select New Topic.**

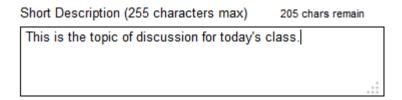

# Create a topic title.

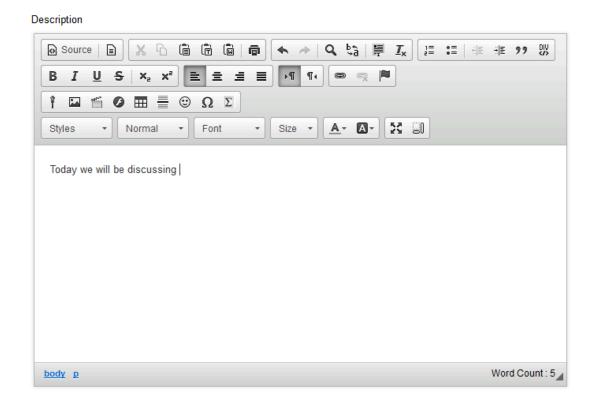

Topic titles are required for every topic.

# Create a short description.

Be aware that this short description only allows a maximum of 255 characters.

# Create a detailed description.

This description box allows the use of Rich Text Editor.

#### Add attachments.

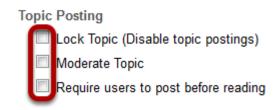

If desired, there is an option to upload attachments.

# Create personalized settings.

Topic Posting	
Lock Topic (Dis	able topic postings)
Moderate Topic	
Require users t	o post before reading
Availability	
Show immedia	itely
<ul><li>Specify dates</li></ul>	to open (show) and/or close (hide)
Mark All Messages i	n Conversations Read
Automatically	mark all messages in a conversation as read
Grading	
Gradebook Item:	You can associate a grade from the Gradebook to this topic, but there are no existing Gradebook items.

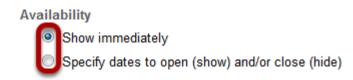

This section allows for the personalization of topic settings in terms of visibility, availability, and grading.

# Select from topic posting options.

The Topic Posting option regulates where the topic is **locked** from topic postings, is **moderated** by the instructor, and/or if the user is **required to post before reading** other posts to the topic.

## Select level of availability.

#### Select if all read messages should be marked.

Mark All Messages in Conversations Read

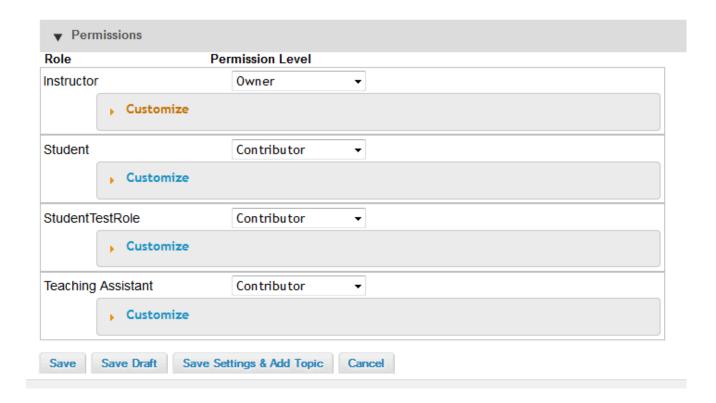

Automatically mark all messages in a conversation as read

## Select grading options.

This options allows for the particular Forum topic to be linked to <u>Gradebook</u> (grading options will be regulated in Gradebook itself).

# Moderate the permission level of roles.

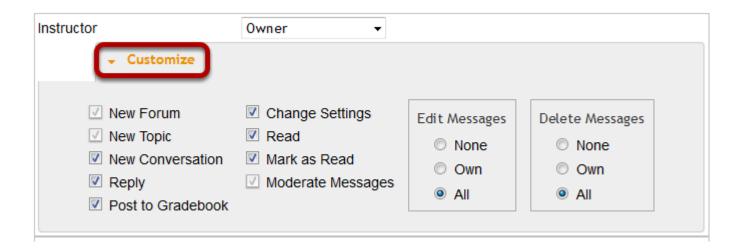

This section allows the user to regulate the Permission Level of each user. These options include **Author**, **Contributor**, **None**, **Nonediting Author**, **Owner**, **Reviewer**, and **Custom**.

Sakai 10 Instructor Guide

Page 195

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### **Customize settings.**

After selecting the **Customize** drop-down arrow, there are a wealth of settings that pertain to the level of permission each role has and the settings that are available to each corresponding role. Please note that selecting a **Permission Level** (noted in the last step) will automatically check corresponding boxes. There is only a need to manually check boxes if a **Custom Permission Level** is desired.

# Save the topic.

The topic can be saved in three different ways. Click **Save** to save and publish the topic. Click **Save Draft** to save the topic without publishing it for other users to view. Click **Save Settings & Add Topic** to save the topic, publish the topic, and begin a new topic with the same settings as the previous topic. There is also an option to **Cancel** the topic.

# How do I post to a forum?

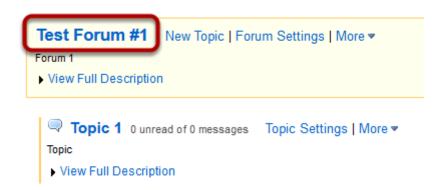

Forums are organizational units that group topics within the site. You cannot post directly to a forum, you must first enter a topic and post your message there.

In order to post to a forum topic, you will **Start a New Conversation** or thread.

#### Go to Forums.

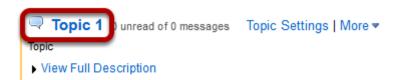

Select the **Forums** tool from Tool Menu in your site.

#### Choose a forum.

This is an example of a forum. The forum title will appear in bold and in a larger font than the topic titles indented beneath it. If you would like to view more information about the forum, you may click **View Full Description** to view any additional information provided by the site owner.

# Select a topic within the forum.

This is an example of a forum topic. If you would like to view more information about the topic, you may click **View Full Description** to view any additional information provided by the site owner.

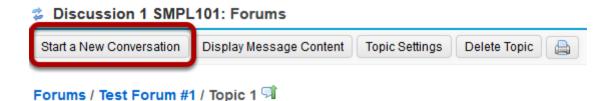

Sakai 10 Instructor Guide

Page 197

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Click on the title of the topic to enter that topic.

#### **Click Start a New Conversation.**

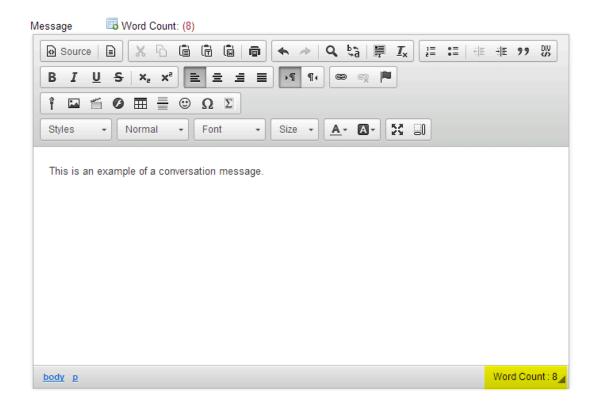

This button is located at the top of the page, below the title of the course. Starting a new conversation is the same thing as starting a new thread.

After you click the **Start a New Conversation** button, the message composition window will appear.

#### Enter a title.

* Title		
Create your title here		

#### Enter a message.

This description box allows the use of Rich Text Editor.

Note: The message box will keep track of word count in the lower right corner.

# Add any attachments. (Optional)

If desired, there is an option to upload attachments to the conversation. Click **Add attachments** to browse for and select your file.

#### Click Post.

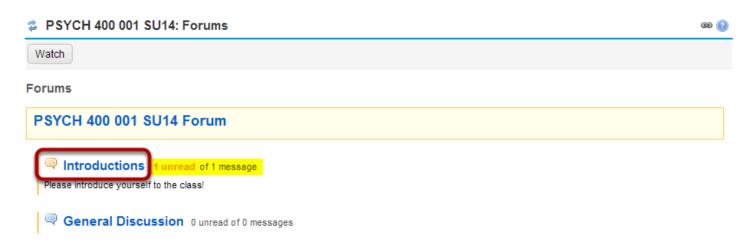

After completing the conversation, click <b>Post</b> to make the conversation viewable.							

# How do I reply to a forum post (i.e. conversation)?

#### Go to Forums.

Select the **Forums** tool from Tool Menu in your site.

## Choose a topic within a forum.

Click on the title of the topic to enter the topic.

Note: The message indicator text next to the topic title will tell you how many messages have been posted within that topic, and how many of them are new or unread.

# Click on the title of an existing post to view the conversation.

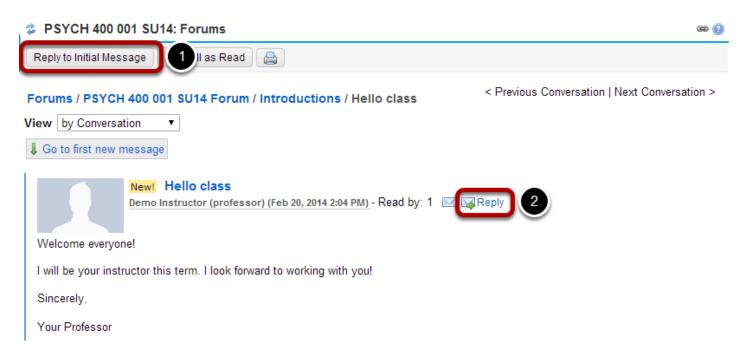

Sakai 10 Instructor Guide

Page 201

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# Click reply.

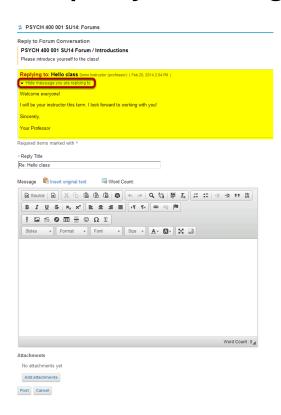

You have two different options for replying to the post within the Forums tool.

- 1. Click **Reply to Initial Message** at the top of the conversation to reply to the first message in the conversation or thread.
- 2. Click the **Reply** link within the message itself to reply to the item you are currently viewing. This is the option you want to use if you would like to reply to someone else's reply.

Sakai 10 Instructor Guide Page 202 This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

# Compose your message.

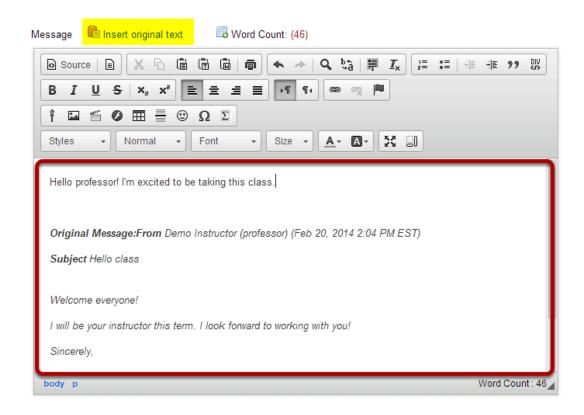

The message you are replying to will be displayed at the top. You can hide the message by clicking on the **Hide message you are replying to** link.

# **Edit the reply title. (Optional)**

The title will be taken from the initial message and prefilled for you, but you may modify it if you wish.

#### Enter your message.

Use the Rich Text Editor to compose your response.

Note: You may optionally click on the **Insert original text link** above the editor area to include the original message along with your reply.

## Add attachment. (Optional)

Click the **Add attachments** button if you would like to browse for and attach a file.

#### Click Post.

After you have finished your reply, click <b>Post</b> to add your message to the conversation.							

# How do I email a forum post author?

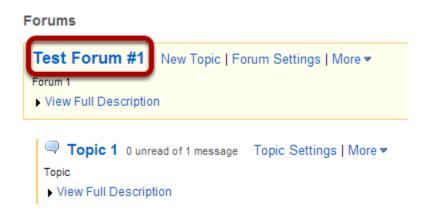

This outlines the process of contacting an author of a Forum post by email.

Note: This email reply option sends a message to the author's external email address. It does not use the internal Messages tool to send the message.

#### Go to Forums.

Select the **Forums** tool from Tool Menu in your site.

#### **Choose a Forum**

This is an example of a **Forum**, bolded and in the largest comparative font. Click **View Full Description** to view more information about the **Forum**.

# Select the Topic within the Forum

This is an example of a **Forum** topic. Click **View Full Description** to view more information about the **Topic**. Otherwise, select the Topic.

## **Select the Conversation**

Select a **conversation**, or thread by the particular Forum post author.

#### **Click Email**

Click **Email** in order to email the Forum post author.

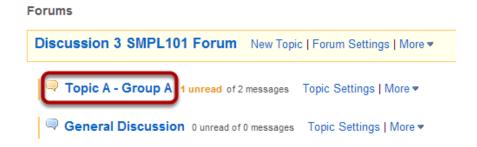

Page 207 Sakai 10 Instructor Guide

# How do I delete a forum post (i.e. conversation)?

#### Go to Forums.

Select the **Forums** tool from Tool Menu in your site.

# Choose a topic within a forum.

Click on the title of the topic to enter the topic.

#### Select a conversation from list.

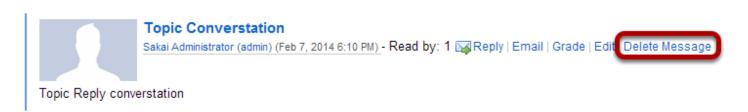

Click on the title of the conversation.

Sakai 10 Instructor Guide

Page 208

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# Click delete message.

Click **Delete Message** and the conversation on the particular topic will be removed.

# How do I moderate a topic?

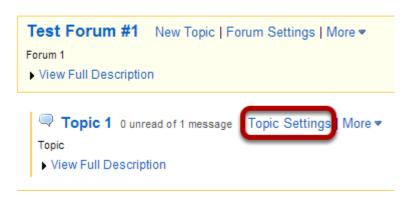

A moderated discussion allows the instructor to review and approve a discussion posting before the participants may view the post. When a discussion is moderated, each message submitted by a participant must be reviewed and approved before other participants may read them.

#### Go to Forums.

Select the **Forums** tool from the Tool Menu in your site.

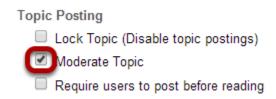

## **Click Topic Settings.**

#### **Forums**

Click **Topic Settings** to moderate a particular Topic.

# Check the box next to Moderate Topic.

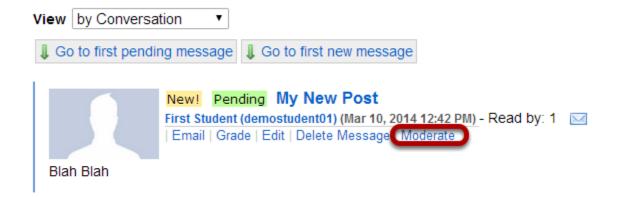

Select the **Moderate Topic** option in the settings and then scroll down and click **Save**.

# **View Pending Messages.**

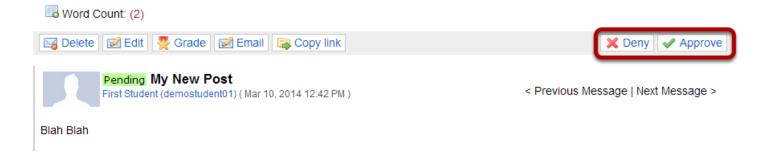

All messages pending approval will display Pending highlighted in green next to the message. Click on the title of the message to view it.

#### Click Moderate.

# Approve or Deny pending posts.

Click either **Deny** or **Approve** to moderate the message. Approved messages will be visible to the rest of the site participants. Denied messages remain visible to the instructor only.

Sakai 10 Instructor Guide

Page 211

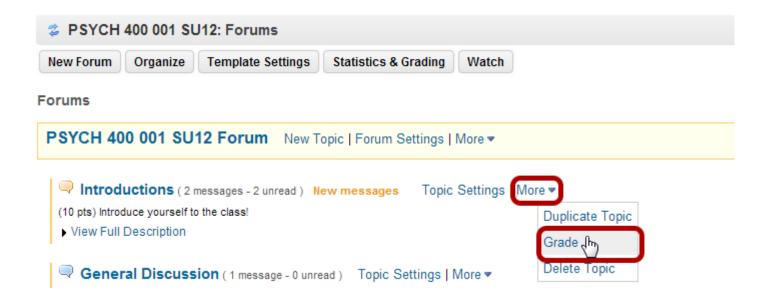

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# How do I grade discussion forums?

#### Go to Forums.

Select the **Forums** tool from the Tool Menu in your site.

# Select the Topic you want to grade.

Click on the **More** link for the Topic you want to grade, and then select **Grade** from the list of expanded options.

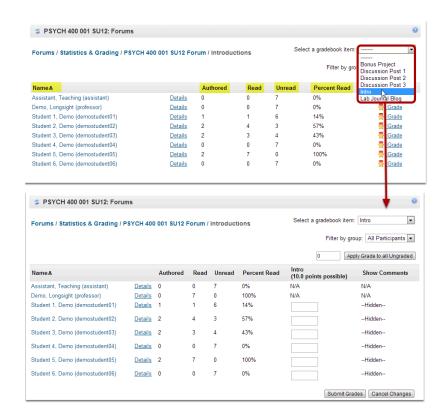

Note: You may grade by either Forum or Topic. The grading process is very similar. However, most faculty prefer to grade by Topic, since a Forum may contain several different Topics and each Topic may represent a separate gradebook item or score.

Sakai 10 Instructor Guide

Page 212

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# Select a gradebook item.

You will see a list of site participants along with summary statistics for each user on number of posts authored, read, unread, and percent read in the current topic. You may sort the list by any of those columns by clicking on the column title if you choose.

Select the gradebook item where you would like to record the scores for this topic from the drop-down menu in the upper right corner. Once you select a gradebook item, the screen will change to display a grade entry column where you may enter points.

Note: If you already associated your Topic with a gradebook item, then you do not need to complete this step. You should have been taken directly to the grade entry screen.

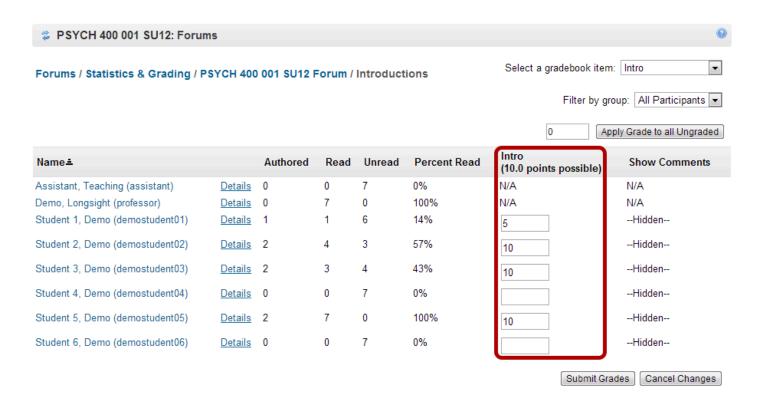

# View posts.

To view posts, click on the author's name. A pop-up window will open showing the message/s posted by that author. Notice that the Word Count in each post is also shown.

Click the **Close Window** button to close the pop-up window and return to the grade entry screen.

# Enter points.

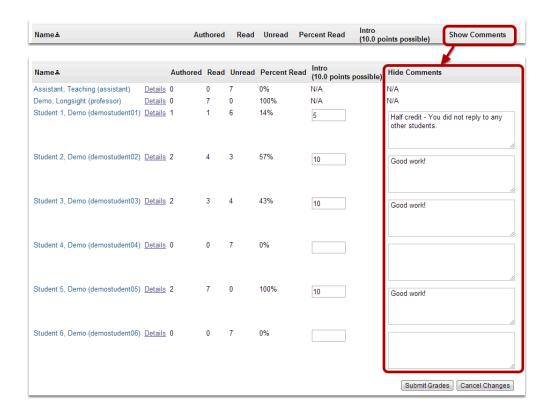

Sakai 10 Instructor Guide

Page 214

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Enter points into the grade entry column.

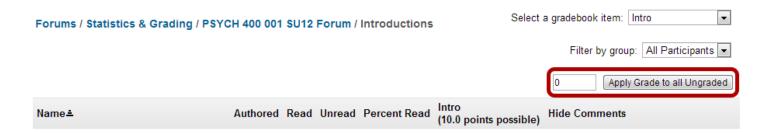

#### **Add Comments.**

If you would like to add comments, click on the **Show Comments** link to expand the comment column.

Enter your comments into the text boxes provided.

# Apply a grade to all ungraded.

If you would like to apply a single score to all ungraded items, enter the score to be applied and then click the **Apply Grade to all Ungraded** button.

Tip: This is a useful option if, for example, you would like to apply zeros to all students that did not post.

Sakai 10 Instructor Guide

Page 215

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# Submit grades.

After you have entered all of the grades and/or comments, scroll down to the bottom of the list and click the **Submit Grades** button to save your changes and send the grades to the gradebook.

# How do I move a thread to a different topic?

This option allows for a thread or conversation to be moved to a different topic.

#### Go to Forums.

Select the **Forums** tool from Tool Menu in your site.

## Select a forum topic.

The topics will be listed underneath the corresponding forum in smaller, bold font.

## Check the box next to the conversation to be moved.

All conversations, or threads, will be listed.

Sakai 10 Instructor Guide

Page 217

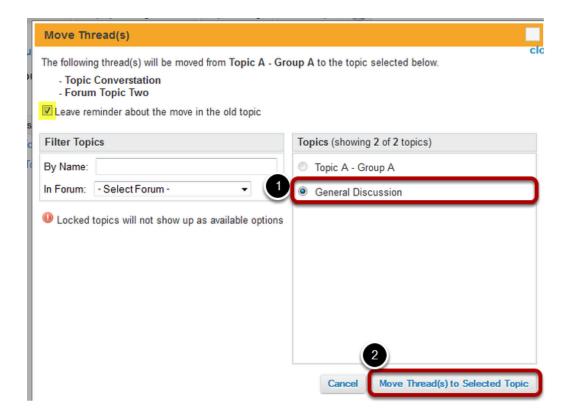

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

## Select move thread(s).

After selecting move threads, a box will open with options pertaining to the thread and where it will be moved.

# Select options and click Move Thread(s) to the selected topic.

- 1. The available topics will be shown on the right. Select the topic where you would like to move the thread.
- 2. Click **Move Thread(s) to Selected Topic** to continue.

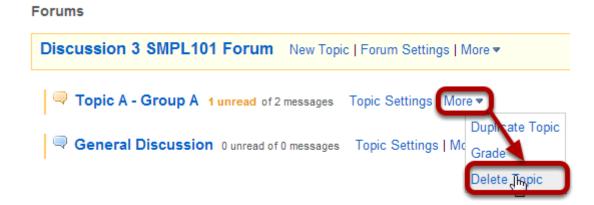

Tip: You may optionally select the check box to leave a reminder about the move in the old topic.

## How do I delete a topic?

#### Go to Forums.

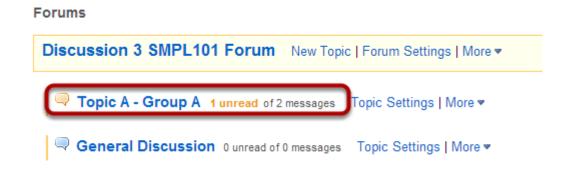

Select the **Forums** tool from the Tool Menu of your site.

## Select Delete Topic from the drop-down menu.

Click the **More** link next to the topic you want to delete, then chose the **Delete Topic** option from the drop-down menu.

## You can also click on the title of a topic to select it.

Topics are indented underneath each of the forums. Click on the title of a topic to enter that topic.

Sakai 10 Instructor Guide

Page 219

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### Then click Delete Topic from within that topic.

The **Delete Topic** button is located at the top of the page below the course name. This will **erase** the topic and all conversations on the topic from its particular forum.

#### Confirm deletion.

You will be prompted to confirm the deletion. If you are sure that you want to delete the topic and all of the messages within it, click the **Delete Topic** button.

Sakai 10 Instructor Guide

Page 220

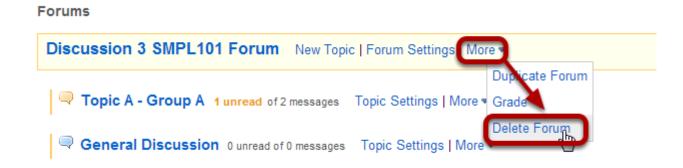

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## How do I delete a forum?

#### Go to Forums.

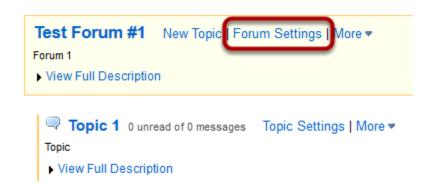

Select the **Forums** tool from the Tool Menu of your site.

## Select Delete Forum from the drop-down menu.

Click the **More** link next to the forum you want to delete, then chose the **Delete Forum** option from the drop-down menu.

# You can also click Format Settings next to the forum you want to delete.

## Then scroll down to bottom of page and click Delete Forum.

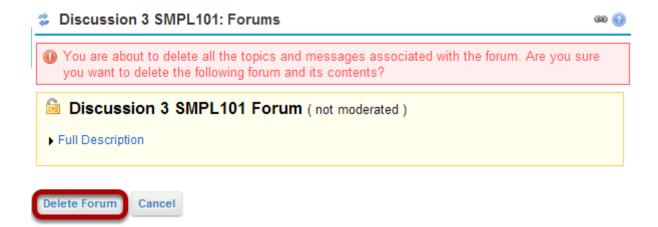

Sakai 10 Instructor Guide

Page 221

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## Confirm deletion.

Deleting a forum will remove the forum and everything associated with it, including all topics and conversations. If you are sure you want to delete the forum, click **Delete Forum** to remove it from the site.

Sakai 10 Instructor Guide

# How do I modify forum template settings?

**Template Settings** control the default settings of each created forum. These settings can be overridden for a specific forum or topic, but must be manually changed after the default settings template is created.

#### Go to Forums.

Select the **Forums** tool from the Tool Menu of your site.

## **Click Template Settings.**

## **Choose Forum Posting settings.**

Forum Posting				
Moderate topics in forums		Yes	0	No
Require users to post before reading	0	Yes	0	No

Template settings allows the option for all topics in forums to be moderated. There is also an option that requires users to post before reading.

## **Choose Availability settings.**

Show immediately
 Specify dates to open (show) and/or close (hide)

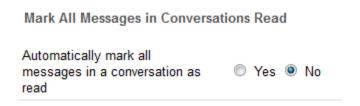

**Template Settings** allows the option for all **Forums** to be shown immediately after they are created or based on specified open (show) and close (hide) dates.

Sakai 10 Instructor Guide

Page 223

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## Choose if messages are marked "read".

Template settings allows the option for conversations to be marked read automatically.

## Select role permissions.

Template Settings allows the option to select permission levels within Forums based on user roles within the site. User roles can be given the title of Author, Contributor, None, Nonediting Author, Owner, Reviewer, and Custom. In the Customize drop-down menu, the check boxes are automatically selected based on the permission level selected. If the check boxes are manually chosen, this fulfills the Custom Permission Level.

Note: You may see different roles depending on whether your site is a course or a project, and whether or not there are any additional or custom roles in your local instance. For more information, see What are Permissions and Roles?

#### Click Save.

Click Save to save your settings (or Cancel to continue without saving).

## How do I watch or subscribe to forums?

In order to stay notified of recent posts on a forum, the Watch option is helpful in doing so.

Note: New post notifications will be sent to the user's external/institutional email address, not via the Messages tool.

#### Go to Forums.

Select the **Forums** tool from the Tool Menu of your site.

#### Click Watch.

## Choose your notification preference.

#### Watch Forums Options

Use the settings below to change what notifications you receive when activity in the forums of this site take place.

Send me an email whenever a new message is posted

Send me an email when a conversation that I have contributed to receives a new message

No notification

Select whether an email is desired for **every new message posted on the Forum**, **every new message posted on a Forum that the user has contributed to**, or **turn off all notifications**.

#### Click Save.

# Gradebook

## What is the Gradebook?

The Gradebook is a tool for instructors to calculate and store grade information and distribute it to students online.

Instructors can view information in the Gradebook in different ways, including an item summary for each course, item detail, all grade listing, course grade listing, gradebook setup, and course grade options.

Students can view their scores for all items; view their course grades, once an instructor releases them; and sort their items by title, due date, grade, and weight, where applicable.

The Gradebook is section aware, so teaching assistants can see grades only for students in their assigned sections.

Using the Gradebook, instructors can:

- Auto-calculate course grades, with the ability to override any course grade.
- Define course letter grades based on a 100% scale.
- Choose between point- or percentage-based grading.
- Add gradebook items for manually graded or offline activities.
- Create categories to organize items and allow for weighting of grades.
- Enter, view, edit, and release to students scores, grades, and comments.
- Collect and display scores from tools such as Tests & Quizzes, Assignments, and Forums.
- Export scores and grades to Microsoft Excel (in XLS format).
- Import item scores from spreadsheet (CSV) files.
- Export a printer-friendly (PDF) version of student grades.
- Drop grades or keep the highest grades in a category.
- Specify items or categories as extra credit.
- Viewing scores: The Gradebook lets students view their own scores and grades once instructors have released them.

# To access this tool, select Gradebook from the Tool Menu of your site.

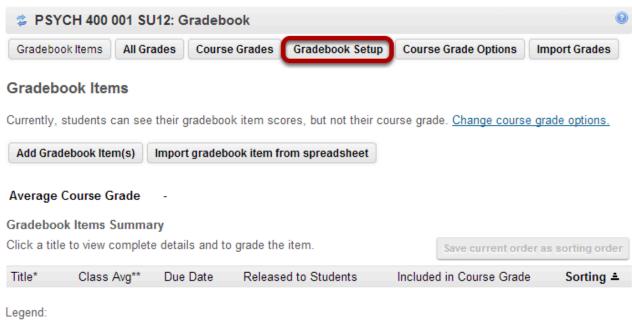

## How do I set up my Gradebook?

The Gradebook is the hub for all graded activities and points earned in your site.

#### Go to Gradebook.

Select the **Gradebook** tool from the Tool Menu in your site.

## Click Gradebook Setup.

<sup>\*</sup>Titles shown in grey are not released to students.

Click on the **Gradebook Setup** button.

**Page 229** Sakai 10 Instructor Guide

<sup>\*\*</sup>Class averages in parentheses () are not included in the course grade calculations.

<sup>\*\*\*</sup>These items must be graded from the tool listed and may not be graded from the gradebook.

## **Gradebook setup options.**

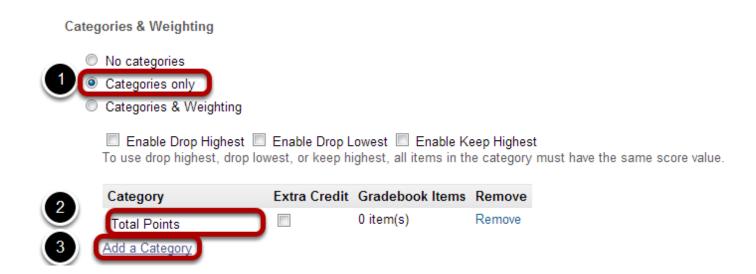

There are three different options in Gradebook setup.

- 1. **Grade entry:** You can select either a **Points** based gradebook or a **Percentage** based gradebook, depending on your preferred method for entering grades.
- 2. **Gradebook Items Display:** Check this box to allow students to view released items in the gradebook. (Individual items can be hidden or released when you create or edit items.)
- 3. Categories & Weighting: You can choose to have No categories, Categories only, or Categories & Weighting in your gradebook.

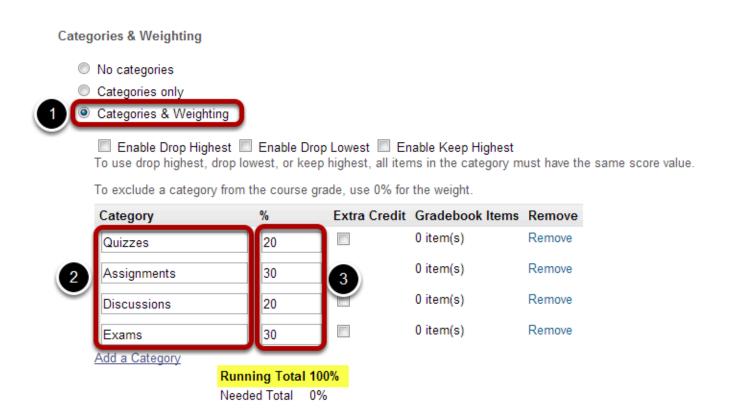

Tip: If you would like to be able to drop grades, you should select either **Categories only** or **Categories & Weighting**.

### Adding categories.

- 1. Select the radio button for **Categories only**.
- 2. Enter a title for the category in the text box provided.
- 3. If you need additional categories, click on the **Add a Category** link to enter additional category titles.

### Adding weighting.

1. Select the radio button for **Categories & Weighting**.

Sakai 10 Instructor Guide

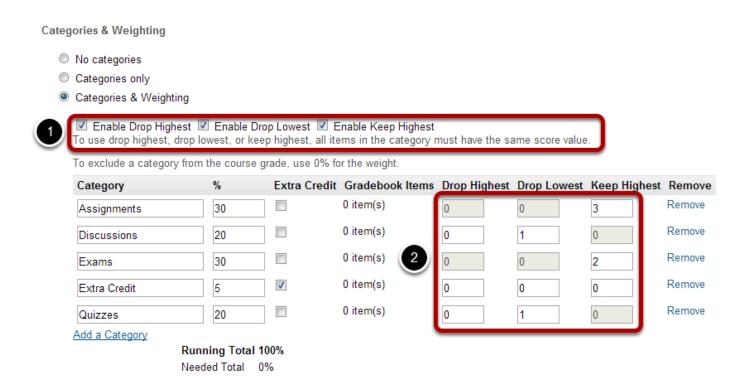

Page 231

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

- 2. Enter the different categories that you plan to weight in your grading scheme.
- 3. Enter the percentage weighting for each category.

Note: The percentage for all categories taken together must equal 100%.

### **Enabling drop lowest and/or keep highest.**

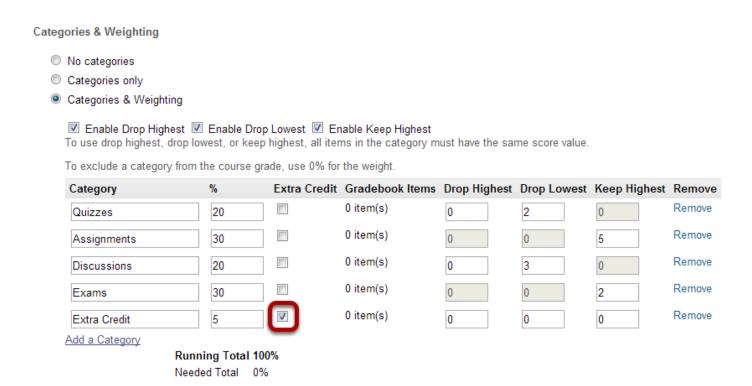

If you selected either **Categories only** or **Categories & Weighting**, the enable drop/keep options will appear. All items within a category must have the same score value in order to use the drop/keep options for that category.

- 1. Select the check box next to each of the desired drop/keep options.
- **Enable Drop Highest:** Automatically drops the highest score/s among items in a category.
- **Enable Drop Lowest:** Automatically drops the lowest score/s among items in a category.
- Enable Keep Highest: Automatically keeps the highest score/s among items in a category.
- In the appropriate column, enter the number of items in each category that you wish to drop or keep. You will notice that unavailable choices are grayed out. For example, you cannot both keep and drop items in the same category, so entering a number for one of these makes the other unavailable.

Tip: Many faculty prefer to use Keep Highest as opposed to Drop Lowest, since it reflects a more accurate running total of student grades during the course of the term. Items that students have not yet completed are not dropped automatically, so one or more higher scores may be dropped until all items have been completed.

### Extra credit category.

If you would like to designate a category as extra credit, select the check box in the **Extra Credit** column next to the category. Extra credit items add to the student's total grade, but points do not detract from the overall grade if not completed. For more information on extra credit, see <a href="How does extra credit work?">How does extra credit work?</a>

Tip: Both entire categories and individual gradebook items within any category may be designated as extra credit.

## Save your changes.

Once you have finished with your gradebook setup, don't forget to click on the **Save Changes** button at the bottom to save your changes.

Sakai 10 Instructor Guide

Page 233

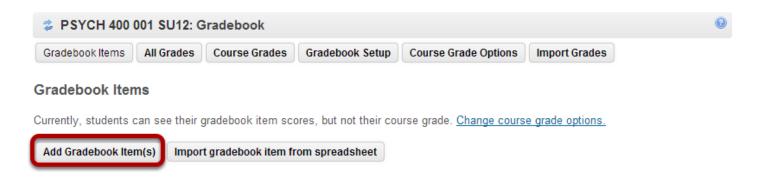

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/bu/4.0/

## How do I add items to the Gradebook?

#### Go to Gradebook.

Select the **Gradebook** tool from the Tool Menu in your site.

## Click the Add Gradebook Item(s) button.

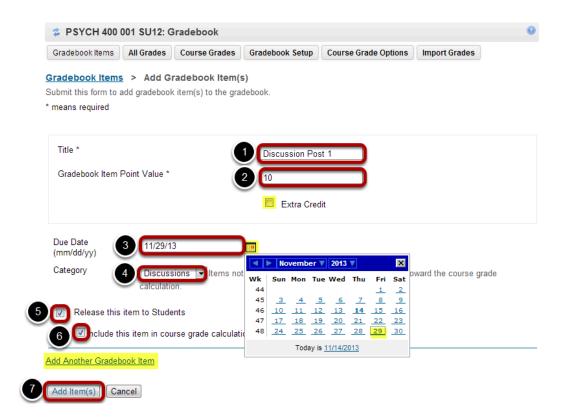

Note: Assignments, Quizzes, and Student Content in Lessons can be sent to the gradebook from within the respective tools when the item is posted or published. There is no need to add those items manually in the gradebook.

Instructors typically add items to the gradebook manually for things such as:

- Posting grades for items completed outside of Sakai
- Discussion Forum grades
- Attendance

Click the **Add Gradebook Items(s)** button to manually add items to your gradebook.

## Item settings.

- 1. Give your item a **Title** in the text box provided. A Title is required.
- 2. Enter the **Gradebook Item Point Value** for the item (also required).
- Optionally, if you would like this to be an extra credit item, you may select the check box for Extra Credit just below the point value. For more information on extra credit, see <u>How does</u> extra credit work?
- Enter a **Due Date** for the item if you choose. Due dates are optional. You may also use the calendar icon to pull up the date-picker and select a date from there.
- If you have categories in your gradebook, select the appropriate category for this item from the **Category** drop-down menu.
- Check the box for **Release this item to Students** if you would like students to be able to view their grades for this item. Leaving the box unchecked hides the item from students.
- Check the box for **Include this item in course grade calculations** if you would like the item to be added into the course grade. Leaving the box unchecked omits it from the course grade.
- Once you have entered all of the information for this item, click the Add Item(s) button to save your changes.

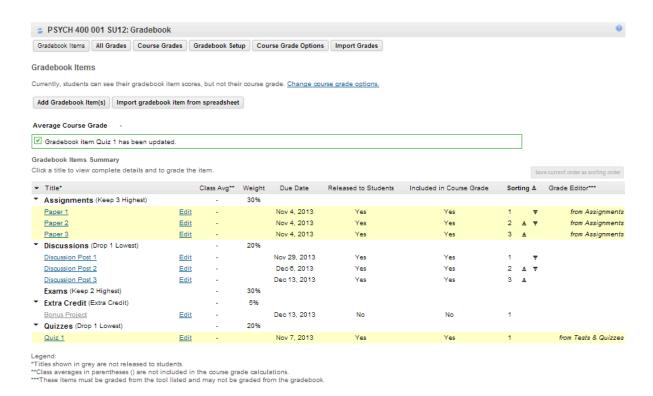

Tip: If you would like to add more than one item at a time, you may also click on the **Add Another Gradebook Item** link to add multiple items.

Sakai 10 Instructor Guide

Page 235

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## View gradebook items.

After you have added items to your gradebook, you will be able to view a list of all gradebook items on the **Gradebook** tool landing page.

Notice that any items which are coming from **Assignments** or **Tests & Quizzes** will be highlighted and the origin of the item will be noted in the **Grade Editor** column on the far right.

Also, notice that any items which are not released to students will appear in grey text.

# How do I enter and/or edit grades in the Gradebook?

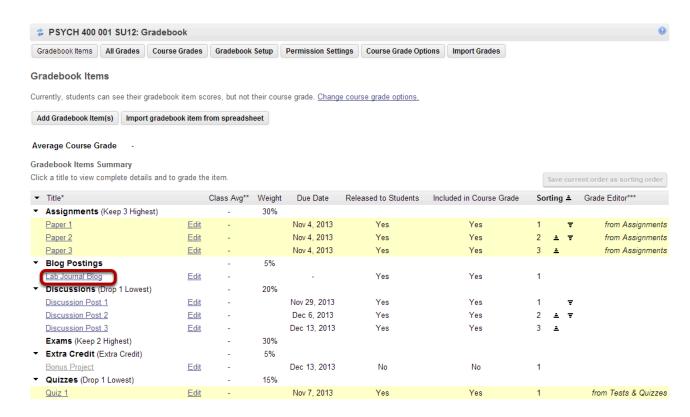

The Gradebook allows instructors to calculate and store grade information for items that are completed either online or offline. Manually added items may be entered and edited directly within the Gradebook interface.

Note: Grades that are being sent to the Gradebook from other tools, such as Assignments or Tests & Quizzes, are managed within their respective tools. You do not need to enter or edit them via the Gradebook.

## Go to Gradebook.

Select the **Gradebook** tool from the Tool Menu in your site.

## Select the gradebook item.

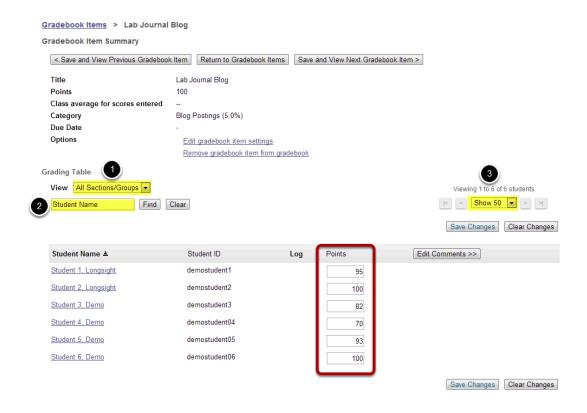

You will see a listing of all the existing gradebook items in your course.

Select the gradebook item for which you would like to enter grades by clicking on the title of the item, in this example we have selected the **Lab Journal Blog** item.

Note: Items highlighted in yellow are being sent to the Gradebook from other tools, as indicated in the "Grade Editor" column. You cannot edit those grades from the Gradebook, although you can view them from here,

## Enter grades.

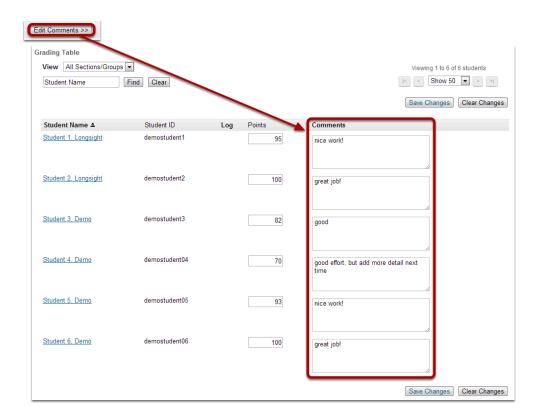

A summary of the gradebook item and the points possible will display at the top. You will also see a list of all the students enrolled and active in your site.

Note: You may also filter the gradebook to view students by:

- 1. Sections/Groups
- 2. Student Name
- 3. Viewing a certain number of students at a time

Enter grades by typing the scores into the **Points** column.

#### **Click Edit Comments.**

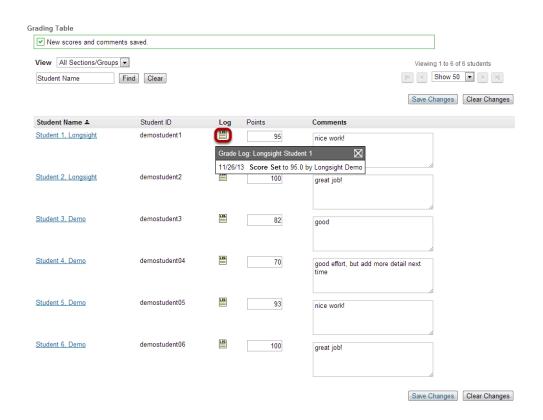

If you would like to enter additional comments along with the score, click the **Edit Comments** button to expand the Comments section. You may then enter your comments into the text areas provided.

## Save changes.

Don't forget to save your changes! The **Save Changes** button appears both at the top and the bottom of the page.

## View grade Log.

Notice that once you have saved your grades, a Log icon will appear in the Log column. If you click on the icon, a pop-up window will display the date, score, and name of the user that entered the grade,

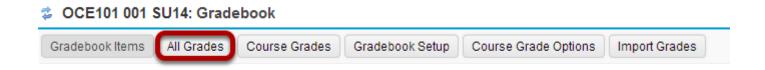

# How do I export grades from the Gradebook?

There are two locations in the Gradebook where you can export grades: from **All Grades** or from **Course Grades**.

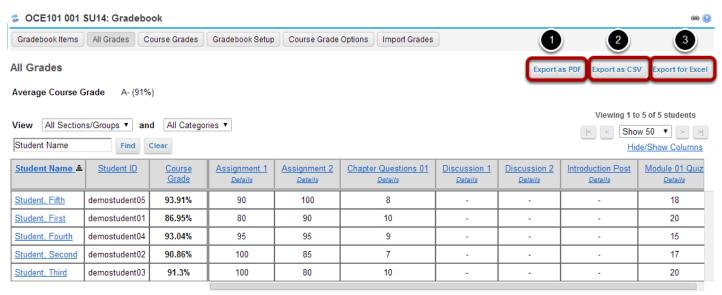

#### Go to Gradebook.

Select the **Gradebook** tool from the Tool Menu of your site.

#### Click All Grades.

## Select your export format.

Legend:

Dropped grades are struck out.

Sakai 10 Instructor Guide

Page 242

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/bu/4.0/

<sup>\*</sup>Grades in parentheses () are not included in the category average or course grade calculations.

<sup>\*\*</sup>Items with a grey background are not released to students

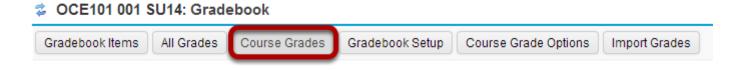

Course grade overrides are highlighted red.

All Grades will take you to a spreadsheet-style view of your student grades with all of the individual gradebook items shown. You have three format options for exporting the student grade data. Click on the button for your preferred export format.

- 1. **Export as PDF**: This will create a printer-friendly PDF document of your gradebook.
- 2. **Export as CSV**: This will create a comma separated variable (CSV) file that can be opened in any spreadsheet program, or text editor.
- Export for Excel: This will create a Microsoft Excel format file that will open in Excel for editing/printing.

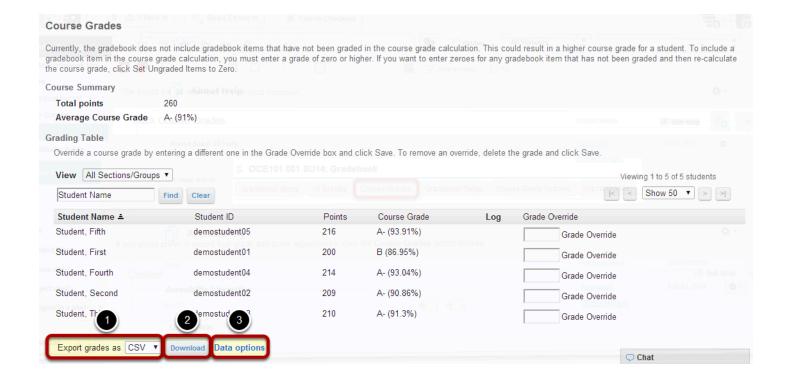

The export file will download to your local computer.

#### Click Course Grades.

If you would prefer to export final grade and score adjustments, click the **Course Grades** button instead.

#### Choose your export options.

In the Course Grades screen, you also have several options:

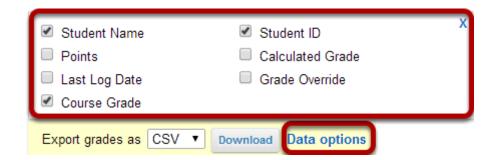

Sakai 10 Instructor Guide

Page 243

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

- 1. Choose the desired export format from the **Export grades as** drop-down menu. You may choose from PDF, CSV, or Excel.
- 2. Click the **Download** button to download the export file to your computer.
- 3. You may also click **Data Options** to modify the settings for the data that will be included in the export.

#### **Data Options.**

If you click **Data Options**, you will be able to choose which items to include in the export.

- Student Name
- Student ID
- Calculated Grade
- Points
- Last Log Date
- Grade Override
- Course Grade

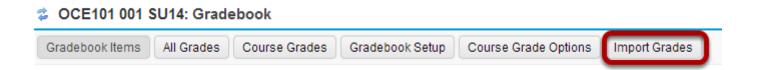

Check the boxes for the items you would like to include.

## How do I import grades into the Gradebook?

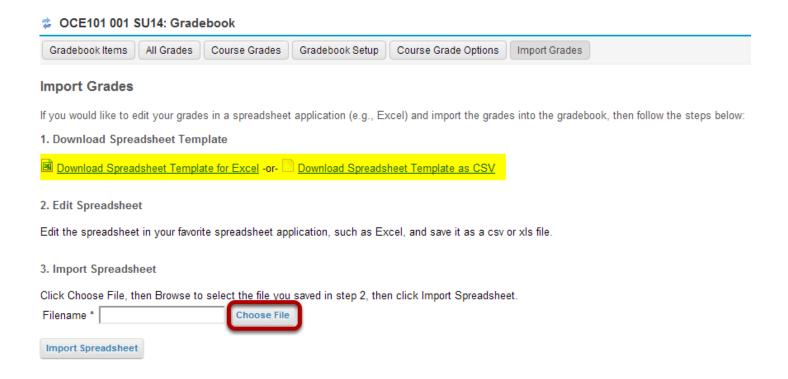

#### Go to Gradebook.

Select the **Gradebook** tool from the Tool Menu of your site.

## **Click Import Grades.**

## Click Choose File.

Click the **Choose File** button to browse for and select your import file.

Note: The import file must be in a specific format in order to import correctly. It should be an Excel or CSV file and contain the appropriate student and gradebook item data. Refer to the links to **Download Spreadsheet Template** for the correct file format.

Sakai 10 Instructor Guide

Page 245

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## **Click Import Spreadsheet.**

#### 3. Import Spreadsheet

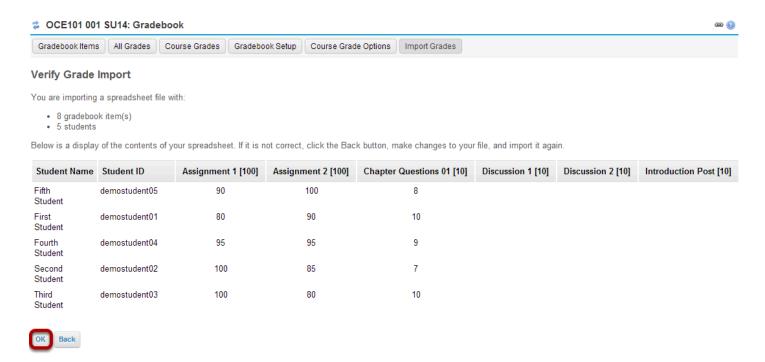

Click Choose File, then Browse to select the file you saved in step 2, then click Import Spreadsheet.

Filename \* gradebook-oce101-2-21-14 Choose File

After selecting your import file, click **Import Spreadsheet** to import the grades.

## Verify the import.

The import data will be previewed for you. If everything looks correct, click **OK** to verify the data. (If you notice any errors, click **Back** to abort the import process.)

## Confirmation message.

#### **Import Grades**

If you would like to edit your grades in a spreadsheet application (e.g., Excel) and import the grades into the gradebook, then follow the steps below:

✓ Your spreadsheet has imported successfully

## How do I override a course grade?

Note: When manually entering a course grade, you must use the appropriate grade type for the Gradebook in which you are working. For example, if the course is graded on a simple letter grade scale, you will only be able to enter the letters A, B, C, D, or F. If the course is graded on a standard letter grade scale, you will also be able to add + (plus sign) or - (minus sign) to the letter grade. If the course is graded on a Pass/Not pass scale, you will only be able to enter the letters P or N.

## Go to Gradebook.

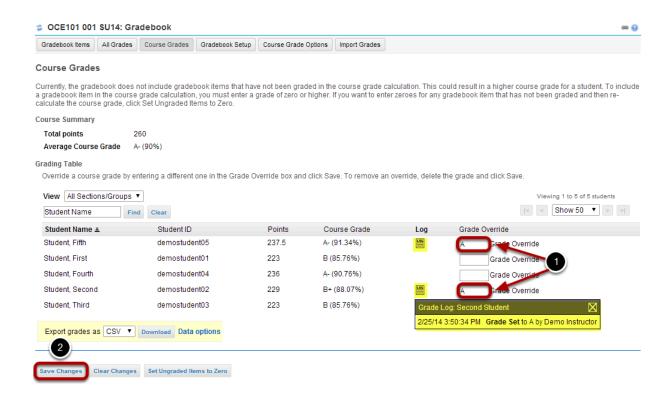

Select the **Gradebook** tool from the Tool Menu of your site.

#### **Click Course Grades.**

Sakai 10 Instructor Guide **Page 248** This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

#### Enter override score.

You will see a list of enrolled students and their calculated course grades. In the "Grade Override" column.

- 1. Enter the new course grade(s) to replace the autocalculated grade(s)
- 2. Click Save.

Note: Once you save the grade override, a log icon will appear next to each modified grade which displays the time, date, grade information, and name of the person who changed the grade manually.

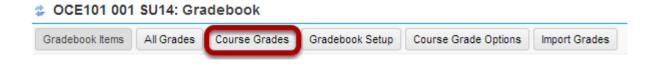

## How do I set all ungraded items to zero?

Note: The Gradebook does not include gradebook items that have not been graded in the course grade calculation. This could result in a higher course grade for a student if they have incomplete items. To include a gradebook item in the course grade calculation, you must enter a grade of zero or higher. If you want to enter zeros for all gradebook items that have not been graded, you should set ungraded items to zero. This can be done in one step from the Gradebook.

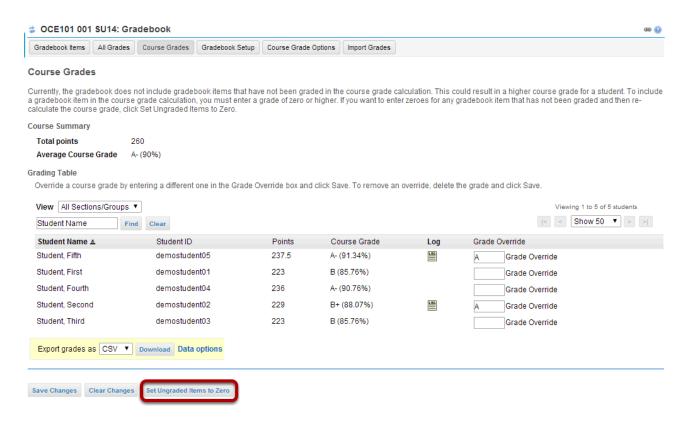

#### Go to Gradebook.

Select the **Gradebook** tool from the Tool Menu of your site.

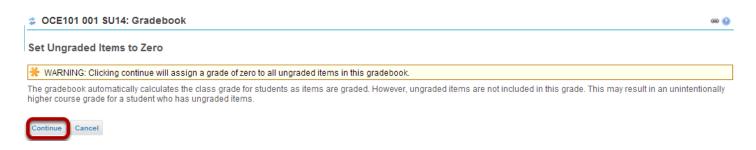

#### Click Course Grades.

## Click Set Ungraded Items to Zero.

#### Click Continue.

You will be prompted to confirm this action. If you are sure you want to assign zeros to all ungraded items, click **Continue**.

Note: You cannot undo this action, so be sure you are ready to assign zeros before continuing.

Sakai 10 Instructor Guide Page 251

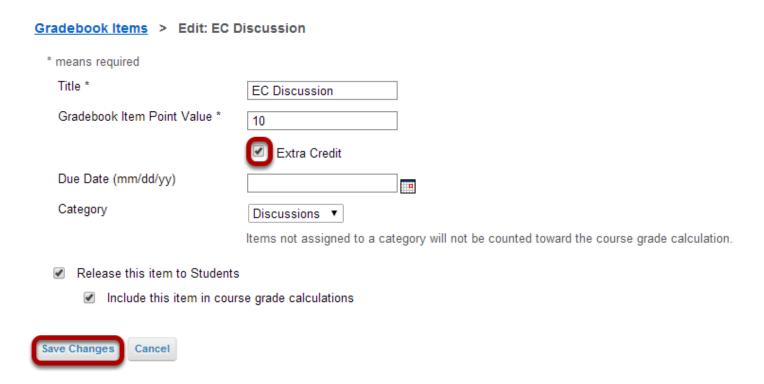

## How does extra credit work?

The extra credit (EC) feature in the Sakai Gradebook can be enabled (1) at the item level or (2) at the category level. For more information on adding items/categories to the gradebook see <a href="How do I set up my Gradebook">How do I add items to the Gradebook</a>?

When you designate an item or a category as EC, those items are not added to the total "out of" value for points possible in the Gradebook. If students earn points for extra credit items, those points are added on top of the total grade. However, no points will be deducted for students who do not receive a score for extra credit. EC indicates "bonus" items, or optional credit.

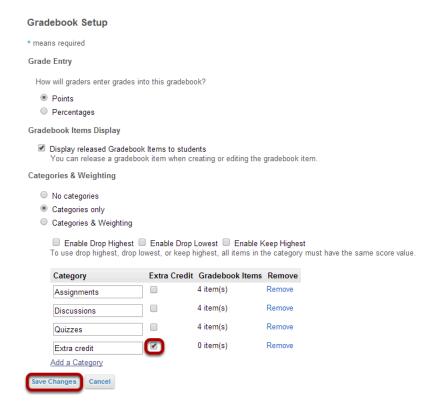

Note: It is important that you DO NOT make individual items extra credit within an extra credit category. Those items will be considered optional within the category and therefore would have no effect on the overall grade outside of the category.

## Setting EC at the item level.

In the Gradebook, edit the item. Then check the box next to **Extra Credit** and click **Save Changes**.

# Setting EC at the category level.

In Gradebook Setup, add a category and the check the box in the **Extra Credit** column next to the category. Then, click **Save Changes**.

### Extra credit item.

Individual extra credit items can be added to any category, or to a Gradebook that contains no categories.

### **Example: EC item in Gradebook with no categories.**

### **Grade Report for First Student**

Return to Instructor's View of Grades for First Student

Course Grade A+ (125%)
Course Points 50/40

#### Gradebook Items

Title	Due Date ≜	Grade*	Comments
EC Quiz (Extra Credit)	-	10/10	
Quiz 1	-	10/10	
Quiz 2	-	10/10	
Quiz 3	-	10/10	
Quiz 4	-	10/10	

Let's say you have a Gradebook that contains 5 quizzes, 4 of them are for credit and 1 of them is an extra credit quiz. Quizzes are worth 10 points each.

The total points possible for the scenario above would be 40 points possible (i.e. 4 quizzes at 10 points each). The EC quiz does not factor into the total "out of" points possible, so the total points remain at 40.

If a student were to score 10/10 points on all 5 quizzes, that student would have a course grade of 50/40 points, or 125%. The 10 points for the extra credit quiz are added on top of the total points for the other items.

Note: If a student scores 10/10 points on only 4 of the 5 quizzes, skipping either the EC quiz or one of the other quiz items, that student would have a course grade of 40/40, or 100%. The EC item can "replace" or make up for another score if it is worth the same amount of points.

Sakai 10 Instructor Guide

Page 254

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

### **Example: EC items within weighted categories.**

	Quiz 2	-	10/10		
Quiz 4 - 10/10	Quiz 3	-	10/10		
	Quiz 4	-	10/10		

Things get a little more complicated when you have weighted categories. You can still specify individual items as extra credit within weighted categories, but the overall percentage grade is not a straight-forward points calculation. Instead, all of the items within each category are averaged together, and then each category average is weighted by the designated amount.

For example, if you have 3 regular assignments and 1 EC assignment in an "Assignments" category that is worth 40% of the total grade, the points for all 4 items (e.g. 40 points) will be added together and then divided by 30 (the total points possible) to result in a category percentage of 133%. Then, 133% will be weighted as 40% of the course grade.

### Extra credit category.

Now, let's say that you want to create an extra category rather than an extra credit item. This can be useful if your Gradebook includes weighting, or if you have several EC items that you want to group together into a category.

Sakai 10 Instructor Guide

Page 255

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### **Example: EC category only.**

**Grade Report for First Student** 

Return to Instructor's View of Grades for First Student

Course Grade A+ (115%)
Course Points 115/100

Gradebook Items

Title	Due Date ≛	Grade*	Comments
Assignments		100%	
Assignment 1	-	10/10	
Assignment 2	-	10/10	
Assignment 3	-	10/10	
Discussions		100%	
Discussion 1	-	10/10	
Discussion 2	-	10/10	
Discussion 3	-	10/10	
Extra Credit (Extra Credit)		100%	
EC Item 1	-	5/5	
EC Item 2	-	5/5	
EC Item 3	-	5/5	
Quizzes		100%	
Quiz 1	-	10/10	
Quiz 2	-	10/10	
Quiz 3	-	10/10	
Quiz 4	-	10/10	

In this example, there are categories only (no weighting) in the Gradebook and one of the categories has been designated as extra credit. Any items placed into the EC category are automatically omitted from the total points possible for the course grade; however, any points earned for those items are still added to the total.

Therefore, if you have 3 items worth 5 point each in the EC category, and a student earns 5/5 points for all three of them, in addition to a perfect score on all other items in the other categories, the student would have 115/100 points possible, or 115%.

Sakai 10 Instructor Guide

Page 256

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### **Example: EC with weighted categories.**

Categ	ories & Weighting					
<ul><li></li><li></li><li></li></ul>	No categories Categories only Categories & Weighting					
	■ Enable Drop Highest □ To use drop highest, drop lov To exclude a category from t	vest, or keep	highest, all ite	ems in the category r	must have th	ne same score value.
	Category	%	Extra Credit	Gradebook Items	Remove	
	Assignments	40		3 item(s)	Remove	
	Discussions	10		3 item(s)	Remove	
	Extra Credit	5	<b>•</b>	3 item(s)	Remove	
	Quizzes	50		4 item(s)	Remove	
•		ing Total 10 ed Total 0%				

Now let's look at an example of weighted categories with extra credit. Notice that when you set up weighted categories in the Gradebook, your combined category weighting must equal 100%. However, by designating a category as EC, you can have a sum that is greater than 100%. In this example, Assignments (40%) + Discussions (10%) + Quizzes (50%) = 100% of the course grade. The extra credit category is worth 5% of the course grade in addition to the 100% total. Including EC, a student could potentially earn 105% of the total grade.

### Student view of this scenario.

**Grade Report for First Student** 

Return to Instructor's View of Grades for First Student

Course Grade A+ (105%)
Course Points 115/100

Gradebook Items

Title	Due Date ≛	Grade*	Weight	Comments
Assignments		100%	40%	
Assignment 1	-	10/10		
Assignment 2	-	10/10		
Assignment 3	-	10/10		
Discussions		100%	10%	
Discussion 1	-	10/10		
Discussion 2	-	10/10		
Discussion 3	-	10/10		
Extra Credit (Extra Credit)		100%	5%	
EC Item 1	-	5/5		
EC Item 2	-	5/5		
EC Item 3	-	5/5		
Quizzes		100%	50%	
Quiz 1	-	10/10		
Quiz 2	-	10/10		
Quiz 3	-	10/10		
Quiz 4	-	10/10		

Notice that, while none of the scores have changed from the prior example, the course grade percentage is now 105%, instead of 115%. This is due to the change in the weighting of the categories. The EC category has a maximum of 5% on top of the total grade (provided that you do not award more than the maximum number of points per item).

# How are grades calculated?

The Gradebook automatically calculates a course grade based on the number of points scored out of the total points submitted (i.e., a running grade). Ungraded items will not be included in the course grade calculation, so the course grade will not necessarily reflect the student's true score. To include ungraded items in the course grade calculation, you need to enter a 0 (zero) for those items.

To exclude a gradebook item from the course grade, you can edit the gradebook item and deselect **Include this item in course grade calculations**. The score for that item will appear in parentheses to indicate that it is not included in the course grade calculation.

Extra credit points are excluded from the total possible points available, but included in student grade calculations for points awarded. See <u>How does extra credit work?</u> for more information on extra credit gradebook items and categories.

Note: Students can't see their grades for an item unless you select **Release this item to students** when editing the gradebook item.

### Example of a non-weighted gradebook calculation:

If your gradebook does not have weighted categories, the calculation is relatively simple. The Course Grade is the total number of points awarded divided by the total points possible. Let's look at an example of this below.

### Assignment is worth 50 points.

Title Assignment

Points 50
Class average for scores entered 40
Due Date -

Options Edit gradebook item settings

Remove gradebook item from gradebook

In this example, the Assignment has a total points possible of 50 points.

### Only Assignments has been graded.

Student Name =	Student ID	Course Grade	Assignment Details	Homework Details	Quiz Details
der Pluijm, Ben van	student0003	70%	35	-	-
van Dijk, Victor	student0001	80%	40	-	-
van Keken, Peter	student0002	90%	45	-	-

Notice the scores for each student.

- student0003 has a course grade of 70%. This grade is based on 35 out of 50 points on Assignment.
- student0001 has a course grade of 80%. This grade is based on 40 out of 50 points on Assignment.
- student0002 has a course grade of 90%. This grade is based on 45 out of 50 points on Assignment.

The Homework and Quiz are not calculated in the course grade since they have not been assigned any scores.

### Homework is worth 100 points.

Title	Homework
Points	100
Class average for scores entered	80
Due Date	-

### Homework has now been graded.

Student Name ±	Student ID	Log	Points
der Pluijm, Ben van	student0003	LOL	90
van Dijk, Victor	student0001	LBC	80
van Keken, Peter	student0002	(Let)	70

Sakai 10 Instructor Guide

Page 260

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

### **Cumulative grades after Homework is graded.**

Student Name -	Student ID	Course Grade	Assignment Details	Homework Details	Quiz Details
der Pluijm, Ben van	student0003	83.33%	35	90	-
van Dijk, Victor	student0001	80%	40	80	-
van Keken, Peter	student0002	76.66%	45	70	-

Now, notice the updated course grades for each student. The scores for Assignment and Homework are added together, and then they are divided by the total possible points for those two items combined.

- student0003 has a course grade of 83.33%. This grade is based on the following calculation: (35 + 90) / 150 = 83.33%
- student0001 has a course grade of 80%. This grade is based on the following calculation: (40 + 80) / 150 = 80%
- student0002 has a course grade of 90%. This grade is based on the following calculation: (45 + 70) / 150 = 76.66%

### Not all Quizzes have been submitted.

Student Name =	Student ID	Course Grade	Assignment Details	Homework Details	Quiz Details
der Pluijm, Ben van	student0003	83.33%	35	90	-
van Dijk, Victor	student0001	82.28%	40	80	24
van Keken, Peter	student0002	80%	45	70	25

Only the grades that have been entered are calculated. Student0003 has not submitted a quiz, so his grade is still (90 + 35) / 150 or 83.33%.

The other students have submitted quizzes. Quizzes are worth 25 points. so their scores are:

- student0001 (40 + 80 + 24) / 175 = 82.28%
- student0002 (45 + 70 + 25) / 175 = 80%

### The student did not submit the quiz.

Student Name -	Student ID	<u>Course</u> <u>Grade</u>	Assignment Details	Homework Details	Quiz Details
der Pluijm, Ben van	student0003	71.42%	35	90	0
van Dijk, Victor	student0001	82.28%	40	80	24
van Keken, Peter	student0002	80%	45	70	25

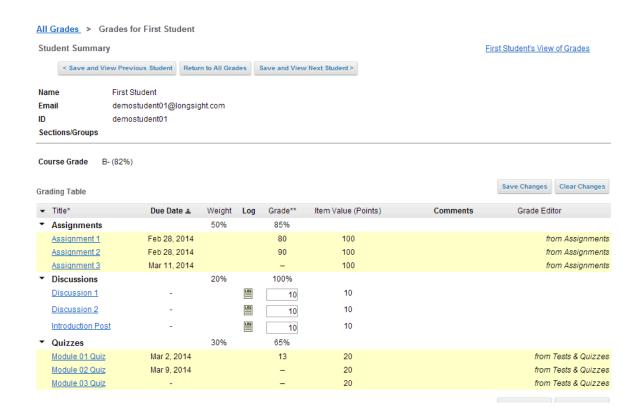

Since student0003 did not turn in the quiz and was assigned a zero on that item by the instructor, now the grade is (90 + 35) / 175 = 71.42%

### Example of a weighted gradebook calculation:

On the other hand, if you have weighted categories in your gradebook, the calculation is a little more complex. First, all of the items within each category are averaged, taking the total points awarded within the category, and dividing that by the total possible points within the category. Then, all category averages are multiplied by the category weighting and added together to determine the final score.

The example below shows the grade for an individual student in a weighted gradebook with three categories: Assignments (50% of course grade), Discussions (20% of course grade), and Quizzes (30% of course grade).

### Demostudent01 course grade with ungraded items.

In this example, demostudent01 has not received a score for Assignment 3, Module 02 Quiz, or Module 03 Quiz. Those three items and their associated possible points are automatically excluded from the grade calculation. Therefore, the grade is calculated as follows:

Average within each category = total of awarded points divided by total possible points

- Assignments = (80 + 90) / 200 = 0.85 or 85%
- Discussions = (10 + 10 + 10) / 30 = 1 or 100%
- Quizzes = 13 / 20 = 0.65 or 65%

Weighted course grade = category averages multiplied by category weighting and added together

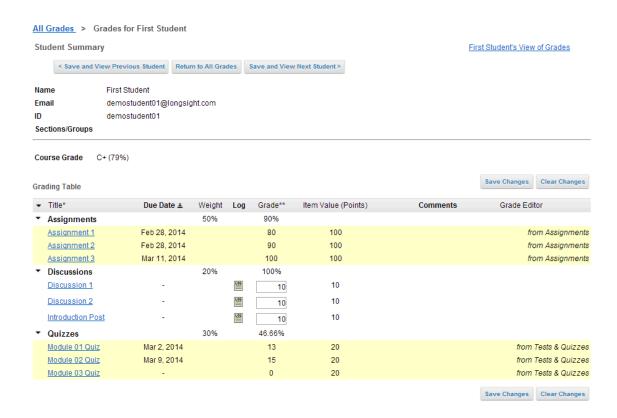

•  $(0.85 \times 50) + (1 \times 20) + (0.65 \times 30) = 82\%$ 

Sakai 10 Instructor Guide

Page 263

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### Demostudent01 with no ungraded items.

Now, demostudent01 has received grades for all items, including a zero for the Module 03 Quiz which the student failed to submit. The grade is recalculated as follows:

Average within each category = total of awarded points divided by total possible points

- Assignments = (80 + 90 + 100) / 300 = 0.90 or 90%
- Discussions = (10 + 10 + 10) / 30 = 1 or 100%
- Quizzes = (13 + 15 + 0) / 60 = 0.46 or 46%

Weighted course grade = category averages multiplied by category weighting and added together

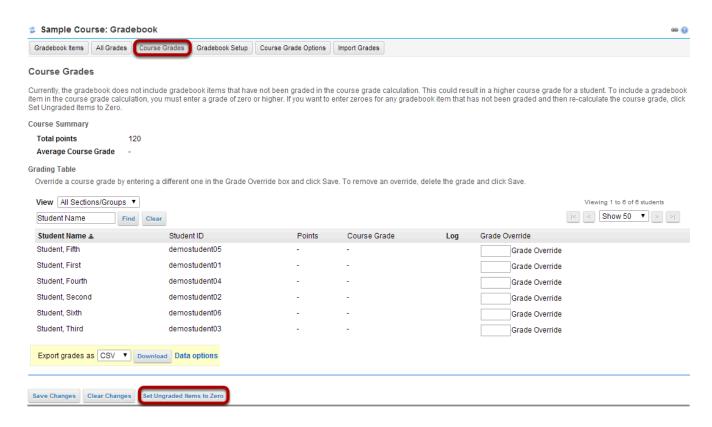

•  $(0.90 \times 50) + (1 \times 20) + (0.46 \times 30) = 79\%$ 

Sakai 10 Instructor Guide

Page 264

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## Setting all ungraded items to zero.

If you would like to enter zeros for all ungraded items in the course, you may go to **Course Grades** and then click the **Set Ungraded Items to Zero** button to update all items at once.

Note: This option should be used with caution, as it will enter a zero for any items not yet scored. It is best used at the end of the term after all submitted work has been graded.

# Gradebook2

## What is the Gradebook2 tool?

Note: Gradebook2 is not the default (or "core") gradebook tool in Sakai. It may or may not be installed/available on your system. Check with your system administrator if you are not certain which gradebook tool is available for your instance.

Gradebook2 allows instructors to calculate, store, and distribute grade information to students. It provides a spreadsheet-style interface and a variety of useful features.

As an instructor using Gradebook2, you may do all of the following:

- Enter grades as points, percentages, or letter grades. Correlate letter grades to a 100-percent course grade scale.
- Enter, view, edit, and release item grades and comments, as well as course grades, to students.
- Create categories that organize items in the gradebook.
- Weight categories in the gradebook, as well as assign relative weights for items within categories.
- Drop lowest-score items in a category.
- Create extra credit items that don't negatively impact course grades
- View a variety of statistics (including mean, median, mode, and class rank) as well as statistics charts.
- Import grades and comments for single or multiple items saved in .xls, .xlsx, or .csv format.
- Export grades and comments in .csv, .xls, or .xlsx format.
- Override default permissions for users with the Teaching Assistant (TA) role to specify unique permissions within the gradebook.

You can set up three types of gradebook:

Non-weighted--a simple gradebook with a series of items. A running "course grade" is the calculated grade for all items that have been graded to date.

Do not use this type of gradebook if:

- You want to organize your graded items by categories
- · You want to weight your graded items
- You want to drop lowest-score items

Non-weighted categories--a gradebook in which items are organized in categories. A running "course grade" is the calculated grade for all items that have been graded to date. With this type of gradebook, you can choose to drop a set number of lowest-score items in a category.

**Weighted categories**—a gradebook in which items are organized in weighted categories. The weight of an item is its relative weight in the category (i.e., weight relative to other items in category) multiplied by the category weight in the gradebook.

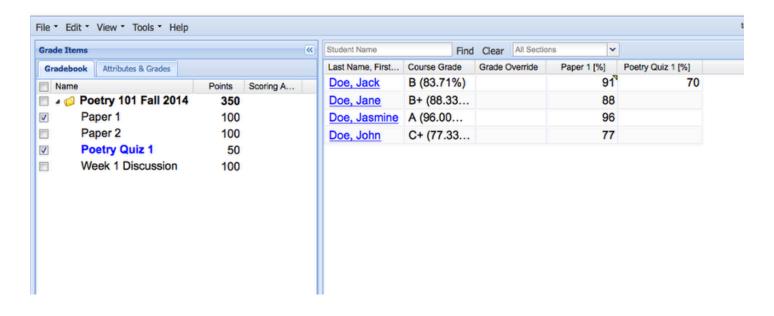

With this type of gradebook, you can:

- Specify the weight of each category
- Specify the relative weight of each item in a category manually
- Set up the category so the relative weights of all items are equal
- Set up a category so the maximum points of each item determines its relative weight in the category
- Include extra credit items in which the extra credit contribution is determined by item weight

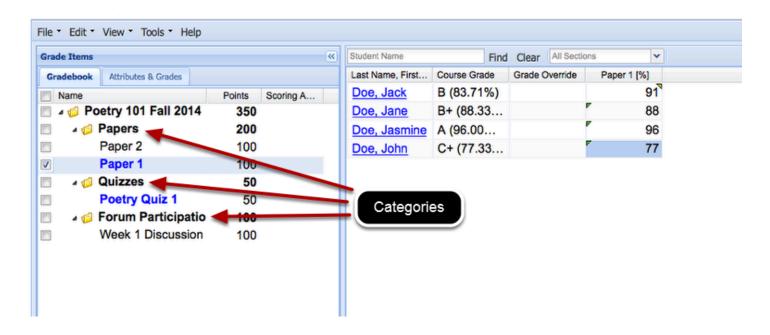

A running "course grade" is the calculated grade for all items that have been graded to date.

*Note*: If some items are not scored, the calculated course grade will reflect scored item weights automatically adjusted to equal 100% of the gradebook.

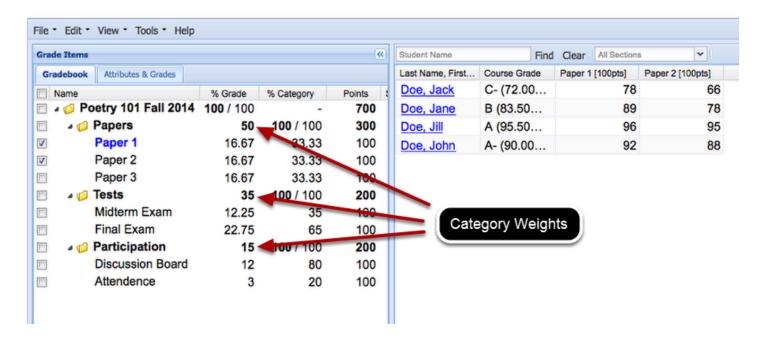

### **Example of a non-weighted gradebook:**

## **Example of a non-weighted categories gradebook:**

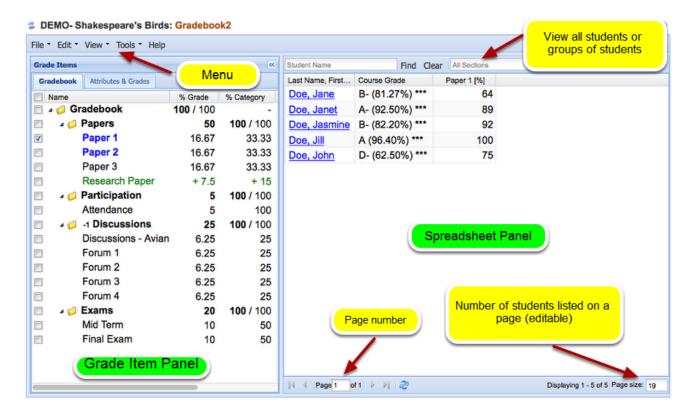

# Example of a weighted categories gradebook:

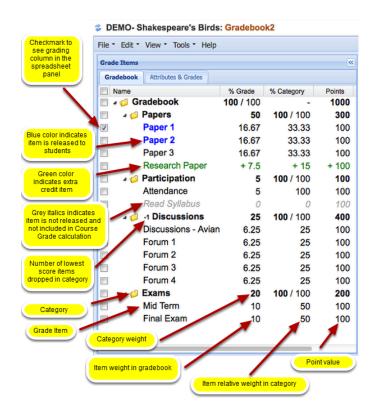

# How do I navigate the Gradebook2 tool?

Gradebook2 has an interface that is different from most other tools. In the Gradebook2 tool, instructors access all functions and features from a single screen.

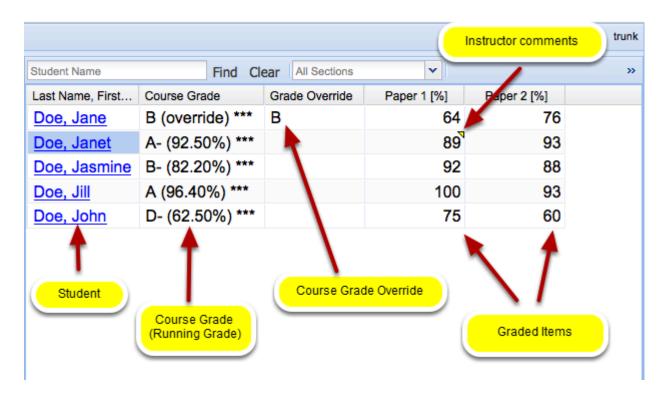

## **Example: Typical "weighted" gradebook.**

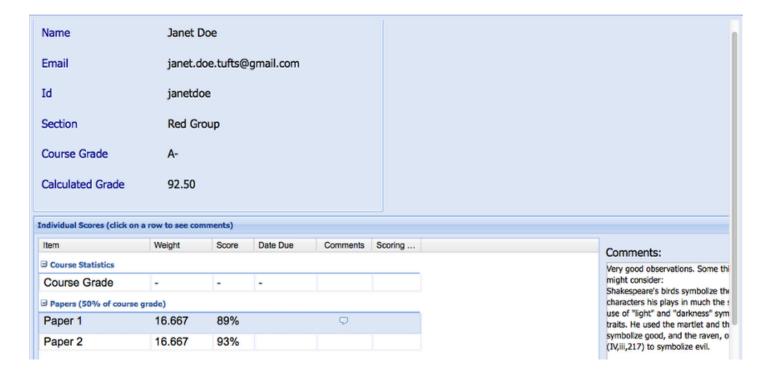

## **Example: Grade Item Panel**

### **Example: Spreadsheet Panel**

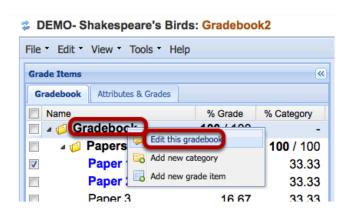

# **Example: Student view of Gradebook2.**

# To set-up Gradebook, click Edit / Gradebook Settings

Note: OR Right-Click (CTRL-Click MAC) in the word "Gradebook" and select Edit this Gradebook.

# How do I create a non-weighted gradebook in the Gradebook2 tool?

A non-weighted gradebook is a simple gradebook that allows instructors to post grades for a series of items.

Item grades can be further calculated into a running "Course Grade", which is the calculated grade for all items that have been graded to date.

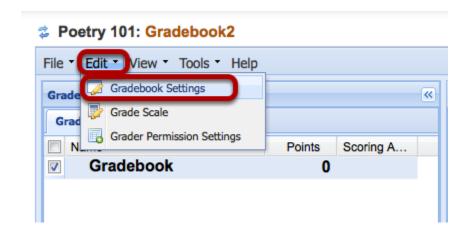

**Do not** use this type of gradebook if:

- You want to organize your graded items by categories
- · You want to weight your graded items
- You want to drop lowest-score items

### Go to Gradebook2.

Select **Gradebook2** from the Tool Menu in your site.

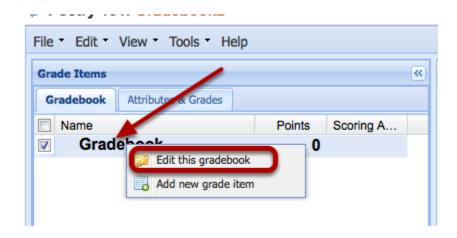

### **Click Edit > Gradebook Settings.**

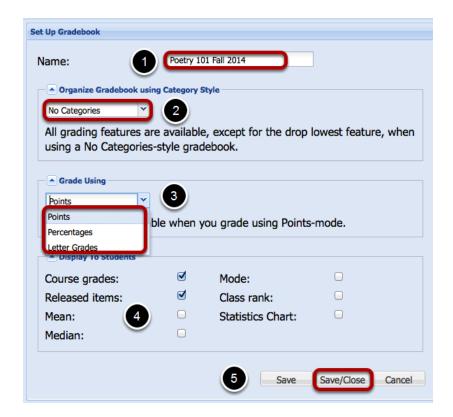

Alternately, you may also right-click the word **Gradebook** and select **Edit this Gradebook**.

This displays the Gradebook Settings in the right panel.

# Or, right-click the word Gradebook and select Edit this Gradebook.

### Set-up Gradebook.

### **Gradebook Settings:**

1. **Name:** By default The Gradebook is named "Gradebook". if you export a copy of the gradebook to your computer, the filename will also be the default, "Gradebook". Naming the gradebook makes it easy to identify the filename if you export a copy onto your computer. We

recommend using the course name, quarter, and year, e.g., ENG001F11, or the actual site name.

- 2. Organize by: From the dropdown menu, choose the gradebook structure: For a simple nonweighted Gradebook select "No Categories" (the default). This is the most straightforward gradebook, listing only gradable items.
- 3. *Grade using:* from the dropdown menu, choose the grading format. *Note: You may choose* only one option. Gradebook2 does not allow multiple grading systems.
- --- Points: This is a grading option that is commonly used by many instructors. All the item's points can add up to any total score and the Gradebook will automatically calculate the running Course Grade based on a 100% grade scale. If your gradebook is set up for points, the score entered for an item cannot be greater than the item's maximum possible points. You may enter a negative score.
- --- Percentages: This option allows instructors to enter a percentage, between 0 and 100, of an item's maximum points. The Gradebook automatically calculates the percentage of each item's maximum points for the course grade, based on a 100% grade scale.

Note: For grading items in Assignments, Forums and Tests & Quizzes, scores can only be entered as points. If, in those three tools, you set the maximum points at any value other than 100, the Gradebook converts those points to the 0-100 scale used in percentage grading.

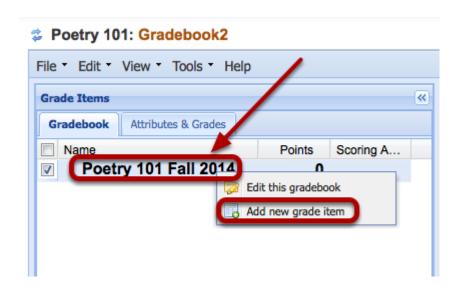

--- Letter Grades: This option allows instructors to enter letter scores of A+ through F, and 0, in the spreadsheet for grading. For the running Course Grade calculation, the Gradebook automatically adds all the item's letter grades and calculates the running course grade based on a 100% grade scale.

Note: For grading items in Assignments, Forums and Tests & Quizzes, scores can only be entered as points. The Gradebook converts these points to a letter grade.

- 4. Display To Students options: Gradebook2 allows instructors to release grade information to students. Checkmark any of the desired "display to students" settings
- --- Course grades: Check the box if you want students to see a running total of their earned course grade, based solely on the work they have turned in.
- --- Released items: This option is checked by default so students can see scores that the instructor has released via each item's settings. Instructors can decide to release or not release individual item scores. It is recommended that this "master" checkbox remain checked and instructors release or not release scores via the individual graded item settings. *Note: Uncheck* this box if you do not want students to EVER see their scores for any items.
  - --- *Mean:* Check the box to show students the mean, or average, of the class' course grades.
  - --- Median: Check the box to show students the median of the class' course grades.
- --- Mode: Check the box to show students the scores found most often in the class' set of course grades.
  - --- Class Rank: Check this box to show each student her or his course grade's class rank.

- --- Statistics Chart: Check this box to let students see statistics charts for released items.
- 5. Once you are satisfied with all your settings, click **Save/Close**.

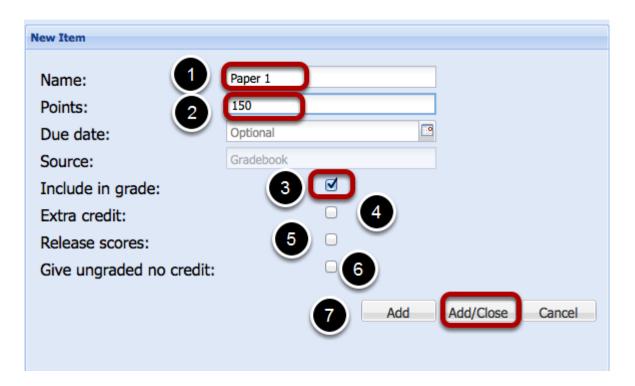

### Add a grade item.

To add a grade item, right-click (CTRL-Click Mac) the gradebook title and select **Add a new grade item**.

This displays the New Item panel on the right.

### Enter the graded item information.

Sakai 10 Instructor Guide

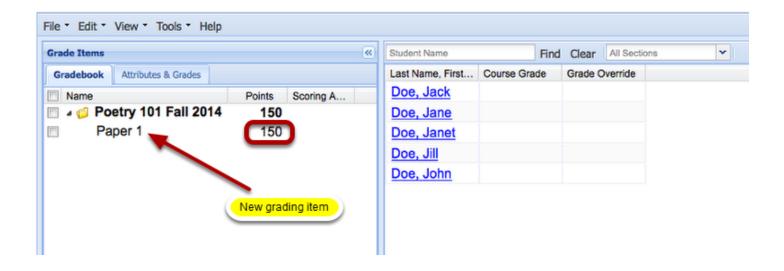

Page 278

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

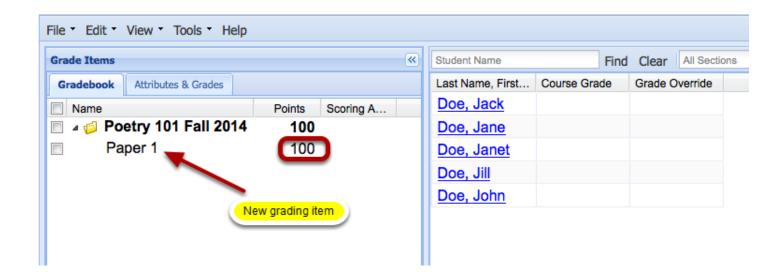

### Item Information:

- 1. Enter a name for the item in the **Name** box.
- 2. Enter a total **Point** value for the item. By default, this value is 100 points, If you are grading by Percentage or Letter Grade, leave this at 100; otherwise enter the point value for the graded item.
- 3. Check **Include in grade** if you want the Gradebook to include this item in the running Course Grade calculations.
- 4. Check **Extra Credit** if you want the item to have no negative impact on the course grade calculation. Extra Credit items can only add to the Course Grade, they cannot subtract from it.
- 5. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 6. Check **Give ungraded no credit** if you want the Gradebook to treat blank entries as zeroes when calculating the course grade. *Note: if checked, this means that all students will have a grade of "0" (rather than nothing). If this is checked on all graded items, students will begin with a Course Grade of "F" (rather than nothing). Use this feature with caution.*
- 7. Click **Add** if you want to add the item and remain in the New Item frame to add another item. Click **Add/Close** to add the item and close the New Item frame.

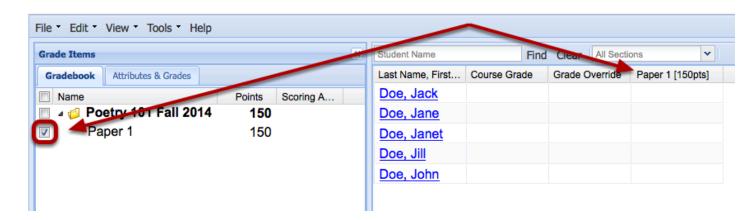

# Example of the new item added to the Gradebook (Graded by Points):

# Example of the new item added to the Gradebook (Graded by Percentage):

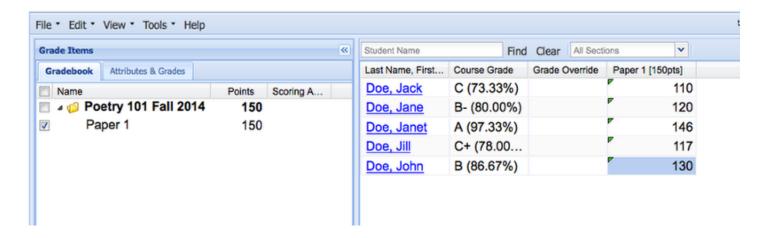

## Display in spreadsheet.

To display the item in the spreadsheet, check the box next to the item name.

This displays the item's grading column in the spreadsheet panel

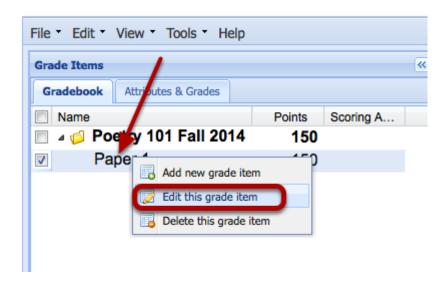

### Enter Grades in the spreadsheet grading column.

### Note:

- Points: You can only enter a number in the range of 0 to the maximum number of points you listed for the grade item.
- Percentage: You can only enter a number in the range of 0% to 100 %
- Letter Grade: you can only enter a letter grade between F and A+

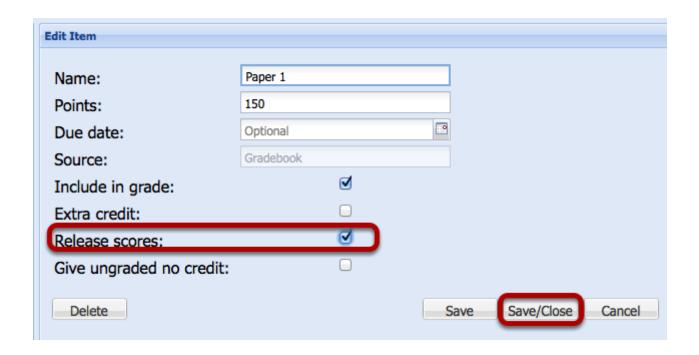

## Release item grades to students.

To release the item grades to students, right-click (CTRL-Click Mac) the grade item and select **Edit this Item**.

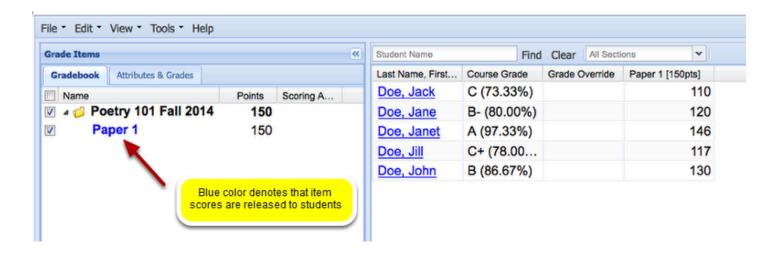

This displays the Edit Item panel on the right.

### Check Release Scores and click Save/Close.

This changes the item color to Blue and releases the item scores to the students.

### **Example:**

# How do I create non-weighted categories in Gradebook2?

A non-weighted Categories gradebook is a simple gradebook that allows instructors to post grades for a series of items, which are organized in the Gradebook2 tool by Categories.

Item grades can be further calculated into a running "Course Grade", which is the calculated grade for all items that have been graded to date.

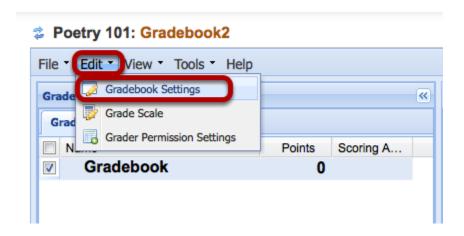

The difference between a "non-weighted gradebook" and a "non-weighted Categories gradebook" is:

- Graded items are organized in instructor created categories.
- Instructors have the option to drop the lowest (or a number of the lowest) grades in a Category.

### Go to Gradebook2.

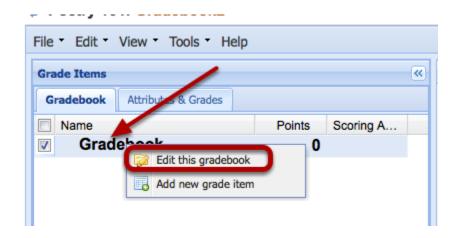

Select **Gradebook2** from the Tool Menu in your site.

# **Click Edit > Gradebook Settings.**

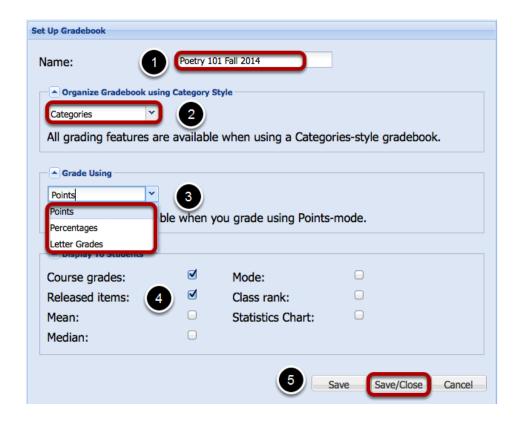

This displays the Gradebook Settings in the right panel.

# Or, you may right-click the word Gradebook and select Edit this Gradebook.

### Set-up Gradebook.

### **Gradebook Settings:**

1. **Name:** By default The Gradebook is named "Gradebook". if you export a copy of the gradebook to your computer, the filename will also be the default, "Gradebook". Naming the gradebook makes it easy to identify the filename if you export a copy onto your computer. We recommend using the course name, quarter, and year, e.g., ENG001F11, or the actual site name.

- 2. Organize by: From the dropdown menu, choose the gradebook structure: For a simple nonweighted Categories Gradebook select "Categories". This is a straightforward gradebook, listing gradable items organized by Categories.
- 3. Grade using: from the dropdown menu, choose the grading format. Note: You may choose only one option. Gradebook2 does not allow multiple grading systems.
- --- *Points:* This is a grading option that is commonly used by many instructors. All the item's points can add up to any total score and the Gradebook will automatically calculate the running Course Grade based on a 100% grade scale. If your gradebook is set up for points, the score entered for an item cannot be greater than the item's maximum possible points. You may enter a negative score.
- --- Percentages: This option allows instructors to enter a percentage, between 0 and 100, of an item's maximum points. The Gradebook automatically calculates the percentage of each item's maximum points for the Course Grade, based on a 100% grade scale.

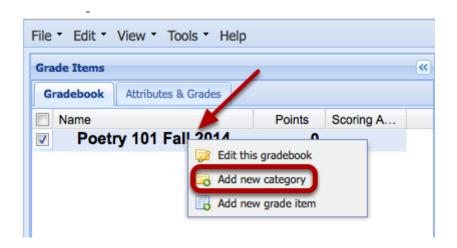

Note: For grading items in Assignments, Forums and Tests & Quizzes, scores can only be entered as points. If, in those three tools, you set the maximum points at any value other than 100, the Gradebook converts those points to the 0-100 scale used in percentage grading.

--- Letter Grades: This option allows instructors to enter letter scores of A+ thru F, and 0, in the spreadsheet for grading. For the running Course Grade calculation, the Gradebook automatically adds all the item's letter grades and calculates the running course grade based on a 100% grade scale.

Note: For grading items in Assignments, Forums and Tests & Quizzes, scores can only be entered as points. The Gradebook converts these points to a letter grade.

- 4. **Display To Students options:** Gradebook2 allows instructors to release grade information to students. Checkmark any of the desired "display to students" settings
- --- Course grades: Check the box if you want students to see a running total of their earned course grade, based solely on the work they have turned in.
- --- Released items: This option is checked by default so students can see scores that the instructor has released via each item's settings. Instructors can decide to release or not release individual item scores. It is recommended that this "master" checkbox remain checked and instructors release or not release scores via the individual graded item settings. *Note: Uncheck* this box if you do not want students to EVER see their scores for any items.
  - --- *Mean:* Check the box to show students the mean, or average, of the class' course grades.
  - --- Median: Check the box to show students the median of the class' course grades.
- --- Mode: Check the box to show students the scores found most often in the class' set of course grades.
  - --- Class Rank: Check this box to show each student her or his course grade's class rank.
  - --- Statistics Chart: Check this box to let students see statistics charts for released items.
- Once you are satisfied with all your settings, click Save/Close.

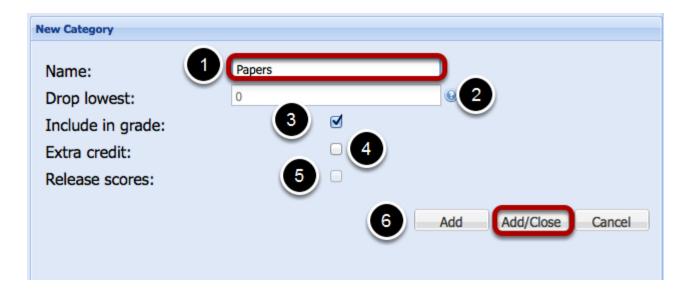

### Create a Category.

To Create a Category, right-click (CTRL-Click Mac) the gradebook title and select **Add new category**.

This displays the Add Category panel on the right.

### **Enter Category information.**

### Category Information:

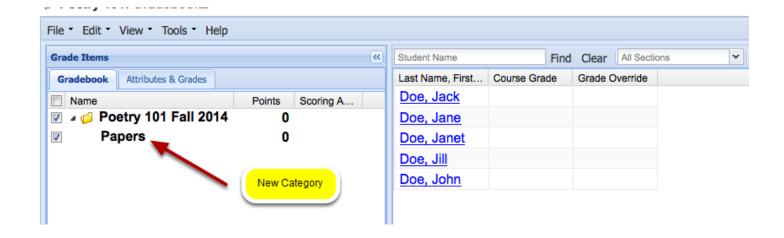

- 1. Enter a **Name** for the category
- 2. Instructors have the option to specify the number of lowest-score items in the category that they want to exclude from course grade calculations, by entering a number in the **Drop lowest** box. The Gradebook will display this number next to the category folder icon in the Gradebook tab of the Grade Items frame.
- 3. Check the **Include in grade** box to include all items in the category in running Course Grade calculations.

Sakai 10 Instructor Guide

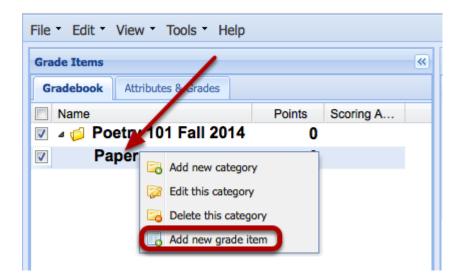

Page 286
This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

- 4. Check **Extra credit** if you want <u>all</u> items in the category to have no negative impact on grade course calculations
- 5. The **Release Scores** option is unchecked by default. It is recommended that this "semi-master" checkbox remain unchecked and instructors release or not release scores via the individual graded item settings. Checking this box will automatically release the scores for all of the items in the category.
- 6. Click **Add** if you want to add the Category and remain in the New Category frame to add another Category. Click **Add/Close** to add the Category and close the New Category frame.

### **Example of added Category:**

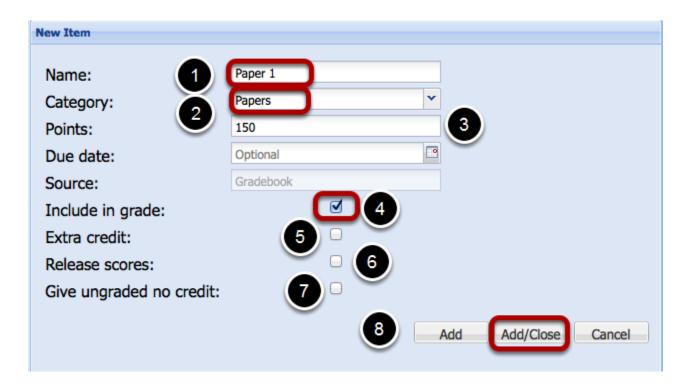

### Add a grade item to the category.

To add a grade item to the category, right-click (CTRL-Click Mac) the category title and select **Add a new grade item**.

This displays the New Item panel on the right.

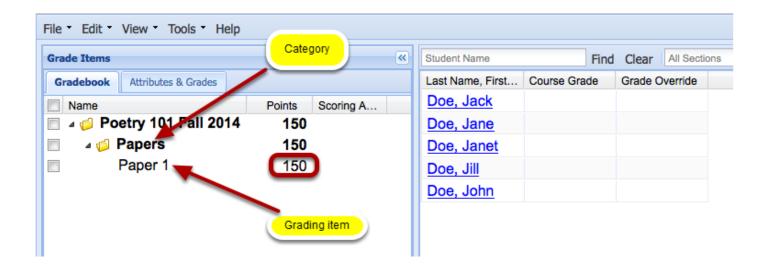

### Enter the Graded Item information.

### Item Information:

- 1. Enter a name for the item in the **Name** box.
- 2. Note the **Category**
- 3. Enter a total **Point** value for the item. By default, this value is 100 points, If you are grading by Percentage or Letter Grade, leave this at 100; otherwise enter the point value for the graded item.
- 4. Check **Include in grade** if you want the Gradebook to include this item in the running Course Grade calculations.
- 5. Check **Extra Credit** if you want the item to have no negative impact on the course grade calculation. Extra Credit items can only add to the Course Grade, they cannot subtract from it.
- 6. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 7. Check **Give ungraded no credit** if you want the Gradebook to treat blank entries as zeroes when calculating the course grade. Note: if checked, this means that all students will have a grade of "0" (rather than nothing). If this is checked on all graded items, students will begin with a Course Grade of "F" (rather than nothing). *Note: Use this feature with caution*.
- 8. Click **Add** if you want to add the item and remain in the New Item frame to add another item. Click **Add/Close** to add the item and close the New Item frame.

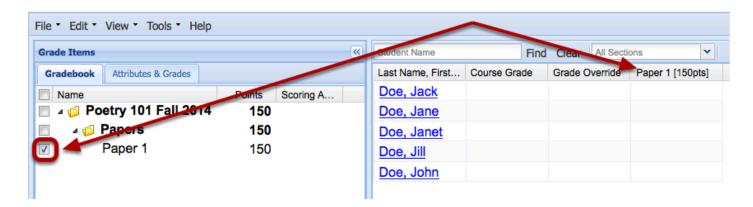

# Example of the new item added to the Gradebook Category (Graded by Points):

# Example of the new item added to the Gradebook Category (Graded by Percentage):

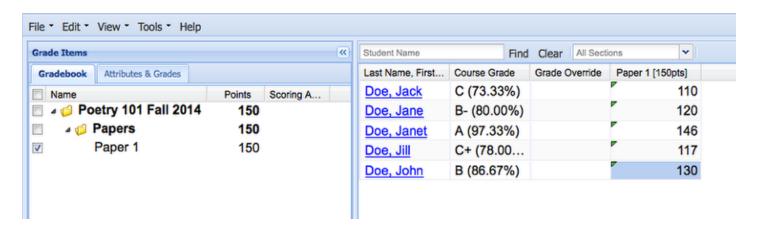

### Display in spreadsheet.

To display the item in the spreadsheet, check the box next to the item name.

This displays the item's grading column in the spreadsheet panel.

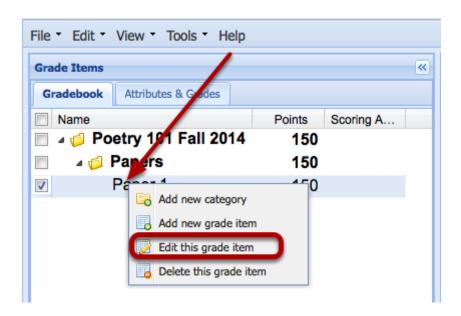

### Enter Grades in the spreadsheet grading column.

#### Note:

- Points: You can only enter a number in the range of 0 to the maximum number of points you listed for the grade item.
- Percentage: You can only enter a number in the range of 0% to 100 %
- Letter Grade: you can only enter a letter grade between F and A+

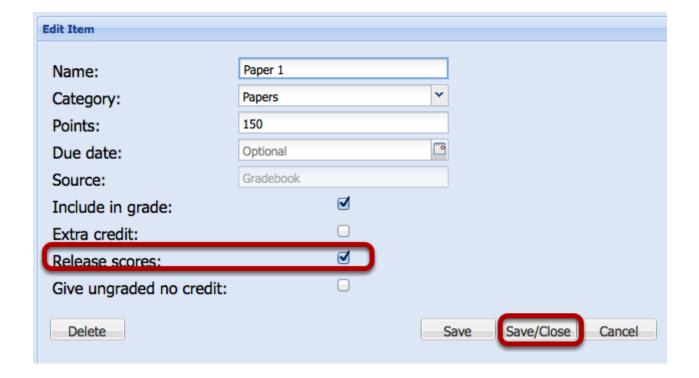

## Release item grades to students.

To release the item grades to students, right-click (CTRL-Click Mac) the grade item and select **Edit this Item**.

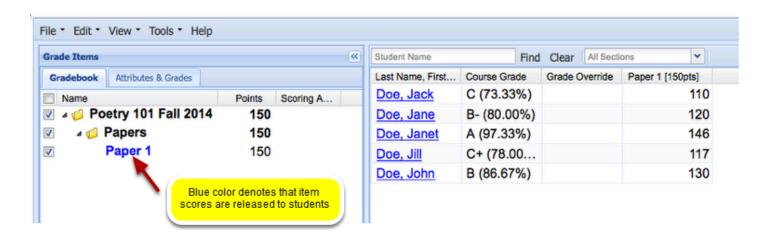

This displays the Edit Item panel on the right.

#### Check Release Scores and click Save/Close.

This changes the item color to Blue and releases the item scores to the students.

### **Example:**

# How do I create weighted categories in Gradebook2?

A Weighted Categories gradebook allows the instructor to post grades to items organized by weighted categories. The weight of an item is its relative weight in the category (i.e., weight relative to other items in category) multiplied by the category weight in the gradebook.

Instructors have the option to:

- Specify the weight of each category
- Specify the relative weight of each item in a category manually
- Set up the category so the relative weights of all items are equal
- Set up a category so the maximum points of each item determines its relative weight in the category
- Include extra credit items in which the extra credit contribution is determined by item weight

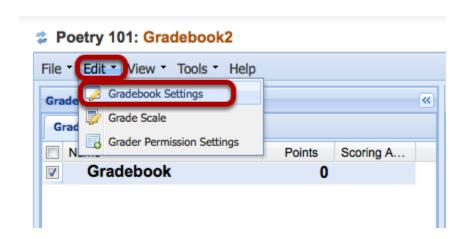

Item grades can be further calculated into a running "Course Grade", which is the calculated grade for all items that have been graded to date.

Note: If some items are not scored, the Course Grade will reflect scored item weights that are automatically adjusted to equal 100% of the gradebook.

#### Go to Gradebook2.

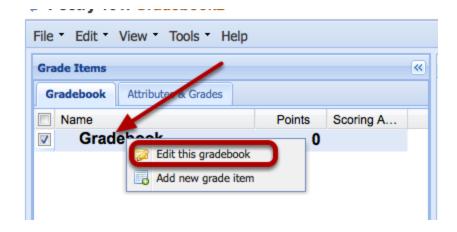

Select **Gradebook2** from the Tool Menu in your site.

# **Click Edit > Gradebook Settings.**

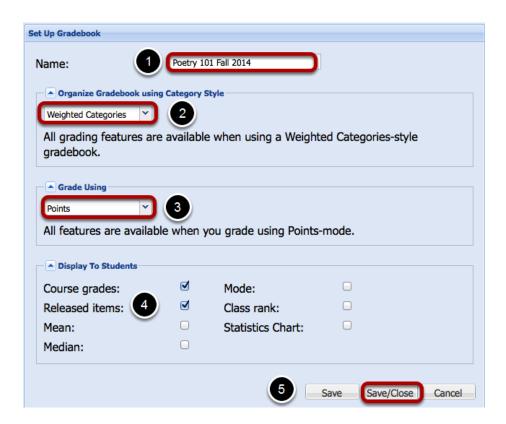

This displays the Gradebook Settings in the right panel.

# Or, right-click the word Gradebook and select Edit this Gradebook.

This displays the Gradebook Settings in the right panel.

#### Set-up Gradebook.

#### **Gradebook Settings:**

- 1. **Name:** By default The Gradebook is named "Gradebook". if you export a copy of the gradebook to your computer, the filename will also be the default, "Gradebook". Naming the gradebook makes it easy to identify the filename if you export a copy onto your computer. We recommend using the course name, quarter, and year, e.g., ENG001F11, or the actual site name.
- 2. *Organize by:* From the dropdown menu, choose the gradebook structure: For a weighted Gradebook select "Weighted Categories". This is a gradebook that has the graded items organized by Categories that are weighted.
- 3. **Grade using:** from the dropdown menu, choose the grading format. Note: You may choose only one option. Gradebook2 does not allow multiple grading systems.
- --- *Points:* This is a grading option that is commonly used by many instructors. All the item's points can add up to any total score and the Gradebook will automatically calculate the running Course Grade based on a 100% grade scale. If your gradebook is set up for points, the score entered for an item cannot be greater than the item's maximum possible points. You may enter a negative score.
- --- Percentages: This option allows instructors to enter a percentage, between 0 and 100, of an item's maximum points. The Gradebook automatically calculates the percentage of each item's maximum points for the course grade, based on a 100% grade scale.

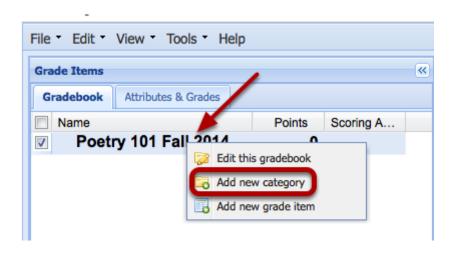

Note: For grading items in Assignments, Forums and Tests & Quizzes, scores can only be entered as points. If, in those three tools, you set the maximum points at any value other than 100, the Gradebook converts those points to the 0-100 scale used in percentage grading.

--- <u>Letter Grades:</u> This option allows instructors to enter letter scores of A+ thru F, and 0, in the spreadsheet for grading. For the running Course Grade calculation, the Gradebook automatically adds all the item's letter grades and calculates the running course grade based on a 100% grade scale.

Note: For grading items in Assignments, Forums and Tests & Quizzes, scores can only be entered as points. The Gradebook converts these points to a letter grade.

- 4. **Display To Students options:** Gradebook2 allows instructors to release grade information to students. Checkmark any of the desired "display to students" settings
- --- <u>Course grades:</u> Check this box if you want students to see a running total of their earned course grade, based solely on the work they have turned in.
- --- <u>Released items:</u> This option is checked by default so students can see scores when the instructor has released them via each item's settings. Instructors can decide to release or not release individual item scores. It is recommended that this "master" checkbox remain checked and instructors release or not release scores via the individual graded item settings. *Note: Uncheck this box if you do not want students to EVER see their scores for any items.* 
  - --- *Mean:* Check the box to show students the mean, or average, of the class' course grades.
  - --- Median: Check the box to show students the median of the class' course grades.
- --- *Mode:* Check the box to show students the scores found most often in the class' set of course grades.
  - --- Class Rank: Check this box to show each student her or his course grade's class rank.
  - --- Statistics Chart: Check this box to let students see statistics charts for released items.
- 5. Once you are satisfied with all your settings, click **Save/Close**.

# Add a category.

Sakai 10 Instructor Guide

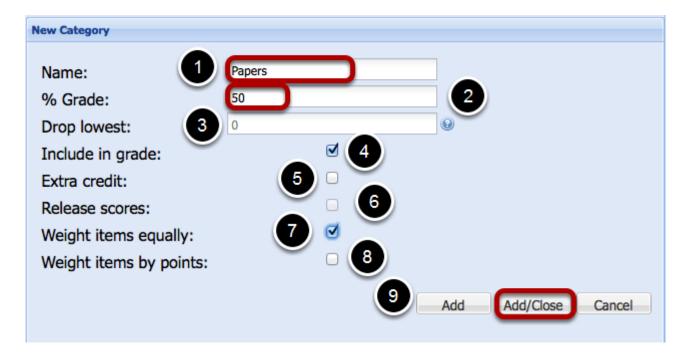

Page 296

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

To Create a Category, Right-Click (CTRL-Click Mac) the gradebook title and select "Add a new category".

This displays the Add Category panel on the right.

### **Enter Category information.**

#### Category Information:

- 1. Enter a **Name** for the category
- 2. Enter the **weight** for the category (as a whole). In the example above, the "Papers" category is worth 50% of the course grade.
- 3. Instructors have the option to specify the number of lowest-score items in the category that they want to exclude from course grade calculations, by entering a number in the **Drop lowest** box. The Gradebook will display this number next to the category folder icon in the Gradebook tab of the Grade Items frame.
- 4. Check the **Include in grade** box to include all items in the category in running Course Grade calculations.
- 5. Check **Extra credit** if you want <u>all</u> items in the category to have no negative impact on grade course calculations
- 6. The **Release Scores** option is unchecked by default. It is recommended that this "semi-master" checkbox remain unchecked and instructors release or not release scores via the individual graded item settings. Checking this box will automatically release the scores for all of the items in the category.
- 7. The **Weight Items Equally** option allows all graded items to have equal relative weights in the category. In the example above, this box has been checked. The 4 items in the category (paper 1, paper 2, paper 3 and paper 4), is each worth 25% of the category (which is 12.5% of the total Course Grade). If this box is not checked, you will need to set each item's relative weight (i.e., weight relative to other items in the category) manually.

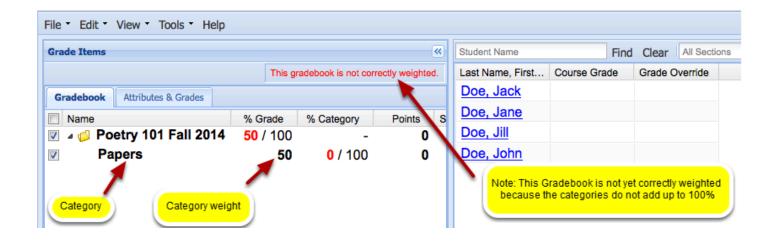

Sakai 10 Instructor Guide

Page 297

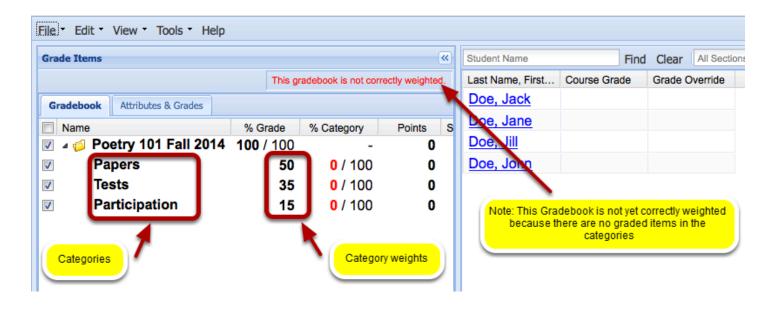

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

- 8. An option here is to set the **weight by points**. If this box is checked, the panel display is reset and the "Drop Lowest" and "Weight Equally" boxes are removed. Weighting by points means that the weight of each item in the category is relative to the maximum point value assigned to it. For instance, if 3 items are listed in the category (paper 1 25 points, paper 2 50 points and paper 3 75 points), then paper 1 is worth 16.66% of the category, paper 2 is worth 33.33% of the category and paper 3 is worth 50% of the category.
- 9. Click **Add** if you want to add the Category and remain in the New Category frame to add another Category. Click **Add/Close** to add the Category and close the New Category frame.

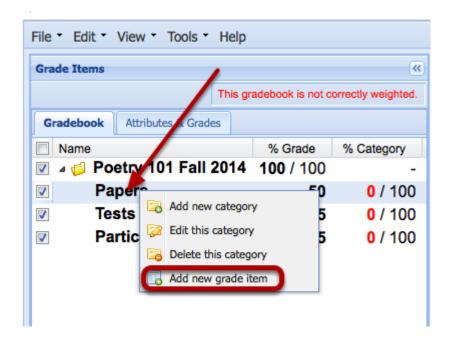

#### **Example of added Category:**

#### **Example of multiple weighted categories**

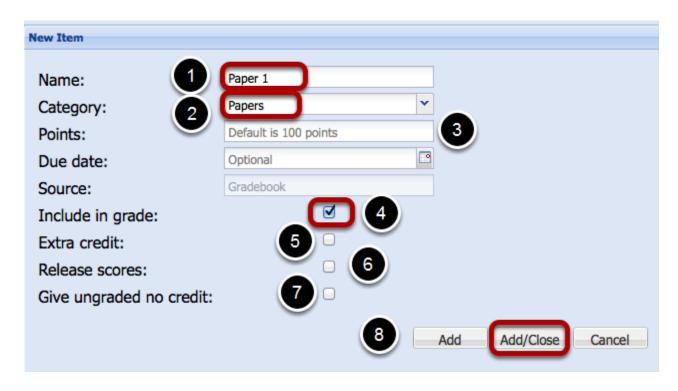

# Add a new grade item.

To add a grade item to the category, right-click (CTRL-Click Mac) the category title and select **Add a new grade item**.

This displays the New Item panel on the right.

# Case 1: Enter the Graded Item information (when the category has Weight Items Equally selected)

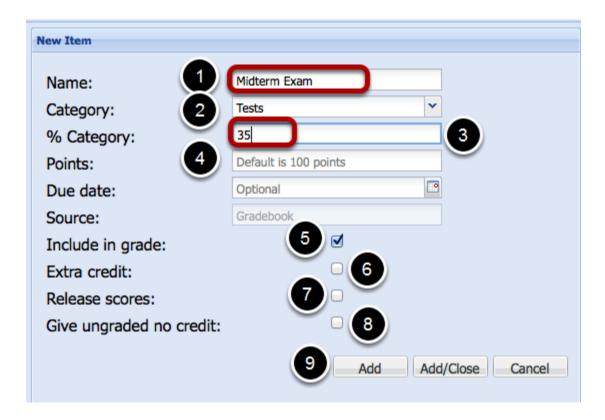

Item Information (when the category has Weight Items Equally selected):

- 1. Enter a name for the item in the **Name** box.
- 2. Note the **Category**
- 3. Enter a total **Point** value for the item. By default, this value is 100 points, If you are grading by Percentage or Letter Grade, leave this at 100; otherwise enter the point value for the graded item.
- 4. Check **Include in grade** if you want the Gradebook to include this item in the running Course Grade calculations.
- 5. Check **Extra Credit** if you want the item to have no negative impact on the course grade calculation. Extra Credit items can only add to the Course Grade, they cannot subtract from it
- 6. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 7. Check **Give ungraded no credit** if you want the Gradebook to treat blank entries as zeroes when calculating the course grade. Note: if checked, this means that all students will have a grade of "0" (rather than nothing). If this is checked on all graded items, students will begin with a Course Grade of "F" (rather than nothing).
- 8. Click **Add** if you want to add the item and remain in the New Item frame to add another item. Click **Add/Close** to add the item and close the New Item frame.

Note: In the example above, the "Papers" category was weighted as 50% of the Course Grade. Also, the category has Weight Items Equally selected. Therefore each paper is worth an equal amount of the 50% total for the category.

# Case 2: Enter the Graded Item information (when the category has Weight Items Equally NOT selected)

Item Information (when the category has Weight Items Equally **NOT** selected):

- 1. Enter a name for the item in the **Name** box.
- 2. Note the **Category**
- 3. Enter the weight this item has for the category. In this example the Midterm Exam has a weight of 35% or the category (Note: The category "Tests" in this example is weighted to 35% of the Course Grade. This means that the midterm is 35% of 35%, or worth 12.25% of the Course Grade.
- 4. Enter a total **Point** value for the item. By default, this value is 100 points, If you are grading by Percentage or Letter Grade, leave this at 100; otherwise enter the point value for the graded item.
- 5. Check **Include in grade** if you want the Gradebook to include this item in the running Course Grade calculations.
- 6. Check **Extra Credit** if you want the item to have no negative impact on the course grade calculation. Extra Credit items can only add to the Course Grade, they cannot subtract from it.
- 7. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the

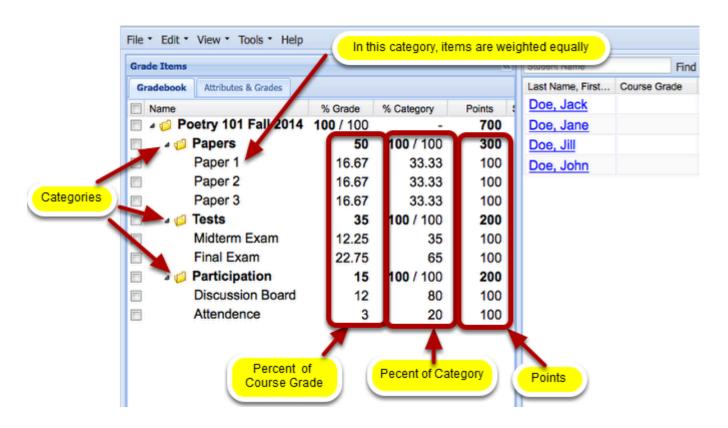

Sakai 10 Instructor Guide

Page 301

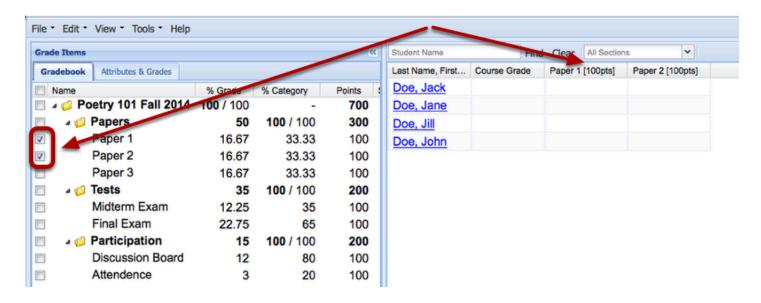

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

- students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 8. Check **Give ungraded no credit** if you want the Gradebook to treat blank entries as zeroes when calculating the course grade. Note: if checked, this means that all students will have a grade of "0" (rather than nothing). If this is checked on all graded items, students will begin with a Course Grade of "F" (rather than nothing).
- 9. Click **Add** if you want to add the item and remain in the New Item frame to add another item. Click **Add/Close** to add the item and close the New Item frame.

# Example of the multiple items added to the Weighted Gradebook Categories:

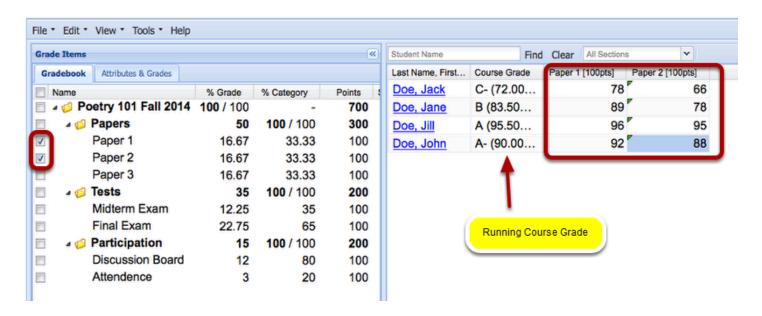

### Display in spreadsheet.

To display the item in the spreadsheet, check the box next to the item name.

This displays the item's grading column in the spreadsheet panel

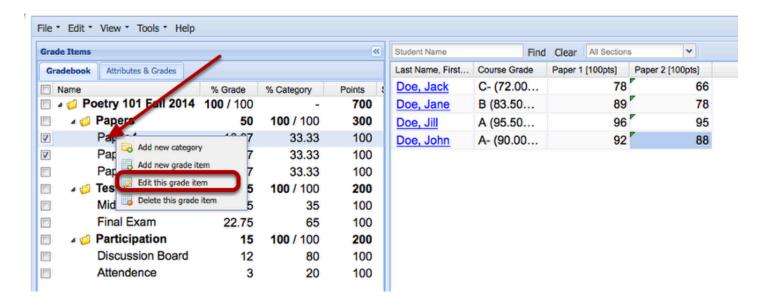

#### Enter Grades in the spreadsheet grading column.

#### Note:

- Points: You can only enter a number in the range of 0 to the maximum number of points you listed for the grade item.
- Percentage: You can only enter a number in the range of 0% to 100 %
- Letter Grade: you can only enter a letter grade between F and A+

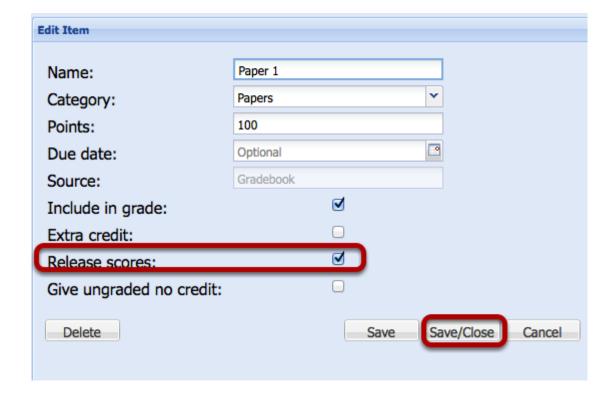

### Release item grades to students.

To release the item grades to students, right-click (CTRL-Click Mac) the grade item and select **Edit this Item**.

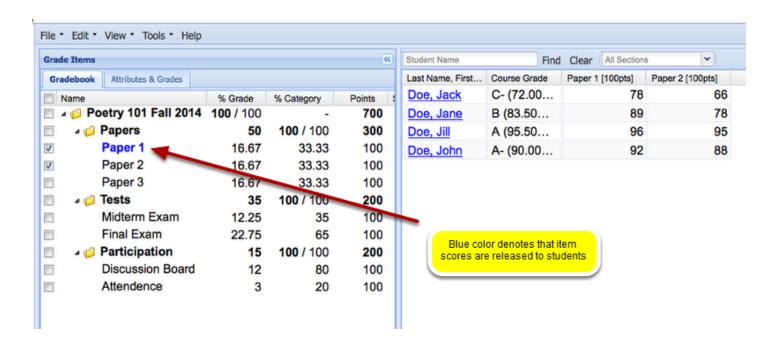

This displays the Edit Item panel on the right.

#### Check Release Scores and click Save/Close.

This changes the item color to Blue and releases the item scores to the students.

#### **Example:**

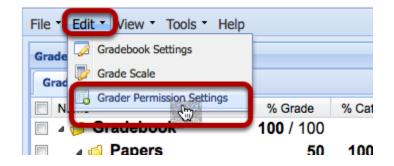

# How do I specify TA grading permissions in the Gradebook2 tool?

If your site has users in the Teaching Assistant (TA) role assigned to sections, you can override default TA grading permissions, so TAs can grade any or all sections. If your gradebook has been set up for categories, you can also specify TA grading permissions for categories.

#### Go to Gradebook2.

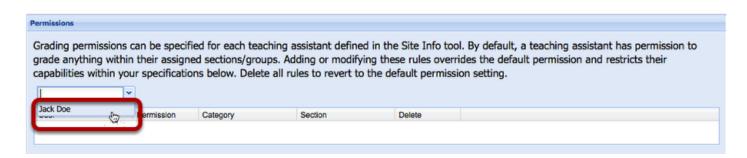

Select **Gradebook2** from the Tool Menu of your site.

#### **Click Edit > Grader Permissions Settings.**

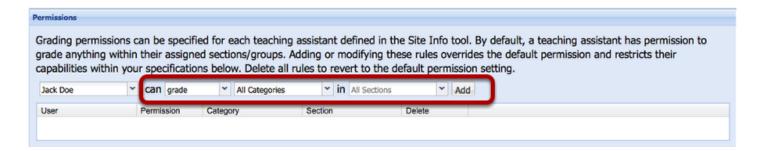

This displays the Grader Permissions dialog box.

#### Use the drop-down box to select the TA's account.

### Select TA permissions.

Choose the desired grading permissions from the drop-down menus. For example, to allow the TA to grade everything, select can **Grade**, **All Categories**, in **All Sections**.

#### Click Add.

This will grant the selected TA the selected grading permissions.

Note: To remove a TA permission for grading:

- Go to Gradebook > Edit > Grader Permission Settings
- Click **Delete** to the right of the TA's name.

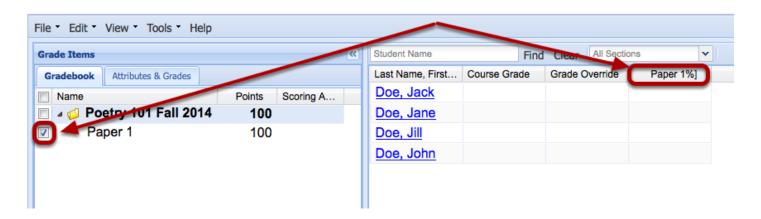

# How do I add grades and comments to the Gradebook2 spreadsheet?

Once the gradebook is set up and you have added items, you can enter grades and comments via the Gradebook2 spreadsheet panel.

### Go to Gradebook2.

Select **Gradebook2** from the Tool Menu in your site.

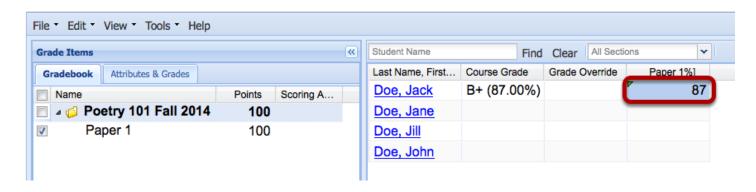

### Display in spreadsheet.

To display the item in the spreadsheet, check the box next to the item name.

This displays the item's grading column in the spreadsheet panel.

# Add a grade.

Sakai 10 Instructor Guide

Page 308

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

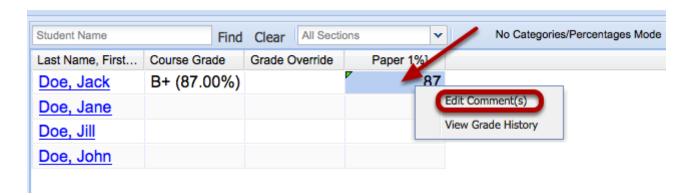

To add a grade, click on a cell in the column and enter a score.

Tip: To save the score and move down the column to the next cell, hit the "Enter" key on your keyboard or use your computer's down arrow key.

Note: How you enter scores will depend on how you have set up the gradebook:

- **Points**. If the gradebook is set up for points, enter any number that is equal to or less than the total point value (maximum points) for the item. You may enter zero, and you may enter numbers with decimal points, up to five places. You may also enter a negative number.
- **Percentages**. If the gradebook is set up for percentages, you must enter a number from 0 to 100. You may enter numbers with decimal points, up to five decimal places.
- **Letter Grades**. If the gradebook is set up for letter grades, enter a letter grade (F to A+) or zero.

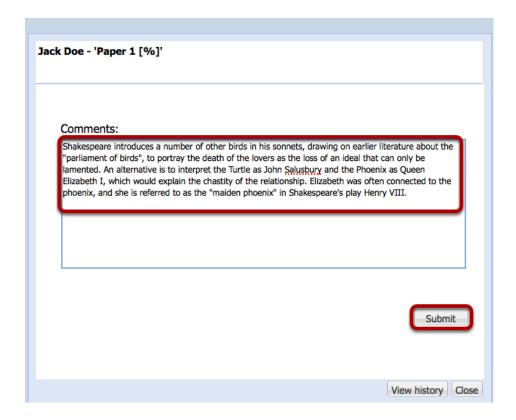

#### Add a comment.

To add a comment, right-click (CTRL-Click Mac) the grade cell and select **Edit Comments**.

This displays the Edit Comments page.

#### Enter your comments, then click Submit.

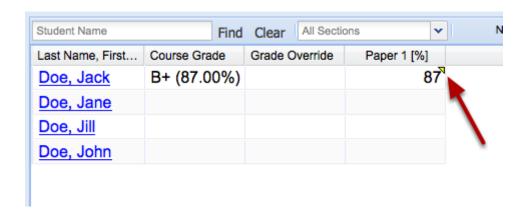

This saves the grade comments.

#### Click Close.

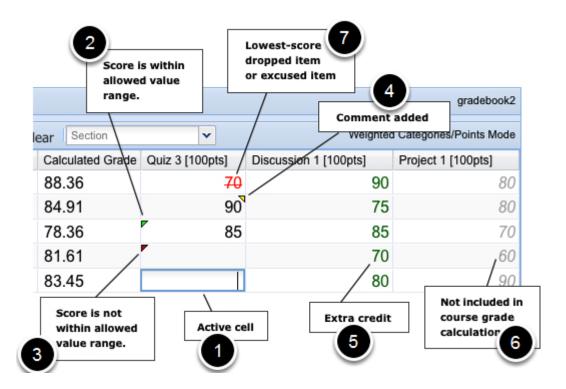

This returns the display to the spreadsheet panel.

# Example: Yellow triangle in top right of cell indicates there is a comment attached to the grade

#### **Example: Other spreadsheet indicators**

- 1. When you click on a cell, the Gradebook displays a blue border around the cell to indicate the cell is active and you may enter a score.
- 2. If the score for an item is within the item's allowed value range, the Gradebook displays a green triangle in the upper left corner of the cell.
- 3. If the score is not within the item's allowed value range, the Gradebook displays a red triangle and a "Request Failed" message, and will not accept the entry.
- 4. When a comment has been added with a score, the Gradebook displays a yellow triangle in the upper right corner of the cell.
- 5. If the score is for an extra credit item, the Gradebook displays the score in green.

Sakai 10 Instructor Guide

Page 311

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

- 6. If the score is not included in the course grade calculation, the Gradebook displays the score in gray.
- 7. If the score has been excused, or if it is low enough to be dropped in a category for which you have opted to drop one or more lowest-score items, the Gradebook will display the score in red with a strikethrough.

Note: When you enter scores in a category set to drop lowest-score items, the Gradebook does not drop scores until you have at least one more scored item than the number set to be dropped. If a category is set to drop two lowest-score items, for example, you must score three items for the Gradebook to drop the two items with lowest scores.

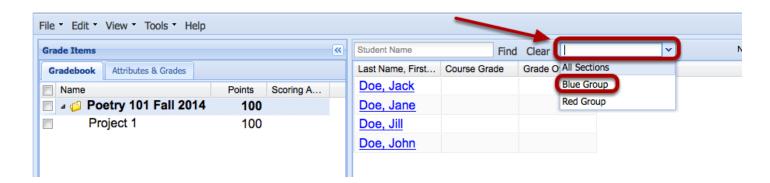

# How do I view and enter grades/comments for an item by group/section in Gradebook2?

Once the gradebook is set-up and you have added items, you can enter grades and comments for users in a specific group/section via the Gradebook2 spreadsheet panel.

### Go to Gradebook2.

Select **Gradebook2** from the Tool Menu in your site.

### Use the All Sections drop-down menu to select a group/ section.

This displays in the spreadsheet only those individuals who are members of the group/section.

#### **Example: Display of students in selected group**

- 1. When you click on a cell, the Gradebook displays a blue border around the cell to indicate the cell is active and you may enter a score.
- 2. If the score for an item is within the item's allowed value range, the Gradebook displays a green triangle in the upper left corner of the cell.
- 3. If the score is not within the item's allowed value range, the Gradebook displays a red triangle and a "Request Failed" message, and will not accept the entry.
- 4. When a comment has been added with a score, the Gradebook displays a yellow triangle in the upper right corner of the cell.
- 5. If the score is for an extra credit item, the Gradebook displays the score in green.
- 6. If the score is not included in the course grade calculation, the Gradebook displays the score in gray.
- 7. If the score has been excused, or if it is low enough to be dropped in a category for which you have opted to drop one or more lowest-score items, the Gradebook will display the score in red with a strikethrough.

Note: When you enter scores in a category set to drop lowest-score items, the Gradebook does not drop scores until you have at least one more scored item than the number set to be dropped. If a category is set to drop two lowest-score items, for example, you must score three items for the Gradebook to drop the two items with lowest scores.

# How do I add extra credit to a non-weighted Gradebook2?

The Gradebook2 tool does not allow scores above the maximum value. For instance, if grading by Points, and the maximum point value is set to 150, you cannot assign a score of 155 points. If grading by Percentages, you cannot assign a score of 105%. If grading by Letter Grade, you cannot assign a score of A++.

Some instructors may want to award extra credit either as an addition to an existing grade or as a separate extra credit assignment.

The method of adding extra credit is slightly different depending on whether the gradebook is "non-weighted", "non-weighted categories" or "weighted categories".

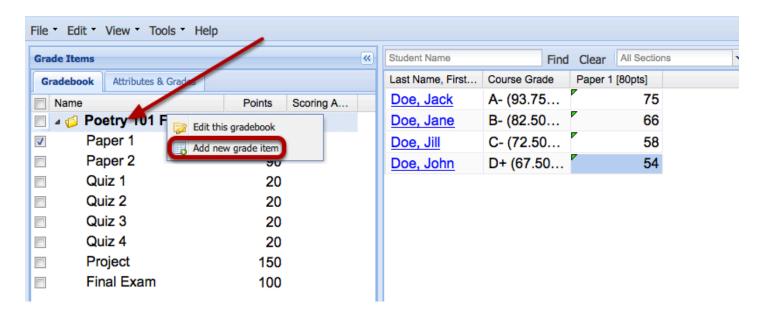

It is also slightly dependent on whether the gradebook is scored by "points", "percentages" or "letter grades".

In all instances of adding extra credit, it is important to look at the total number of possible points that can be awarded for the semester to a student and base your extra credit calculations on how will it affect the final Course Grade.

#### Go to Gradebook2.

Select **Gradebook2** from the Tool Menu in your site.

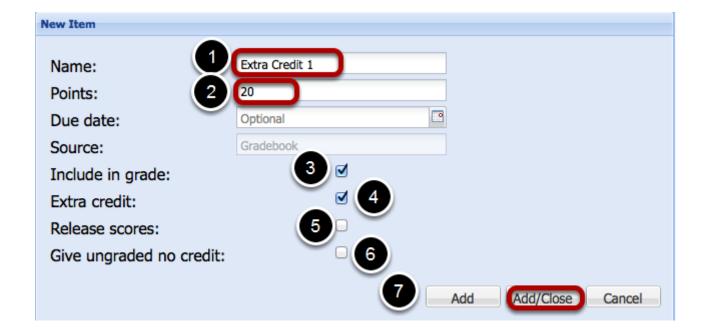

# Right-click the name of the Gradebook and select Add a new grade item.

This displays the New Item panel on the right.

# Non-weighted gradebook: Scoring by Points

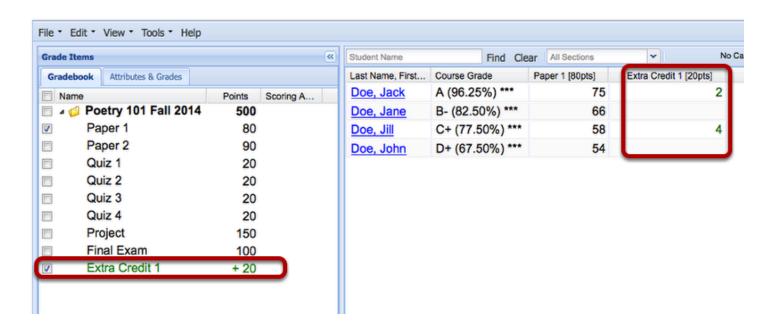

#### Enter Extra Credit Item Information, then click Add/Close.

1. Enter a **Name** for the Extra Credit item

- 2. Enter a **Points** value for the Extra credit Item. **When scoring by points make this value the maximum extra points you want to be able to add to the overall Course Grade. Any points awarded to a student on this grade item will be added to the total number of points earned by the student.**
- 3. **Include** this Extra credit item in the running Course grade calculation.
- 4. Indicate that this item is "**Extra Credit**". That is, students are not required to be graded for this item and any grade given to a student for this item can only positively affect their Course Grade.
- 5. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 6. <u>Important:</u> Do not check **Give ungraded no credit** for an Extra credit item. Students that do not perform extra credit should not receive any grade for this item.
- 7. Click **Add/Close** to add the Extra Credit item and close the New Item frame.

#### **Example:**

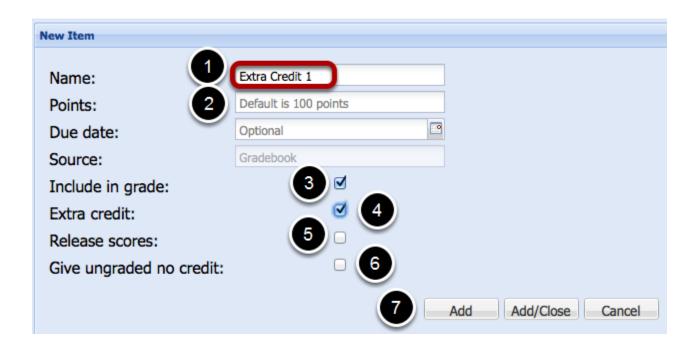

With this set-up, when a score of "2" is given to a student on the extra credit item, it is the same as adding 2 extra points to the student's total cumulative score of points.

Tip: You might want to have a single "Extra Credit" item and just increase the awarded score as needed through the semester.

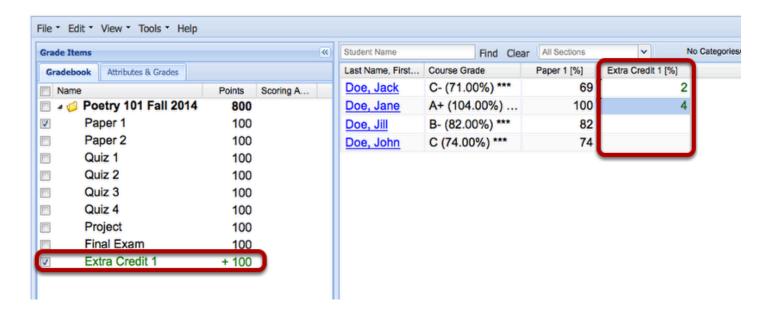

#### Non-weighted gradebook: Scoring by Percentages

#### Enter Extra Credit Item Information, then click Add/Close.

- 1. Enter a **Name** for the Extra Credit item
- 2. When scoring by percentages, leave this point value at 100. Any percentage awarded to a student on this grade item will result in that number of points add the total number of points earned by the student.
- 3. **Include** this Extra credit item in the running Course grade calculation.
- 4. Indicate that this item is "**Extra Credit**". That is, students are not required to be graded for this item and any grade given to a student for this item can only positively affect their Course Grade.
- 5. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 6. **Important:** Do not check **Give ungraded no credit** for an Extra credit item. Students that do not perform extra credit should not receive any grade for this item.
- 7. Click **Add/Close** to add the Extra Credit item and close the New Item frame.

#### **Example:**

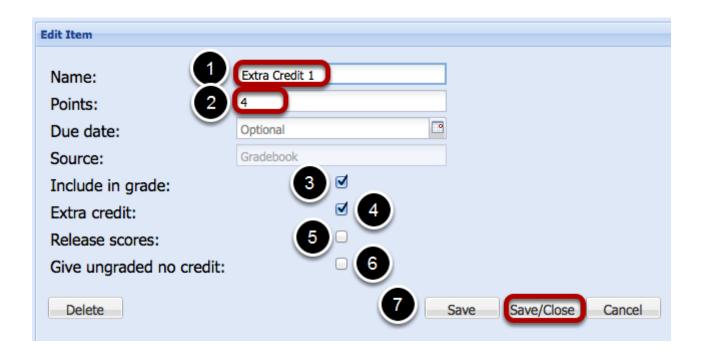

With this set-up, when a score of "2%" is given to a student on the extra credit item, it is the same as adding 2% extra points (2 points on a 100 point scale) to the student's total cumulative score of points.

Tip: You might want to have a single "Extra Credit" item and just increase the awarded score as needed through the semester.

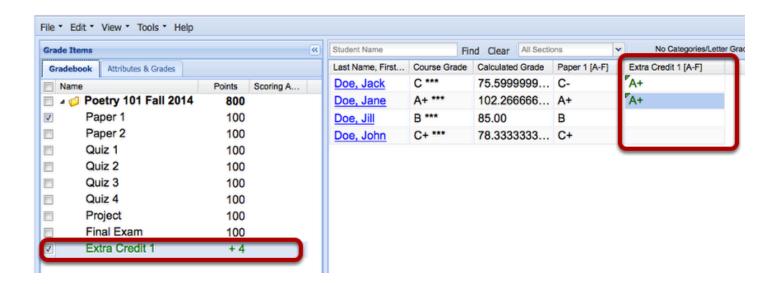

## Non-weighted gradebook: Scoring by Letter Grade

#### Enter Extra Credit Item Information, then click Add/Close.

- 1. Enter a **Name** for the Extra Credit item
- 2. Enter a **Points** value for the Extra credit Item. **This is a bit difficult when the gradebook is** set up for letter grading as there is no 1 to 1 relationship between a letter grade and a point. We recommend, if you are grading by Letter Grade to enter the highest maximum number of extra credit points you want to give in reference to an existing grade item (for instance "4" points) and grade the student with an "A+" on the Extra Credit item, which will add approximately 4 points (actually 98.333% of 4 points) to the total number of points earned by the student.
- 3. **Include** this Extra credit item in the running Course grade calculation.
- 4. Indicate that this item is "**Extra Credit**". That is, students are not required to be graded for this item and any grade given to a student for this item can only positively affect their Course Grade.
- 5. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 6. <u>Important:</u> Do not check **Give ungraded no credit** for an Extra credit item. Students that do not perform extra credit should not receive any grade for this item.
- 7. Click **Add/Close** to add the Extra Credit item and close the New Item frame.

#### **Example:**

With this set-up, when a score of "A+" is given to a student on the extra credit item, and the point value for the extra credit item is set to "4", it is the same as adding 3.933 points (.98333 X 4) to the student's total cumulative score of points.

Tip: You might want to add multiple "Extra Credit" items; one for each time you want to give extra credit through the semester.

# How do I add extra credit to non-weighted categories in Gradebook2?

The Gradebook2 tool does not allow scores above the maximum value. For instance, if grading by Points, and the maximum point value is set to 150, you cannot assign a score of 155 points. If grading by Percentages, you cannot assign a score of 105%. If grading by Letter Grade, you cannot assign a score of A++.

Some instructors may want to award extra credit either as an addition to an existing grade or as a separate extra credit assignment.

The method of adding extra credit is slightly different depending on whether the gradebook is "non-weighted", "non-weighted categories" or "weighted categories".

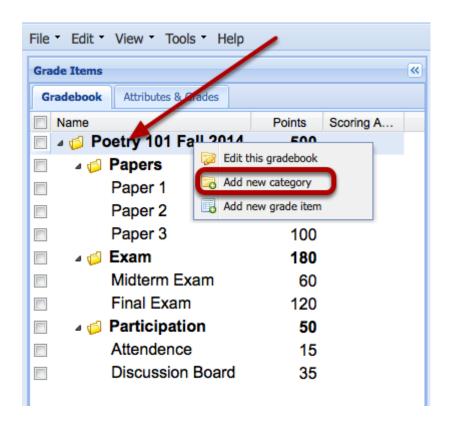

It is also slightly dependent on whether the gradebook is scored by "points", "percentages" or "letter grades".

In all instances of adding extra credit, it is important to look at the total number of possible points that can be awarded for the semester to a student and base your extra credit calculations on how will it affect the final Course Grade.

#### Go to Gradebook2.

Select **Gradebook2** from the Tool Menu in your site.

# Right-Click the name of the Gradebook and select Add New Category.

This displays the Add Category panel on the right.

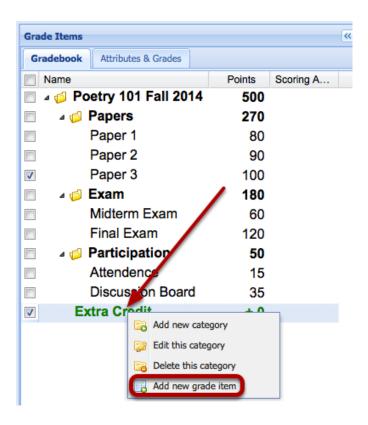

### **Enter Extra Credit Category information.**

- 1. Enter a **name** of the Category (usually "Extra Credit").
- 2. **Include** this Extra credit Category in the running Course grade calculation.

- 3. Indicate that this category is "Extra Credit". That is, students are not required to be graded for any item in this category and any grade given to a student for any item in this category can only positively affect their Course Grade.
- 4. Release Scores is usually unchecked in the Category set-up. Instructors can always edit individual graded items and decide if they want to release those scores to students or not.
- 5. Click **Add/Close** to add the Extra Credit item and close the New Item frame.

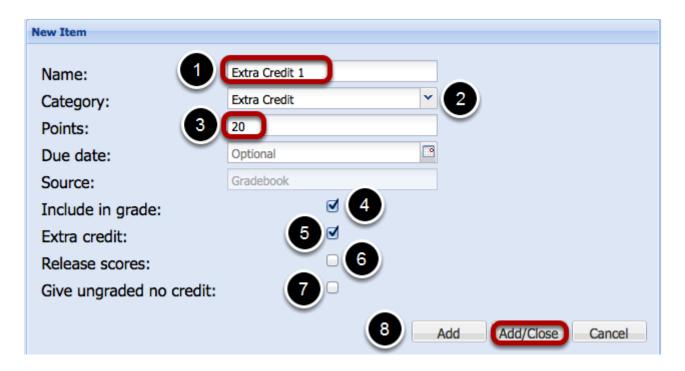

### Right-click the name of the Gradebook and select Add a new grade item.

This displays the New Item panel on the right.

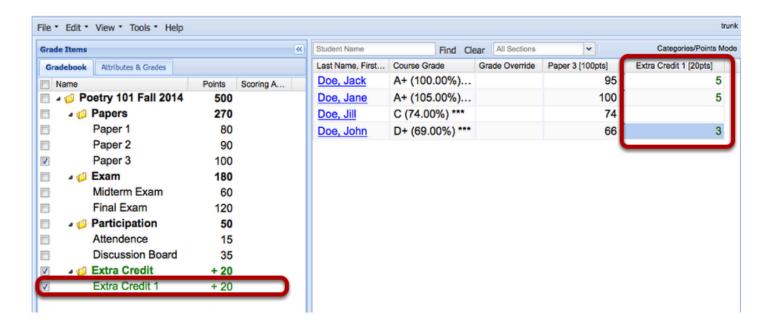

**Page 327** Sakai 10 Instructor Guide This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

# (Non-weighted Category gradebook - Scoring by Points) - Enter Extra Credit Item Information, then click Add/Close.

- 1. Enter a **Name** for the Extra Credit item.
- 2. Note that this new item is to be located in the Extra Credit Category
- 3. Enter a **Points** value for the Extra credit Item. **When scoring by points make this value the maximum extra points you want to be able to add to the overall Course Grade. Any points awarded to a student on this grade item will be added to the total number of points earned by the student.**
- 4. **Include** this Extra credit item in the running Course grade calculation.
- 5. Indicate that this item is "**Extra Credit**". That is, students are not required to be graded for this item and any grade given to a student for this item can only positively affect their Course Grade.
- 6. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 7. <u>Important:</u> Do not check **Give ungraded no credit** for an Extra credit item. Students that do not perform extra credit should not receive any grade for this item.
- 8. Click **Add/Close** to add the Extra Credit item and close the New Item frame.

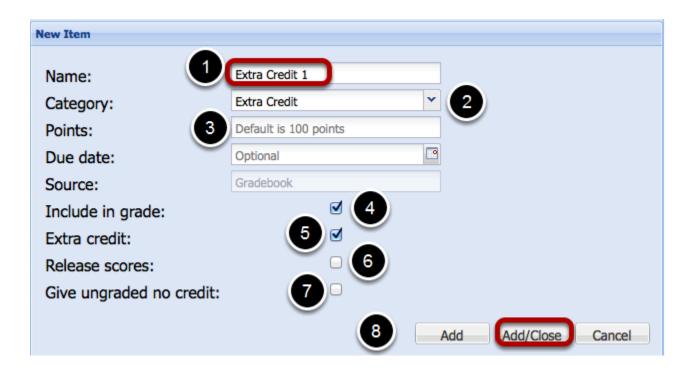

#### **Example: (Non-weighted Category gradebook - Scoring by Points)**

With this set-up, when a score of "5" is given to a student on the extra credit item, it is the same as adding 5 extra points to the student's total cumulative score of points.

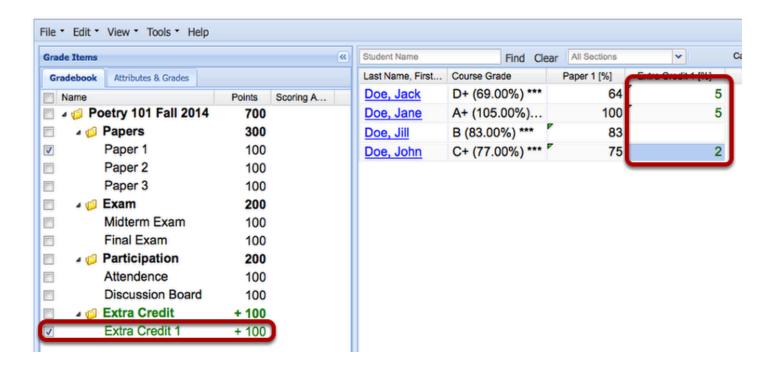

Tip: You might want to have a single "Extra Credit" item and just increase the awarded score as needed through the semester.

# (Non-weighted Category gradebook - Scoring by Percentages) - Enter Extra Credit Item Information, then click Add/Close.

- 1. Enter a **Name** for the Extra Credit item
- 2. Note that this new item is to be located in the Extra Credit Category
- 3. When scoring by percentages, leave this point value at 100. Any percentage awarded to a student on this grade item will result in that number of points add the total number of points earned by the student.
- 4. **Include** this Extra credit item in the running Course grade calculation.
- 5. Indicate that this item is "**Extra Credit**". That is, students are not required to be graded for this item and any grade given to a student for this item can only positively affect their Course Grade.
- 6. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 7. <u>Important:</u> Do not check **Give ungraded no credit** for an Extra credit item. Students that do not perform extra credit should not receive any grade for this item.
- 8. Click **Add/Close** to add the Extra Credit item and close the New Item frame.

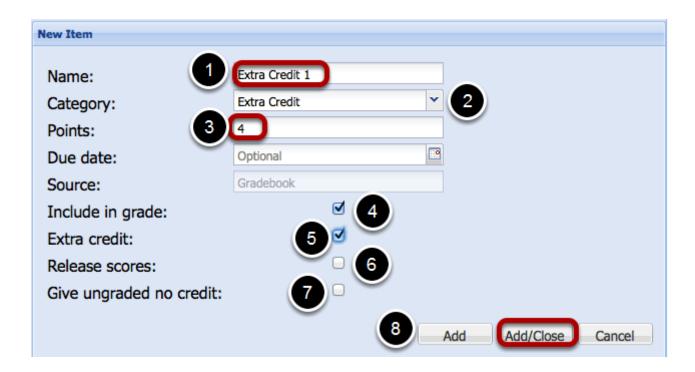

## Example: (Non-weighted Category gradebook - Scoring by Percentages)

With this set-up, when a score of "2%" is given to a student on the extra credit item, it is the same as adding 2% extra points (2 points on a 100 point scale) to the student's total cumulative score of points.

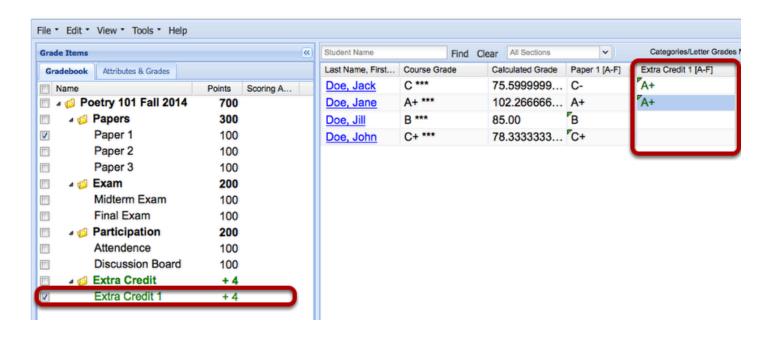

Tip: You might want to have a single "Extra Credit" item and just increase the awarded score as needed through the semester.

# (Non-weighted Category gradebook - Scoring by Letter Grade) - Enter Extra Credit Item Information, then click Add/Close.

- 1. Enter a **Name** for the Extra Credit item.
- 2. Note that this new item is to be located in the Extra Credit Category
- 3. Enter a **Points** value for the Extra credit Item. **This is a bit difficult when the gradebook is** set up for letter grading as there is no 1 to 1 relationship between a letter grade and a point. We recommend, if you are grading by Letter Grade to enter the highest maximum number of extra credit points you want to give in reference to an existing grade item (for instance "4" points) and grade the student with an "A+" on the Extra Credit item, which will add approximately 4 points (actually 98.333% of 4 points) to the total number of points earned by the student.
- 4. **Include** this Extra credit item in the running Course grade calculation.
- 5. Indicate that this item is "**Extra Credit**". That is, students are not required to be graded for this item and any grade given to a student for this item can only positively affect their Course Grade.
- 6. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 7. **Important:** Do not check **Give ungraded no credit** for an Extra credit item. Students that do not perform extra credit should not receive any grade for this item.
- 8. Click **Add/Close** to add the Extra Credit item and close the New Item frame.

## Example: (Non-weighted Category gradebook - Scoring by Letter Grades)

With this set-up, when a score of "A+" is given to a student on the extra credit item, and the point value for the extra credit item is set to "4", it is the same as adding 3.933 points (.98333 X 4) to the student's total cumulative score of points.

Tip: You might want to add multiple "Extra Credit" items; one for each time you want to give extra credit through the semester.

# How do I add extra credit to weighted categories in Gradebook2?

The Gradebook2 tool does not allow scores above the maximum value. For instance, if grading by Points, and the maximum point value is set to 150, you cannot assign a score of 155 points. If grading by Percentages, you cannot assign a score of 105%. If grading by Letter Grade, you cannot assign a score of A++.

Some instructors may want to award extra credit either as an addition to an existing grade or as a separate extra credit assignment.

The method of adding extra credit is slightly different depending on whether the gradebook is "non-weighted", "non-weighted categories" or "weighted categories"

It is also slightly dependent on whether the gradebook is scored by "points", "percentages" or "letter grades".

In all instances of adding extra credit, it is important to look at the total number of possible points that can be awarded for the semester to a student and base your extra credit calculations on how will it affect the final Course Grade.

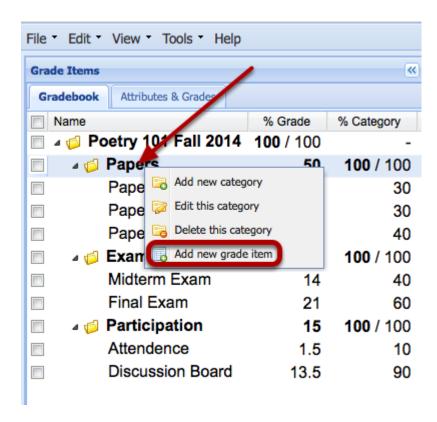

This becomes a bit more complex when working with a weighted categories gradebook because instructors have the option to add an extra credit **item** to an existing category (which affectes to overall grade only as much as the weighted category affects the overall grade) or they can add an "weighted" Extra Credit **category** and place extra credit items within it (which will affect the overall grade only as much as the extra credit weighted category affects the overall grade).

- Case 1: Adding an extra credit item to an existing category.
- Case 2: Adding an extra credit category.

#### Go to Gradebook2.

Select **Gradebook2** from the Tool Menu in your site.

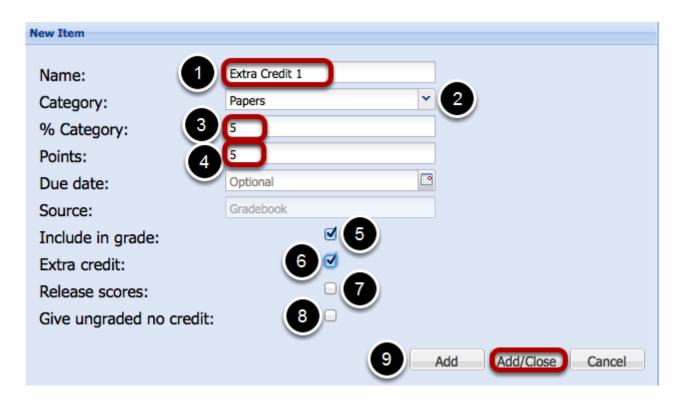

### Case 1: Adding an extra credit item to an existing category

Right-click the name of the Category and select **Add a new grade item**.

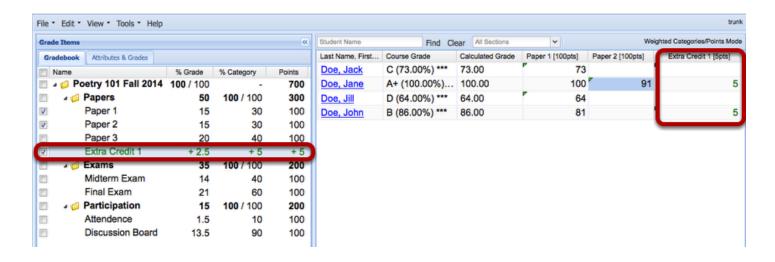

This displays the New Item panel on the right.

# (Weighted Category gradebook - Scoring by Points) - Enter Extra Credit Item Information, then click Add/Close

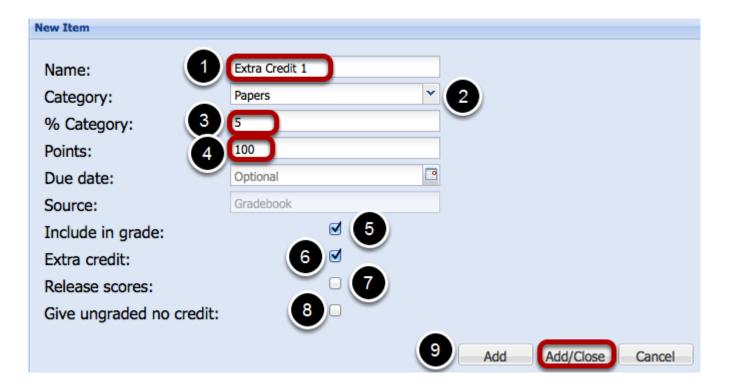

- 1. Enter a **Name** for the Extra Credit item.
- 2. Note that this new item is located in an existing Category.
- 3. Enter the **Percentage** of the Category. For instance, in the example above the extra credit item is worth 5% of the Papers category. Since the papers category is worth 50% of the Course Grade, the extra credit item (if given full credit) is worth 2.5% of the Course Grade  $(.05 \times 50)$ .
- 4. Enter a **Points** value for the Extra credit Item. When grading by points set this number in some relationship to the percentage number for easier calculation. In the example above, the maximum point value is set to 5 (same as the percentage). Since, in this case, the item is worth a maximum of 2.5% of the Course Grade, every point awarded here is worth .5% of the Course Grade. A grade of "4" adds 2% to the Course Grade.
- 5. **Include** this Extra credit item in the running Course grade calculation.
- 6. Indicate that this item is "**Extra Credit**". That is, students are not required to be graded for this item and any grade given to a student for this item can only positively affect their Course Grade.
- 7. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 8. <u>Important:</u> Do not check **Give ungraded no credit** for an Extra credit item. Students that do not perform extra credit should not receive any grade for this item.
- 9. Click **Add/Close** to add the Extra Credit item and close the New Item frame.

#### **Example: (Weighted Category gradebook - Scoring by Points)**

Tip: You might want to have a single "Extra Credit" item and just increase the awarded score as needed through the semester.

# (Weighted Category gradebook - Scoring by Percentages) - Enter Extra Credit Item Information, then click Add/Close

- 1. Enter a Name for the Extra Credit item.
- 2. Note that this new item is located in an existing **Category.**
- 3. Enter the **Percentage** of the Category. For instance, in the example above the extra credit item is worth 5% of the Papers category. Since the papers category is worth 50% of the

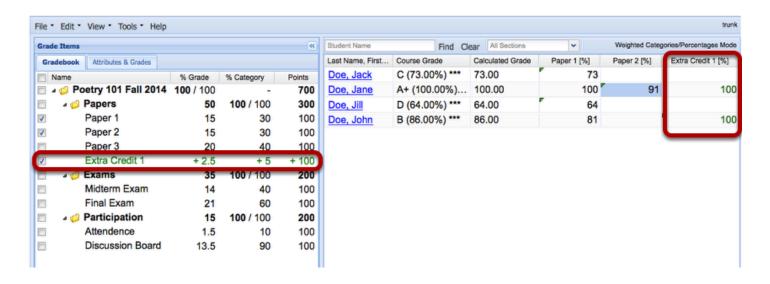

Sakai 10 Instructor Guide

Page 337

- Course Grade, the extra credit item (if given full credit) is worth 2.5% of the Course Grade  $(.05 \times 50)$ .
- 4. Enter a **Points** value for the Extra credit Item. When grading by percentage set this number to 100. In the example above, the point value is set to 100. Since, in this case, the item is worth a maximum of 2.5% of the Course Grade. A grade of 100% will add 5% to the Category and 2.5% to the Course Grade.
- 5. **Include** this Extra credit item in the running Course grade calculation.
- 6. Indicate that this item is "**Extra Credit**". That is, students are not required to be graded for this item and any grade given to a student for this item can only positively affect their Course Grade.
- 7. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 8. <u>Important:</u> Do not check **Give ungraded no credit** for an Extra credit item. Students that do not perform extra credit should not receive any grade for this item.
- 9. Click **Add/Close** to add the Extra Credit item and close the New Item frame.

#### **Example: (Weighted Category gradebook - Scoring by Percentages)**

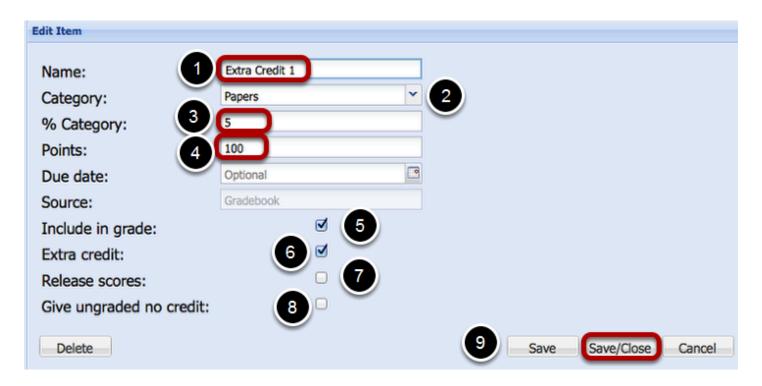

Tip: You might want to have a single "Extra Credit" item and just increase the awarded score as needed through the semester.

## (Weighted Category gradebook - Scoring by Letter Grade) - Enter Extra Credit Item Information, then click Add/Close

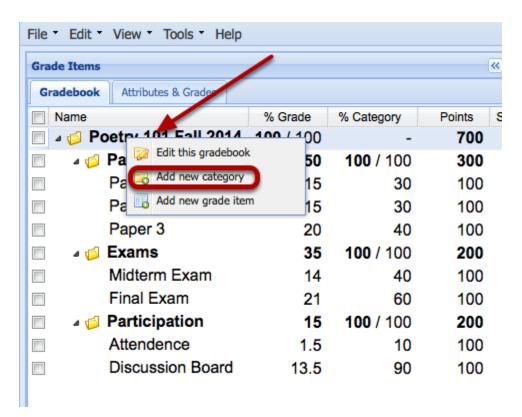

- 1. Enter a **Name** for the Extra Credit item.
- 2. Note that this new item is located in an existing **Category.**
- 3. Enter the **Percentage** of the Category. For instance, in the example above the extra credit item is worth 5% of the Papers category. Since the papers category is worth 50% of the Course Grade, the extra credit item (if given full credit) is worth 2.5% of the Course Grade  $(.05 \times 50)$ .
- 4. Enter a **Points** value for the Extra credit Item. When grading by letter grade set this number to 100, as there is no 1 to 1 relationship between a letter grade and a point. In the example above, the point value is set to 100. Since, in this case, the item is worth a maximum of 2.5% of the Course Grade. A grade of A+ will add 4.9166 points to the category grade or approximately 2.5 points to the overall grade.
- 5. **Include** this Extra credit item in the running Course grade calculation.
- 6. Indicate that this item is "**Extra Credit**". That is, students are not required to be graded for this item and any grade given to a student for this item can only positively affect their Course Grade.
- 7. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 8. <u>Important:</u> Do not check **Give ungraded no credit** for an Extra credit item. Students that do not perform extra credit should not receive any grade for this item.
- Click Add/Close to add the Extra Credit item and close the New Item frame.

# **Example: (Weighted Category gradebook - Scoring by Letter Grade)**

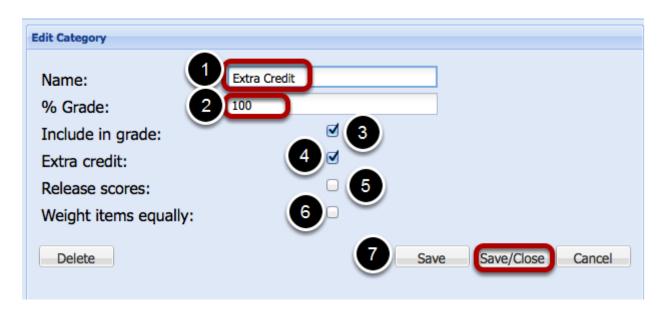

## Case 2: Adding an extra credit category

Right-Click the name of the Gradebook and select **Add New Category**.

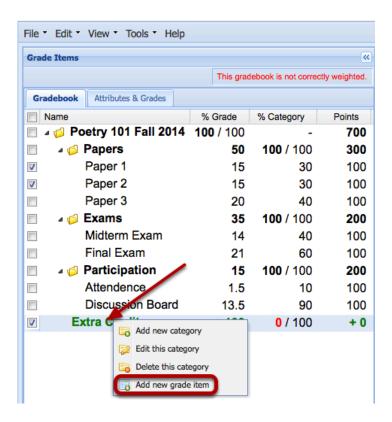

This displays the Add New Category panel on the right.

#### Enter the Category Information, then click Save/Close.

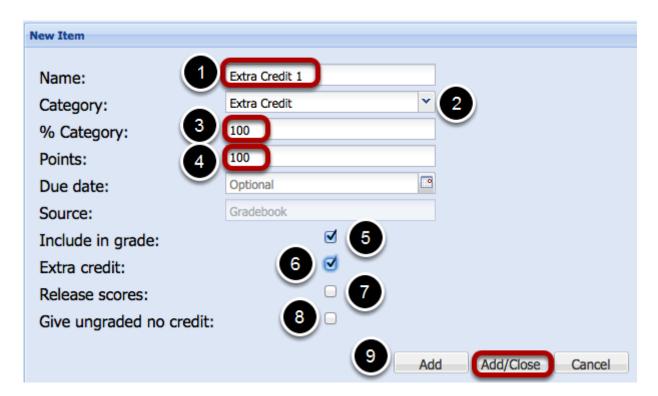

- 1. Enter a **name** of the Category (usually "Extra Credit").
- 2. Enter the **Percentage** of the Course Grade. In the example above, the Extra Credit Category allows a 100% increase in the Course Grade.
- 3. **Include** this Extra credit Category in the running Course grade calculation.
- 4. Indicate that this category is "**Extra Credit**". That is, students are not required to be graded for any item in this category and any grade given to a student for any item in this category can only positively affect their Course Grade.
- 5. **Release Scores** is usually unchecked in the Category set-up. Instructors can always edit individual graded items and decide if they want to release those scores to students or not.
- 6. Leave Weight items equally unchecked so you can adjust the weight of individual extra credit items.
- 7. Click **Save/Close** to add the Extra Credit item and close the New Item frame.

#### Right-click the Extra Credit Category and select Add a new Item.

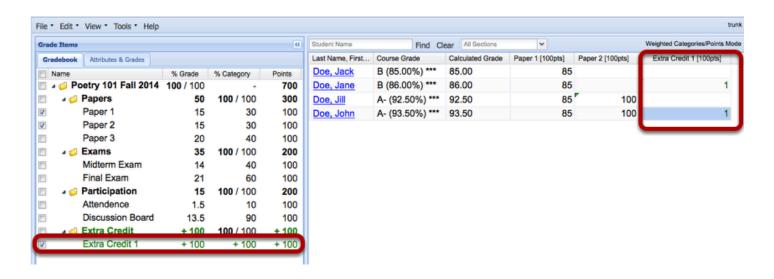

This displays the Add New Item panel on the right.

#### Enter the graded Item information, then click Add/Close.

- 1. Enter a **Name** for the Extra Credit item.
- 2. Note that this new item is located in an existing **Category** (Extra Credit).
- 3. Enter the **Percentage** of the Category. For instance, in the example above the extra credit item is worth 100% of the Extra Credit category. When grading by points (on a 100 point scale) or grading by percentages (on a 0 to 100% scale), each point or percentage will increase the student's Course Grade by 1%.
- 4. Enter a **Points** value for the Extra credit Item. Set this number to 100.
- 5. **Include** this Extra credit item in the running Course grade calculation.
- 6. Indicate that this item is "**Extra Credit**". That is, students are not required to be graded for this item and any grade given to a student for this item can only positively affect their Course Grade.
- 7. Check **Release Scores** to let students see their scores and statistics for the item. Note: Usually, this is kept unchecked until the instructor is ready to release the item scores to the students. Instructors can always return to these settings and change the "Release Scores" setting later.
- 8. <u>Important:</u> Do not check **Give ungraded no credit** for an Extra credit item. Students that do not perform extra credit should not receive any grade for this item.
- 9. Click **Add/Close** to add the Extra Credit item and close the New Item frame.

#### **Example: Case 2: (Adding an extra credit category)**

Tip: In this set-up, to add .5% to a student's overall Course Grade, score the Extra Credit item ".5"

# How do I drop the lowest grade(s) from a category in Gradebook2?

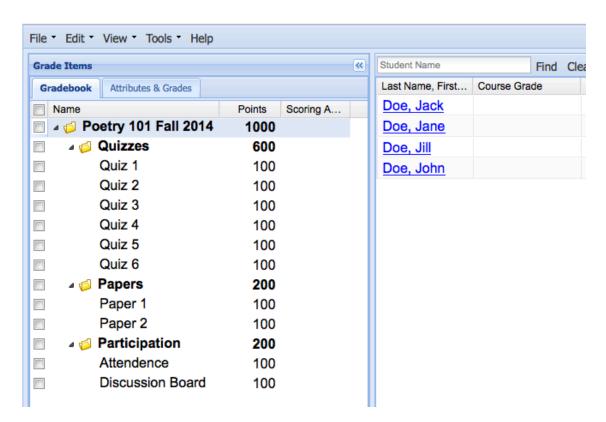

If you are using a Non-weighted (or weighted) Categories gradebook, you can arrange for a number of the lowest grades in any category to be dropped from Course grade consideration.

The gradebook must use categories (weighted or non-weighted) to use the drop lowest grade functionality.

#### Go to Gradebook2.

Select **Gradebook2** from the Tool Menu in your site.

# Case I: If you use non-weighted categories gradebook (grading by points):

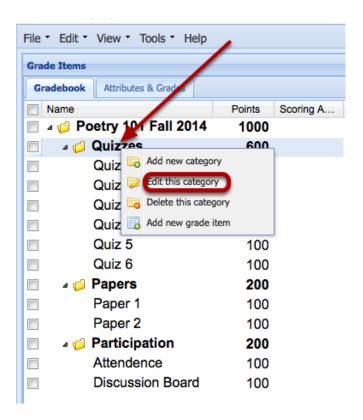

The gradebook has 3 categories (Quizzes, Papers and Participation). The instructor would like to drop the lowest grade from the Quizzes Category.

Sakai 10 Instructor Guide

Page 345

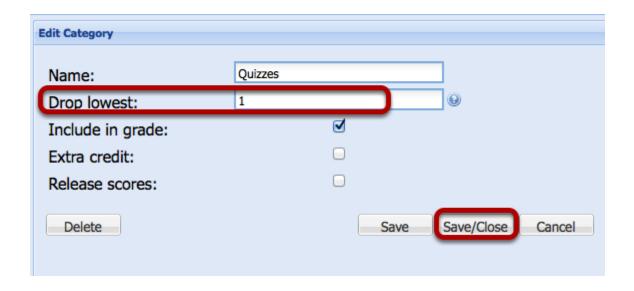

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### Right-click the category name and select Edit this Category.

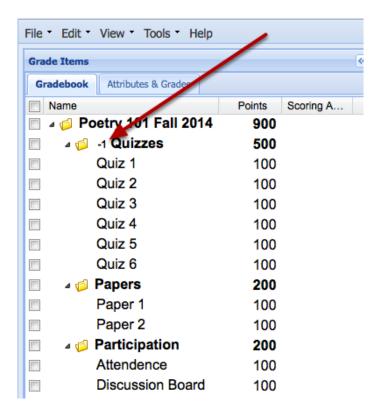

This displays the Edit Category panel on the right.

## Enter the number of lowest category grades to be dropped, then click Save/Close.

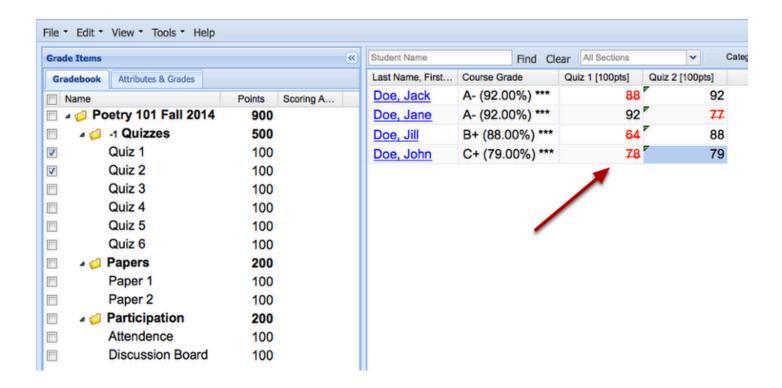

This will drop the lowest grade(s) from the Course Grade calculation.

#### **Example 1:**

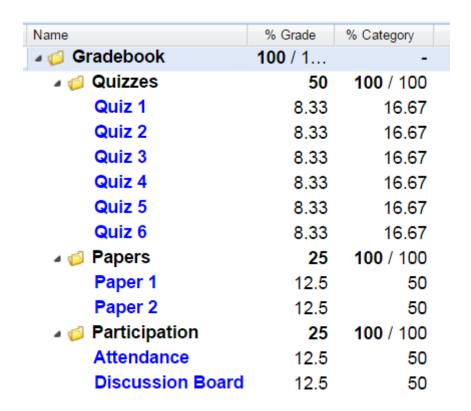

Notice that to the left of the Quizzes category name is a "-1" indicating that the lowest grade for this category will be dropped from the Course Grade.

#### **Example 2:**

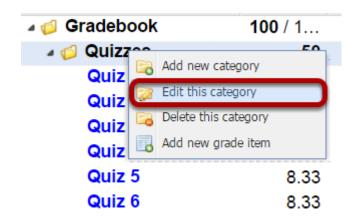

Notice that the lowest score in the category is displayed in red with a line drawn through it and that grade is not included in the Course Grade calculation.

### Case II: If you use weighted categories in your gradebook:

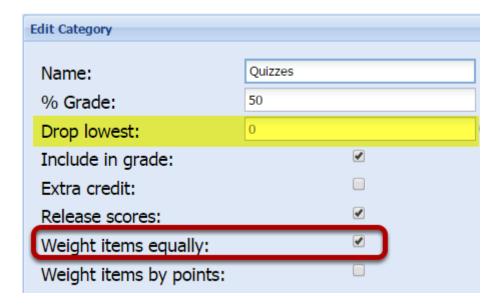

Categories carry a percentage of the total grade, and there are grade items within those categories.

## Right-click the category name and select Edit this Category.

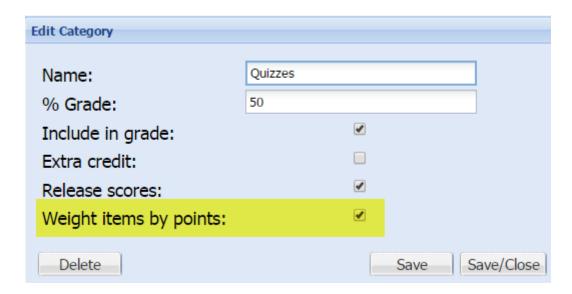

#### Select "Weight items equally."

You must check "Weight Items equally" before seeing the Drop Lowest field.

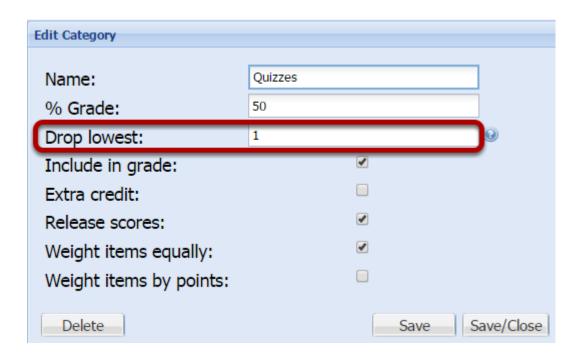

## NOTE: If you only see "Weight items by points," you will need to uncheck that choice before the option to weight items equally will appear.

The ability to drop the lowest grades in a category is only available if you choose to weight items equally.

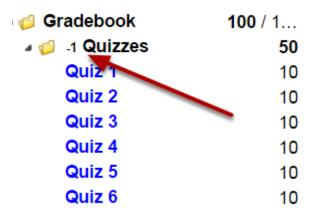

## Enter the number of lowest category grades to be dropped,

#### then click Save/Close.

This will drop the lowest grade(s) from the Course Grade calculation.

#### **Example 1:**

Notice that to the left of the Quizzes category name is a "-1" indicating that the lowest grade for this category will be dropped from the Course Grade.

### Example 2:

Last Name, First -	Course Grade	Quiz 1	Quiz 2	Quiz 3
Bohr, Niels	A (95.00	88	92	98
Giuliani, Rudy	A- (94.50	92	77	97
Hsu, Feng	B (83.50	<del>64</del>	88	79
Parks, Rosa	B- (82.00	78	79	85
Phelps, Mic	A- (90.00	<del>85</del>	92	88

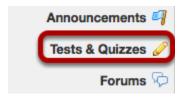

Notice that the lowest score in the category is displayed in red with a line drawn through it and that grade is not included in the Course Grade calculation.

# How do I connect the Test & Quizzes tool to Gradebook2?

The Gradebook2 tool can be connected to the Test and Quizzes tool so that grades scored in the Test & Quizzes tool are displayed in the Gradebook2 tool.

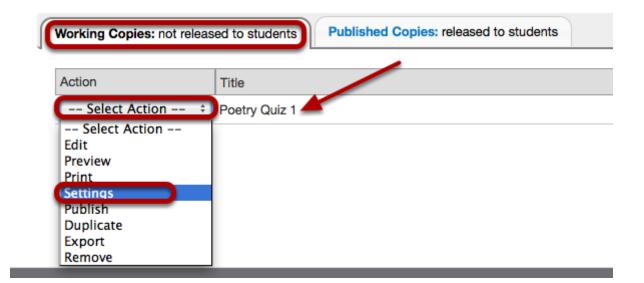

Note; If you connect a Test or Quiz to the Gradebook2 tool, you cannot add (or edit) the student's grade in the Gradebook spreadsheet column. All grades come from Test & Quizzes tool. Grades can be adjusted in the Test & Quizzes tool under Published Copies > Select Actions > Scores.

#### Go to the Test and Quizzes tool.

Select **Tests & Quizzes** from the Tool Menu in your site.

## Go to the assessment settings.

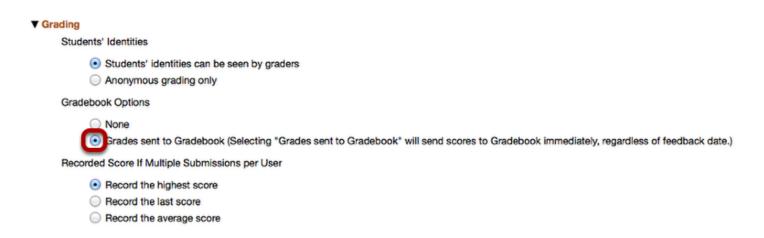

Under the Working Copies tab, for the selected assessment, click **Select Action**, then select **Settings**.

Sakai 10 Instructor Guide

Page 353

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### Send grades to gradebook.

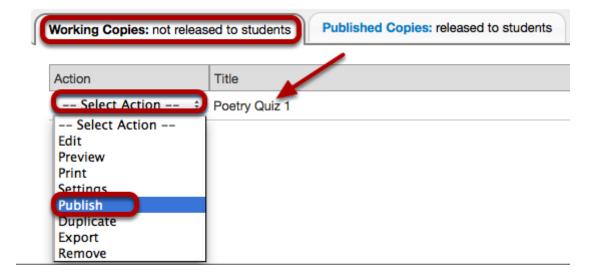

#### Under **Grading**, select **Grades sent to Gradebook**.

Note; If you connect a Test > Quiz to the Gradebook2 tool, you cannot add (or edit) the student's grade in the Gradebook spreadsheet column. All grades come from Test & Quizzes tool. Grades can be adjusted in the Test & Quizzes tool under Published Copies > Select Actions > Scores.

#### **Click Save Settings.**

#### Publish the assessment.

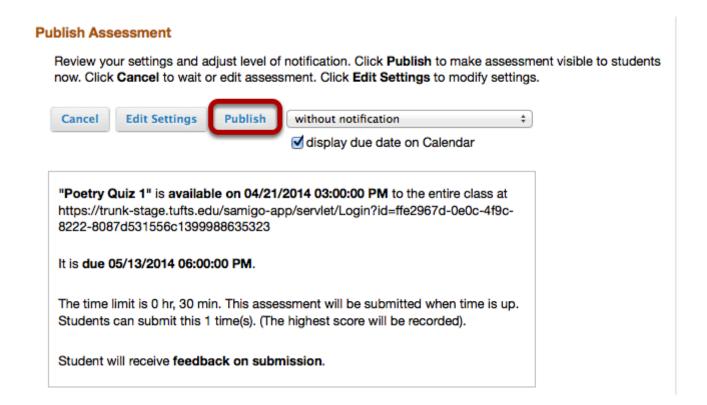

Sakai 10 Instructor Guide

Page 354

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Under the Working Copies tab, for the selected Assessment, click **Select Action** then click **Publish**.

#### Click Publish.

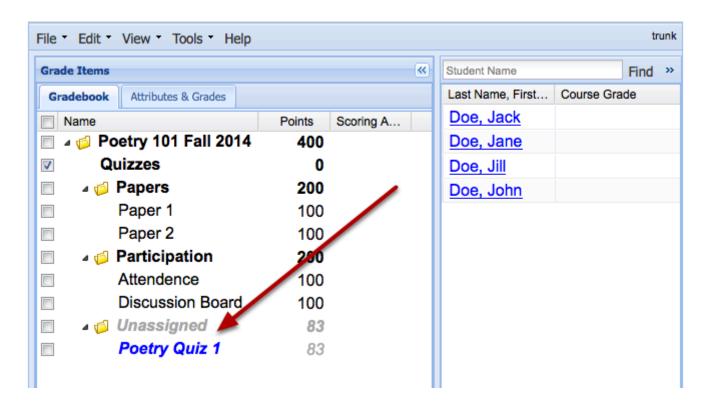

This places a copy of the assessment under the Published Assessments tab.

#### Go to Gradebook2.

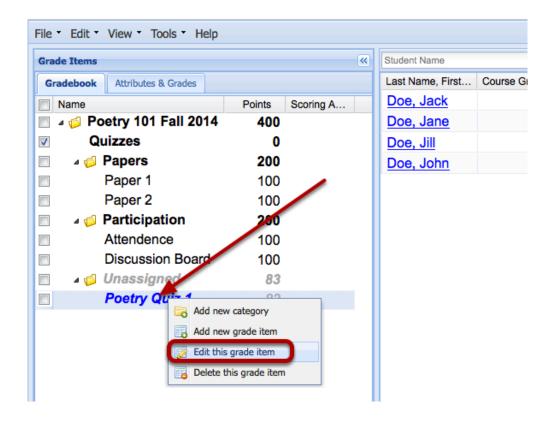

Select **Gradebook2** from the Tool Menu in your site.

### Notice the listing for the Test and Quizzes assessment.

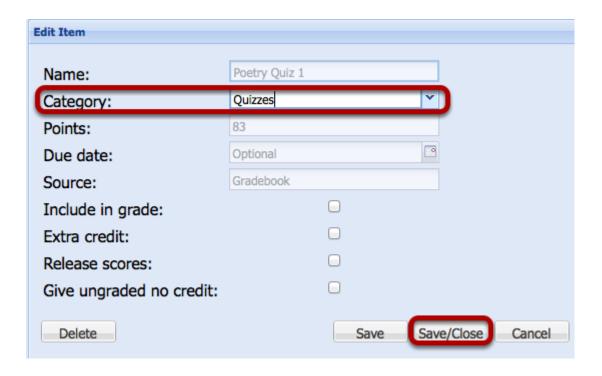

By default, the assessment item is placed in an "unassigned" category (if you are using categories) and it is displayed in Blue, which means that the grades can be see in the gradebook as soon as they submit the quiz.

# Right-click the name of the grade item and select Edit this grade item.

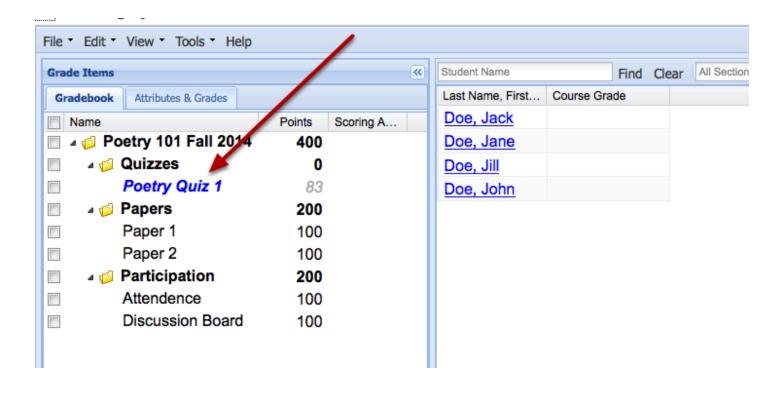

This displays the Edit Item panel on the right.

## Change the Category to the Selected Category, then click Save Close.

Note: as an alternative, you can drag and drop the grade item into the proper category, however, this does not work well with some browsers.

#### **Example:**

Sakai 10 Instructor Guide

Page 358

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# How do I connect the Assignments tool to Gradebook2?

#### Go to the Assignments tool.

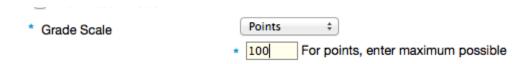

Select **Assignments** from the Tool Menu in your site.

#### Click Add.

If you prefer, you may edit an existing assignment instead.

#### Enter points.

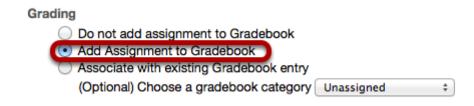

Under Grade Scale, select Points and enter a number of maximum points.

All Assignments connected to the Gradebook must be graded by points. If your Gradebook is set up for grading by percentages or letter grades, the Assignment tool will automatically convert the points to percentages or letter grades.

### Select a Grading option.

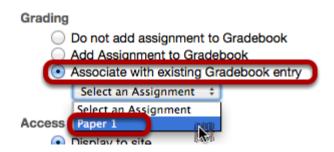

#### **Option 1: Select Add Assignment to Gradebook.**

Making this connection creates a new item in the Gradebook2 tool.

Note; If you use this type of Gradebook connection you cannot add (or edit) the student's grade in the Gradebook spreadsheet column. All grades come from the Assignment tool.

#### **Option 2: Select Associate with existing Gradebook entry.**

Making this connection send the grades to an existing item in the Gradebook2 tool.

Note; If you use this type of Gradebook connection you add (or edit) the student's grade in both the Assignments tool AND in the the Gradebook spreadsheet column.

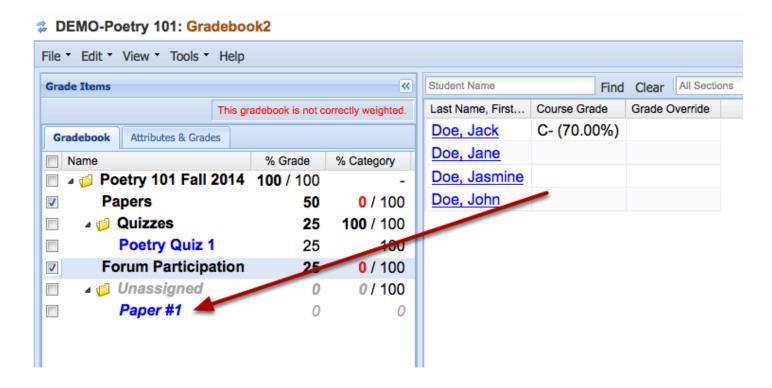

#### Sett the rest of the Assignment properties, then click Post.

#### Go to Gradebook2.

Select **Gradebook2** from the Tool Menu in your site.

#### **Option 1: New gradebook item.**

If you selected **Add Assignment to Gradebook**, a new item will be added to the Gradebook.

By default, the assessment item is placed in an "unassigned" category (if you are using categories) and it is displayed in Blue, which means that the grades can be see in the gradebook as soon as they released in the Assignment tool.

#### Edit the gradebook item.

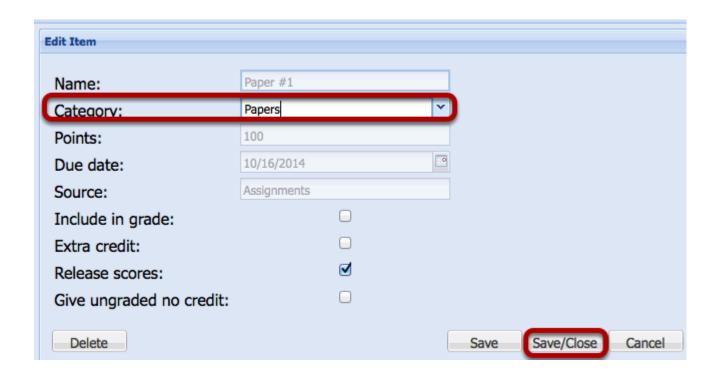

#### DEMO-Poetry 101: Gradebook2

Right-click the name of the grade item and select **Edit this grade item**.

This displays the Edit Item panel on the right.

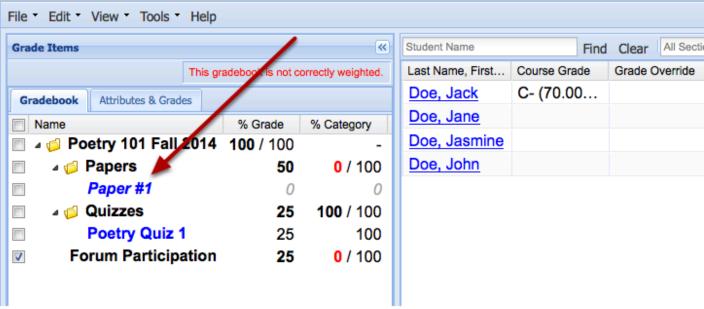

### Change the Category to the Selected Category, then click Save Close.

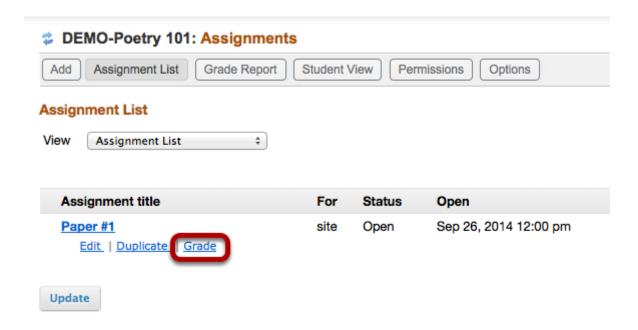

Note: as an alternative, you can drag and drop the grade item into the proper category, however, this does not work well with some browsers.

#### **Example:**

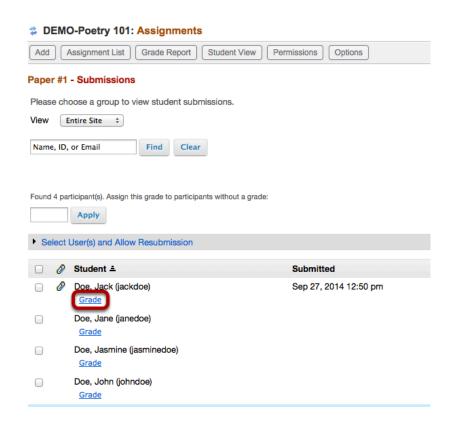

### Grading: Go to the Assignments tool and click Grade for the assignment.

#### Grading: Click Grade for the specific student's submission.

Sakai 10 Instructor Guide

Page 364

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Grading: Enter a Grade for the student assignment.

#### Grading: Click either Save and Release or Save and Don't Release.

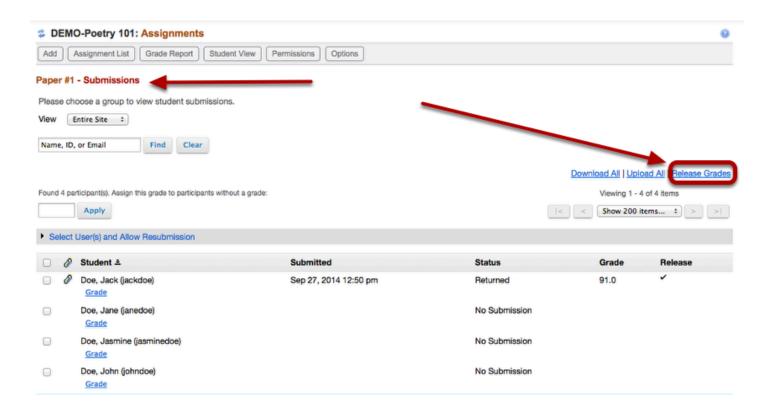

Clicking "Save and Release" will post the Grade in both the Assignment tool and in the Gradebook tool.

Clicking "Save and Don't Release" will save the Grade but the Student will not see the grade in either the Assignment tool or the Gradebook tool.

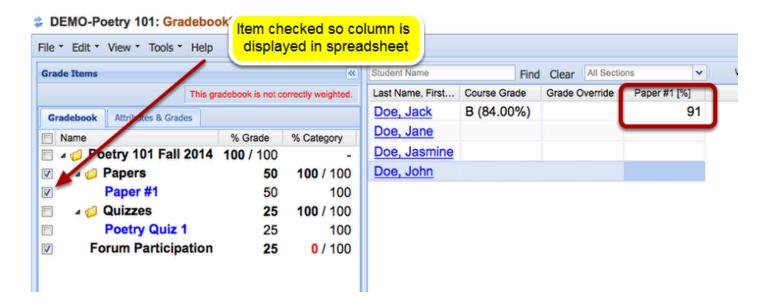

Sakai 10 Instructor Guide

Page 365
This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

#### Grading: Instructors can optionally Release All grades at once on the Assignment Submission list page.

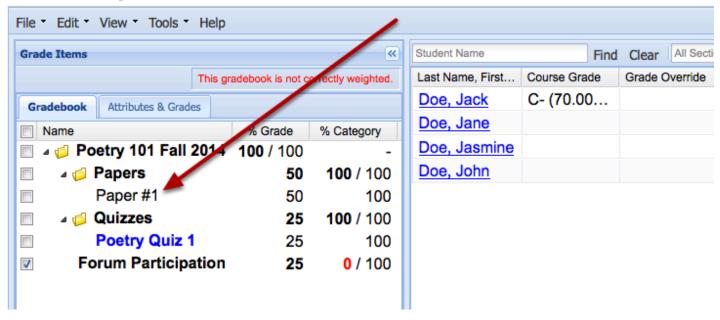

#### Grading: Example of grade displayed in Gradebook2 tool.

Note: Option 1 does not allow the instructor to add/edit the grade in the Gradebook spreadsheet. All grades must come from the Assignment tool and must be released for the student to see them.

#### **Option 2: Existing gradebook item.**

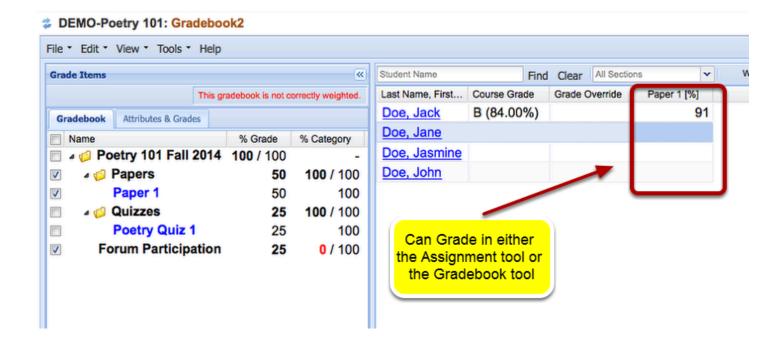

If you selected **Associate with existing Gradebook entry**, the Assignment grade will be associated with the selected existing Gradebook entry.

*Note: The item is not automatically set to be released to students.* 

#### Grading: Go to the Gradebook tool and display the item.

Check the box next to the grade item so it is displayed in the right spreadsheet.

## How do I connect the Forums tool to Gradebook2?

The Gradebook2 tool can be connected to the Forums tool so that grades scored in the Forums tool are displayed in the Gradebook2 tool.

There are 2 different types of connections that can be made to the Forums tool.

**Option 1 - Add Forum to Gradebook:** Making this connection connects all of the Topics located in this Forum to a single item in the Gradebook 2 tool. Instructors will be able to add/subtract points for ANY of the Forum Topics student submissions. That is, there is one grade item that covers all of the discussion topics within the Forum.

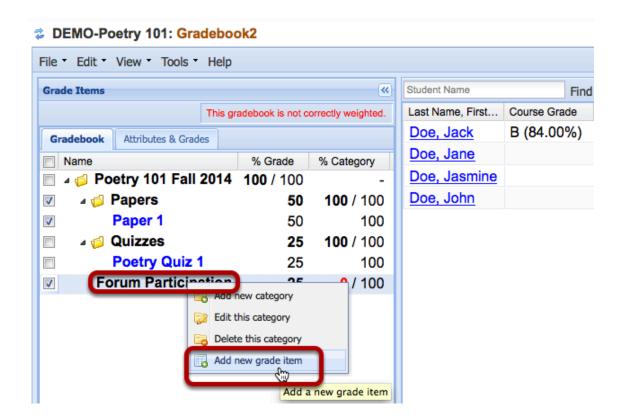

**Option 2 - Add individual Topics to Gradebook:** Making this connection connects a single Topic to a single item in the Gradebook. In order to grade multiple Topics, Instructors need to make multiple connections to the gradebook.

Note: in order to connect the Gradebook2 to a Forum or Topic, you must first create the grade item in the Gradebook2 tool and create the Forum/Topic in the Forums tool.

#### Go to Gradebook2.

Select **Gradebook2** from the Tool Menu in your site.

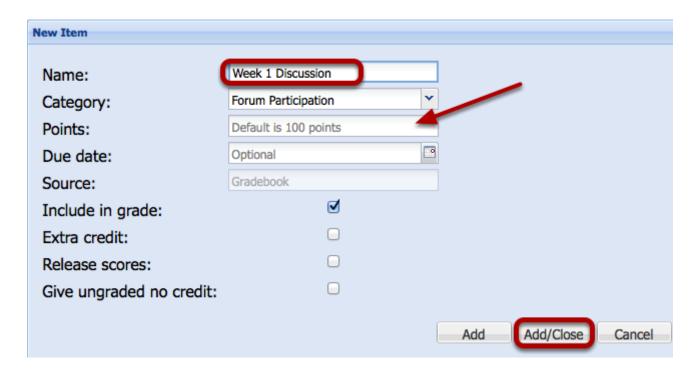

#### Add new grade item.

Right-click the proper category (or the gradebook name if you are not using categories) and select **Add new Grade item**.

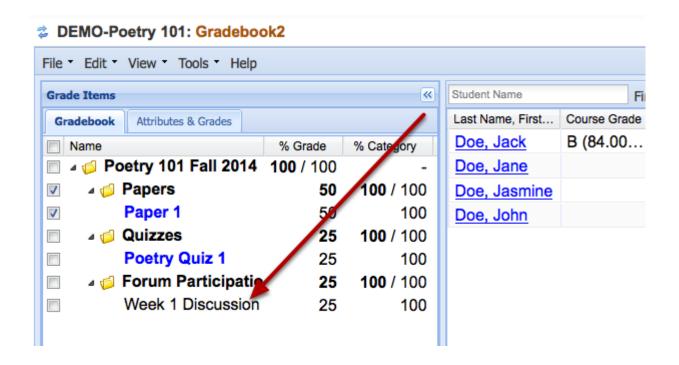

This displays the Add New Item dialog panel on the right.

### Enter the Name and Points of the grade item and then click Save/Close.

This creates the item in the Gradebook.

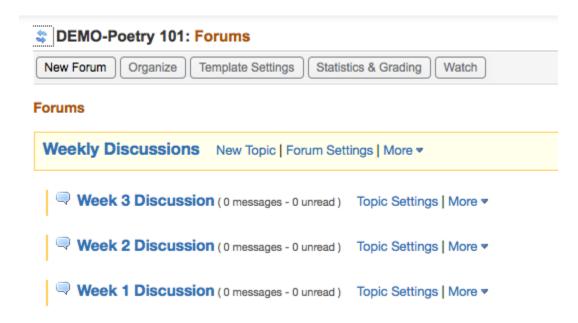

#### **Example:**

#### Go to Forums.

Select **Forums** from the Tool Menu in your site.

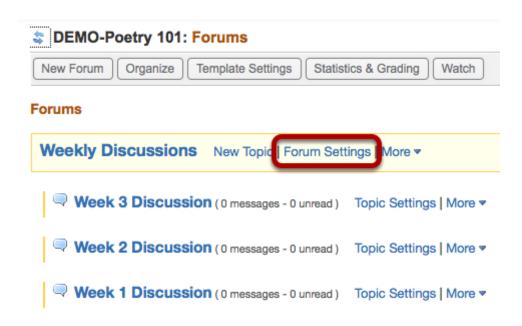

#### Create a Forum with Topics for students to discuss.

Note: You cannot connect a Forum (Option 1) or a Topic (Option 2) to the Gradebook2 when creating a new Forum or Topic. You can only make the connection after the Forum/Topic is created.

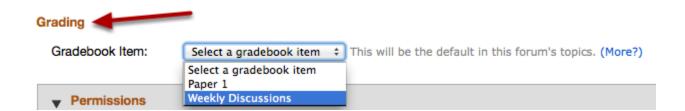

#### **Option 1: Add Forum to Gradebook.**

#### **Click Forum Settings.**

This displays the Edit Forum Settings page.

#### Under Grading, select the existing Gradebook item.

Making this connection connects all of the Topics located in this Forum to a single item in the Gradebook 2 tool. Instructors will be able to add/subtract points for ANY of the Forum Topics student submissions. That is, there is one grade item that covers all of the discussion topics within the Forum.

#### Click Save.

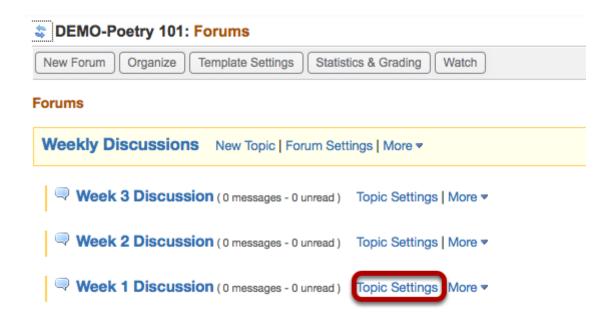

#### Option 2: Add individual Topics to Gradebook.

Sakai 10 Instructor Guide

Page 373

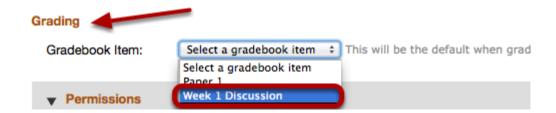

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **Click Topic Settings.**

This displays the Edit Topic Settings page.

#### Under Grading, select the existing Gradebook item.

Making this connection connects a single Topic to a single item in the Gradebook. In order to grade multiple Topics, Instructors need to make multiple connections to the gradebook.

#### Click Save.

#### **Grading: Go to Forums.**

Select **Forums** from the Tool Menu in your site.

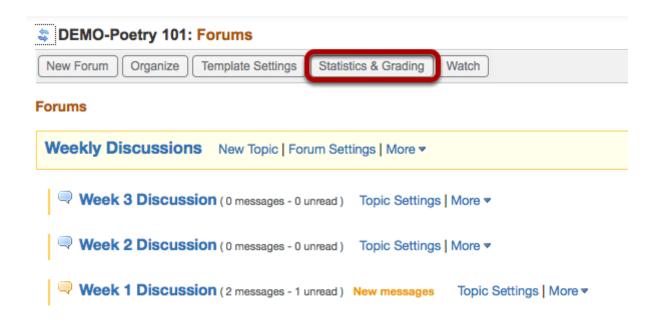

Sakai 10 Instructor Guide

Page 374

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

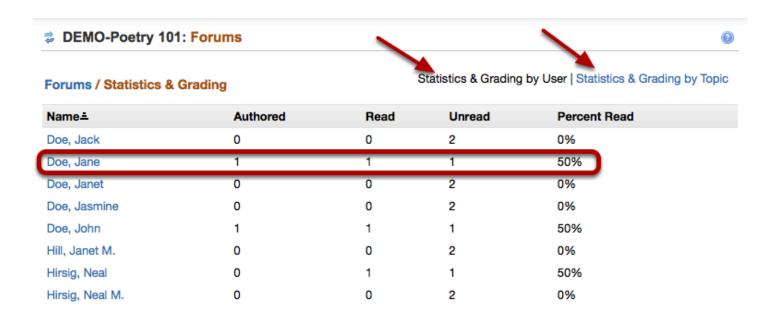

#### **Grade by Student.**

#### **Click Statistics and Grading.**

This displays the Statistics and Grading page.

#### Click on the name of the student you would like to grade.

This displays the Grading page for that student. It contains all of the posts by that student to that forum.

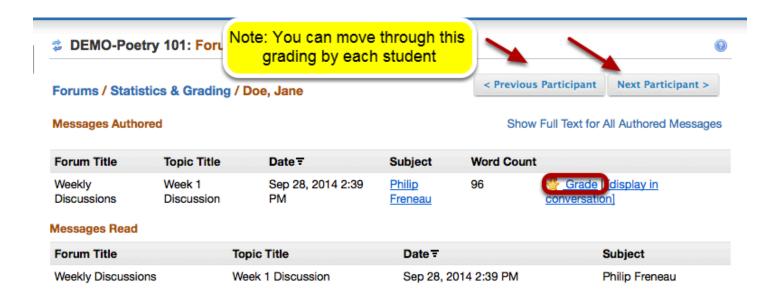

Sakai 10 Instructor Guide

Page 375

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

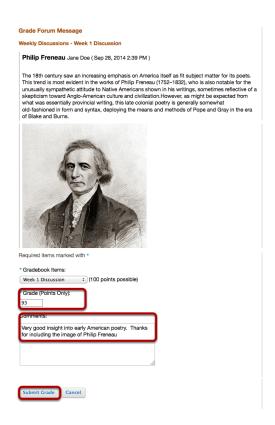

Note: you can also grade by looking at the Statistics and grading for a single Topic.

#### Click Grade.

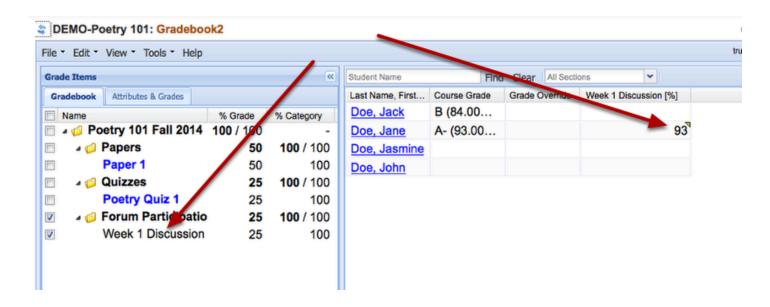

This displays the student post for the selected topic.

#### Read post, grade (and/or comment) then click Submit Grade.

This adds the Grade to the item in the Gradebook2.

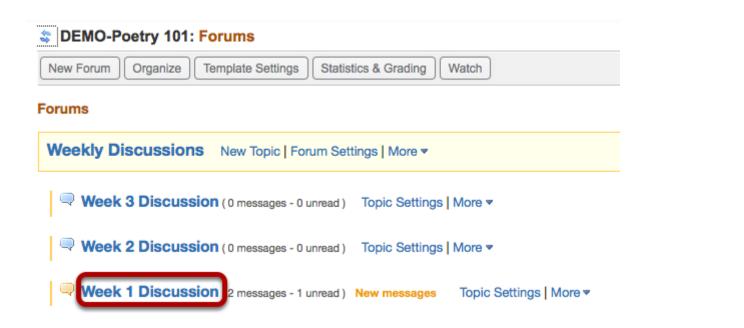

#### **Example:**

Note: It is also possible to add/edit the grade in the Gradebook2.

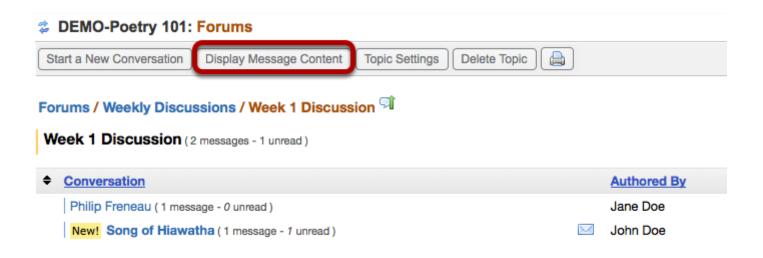

#### **Grade by Topic.**

#### Go to Topic.

This displays the contents of the Topic.

#### **Click Display Message Contents.**

This displays the content of the entire Topic on one page.

#### To the right of the student post, click Grade.

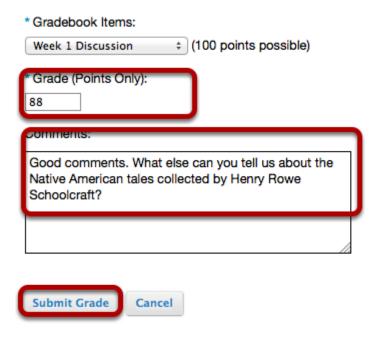

The first significant poet of the independent United States was William Cullen Bryant (1794–1878), whose great contribution was to write rhapsodic poems on the grandeur of prairies and forests. Other notable poets to emerge in the early and middle 19th century include Ralph Waldo Emerson (1803–1882), Henry Wadsworth Longfellow (1807–1882), John Greenleaf Whittier (1807–1892), Edgar Allan Poe (1809–1849), Oliver Wendell Holmes (1809–1894), Henry David Thoreau (1817–1862), James Russell Lowell (1819–1891), Sidney Lanier (1842–1881), and James Whitcomb Riley (1849–1916). As might be expected, the works of these writers are united by a common search for a distinctive American voice to distinguish them from their British counterparts. To this end, they explored the landscape and traditions of their native country as materials for their poetry.

This displays the grading page for this student's post.

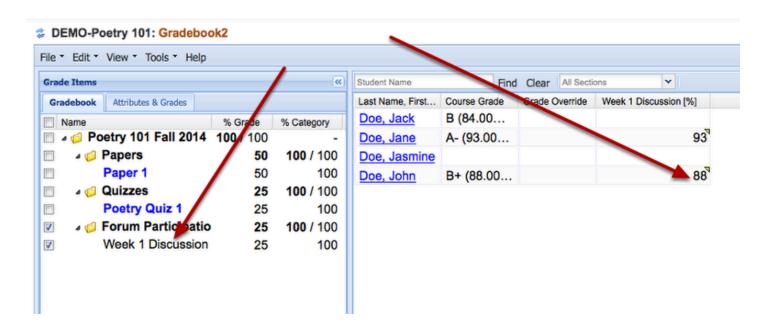

Sakai 10 Instructor Guide Page 378

#### Read post, grade (and/or comment) then click Submit Grade.

This adds the Grade to the item in the Gradebook2.

#### **Example:**

Note: It is also possible to add/edit the grade in the Gradebook2.

Sakai 10 Instructor Guide

Page 379

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### How do I download a Gradebook2 template?

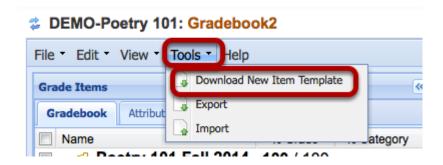

In order to import grades from an Excel spreadsheet, instructors must use a template that organizes the rows and columns of the spreadsheet in a proper format for importing. The Gradebook2 tool provides a mechanism for download a blank template that can be used for grading and importing back to the Gradebook2 tool.

This template can also be used for the Feedback tool (See

#### Go to Gradebook2.

Select **Gradebook2** from the Tool Menu in your site.

#### **Click Tools > Download New Item Template.**

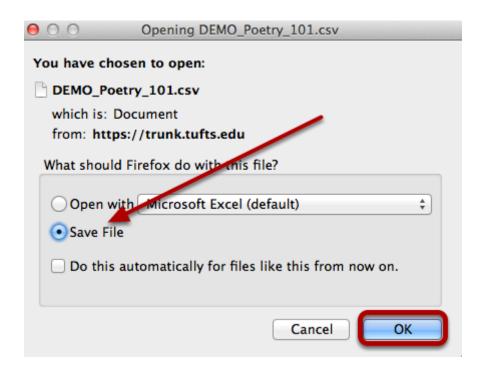

This displays the Gradebook2 download dialog box.

#### Select the default All Sections, then click Download.

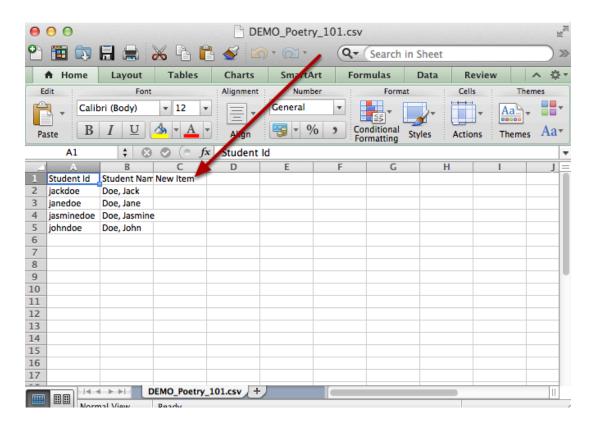

Depending on your computer settings, you may see another downloading dialog box.

#### Download the template (.csv file) to your computer.

## Open the downloaded .csv file in your Excel (or other) spreadsheet application.

The template is set up with the proper columns and the information about your students (ID and Name). Change the Column Header name to the name of your new grade item and add grades to column.

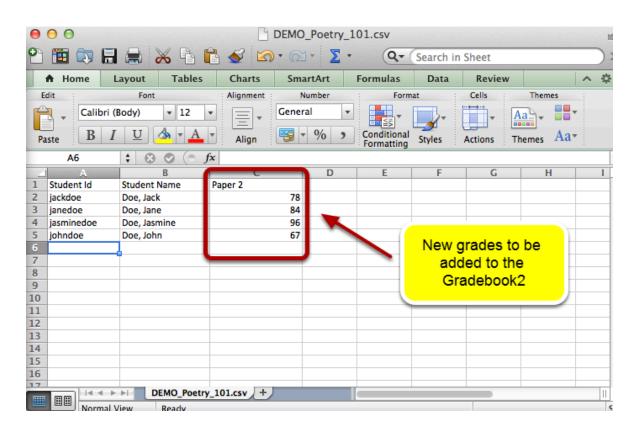

Note: you may add additional grade columns.

## How do I Import grades from an Excel (.csv) file into Gradebook2?

Instructors can import grades into the Gradebook2 tool using a formatted .csv file. A properly formatted .csv file containing all of the student information can be downloaded first from the Gradebook2 tool under Tools > Download New item Template.

Use this template to add/calculate your grades in Excel (or some other spreadsheet application) then import the file back into the Gradebook2.

### Example of a .csv template file with the new grade information added.

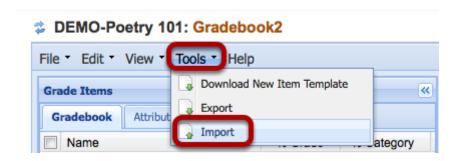

Note: Grades must use the same grading system (Points/Percentages/Letter Grades) as you have chosen for your gradebook.

#### Go to Gradebook.

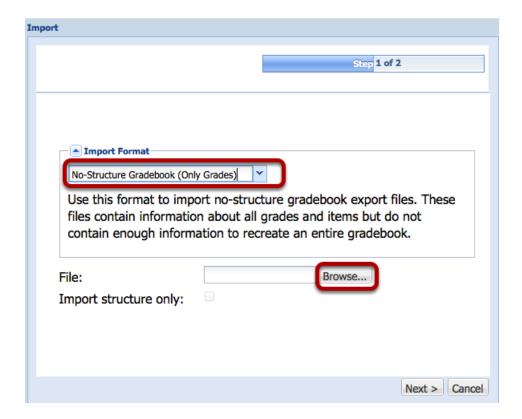

Select **Gradebook2** from the Tool Menu in your site.

#### **Click Tools > Import.**

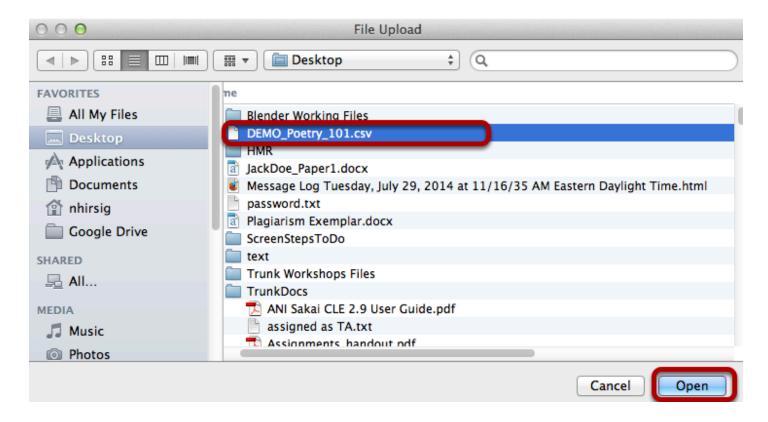

This displays the Gradebook2 Import dialog box.

### Select No-structure gradebook (grades only), then click Browse.

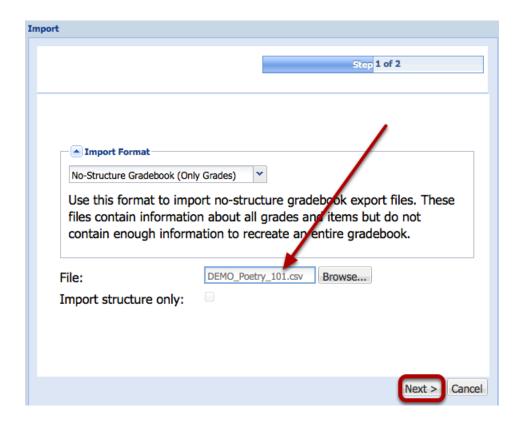

This displays your computer's file locator.

## Locate the .csv file on our computer, then click Open (or Select).

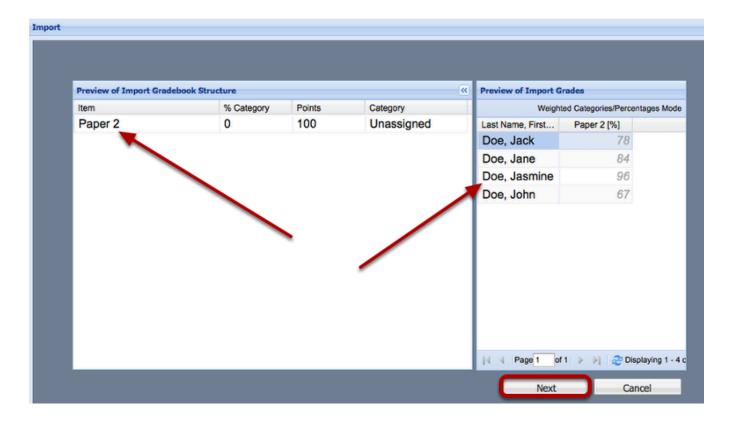

This returns the display to the Import dialog box.

#### **Click Next.**

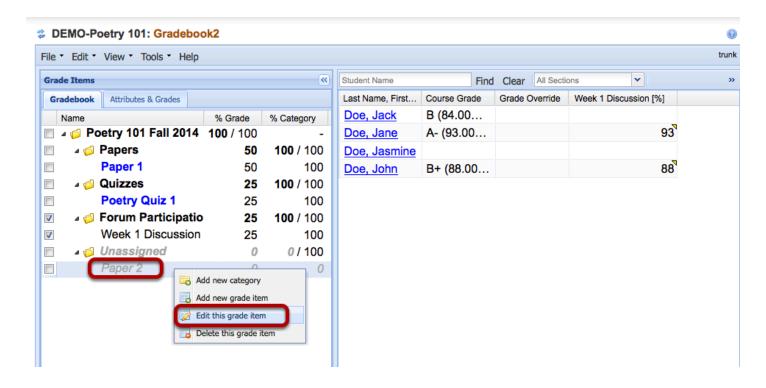

This displays the contents of what will be imported into the gradebook.

#### **Click Next.**

This uploads the data and adds a new item to the Gradebook.

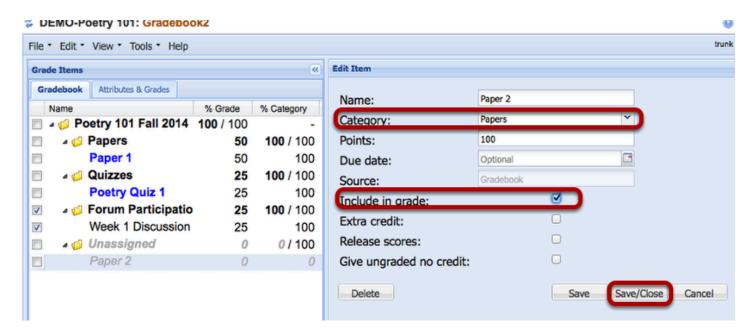

#### Edit the item.

Right-click the item and select **Edit this Grade Item**.

This displays the Edit dialog box for this grade item.

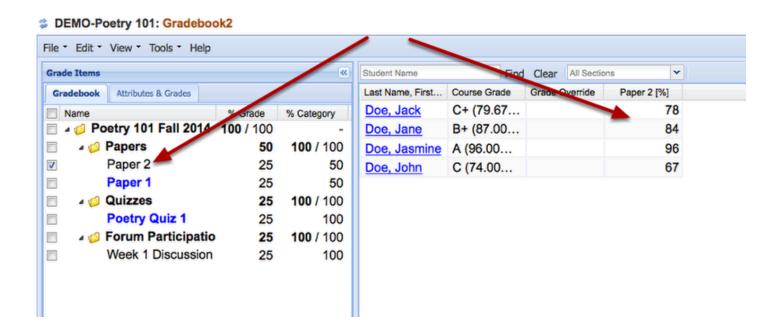

#### Update the item category.

Place the item in the proper category (if you are using categories) and check the box next to **Include in Grade**, then click **Save/Close**.

The grade item and the grades are now properly listed in the Gradebook.

#### **Example:**

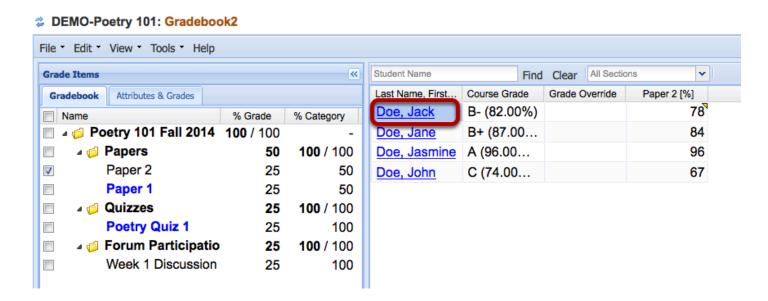

#### How do I view the Gradebook2 as a student?

Instructors can view the Gradebook2 as a specific student will see it.

#### Go to Gradebook2.

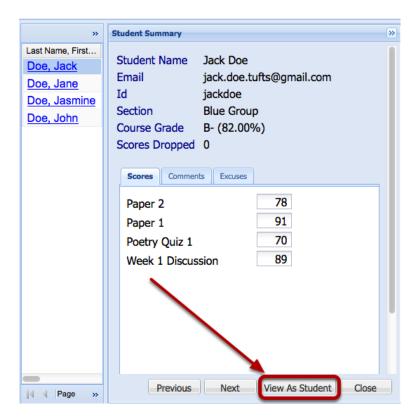

Select **Gradebook2** from the Tool Menu in your site.

### In the spreadsheet on the right, click on the name of the student.

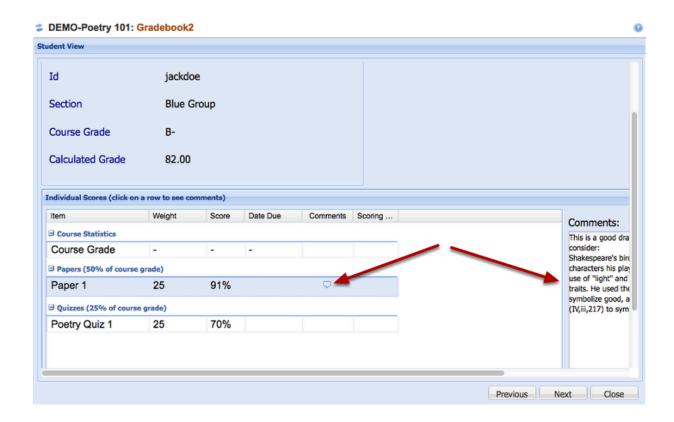

This displays the Student Summary of grades and comments for that student.

#### Click View As Student.

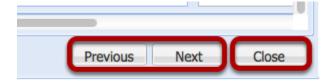

This displays the view of the Gradebook2 tool that this student will see.

#### Click on the Comment bubble to view comment for item.

Note: Student can only view grade items that have been "Released" (displayed in Blue in the Gradebook2)

## Click Close (or Next/Previous to see other student's view of the Gradebook).

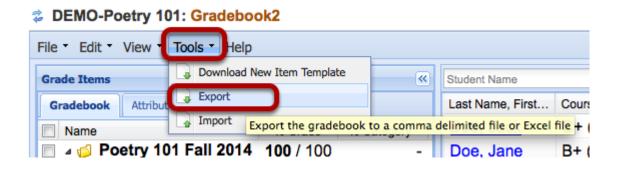

### How do I export the Gradebook2 grades?

#### Go to Gradebook.

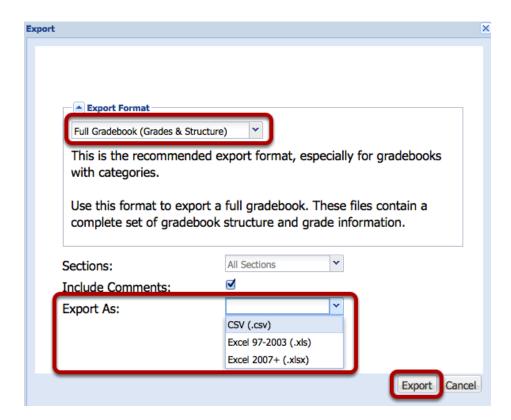

Select Gradebook2 from the Tool Menu in your site.

#### **Click Tools > Export.**

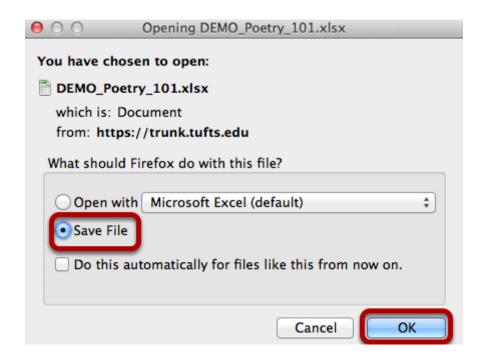

This displays the Gradebook2 Export dialog box.

#### Select the export format and file type, then click Export.

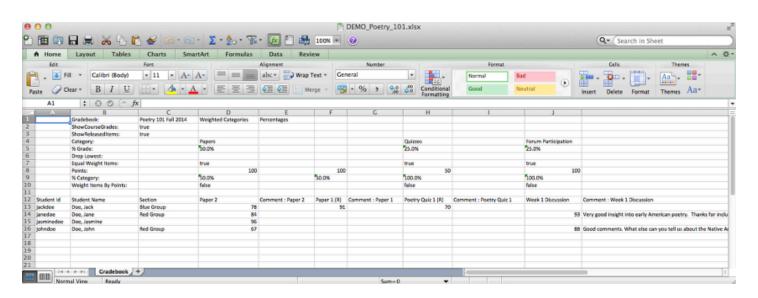

Depending on your computer settings, you may see another download dialog box.

#### Download the exported Gradebook file to your computer.

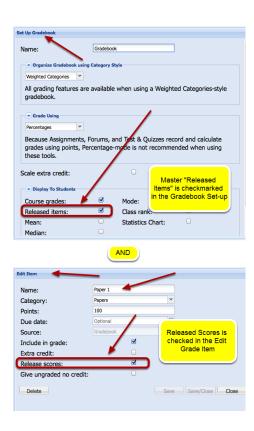

#### **Example of a Gradebook2 Export file.**

# Why are students not seeing released grades in Gradebook2?

In Gradebook2, students can view scores for grade items if you have selected the "Release scores" setting for each item **and** you have selected the "Released items" option in the "Display to Students" list of settings for your gradebook.

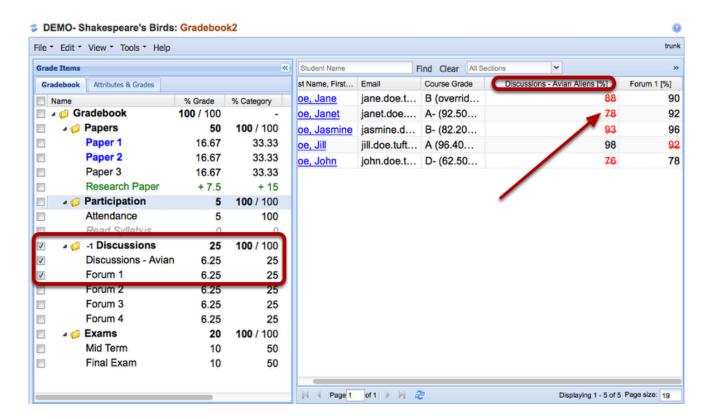

### Example: Both of these settings must be made before students can see their grades.

# Why are some item scores displayed in red with a strikethrough in Gradebook2?

When you view item scores in the spreadsheet frame or Student Summary frame of Gradebook2, you may notice some item scores are displayed in red with a strikethrough. You'll see a score displayed this way when an item has been excluded from course grade calculations.

#### **Example of "red strikethrough" scores.**

An item is excluded from course grade calculations for one of two reasons:

- The item is a "lowest score" item in its category. If you have set up your gradebook for
  categories or weighted categories, one of your options when creating a category is "Drop
  lowest." This option lets you specify that a certain number of lowest-score items for each
  student will be excluded from course grade calculations. This is the example demonstrated
  above.
- The item has been "excused" for that student. To excuse an item, you access the Student Summary frame for the student, select the Excuses tab, and click on the checkbox for the item. If you no longer want to excuse the item, simply uncheck it.

Sakai 10 Instructor Guide

Page 395

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

When using the Drop lowest option, keep in mind the following:

- When you enter scores in a category set to drop lowest-score items, Gradebook2 does not
  drop scores until you have at least one more scored item than the number set to be
  dropped. If a category is set to drop two lowest-score items, for example, you must score
  three items for the CLE to drop the two items with lowest scores.
- Excusing an item in a category set to drop lowest can affect which items are counted as "lowest score," since the excused item will no longer be included in the calculation. If you excuse an item that is already being counted as a ilowest score item, for example, then another item will get counted as "lowest score."

# How do I override the course grade in Gradebook2?

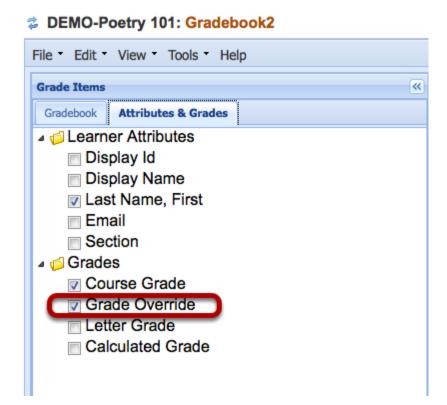

The Gradebook2 Course Grade is the current calculated grade (Running Grade) based on which items have been graded and how much value those items carry.

Sometimes, especially when seen as a final grade, instructors may want to override this calculated grade.

#### Go to Gradebook.

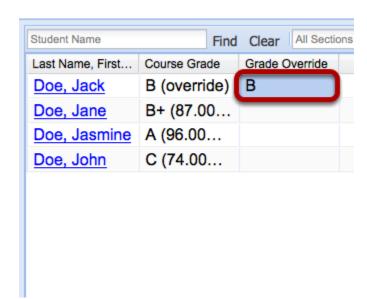

Select **Gradebook2** from the Tool Menu in your site.

## Click the Attributes and Grades tab and check the box next to Grade Override.

This displays the Grade Override column in the spreadsheet.

## Enter the Override Grade in the Grade override column to the right of the student's name.

This overrides the calculated Course Grade.

Note: If you have released the Course Grade to students (edit gradebook settings / display to students - course grade), they will see this override grade and not the Gradebook2 calculated grade. That is, they will not see the course grade as "overridden".

Note: You may only enter grade overrides that are in the appropriate course grade format for your gradebook (Pass/Not Pass, Letter grades with +-, or Letter Grades).

# How do I view grade statistics in Gradebook2?

Instructors can view the general grade statistics for a class.

- **Mean:** The average of all course grades
- **Standard Deviation:** The amount of variation or dispersion from the average. A low standard deviation indicates that the data points tend to be very close to the mean; a high standard deviation indicates that the data points are spread out over a large range of values.
- Median: The middle grade (an many above as below)
- **Mode:** The data value that appears the most in the set. Because no value may appear more often than any other, it is possible for a set to have no mode.

Note: Only students who have received grades are included in the calculation. Students whose work has not yet been graded are ignored.

#### Go to Gradeboook2.

Select **Gradebook2** from the Tool Menu in your site.

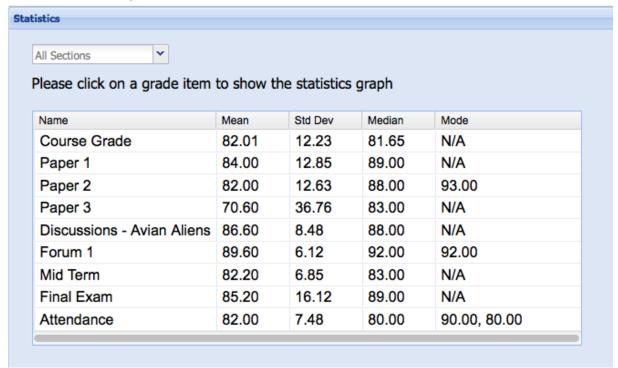

#### Click View > Statistics.

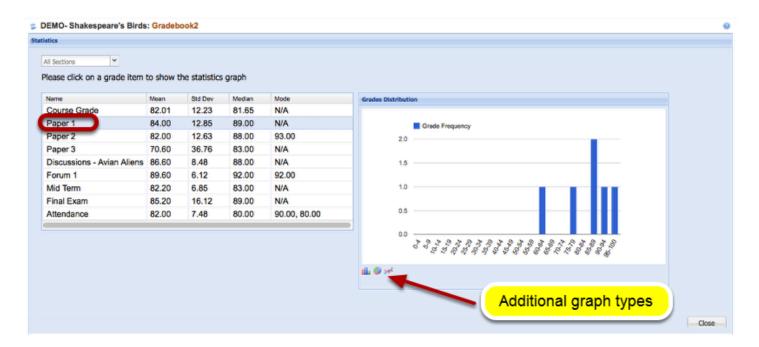

This displays the Statistics dialog panel.

#### **Example:**

DEMO- Shakespeare's Birds: Gradebook2

## To view a Graph of the grade distribution, click on the item name.

Sakai 10 Instructor Guide

Page 400

# How do I view/grade/comment by student in Gradebook2?

In addition to entering grades in the spreadsheet columns, instructors can view, grade and enter comments by student.

#### Go to Gradebook.

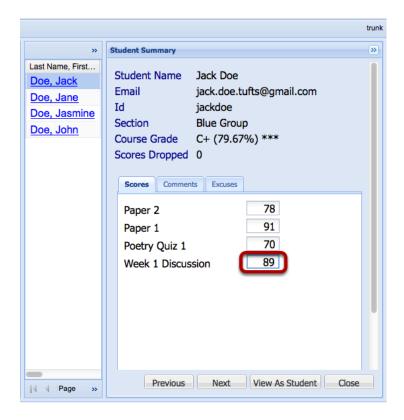

Select **Gradebook2** from the Tool Menu in your site.

## In the spreadsheet on the right, click on the name of the student.

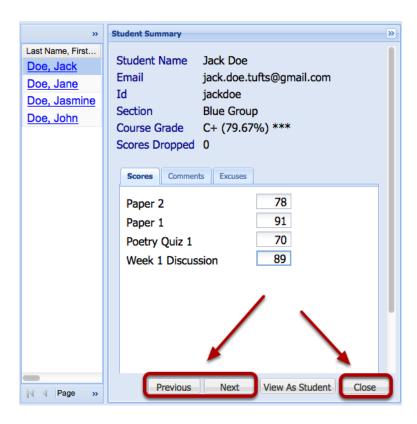

This displays the Student Summary for that student.

## Enter grades in grade boxes (or view student's grades).

## Click Close (or Next/Previous) to view/grade next student.

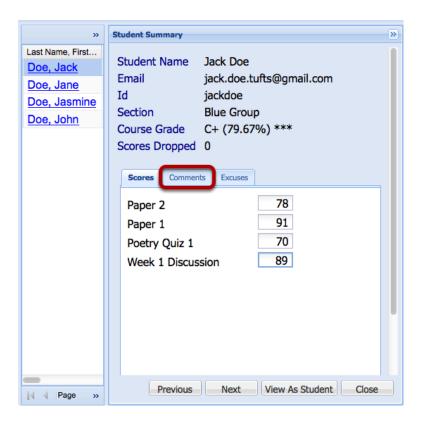

Sakai 10 Instructor Guide

Page 402

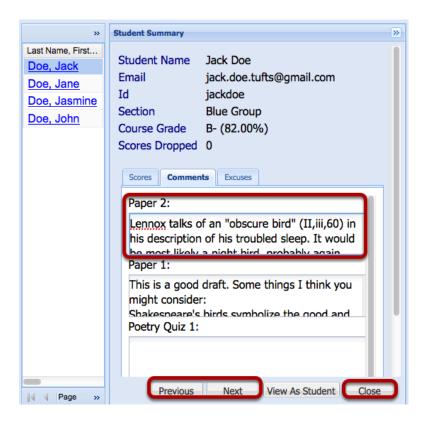

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## To view or comment on a grade item for the student, click the Comments tab.

This displays the comments for each grade item.

## **Enter Comments, the click Close (or Next/Previous).**

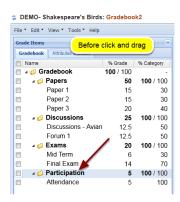

# How do I reorder items or categories in Gradebook2?

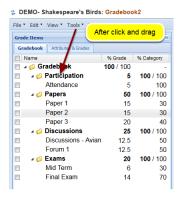

Instructors can reorder the listing of Gradebook2 categories or reorder the listing on grade items within a single category.

#### Go to Gradebook2.

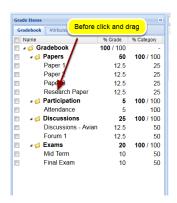

Select **Gradebook2** from the Tool Menu in your site.

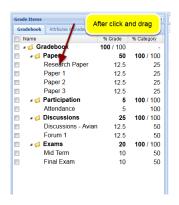

## To reorder the categories, click and drag the category to the new location.

## To reorder items within a category, click and drag the item to the new location.

# How do I exclude an individual student from a graded item in Gradebook2?

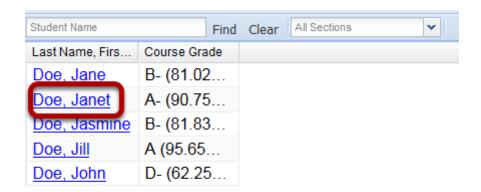

Instructors may exclude (or excuse) any individual student from an item listed in the gradebook2. When excused, the student's course grade is not affected by the student's submission or non-submission for that item.

Excusing an item often happens when a class is composed of both graduate and undergraduate students; excusing the undergraduate students from the graduate requirements and excusing the graduate students from the undergraduate requirements.

#### Go to Gradebook2.

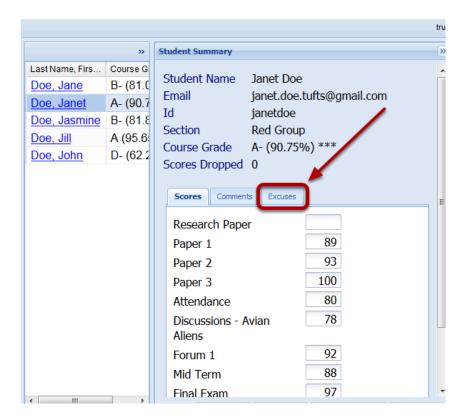

Select **Gradebook2** from the Tool Menu in your site.

### In the right spreadsheet, click on the name of the student to be excused from an item.

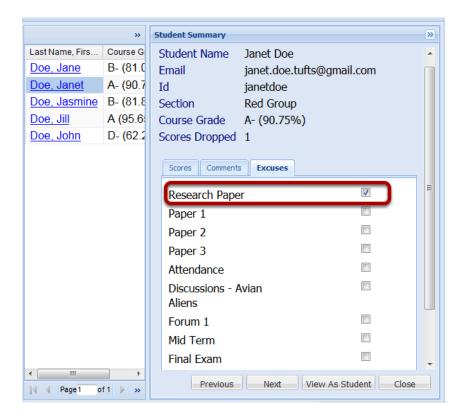

This displays the Student Summary dialog box for that student.

#### Click on the Excuses tab.

This displays the Excuses dialog box for that student.

## Check the box next to the grade item from which the student is excused.

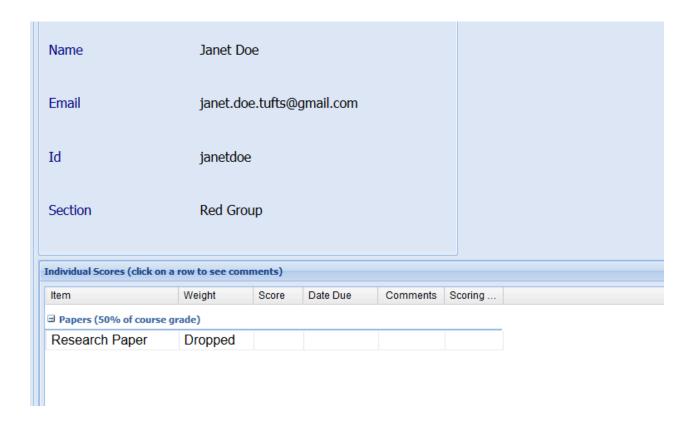

The student is excused from that grade item. That is, any grade or non-grade will have no effect on the student's Course Grade calculation.

## Click Close (or Next / Previous to excuse other students).

## In the student view of the Gradebook2, when the item is released, the item is marked "Dropped".

# How do I edit the Letter Grade Scale in Gradebook2?

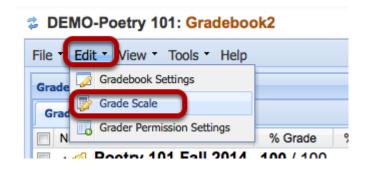

Although the Gradebook2 can be set up to accept either point, percentages or letter grades for items, the Course Grade (or Running Grade) is by default calculated in Letter Grades (with +, -).

Instructors can edit the Course Grade Scale by either selecting a different built-in scale ("F through A - no plus or minus" - "F through A+ - with plusses and minuses" - "Pass / Not Pass") or they can manually edit one of the built-in scales.

#### Go to Gradebook2.

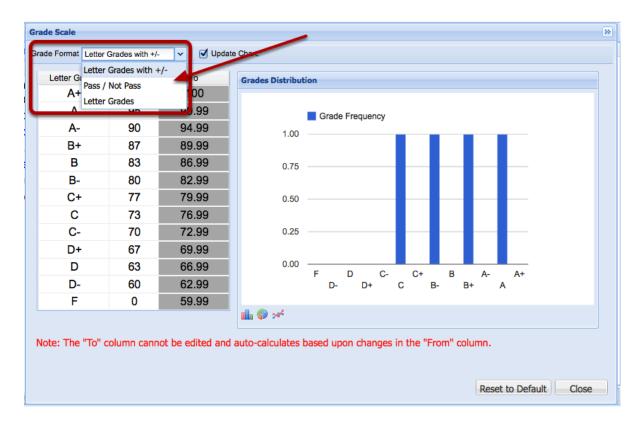

Select **Gradebook2** from the Tool Menu in your site.

#### Click Edit > Grade Scale.

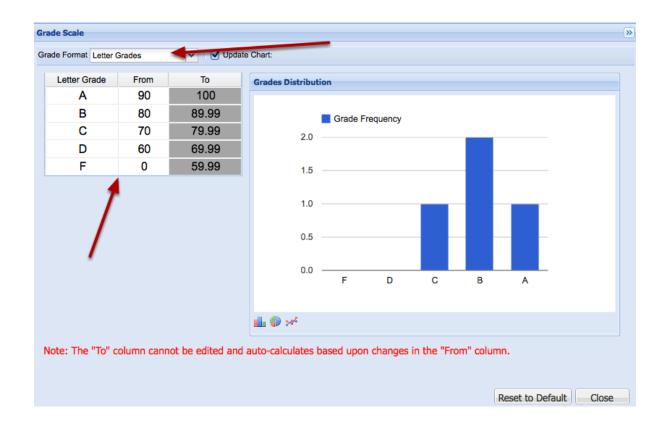

This displays the Edit Grade Scale dialog box.

## Use the drop-down menu to select a built-in Grade Scale.

This will display the calculations for that built-in scale.

### **Example: Letter Grades**

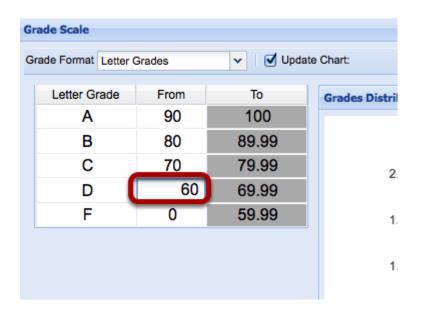

## **Example: Pass / Not Pass.**

**Page 413** Sakai 10 Instructor Guide

## To manually adjust a grade scale, change the numbers in the From column.

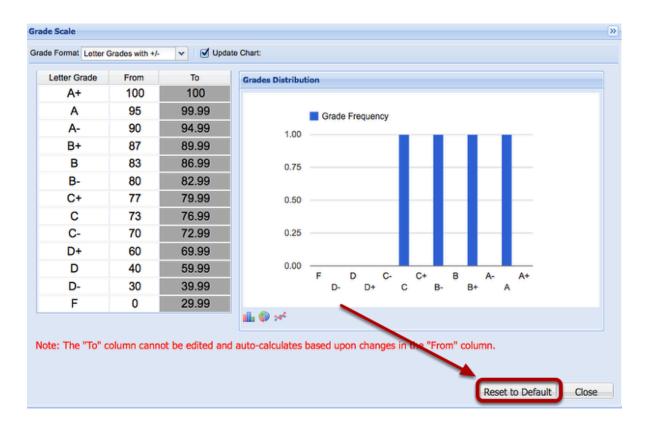

When a number is changed in the "From" column, the preceding "To" column number will automatically adjust.

For best results, work your way up from the bottom of the "From" column.

#### Some Problems:

- You cannot enter "0" in any "From" column box.
- if you are editing the A-F (with +, -) scale, you cannot eliminate the grade of A+. (a perfect score will always be seen as an A+)

## To restore the default scale, select the scale, then click Reset to Default.

# How do I edit the Letter Grade Scale in Gradebook2?

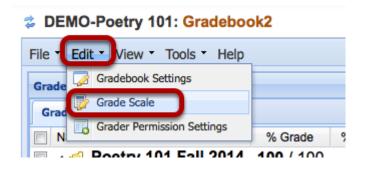

Although the Gradebook2 can be set up to accept either point, percentages or letter grades for items, the Course Grade (or Running Grade) is by default calculated in Letter Grades (with +, -).

Instructors can edit the Course Grade Scale by either selecting a different built-in scale ("F through A - no plus or minus" - "F through A+ - with plusses and minuses" - "Pass / Not Pass") or they can manually edit one of the built-in scales.

#### Go to Gradebook2.

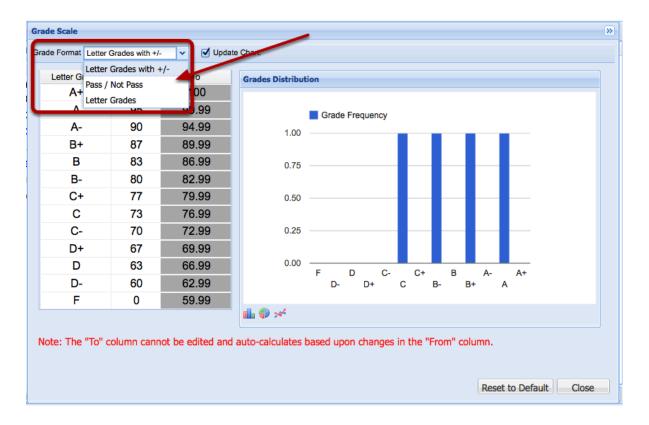

Select **Gradebook2** from the Tool Menu in your site.

#### Click Edit > Grade Scale.

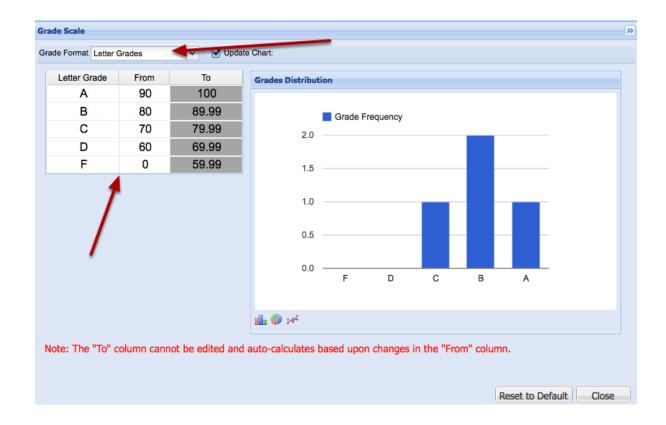

This displays the Edit Grade Scale dialog box.

## Use the drop-down menu to select a built-in Grade Scale.

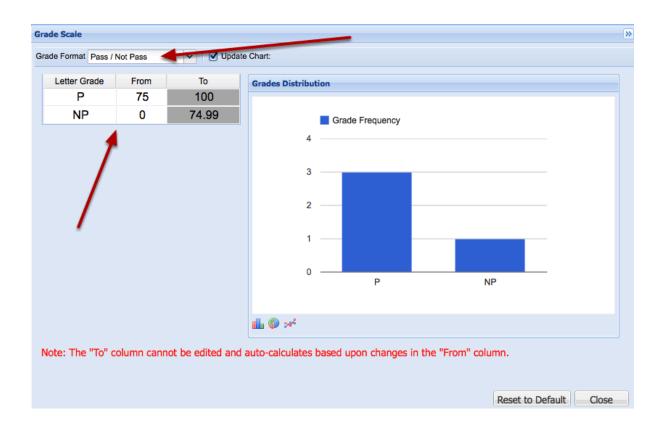

This will display the calculations for that built-in scale.

### **Example: Letter Grades**

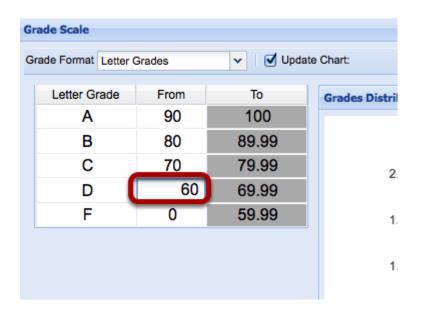

### **Example: Pass / Not Pass.**

**Page 418** Sakai 10 Instructor Guide

## To manually adjust a grade scale, change the numbers in the From column.

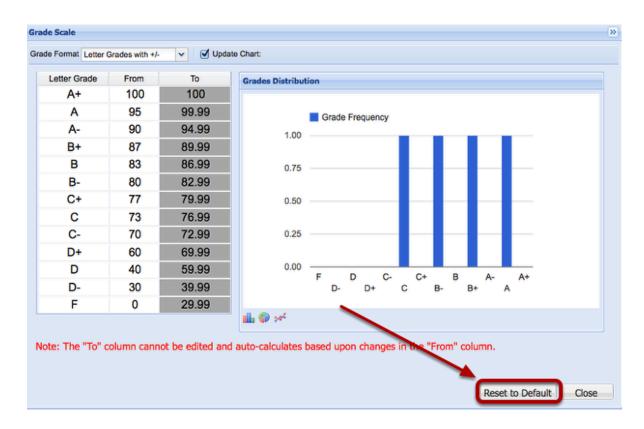

When a number is changed in the "From" column, the preceding "To" column number will automatically adjust.

For best results, work your way up from the bottom of the "From" column.

#### Some Problems:

- You cannot enter "0" in any "From" column box.
- if you are editing the A-F (with +, -) scale, you cannot eliminate the grade of A+. (a perfect score will always be seen as an A+)

## To restore the default scale, select the scale, then click Reset to Default.

## How do I view the Gradebook2 history?

Instructors can view the history of all actions taken in the Gradebook2.

- **Date:** (the date and time the action was taken)
- Action: (adding or editing scores, adding or editing items or categories, and editing gradebook settings)
- **Entity:** (items, categories, and the gradebook)
- Student: (listed by a student's display name)
- User: (the name of the person that made the change or added the grade

#### Go to Gradebook2.

Select **Gradebook2** from the Tool Menu in your site.

### Click View > History.

This displays the Gradebook History panel.

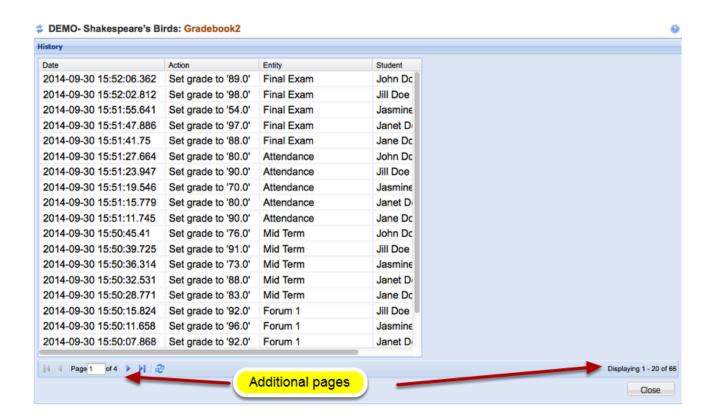

Note: This panel may take some time to open depending on the number of actions taken in the gradebook.

## To view additional details, click on any item.

## Lessons

### What is the Lessons tool?

Lessons is a tool that allows an instructor to organize resources, activities, and media on a single page. You can have as many Lessons pages in your site as needed. Each Lessons page can be customized to suit the needs of the lesson, including links to other site tools, conditional release of items and content, student content pages, LTI tools, and more.

With Lessons, instructors can organize the course by unit, module, week, topic, or any other grouping that makes sense for the site.

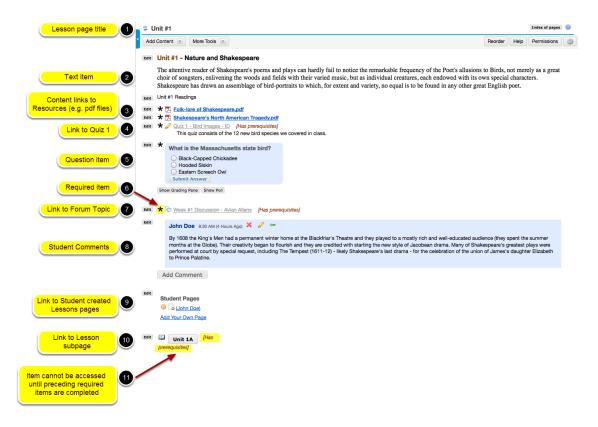

## To access this tool, click on the Lessons page title in the Tool Menu of your site.

The Lessons tool is often renamed to something else, and may appear multiple times in a given course. Click on the Lessons Page Title (e.g. **Unit #1**) in the Tool Menu to display the page.

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

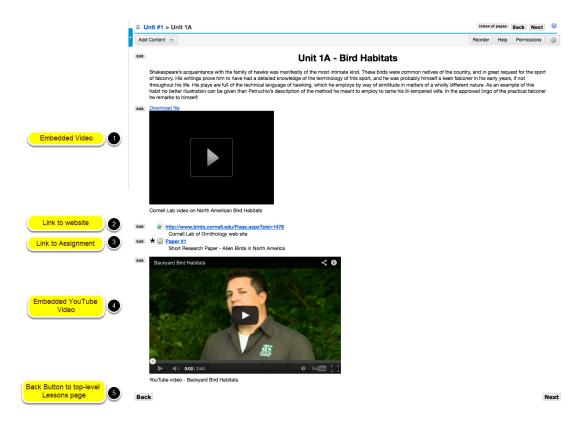

### **Example of a Lessons page.**

Lessons pages may contain any of the following items:

- 1. Page title
- 2. Text item (i.e. content on the page)
- Content links to items in Resources such as files or URLs
- 4. Links to published assessments
- 5. In-line question items on the page
- 6. Items may be designated as required
- 7. Links to forum topics
- 8. Student Comments on the page
- 9. Links to Student Pages where students may create their own content
- 10. Links to subpages
- 11. Items may have prerequisites (i.e. conditional release)

## **Example of a Lessons subpage.**

Subpages in Lessons may contain all of the same types of items as the top level page. Some additional examples of items you may see in Lessons are:

- 1. Embedded video
- 2. URL links to external websites
- 3. Links to course assignments
- 4. Embedded YouTube clips
- 5. Back and Next navigation buttons at the bottom of the page

## How do I create a new Lessons page?

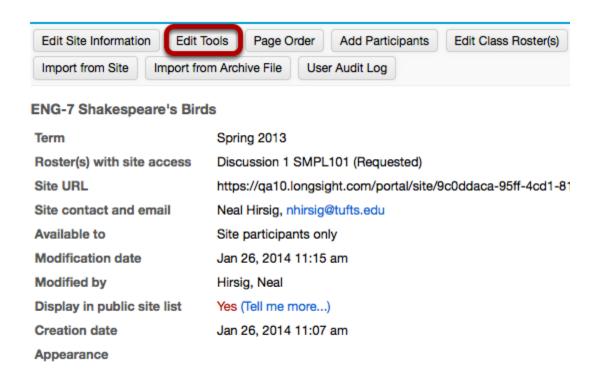

Some institutions display a Lessons tool by default in the tool list on the left. If the Lessons tool is not listed in the tool panel on the left, you will need to first add the Lessons tool to the tool list.

Instructors can create a new Lessons page or multiple Lessons pages.

#### Go to Site Info.

If the Lessons tool is not already active in your site, select the **Site Info** tool from the Tool Menu in your site to add it.

#### Click Edit Tools.

#### Place a check in the box next to Lessons.

Sakai 10 Instructor Guide

Page 427

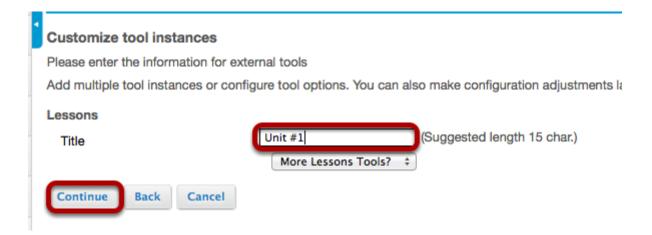

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Click Continue.

Scroll down to the bottom of the screen and click the **Continue** button.

#### Enter a Lessons title and click Continue.

## Your new page will display in the Tool Menu.

Sakai 10 Instructor Guide

This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

#### Notice the new folder in Resources.

When you add a new Lessons page, a folder is automatically created in the site Resources tool with the Lesson page name.

## Click on the Lessons page title in the Tool Menu.

If the Lessons tool is already active in your site, click on **Lessons** in the Tool Menu to go to the tool.

### **Retitle page. (Optional)**

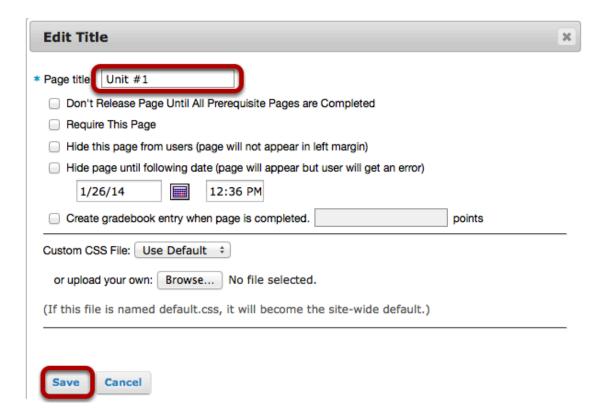

To retitle the Lessons Page, click on the Settings icon (i.e. gear icon) located in the top right corner of the page.

Sakai 10 Instructor Guide

Page 429

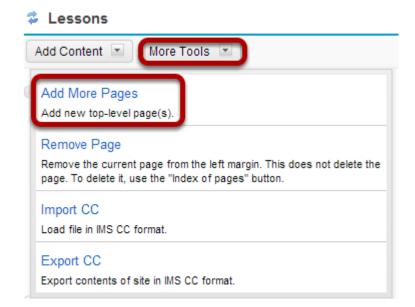

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Enter a new title.

Add a new page title. (This title will appear in the Tool Menu). Then click **Save**.

## **Add More Pages. (Optional)**

## How do I add text to a Lessons page?

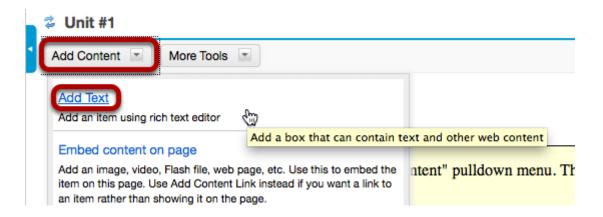

Instructors can add a text box to any point in the Lesson Page.

#### Go to Lessons.

Click on the Lessons Page Title (e.g. Unit #1) in the Tool Menu to display the page.

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

#### Click Add Content, then Add Text.

From the **Add Content** drop-down menu, select **Add Tex**t.

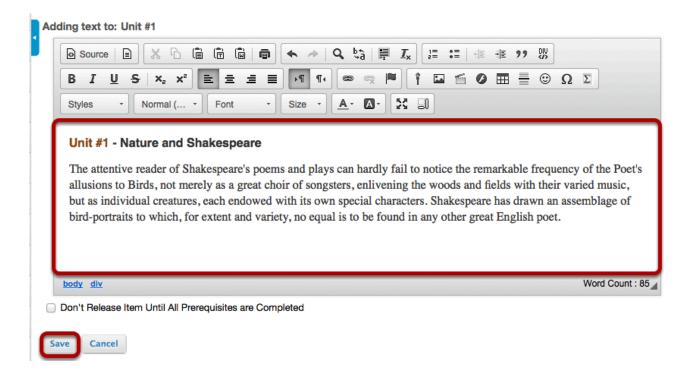

This will display the Lessons Page Rich Text Editor text box.

Sakai 10 Instructor Guide

Page 432

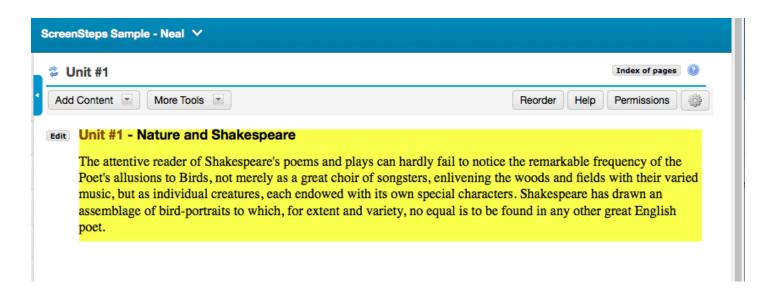

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

#### Enter your text content.

Use the Rich Text Editor tools to format the text. When finished, click **Save**.

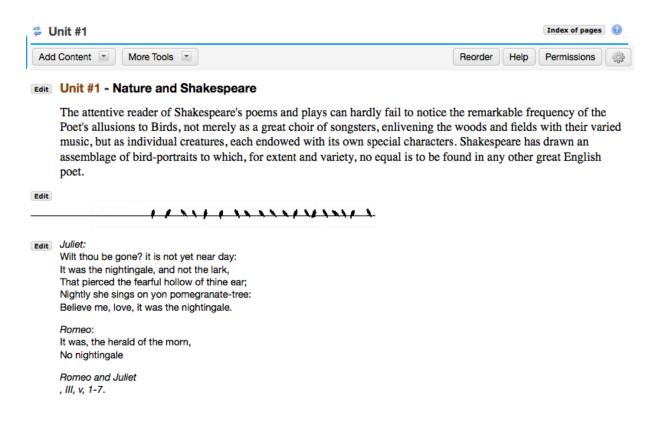

#### View content on page.

After saving, you will return to the Lessons page with the new text displayed.

Note: The Lessons tool descriptive text disappears from the page after content has been added.

# Add additional text items to the page. (Optional)

Repeat the steps above to add more content items to the page. In the example image above, an initial text box was followed by an embedded image, then followed by a second text box.

Tip: Text boxes can be added at any point in the Lessons Page. You may want to intersperse text items with other types of Lessons content, such as images, embedded video, assignment or assessment links, etc.

#### Enter a URL.

Paste the image URL in the box marked "URL", and then click **Save**.

### View embedded image.

#### Edit Unit #1 - Nature and Shakespeare

The attentive reader of Shakespeare's poems and plays can hardly fail to notice the remarkable frequency of the Poet's allusions to Birds, not merely as a great choir of songsters, enlivening the woods and fields with their varied music, but as individual creatures, each endowed with its own special characters. Shakespeare has drawn an assemblage of bird-portraits to which, for extent and variety, no equal is to be found in any other great English poet.

After saving, you will return to the Lessons page with the image embedded.

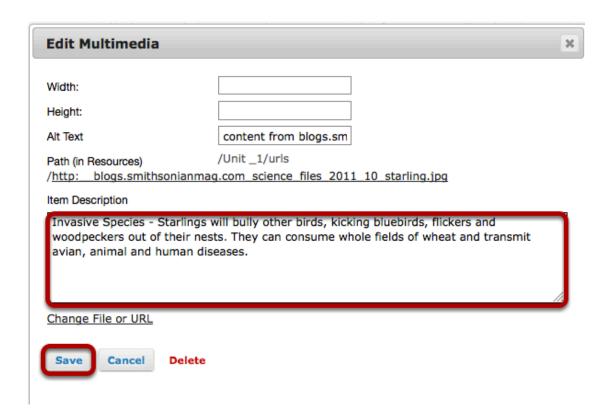

# To add a description for the image, click Edit.

#### Edit Unit #1 - Nature and Shakespeare

The attentive reader of Shakespeare's poems and plays can hardly fail to Poet's allusions to Birds, not merely as a great choir of songsters, enlive varied music, but as individual creatures, each endowed with its own spi an assemblage of bird-portraits to which, for extent and variety, no equa poet.

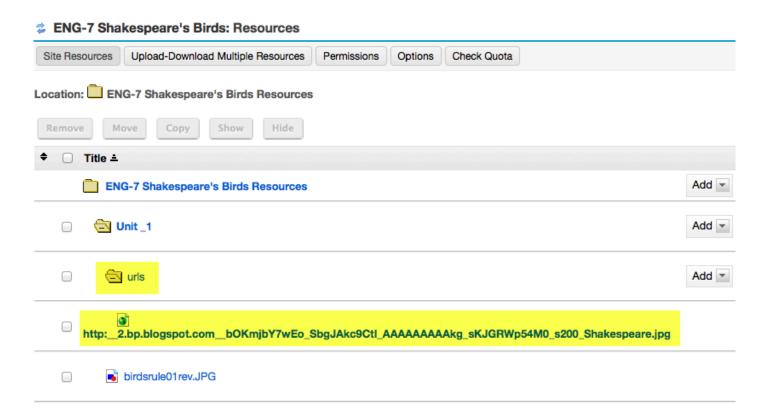

# Add a description.

Enter a description in the Item Description text box and then click Save.

### Notice the image link location.

Note that a URL link to the image has been added to a sub-folder named "urls" located in the Lessons page named folder.

# How do I embed a video from my computer on a Lessons page?

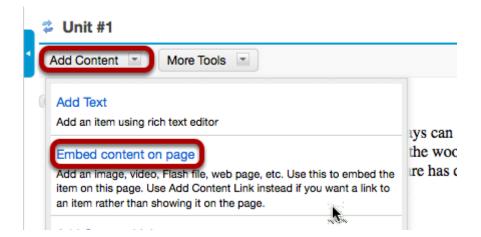

Instructors can add an embedded video at any point in a Lessons page. The embedded video described here is a video uploaded from the instructor's computer to the Lessons page. (See <a href="How do I embed a YouTube Video in a Lessons page">How do I embed a YouTube Video in a Lessons page</a>? for directions on embedding a YouTube video.)

#### Go to Lessons.

Click on the Lessons Page Title (e.g. **Unit #1**) in the Tool Menu to display the page.

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

### Click on Add Content, then Embed Content on a Page

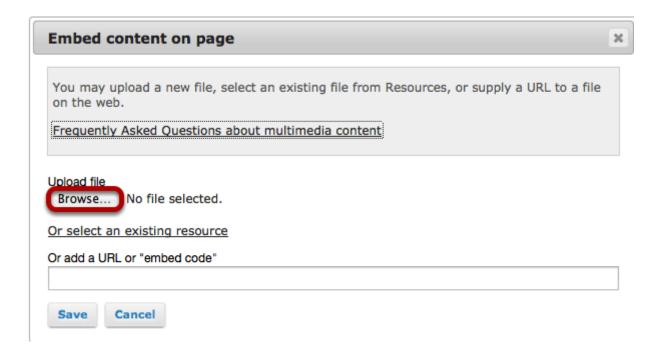

From the **Add Content** drop-down menu, select **Embed content on page**. This displays the Embed Content dialog box.

# How do I embed a YouTube video on a Lessons Page?

A special feature of the Lessons tool allows Instructors to embed a YouTube video on a Lessons page without the need to copy the source code.

# First locate and copy the YouTube video URL (not source code).

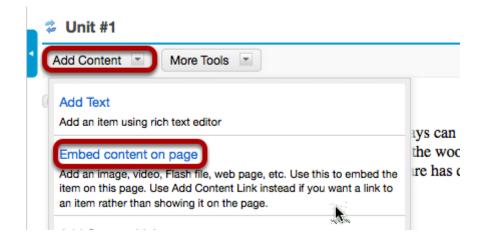

- 1. Click on the Share tab under the clip.
- 2. Copy the YouTube URL into the clipboard (CTRL+C for PC, or CMD+C for Mac).

#### Go to Lessons.

Click on the Lessons Page Title (e.g. **Unit #1**) in the Tool Menu to display the page.

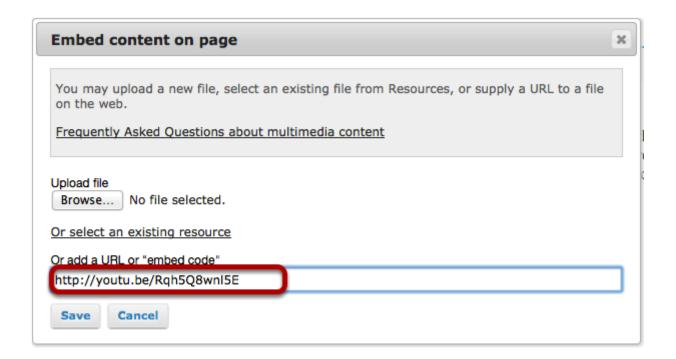

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

# Click on Add Content, then Embed Content on a Page.

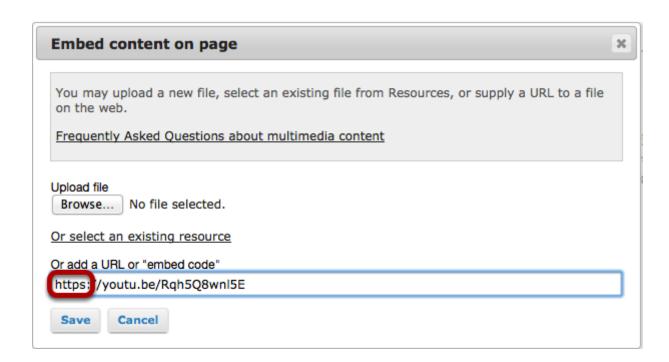

From the **Add Content** drop-down menu, select **Embed content on page**. This displays the Embed Content dialog box.

#### Past the URL.

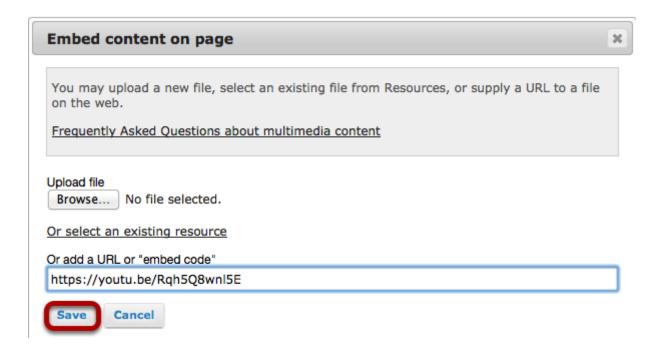

Paste the YouTube URL into the box marked Or add a URL or "embed code".

### Change "http" to "https". (Optional)

Tip: Before clicking Save, you might want to change "http" to "https" as some browsers (Firefox) do not display "http" links.

#### Click Save.

# How do I add a question to a Lessons page?

Instructors can add either a Multiple Choice question or a Short Answer question to a Lessons Page. The questions can either be in poll form (no correct answer) or in graded form (correct answer).

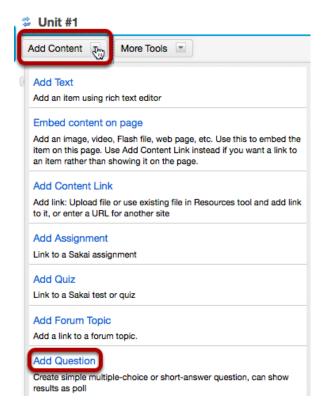

#### Go to Lessons.

Click on the Lessons Page Title (e.g. Unit #1) in the Tool Menu to display the page.

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

# To add a multiple choice question:

#### Click Add Content, then Add Question.

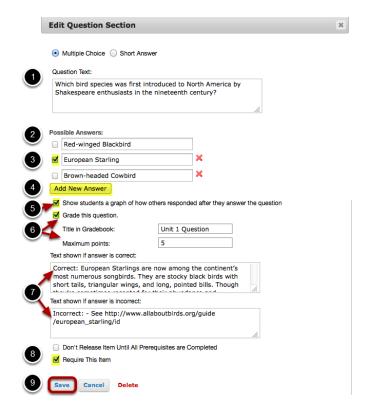

From the **Add Content** drop-down menu, select **Add Question**.

## **Select Multiple Choice.**

#### Add the question text and any additional settings as needed.

- 1. Enter the guestion text.
- 2. Enter the possible answer choices.
- 3. Place a checkmark to the left of the correct answer. (If this is a Multiple Choice poll with no correct answer, you may leave the correct answer check boxes blank.)
- 4. Click Add New Answer to add additional Multiple Choice answers if needed. (Optional)
- Check the box for Show student a graph of how others responded after they answer the question if you want the question/poll results to be displayed. (Optional)
- 6. Check the box next to **Grade this Question** if you want the question to be automatically graded and recorded in the Gradebook tool. Also, enter a gradebook item title and point value in the boxes provided. (Optional)
- 7. Add feedback for correct and/or incorrect student answers if desired. (Optional)
- 8. Check the box next to **Require this item** if you want to require students to complete the item before they can move on to subsequent Lessons pages or items. (Optional)

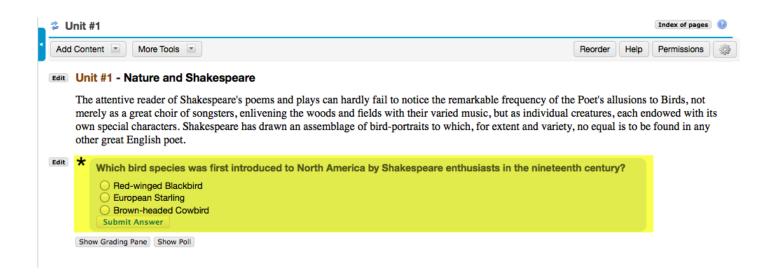

Sakai 10 Instructor Guide

9. Click **Save** to save your question and return to the Lessons page.

#### View question on the page.

#### To make changes to the question, click Edit. (Optional)

#### To see student responses, click Show Grading Panel.

Edit	*	Which bird species was first introduced to North America by Shakespeare enthusiasts in the nineteenth century?
		Red-winged Blackbird European Starling Brown-headed Cowbird Submit Answer

# To add a short answer question:

## Click Add Content, then Add Question.

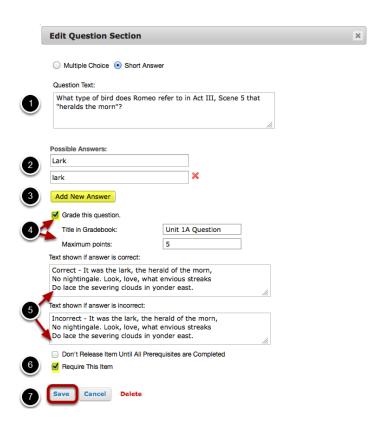

From the **Add Content** drop-down menu, select **Add Question**.

#### **Select Short Answer.**

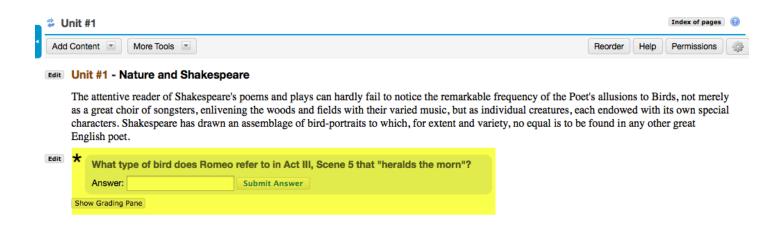

#### Add the question text and any additional settings as needed.

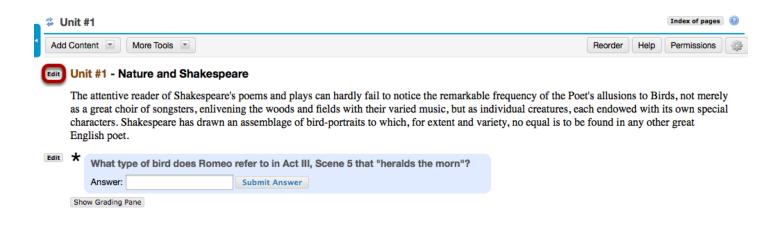

- 1. Enter the question text.
- 2. Enter the possible answer choices. All of the answers you list will be correct answers. (If this is a Short Answer poll with no correct answer, you may leave the answer boxes blank.)
- 3. Click Add New Answer to add additional Multiple Choice answers if needed. (Optional)
- 4. Check the box next to **Grade this Question** if you want the question to be automatically graded and recorded in the Gradebook tool. Also, enter a gradebook item title and point value in the boxes provided. (Optional)
- 5. Add feedback for correct and/or incorrect student answers if desired. (Optional)
- 6. Check the box next to **Require this item** if you want to require students to complete the item before they can move on to subsequent Lessons pages or items. (Optional)
- 7. Click **Save** to save your question and return to the Lessons page.

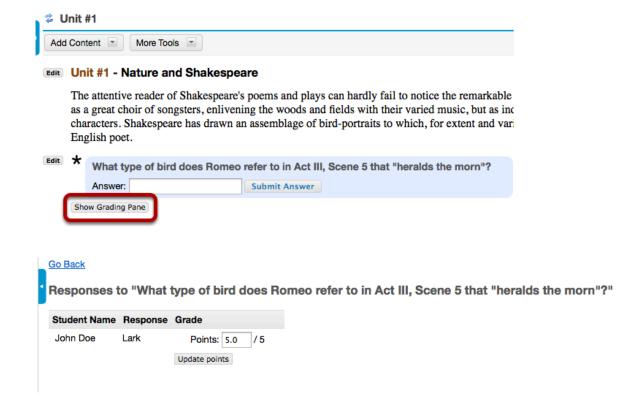

#### View question on the page.

#### To make changes to the question, click Edit. (Optional)

## To see student responses, click Show Grading Panel.

This will display the student grades and responses.

Sakai 10 Instructor Guide

Page 490

# How do I allow comments to be posted on a Lessons page?

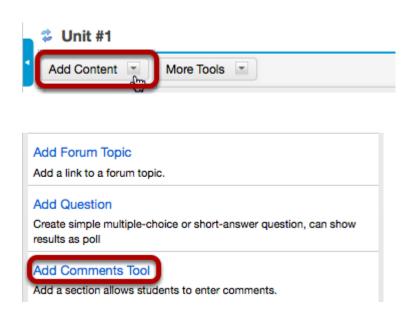

Instructors can allow students to add comments to a Lessons page. The comments can either be anonymous or have the student's name attached. The comments can be graded and either required or optional.

#### Go to Lessons.

Click on the Lessons Page Title (e.g. **Unit #1**) in the Tool Menu to display the page.

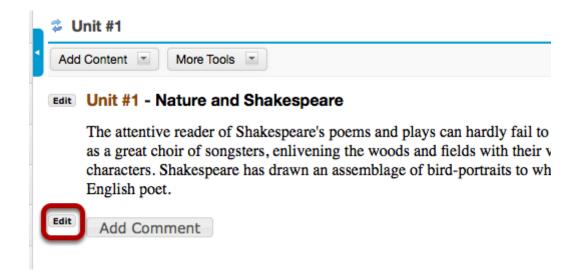

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

#### Click Add Content, then Add Comment Tool.

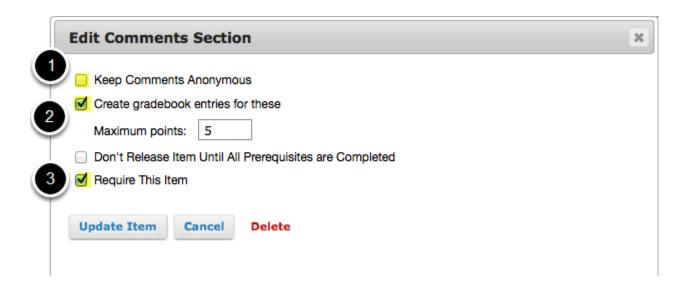

From the Add Content drop-down menu, select Add Comments Tool.

# **Click Edit. (Optional)**

Click Edit to view or modify the comment properties.

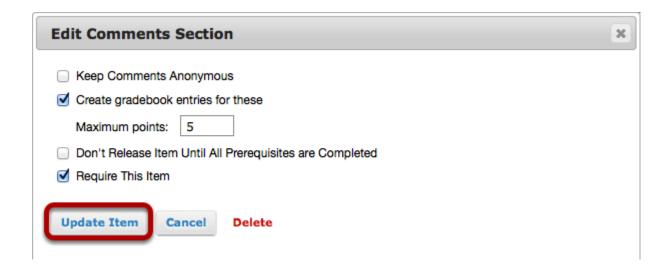

#### Edit the comments tool properties as needed.

- 1. To make comments anonymous, check the box nest to **Keep Comments Anonymous**.
- 2. Check the box next to **Create Gradebook Entries**, if you would like to grade the comments, and enter a maximum point value.
- If students are required to add comments before moving on to a different Lessons item, check the box next to **Require This Item**.

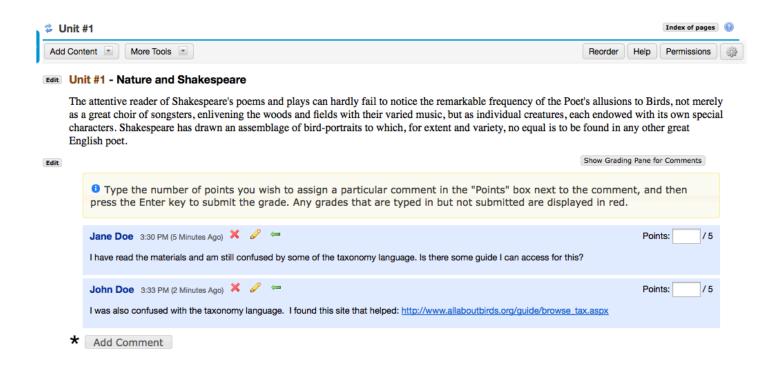

Note: Students CAN read other students' comments.

#### Click Update Item.

This will return the display to the Lessons Page with the Add Comments button.

# Example of student comments from an instructor's view.

Note: Students have 30 minuets to edit or delete their comments. Instructors can edit or delete a student comment at any time.

# How do I allow students to add content to Lessons?

#### Go to Lessons.

Click on the Lessons Page Title (e.g. **Unit #1**) in the Tool Menu to display the page.

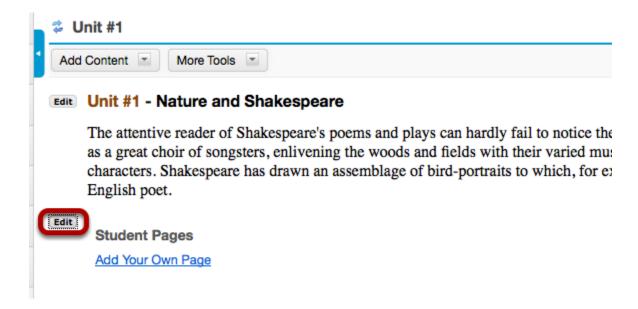

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

## Click Add Content, then Add Student Content.

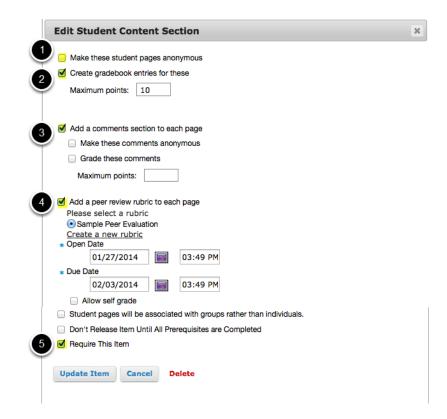

From the Add Content drop-down menu, select Add Student Content.

# **Click Edit. (Optional)**

Click the **Edit** button if you would like to modify the settings.

#### Edit the Student Content Section Properties as needed.

1. Check **Anonymous** if you want the student pages to not reflect the name of the student creating the pages.

Sakai 10 Instructor Guide

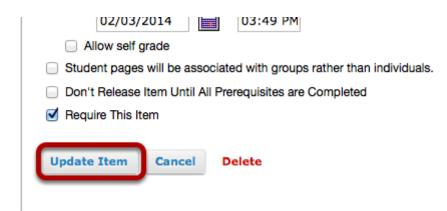

Page 495

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

- 2. Check **Create Gradebook** if the pages are to be graded.
- 3. Check **Add Comments** if you will allow other students to comment on the student pages.
- 4. Check **Grade These Comments** if you want to grade student comments on other student pages.
- 5. Check **Peer Review Rubic** if you want to allow students to grade other student pages based on the Sample Peer Evaluation rubric (selected by default), or by a rubric of your own creation.
  - Set the Open/Due dates for peer review
  - · Allow Self Grade for peer reviews
- 6. Check **Student pages will be associated with groups rather than individuals** to allow site groups (rather than individuals) to create Student Pages. Each group member will be allowed to add/edit content on the group's Student Pages.
- 7. Check **Require this item** to require the creation of Student Pages before moving on to a different Lessons item.

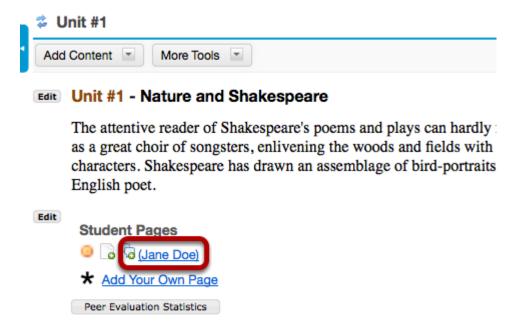

Note: All of the settings listed above are optional.

#### When finished, click Update item.

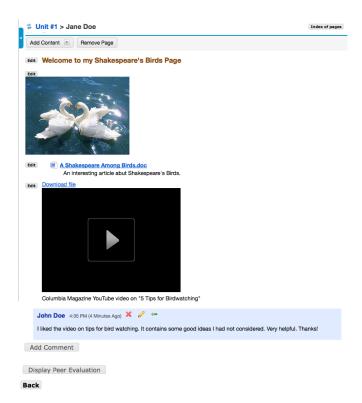

Updating will return the display to the Lessons page with the Student Pages section shown.

# To view a student's page, click on the student's name.

#### **Example of a Student Page.**

Students can add text, link to documents, link to web pages, embed images, embed video, embed audio, create sub-pages, add comments (if allowed) and peer review (if allowed).

Sakai 10 Instructor Guide

Page 497

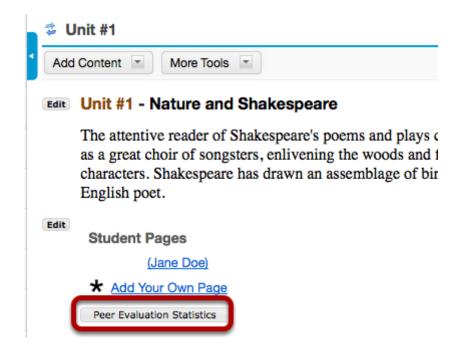

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## Click Back to return to the Lessons page.

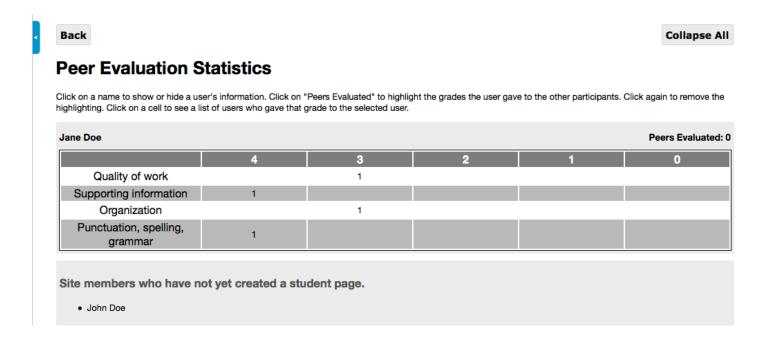

The **Back** button is located in the top right corner of the student's page.

#### **Click Peer Evaluation Statistics.**

Click the **Peer Evaluation Statistics** button to see the evaluations made by other students (or self-evaluations).

## View peer/self evaluations.

This will display the Peer Evaluations made by other students or the Self Evaluation (if selected in properties) based on either the default rubric (shown above) or your own self created rubric.

# How do I reorder items on a Lessons page?

Instructors can reorder the placement of items on a Lessons Page.

#### Go to Lessons.

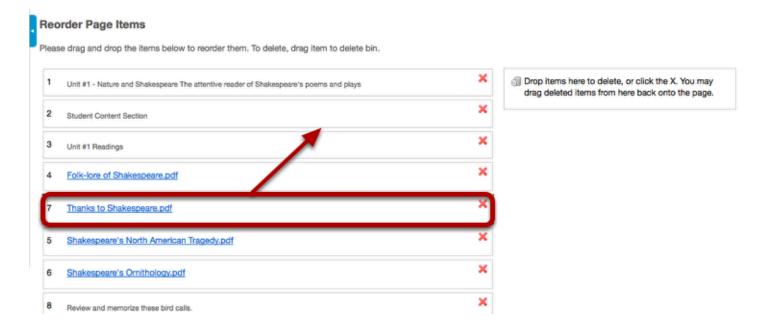

Click on the Lessons Page Title (e.g. Unit #1) in the Tool Menu to display the page.

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

#### Click Reorder.

# Drag and drop the items into the desired order.

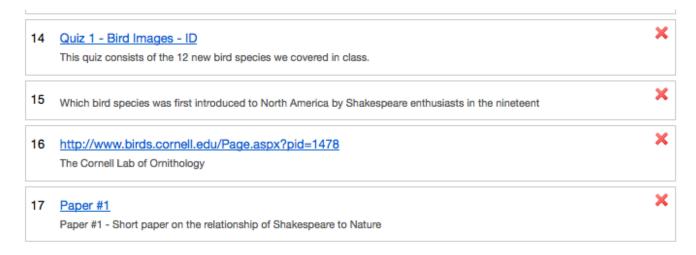

Sakai 10 Instructor Guide

Page 500

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## Click Save.

#### Add items from another page

After saving, you will return to the Lessons page with the items displayed in the new order.

# How do I delete items on a Lessons page?

Instructors can delete items added to a Lessons page using either the Edit option or the Reorder option.

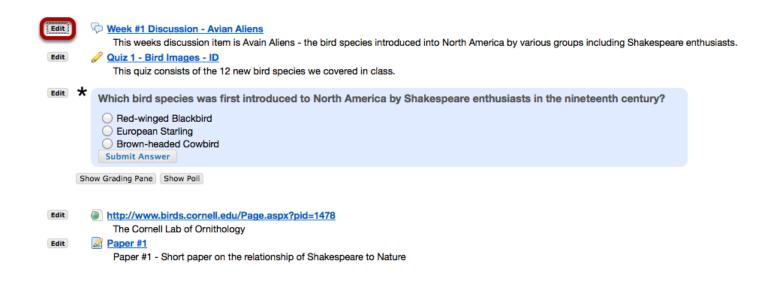

#### Go to Lessons.

Click on the Lessons Page Title (e.g. Unit #1) in the Tool Menu to display the page.

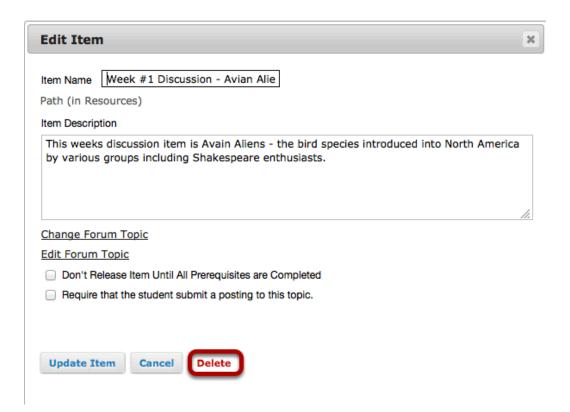

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

# To delete an item using the Edit option:

#### Click Edit.

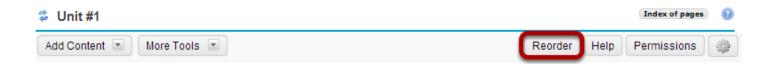

#### Click Delete.

This returns the display to the Lessons page with the item deleted.

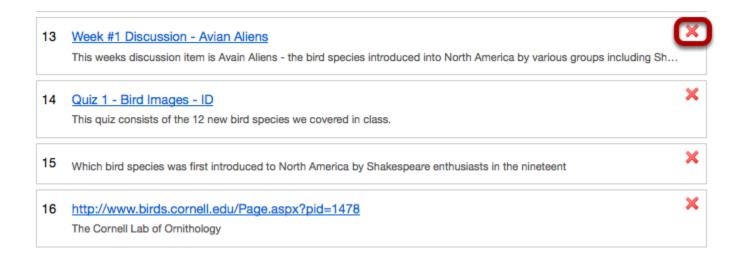

# To delete an item using the Reorder option:

#### Click Reorder.

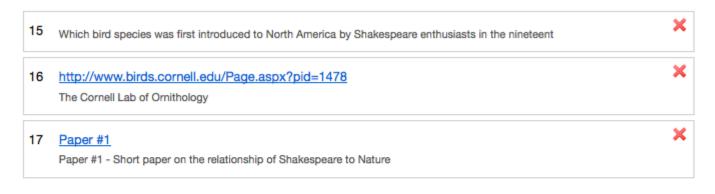

This displays the reorder list of items added to the Lessons page.

## Click the red X icon located to the right of the item.

This removes the item from the Lessons page list of items.

#### Click Save.

#### Add items from another page

Saving returns the display to the Lessons page with the item removed.

# How do I limit access to Lessons page items to groups?

Instructors can limit access (i.e. specify conditional release) to items added to a Lessons page or subpage by group.

Note: The site must have existing groups in order to limit items to groups. See <u>How do I create</u> <u>groups?</u> for more information on creating groups.

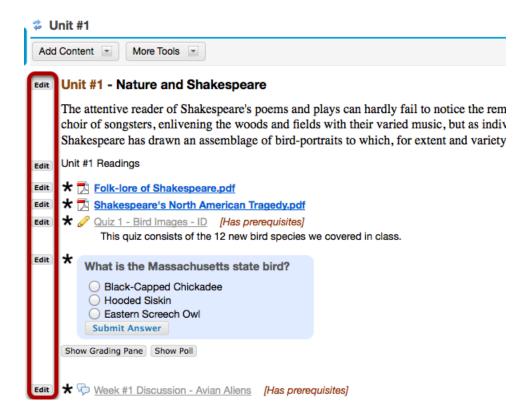

#### Go to Lessons.

Click on the Lessons Page Title (e.g. **Unit #1**) in the Tool Menu to display the page.

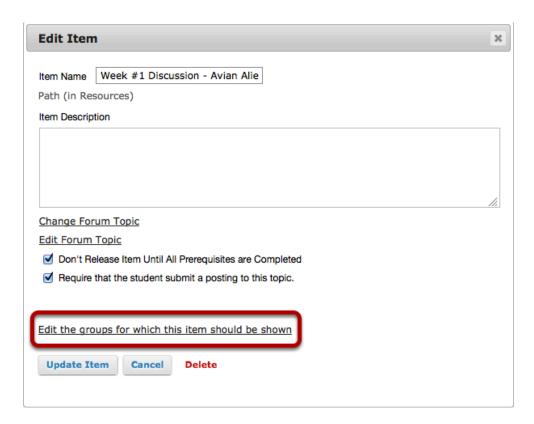

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

#### Click Edit.

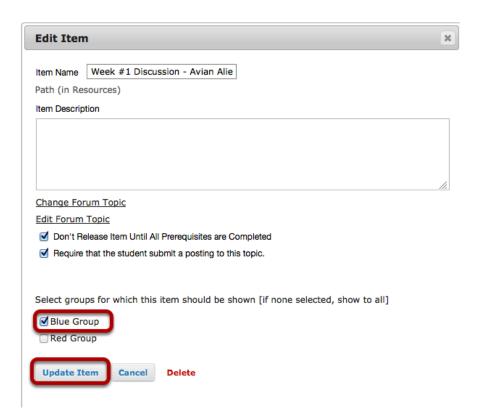

Click the **Edit** button to the left of the item you want to restrict to a group or groups.

# Click Edit the groups for which this item should be shown.

This will display a list of the site's existing groups.

# Select the group(s), then click Update Item.

# View item on the page.

Items which are restricted based on specified criteria indicate the criteria in red next to the item, e.g. [Has prerequisites; Blue Group]

Note: All items that can be added to a Lessons page (except "Add Question") can be limited to a selected group (or groups) via the Edit button.

# How do I add subpages to a Lessons page?

Instructors can add subpages to a top-level Lessons page. A top-level Lessons page is a Lessons page that is listed by name in the Tool Menu. Subpages are connected to top-level Lessons pages by a link or a button.

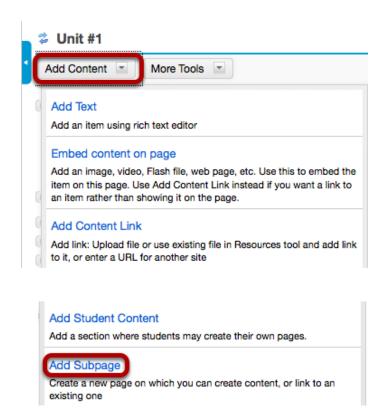

Note: Subpages are added to whatever page the Add Content / Add Subpage function is accessed from. To add multiple subpages to a top-level page, make sure you access the Add Content / Add Subpage function from the original top-level Lessons page and not from a subpage.

#### Go to Lessons.

Click on the Lessons Page Title (e.g. Unit #1) in the Tool Menu to display the page.

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

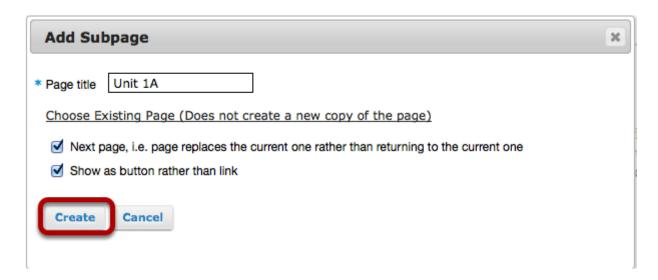

#### Click Add Content, then Add Subpage.

From the **Add Content** drop-down menu, select **Add Subpage**.

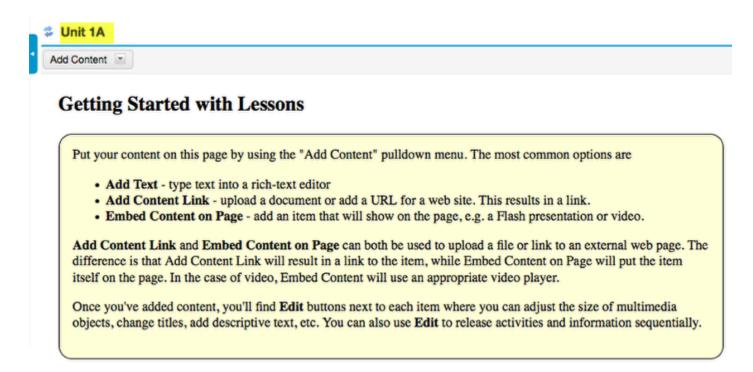

Sakai 10 Instructor Guide **Page 509** 

## Enter the subpage information.

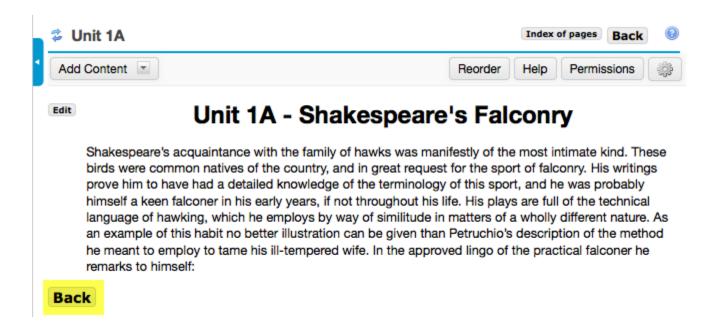

- 1. Enter a title.
- Click the Choose Existing Page link to select from the index of existing pages in the site. (Optional)
- 3. Select the **Next page** option if desired.
- 4. Select the **Show as button rather than link** option if desired.
- 5. Click Create.

### View subpage.

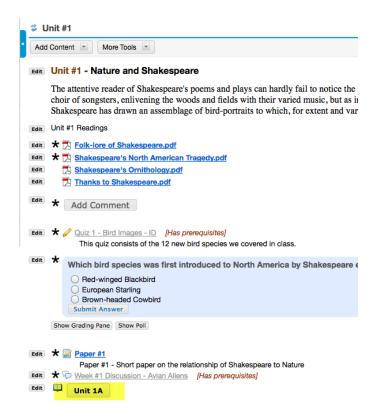

The new subpage contains the default Lessons page information.

#### **Example Subpage Unit 1A with added text.**

Note: Clicking on the **Back** button takes the user back to the top-level page.

# Example Unit 1 top-level Lessons page with button link to Unit 1A subpage

Sakai 10 Instructor Guide

#### To edit the title and properties of a subpage: (Optional)

#### Click on the Settings icon.

The **Settings** icon is a gear-shaped icon located on the top right of the subpage.

#### Edit the title and properties of the subpage as needed.

- 1. The title of the subpage can be edited in the **Page Title** box.
- 2. Check **Hide this page from users** to not allow students to access the subpage.
- 3. Check **Hide page until** to allow access to the subpage at a particular date and tie.
- 4. Check **Create gradebook entry** to automatically create an item in the gradebook when the page (and any required items on it) is completed.
- 5. Click **Save** when finished.

Sakai 10 Instructor Guide

# How do I require completion of a Lessons item?

Most of the items that can be added to a Lessons page can be made "required". That is, students must open (if the item is a resource) or complete (if the item is a forum posting, quiz, assignment, question, comment or student page). Further, the Lessons tool allows instructors to require students to complete one item in the list before allowing access to another item in the list.

Lessons tool Items that can be required:

- Add Content items (requires student to open resource or link)
- Add Assignment items (requires student to submit the assignment)
- Add Quiz items (requires student to submit the quiz and/or achieve a minimum grade on the quiz)
- Add Forum Topics items (requires student to create a post on a selected forum topic)
- Add Question items (requires student to submit an answer to the question)
- Add Comment items (requires student to add a comment)
- Add Student Content (requires student to add a new student page)

Lessons tool items that can be set as unavailable until required items above it in the list are completed:

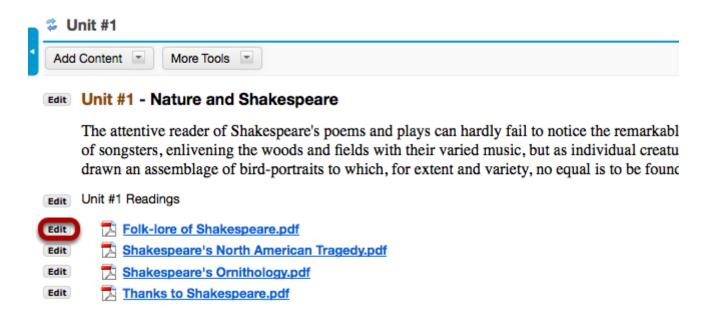

- Text items
- Embedded items
- Content links
- Assignment links
- Quiz links
- Forum Topic links
- Question items
- Add Comment items
- Student Content
- Subpages (See <u>How do I add subpages to a Lessons page?</u> for more information on subpages.)

#### Go to Lessons.

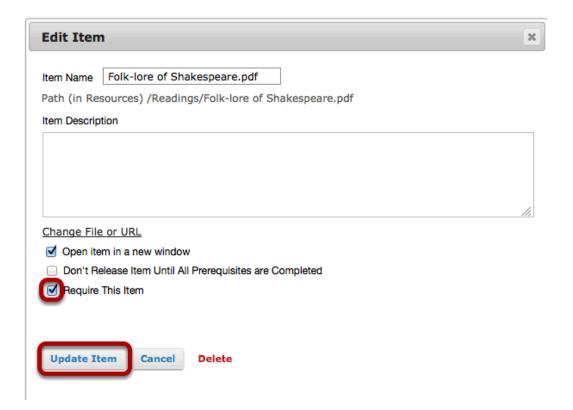

Click on the Lessons Page Title (e.g. **Unit #1**) in the Tool Menu to display the page.

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

#### Click Edit.

#### Check Require This Item, then click Update Item.

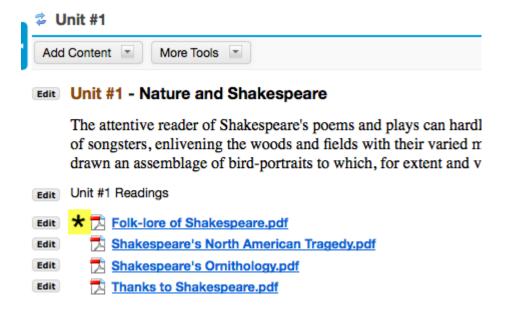

Sakai 10 Instructor Guide

Page 516

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

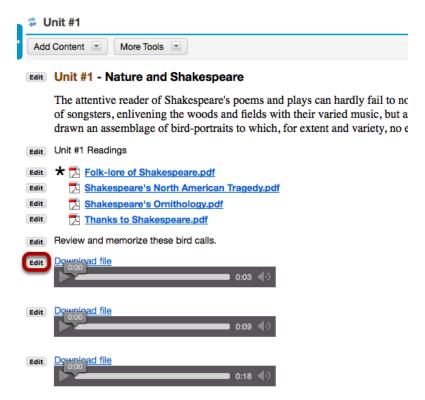

#### Notice the asterisk.

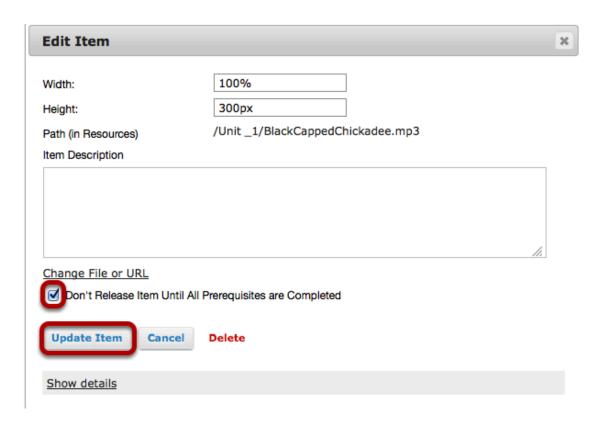

Notice that Required items are indicated with an asterisk to the left of the item.

# To conditionally release based on prerequisites:

#### Click Edit.

### Specify completion of prerequisites.

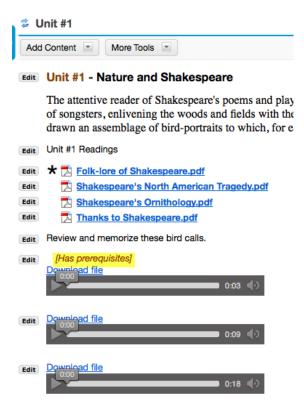

Sakai 10 Instructor Guide

Page 518

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Check **Don't Release Item Until All Prerequisites are Completed** option, then click **Update Item**.

#### Notice prerequisite text.

Notice that items that are conditionally released display [Has prerequisites] in red text next to the item.

In the example shown above, the audio file cannot be opened until the required PDF file above it is opened.

# How do I require completion of a Lessons page?

Instructors can require the completion of one Lessons page or subpage before allowing students to move on to subsequent Lessons pages or subpages in the Lessons hierarchy. That is, instructors can require all of the required items on one page to be completed before students have access subsequent Lesson pages or subpages.

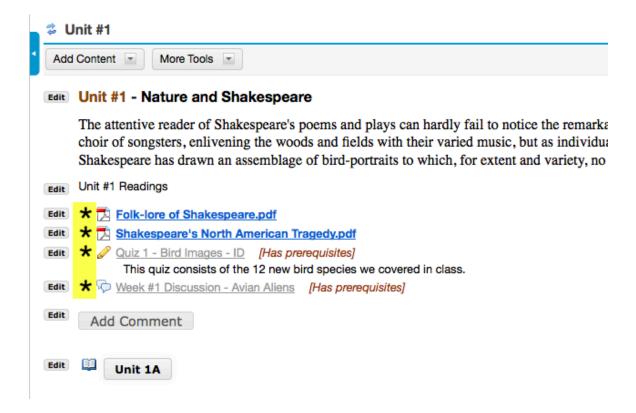

See <u>How do I require one Lesson item to be completed before another Lesson item becomes available?</u> for directions on requiring an item on a page to be completed.

#### Go to Lessons.

Click on the Lessons Page Title (e.g. **Unit #1**) in the Tool Menu to display the page.

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

# Specify required items on the page.

Sakai 10 Instructor Guide

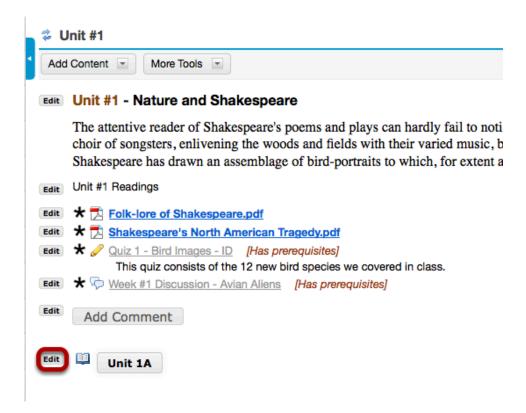

Page 520

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

See <u>How do I require completion of a Lessons item?</u> for directions on requiring an item to be completed.

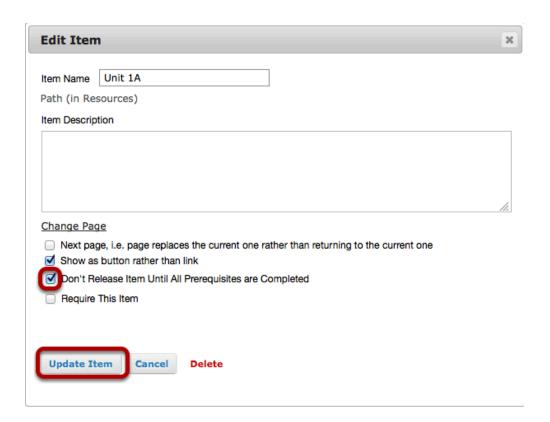

Note: Required items are indicated by an asterisk.

#### Click Edit.

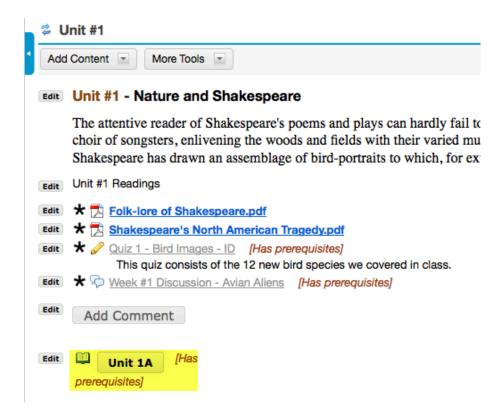

Click the **Edit** button to the left of the subpage link that will be unavailable until required items are completed.

# Specify completion of prerequisites.

Check Don't Release Item Until All Prerequisites are Completed, then click Update Item.

#### Example of a subpage with requirements.

If a student clicks the subpage link (or button) without completing all the required items on the page, nothing will happen. (Instructors can click on the subpage link and the subpage will be displayed.)

Note: that the subpage link (or button) now displays the text [Has Prerequisites] next to the item.

# To require a top-level Lessons page before accessing subsequent pages:

#### Click the Settings icon.

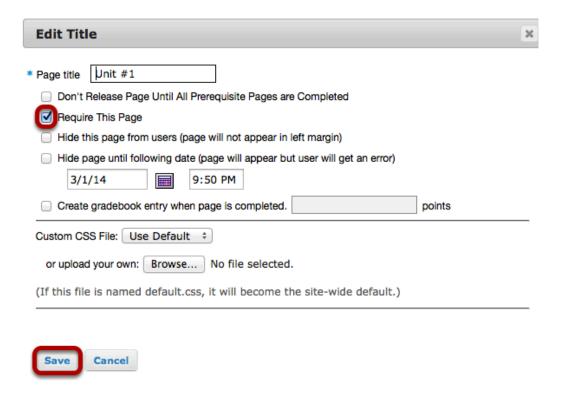

The **Settings** icon is a gear-shaped icon in the top right corner of the page.

Sakai 10 Instructor Guide

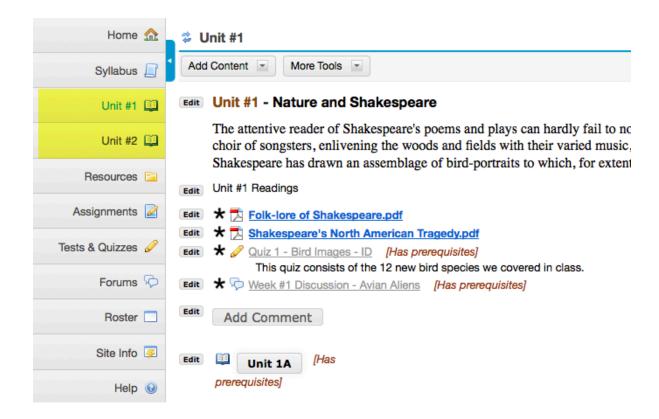

Page 523

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Check Require this page, then click Save.

## Example of a top-level Lessons page that must be completed.

Sakai 10 Instructor Guide

Page 524

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

The Unit #1 Lessons page items must be completed before a student can access the Unit #2 Lessons page.

If a student clicks on the Unit #2 page in the Tool Menu without completing all of the Unit #1 Lessons page items, a message is displayed alerting the student that they cannot access the page until all of the Unit #1 items are completed. (Instructors can access both top-level Lessons pages.)

Unit #2 is subsequent to Unit #1 because of its position in the Tool Menu order. Instructors can go to Site Info > Page Order tool to reorder the positions of the top-level pages in the menu.

# How do I add additional top-level Lessons pages?

Instructors can add additional top-level Lessons pages. Top-level Lesson pages are listed by name in the Tool Menu and can operate independent from other top-level Lesson pages or be connected to other top-level or subpages in a sequence.

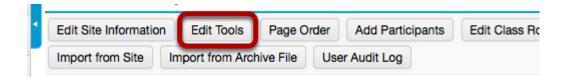

Additional top-level Lesson pages can be added either from Site Info > Edit Tools or from within an existing top-level Lessons page.

#### Click Site Info.

Select the **Site Info** tool from the Tool Menu in your site.

#### Click Edit Tools.

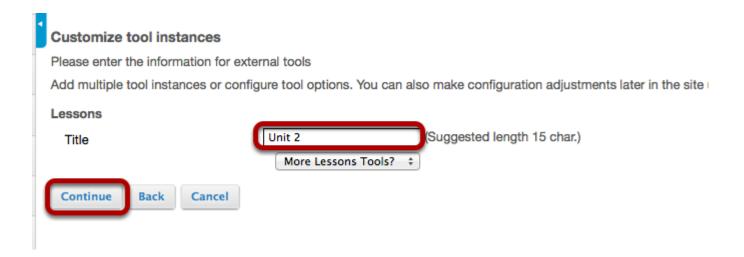

# **Check Lessons.**

#### Name the new Lessons page, then click Continue

#### **Click Finish**

This returns the display to the Site Information page with the new top-level Lessons title listed in the Tool Menu.

Sakai 10 Instructor Guide

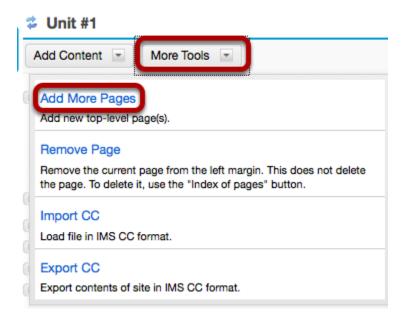

Page 528

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

To view and edit the new Lessons page, click the name of the page in the Tool Menu.

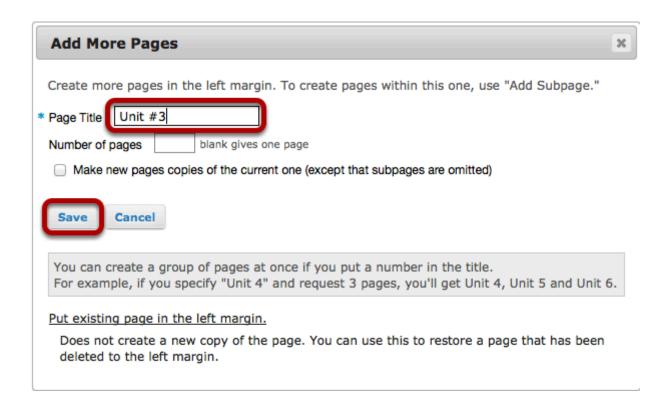

Or, on an existing top-level page, click More Tools, then Add More Pages.

From the More Tools drop-down menu, select the Add More Pages option.

Note: The More Tools drop-down menu only displays on top-level Lessons pages.

#### Add a page title, then click Save.

Saving returns the display to the Lessons page with the new discrete Lessons title listed in the left Tool Menu.

# To view and edit the new Lessons page, click the name of the Lesson in the Tool Menu.

Sakai 10 Instructor Guide

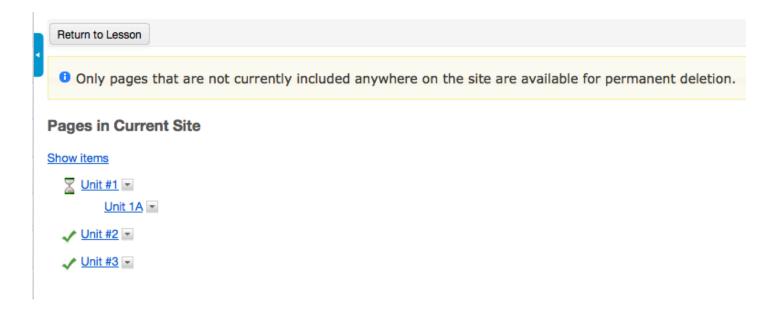

Page 530

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# Click Index of Pages to view all pages.

# View the page hierarchy.

This displays the hierarchy of the top-level and subpages.

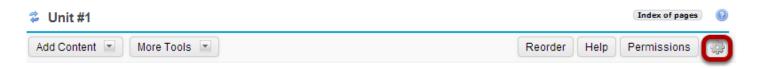

# How do I rename a Lessons page?

#### Go to Lessons.

Click on the Lessons Page Title (e.g. Unit #1) to display the page you want to rename.

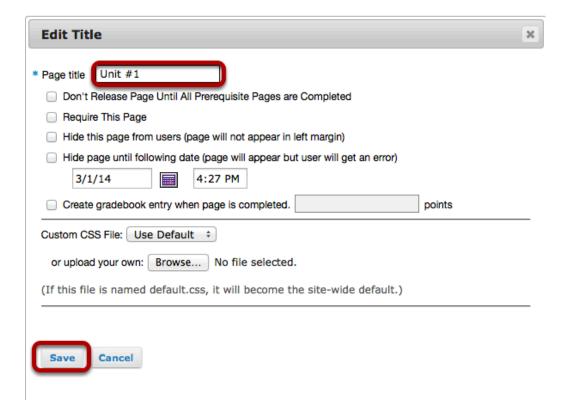

Note: The default or blank Lessons page contains text and images that explain the basic functionality of the Lessons tool.

## Click the Settings icon.

The **Settings** icon is a gear-shaped icon located on the top right corner of the Lessons page.

## Edit the Page Title, then click Save.

# How do I delete a top-level Lessons page?

Deleting a lessons page is a two-part process. First, you must remove the Lessons page from the Tool Menu or page link, and then you can delete it from the site.

#### Go to Lessons.

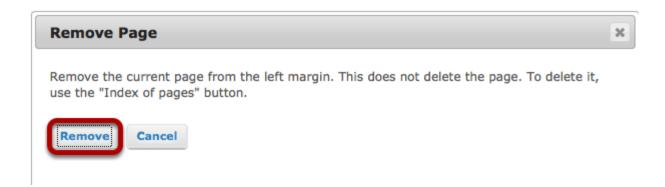

Click on the Lessons Page Title (e.g. **Unit #2**) to display the page you want to delete.

#### Click More Tools, then Remove Page.

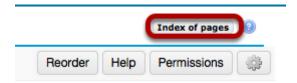

From the More Tools drop-down menu, select Remove Page.

#### Click Remove.

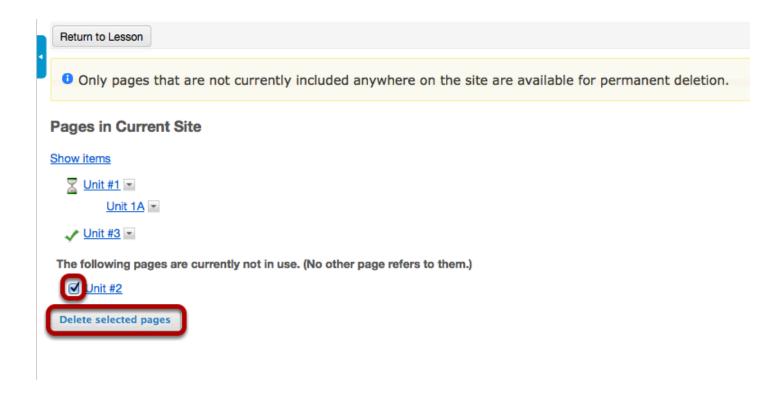

This removes the page from the Tool Menu but does not remove it from the site.

# Next, go to the Index of Pages.

## Select page/s, then click Delete selected pages.

Sakai 10 Instructor Guide

Page 534

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

You will see the list of pages with the unused pages listed at the bottom. Only items which are not linked from any other location can be permanently removed from the site. Click **Delete selected pages** to completely delete the selected page/s from the site.

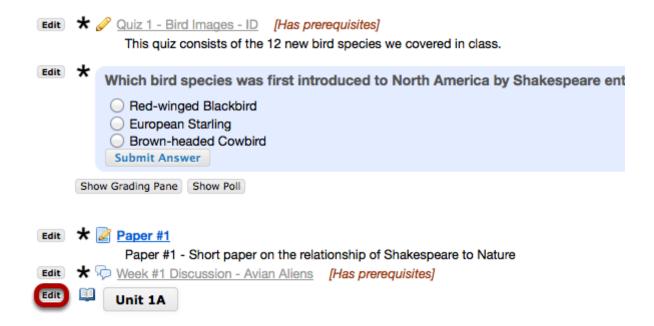

# How do I delete a Lessons subpage?

Deleting a Lessons subpage is a two-part process. First, remove the link to the subpage from the top-level page and then delete the subpage from the site.

#### Go to Lessons.

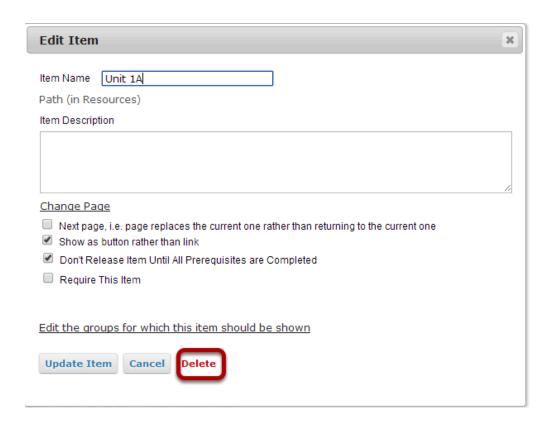

Click on the Lessons page which contains the subpage link you want to delete.

#### Click Edit.

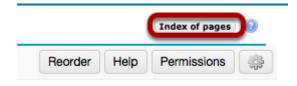

Click the **Edit** button next to the subpage to be removed.

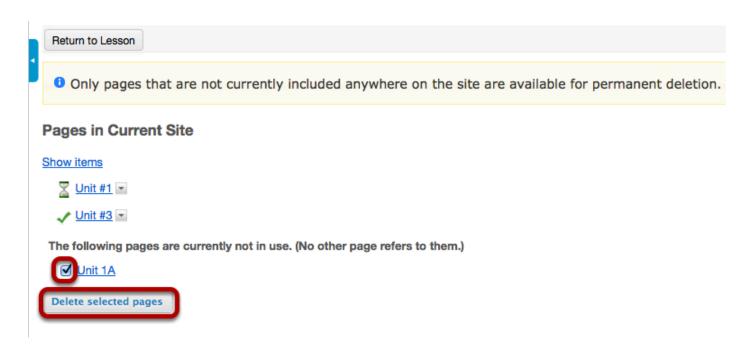

#### Click Delete.

# Next, go to the Index of Pages.

#### Select page/s, then click Delete selected pages.

You will see the list of pages with the unused pages listed at the bottom. Only items which are not linked from any other location can be permanently removed from the site.

Click **Delete selected pages** to completely delete the selected page/s from the site.

# **How do I export Lessons content?**

The Lessons tool allows instructors to export course content in IMS Common Cartridge format. If your Lessons contain links to site activities (e.g. assignments, forum topic, or quizzes) or resources (e.g. files, url links) those items will also be exported in the content package.

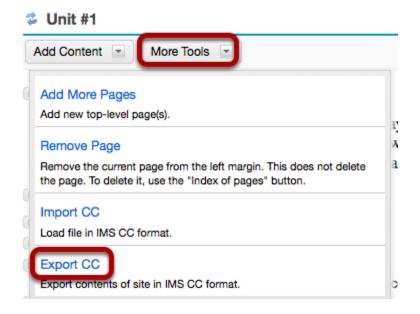

Note: Pages added by students via the Student Pages tool are not included in the export file.

#### Go to Lessons.

Click on the Lessons Page Title (e.g. **Unit #1**) in the Tool Menu to display the page.

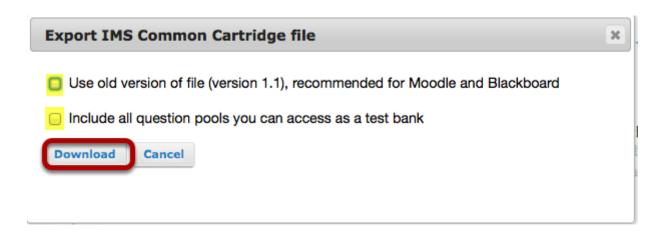

Note: You must be on a top-level page to export Lessons content.

## Click More Tools, then Export CC.

From the **More Tools** drop-down menu, select **Export CC** to display the Export IMS Common Cartridge dialog.

## Click Download.

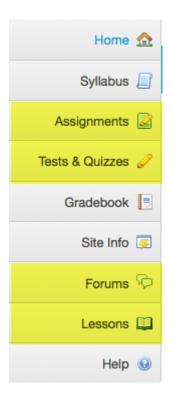

#### Note:

- If your Lessons include a link to a quiz that draws questions from a question pool, check the **Include all question pools you can access as a test bank** option.
- If the Lessons are destined for use in Moodle or Blackboard LMS, check the **Use old version of file** option.

### **How do I import Lessons content?**

Instructors can import a previously exported IMS Common Cartridge (.imscc) file into a course site. This is useful for bringing in content from other Sakai sites, publisher materials, or content from other learning management systems.

#### First, verify the active tools in the destination site.

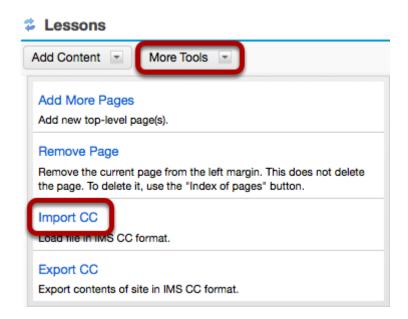

Make sure the course site contains a blank Lessons tool and any other tools referenced by the imported content (e.g. Tests & Quizzes, Forums, Assignments.).

#### Go to Lessons.

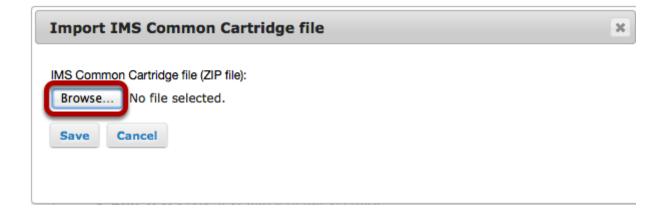

#### Select More Tools, then Import CC.

From the More Tools drop-down menu, select the Import CC option. This will display the Import Common Cartridge File dialog.

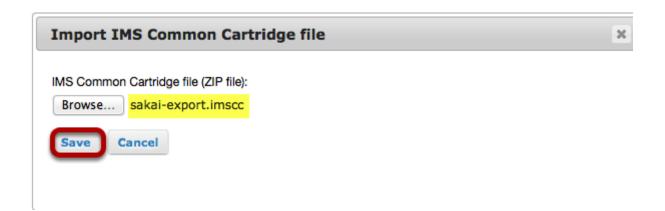

#### Click Browse.

Click the **Browse** button to locate and select and upload the import file from your computer.

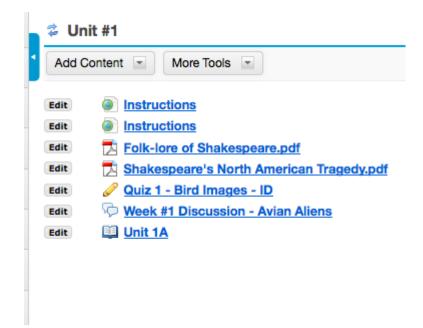

Page 542 Sakai 10 Instructor Guide

#### Click Save.

Click **Save** to import the contents of the selected IMS Common Cartridge file (.imscc) into your site.

#### **Example of an imported Lessons page.**

#### Note:

- Text items are not imported as displayed text but rather as links to text files. Instructors may want to copy then paste the text content into the item textbox (Click Edit).
- Embedded images, audio and video files are imported but not displayed via the import process, however the files are imported to the sites Resources. Instructors may want to re-embed the images, audio, or video (Click Edit).
- All linked Forums, Assignments and Quizzes are imported and reproduced in the new site's Forums, Assignments and Test & Quizzes tools.

# Messages

### What is the Messages tool?

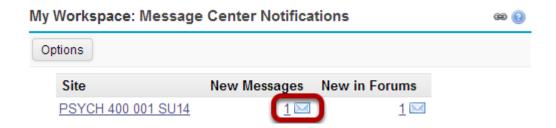

The Messages tool offers a convenient way to send and receive private messages to other members enrolled in the course site. Each course site has its own Messages tool. For example, if you are enrolled in two course sites (Site 1 & Site 2) you will have two separate inboxes, one in each site. When in Site 1 you may send and receive messages to and from members of Site 1. When in Site 2 you may send and receive message to and from members of Site 2.

The Messages tool is like email in some respects but the two have fundamental differences. The Messages tool does not use external email addresses. Instead, you simply select the person you wish to write from the list of enrolled site participants. Also, messages do not leave the system. They are not carried over the Internet like email is; therefore, they remain self-contained with the course or project site.

# To access this tool, select Messages from the Tool Menu in your site.

# Or, go to Messages directly from your Message Center Notification links.

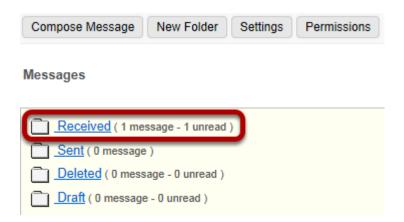

You may also click on the new message number indicator or envelope icon from the Message Center Notifications shown in My Workspace to go directly to Messages for a given site.

### How do I view my messages?

#### Go to Messages.

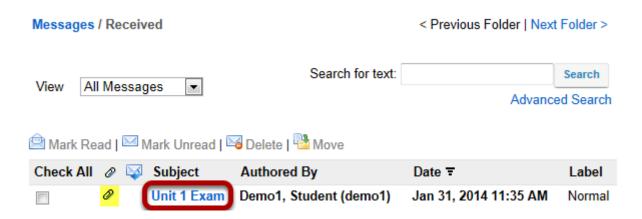

Select the **Messages** tool from the Tool Menu in your site.

#### Go to Received folder.

Select the **Received** folder to view a list of your received messages.

#### Open the message.

New messages will appear in bold text. Select the subject of the message you would like to view. In this case, **Unit 1 Exam** is selected.

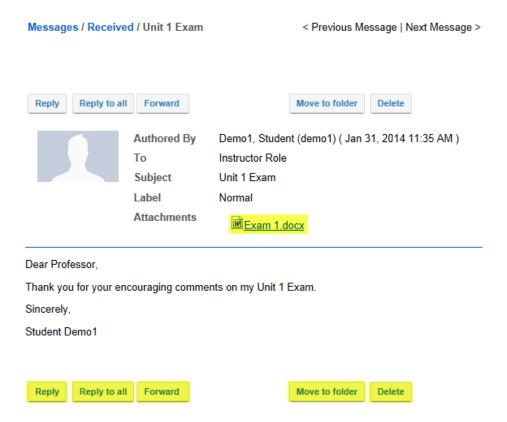

Note: The paperclip icon next to the message indicates that there is a file attached.

Sakai 10 Instructor Guide

Page 547

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### View the message.

The contents of the message will appear. The following options will also be available to you:

- **Reply**. Select **Reply** to reply to the original sender with a message of your own.
- Reply to all. Select Reply to all to reply to the original sender and any other course members included on the message.
- **Forward**. Select **Forward** to forward the message to another member of the course.
- Move to folder. Select Move to folder to move the message from one folder to another.
- **Delete**. Select **Delete** to delete the message.
- Open an attachment. Select the file name to open an attachment. In this case, Exam 1.docx is selected.

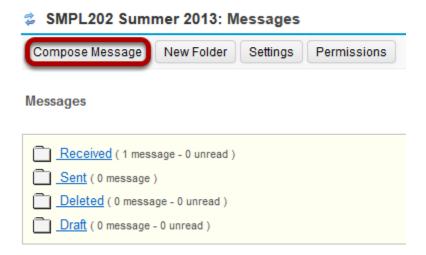

**Page 548** Sakai 10 Instructor Guide This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

# How do I send a message?

#### Go to Messages.

Select the Messages tool from the Tool Menu in your site.

#### **Click Compose Message.**

Select **Compose Message** from the options at the top of the tool.

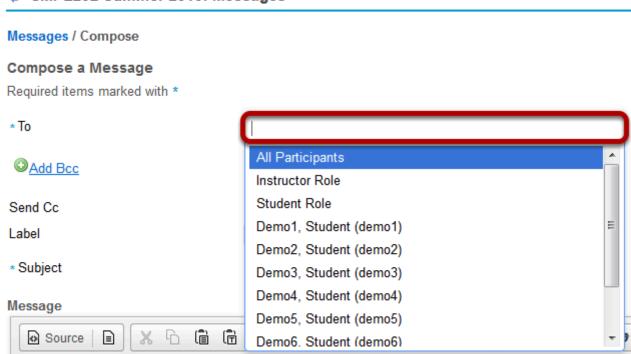

Sakai 10 Instructor Guide

Page 549

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Address your message.

#### SMPL202 Summer 2013: Messages

Click the **To** field to expand the course member list. Select the member of the course that you wish to address. You can repeat this step to address your message to multiple recipients.

Tip: You can address a message to all members assigned to a specific role by selecting that role from the list. For example, you can send a message to all instructors by selecting "Instructor Role".

#### Send Cc. (Optional)

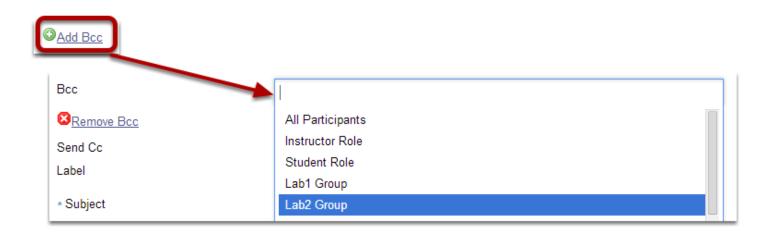

If you would like to send a copy the recipient's external email address, check the box for **Send a copy of this message to recipients' email address(es)**.

Sakai 10 Instructor Guide

Page 550

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **Add Bcc. (Optional)**

If you would like to blind copy recipients on the message, click the **Add Bcc** link to expand this option, and then click in the Bcc address field to select recipients from the list of site participants.

Tip: The Bcc option allows you to send a message to multiple people without the recipients being able to see the other people addressed in the message. Faculty often use this option when emailing groups of students about grade-related issues in order to protect the students' privacy and FERPA rights.

#### Apply a label.

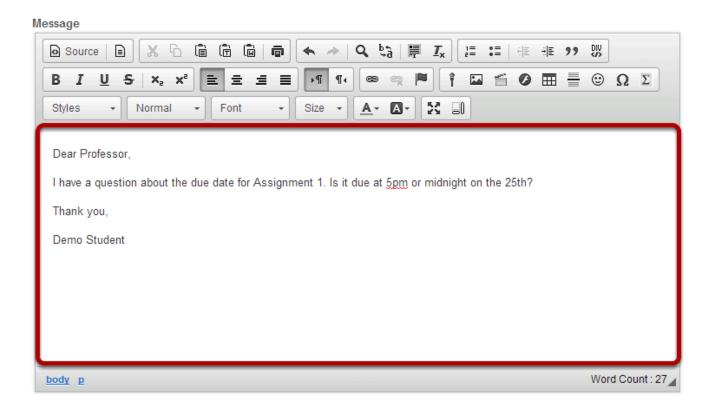

You may apply a label from the drop-down menu to indicate the priority of your message. The default label is **Normal**. You may change it to **Low** or **High** if desired.

#### Enter a subject.

Click the **Subject** field. Type the subject for your message.

#### Enter a message.

Type your message into the Message box.

Tip: There are a variety of tools within the <u>rich text editor</u> to help you format your message. Other features include adding images, video, and emoticons.

#### Add an attachment. (Optional)

If you would like to attach a file to your message, click the **Add attachments** button to browse for and select your file.

#### Send the message.

Select **Send** to send your message.

Tip: You can also select **Preview** to preview a finished version of your message, **Save Draft** to save the message as a draft that you can revisit later, or **Cancel** to cancel and delete the message.

# How do I reply to a message?

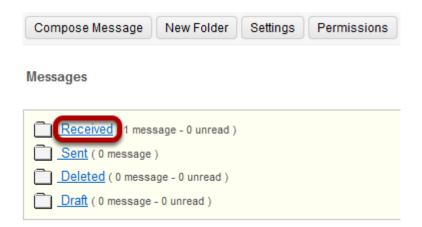

The Messages tool allows you to reply to a message sent to you by another member of the course.

#### Go to Messages.

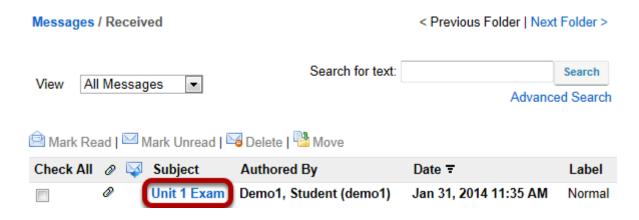

Select the **Messages** tool from the Tool Menu in your site.

#### Go to Received folder.

Select the **Received** folder to view a list of your received messages.

#### Open the message.

Select the subject of the message you would like to view. In this case, **Unit 1 Exam** is selected.

#### Choose Reply or Reply to all.

Select **Reply** to reply to the author of the original message. Select **Reply to all** to reply to all parties included on the original message.

#### Compose the message and send.

Compose the message and select **Send**. For instruction on composing a message, view the article <u>How do I send a message?</u>

### How do I create a Messages folder?

Folders can be created within the Messages tool to aid in organization.

#### Go to Messages.

Select the **Messages** tool from the Tool Menu in your site.

#### Go to New Folder.

Select the **New Folder** button.

#### Enter a folder title.

Enter a title into the **Folder Title** field and select the **Add** button.

#### Click Add.

#### View the new folder in your list of message folders.

#### Messages

The new folder will appear at the bottom of your list of message folders.

Sakai 10 Instructor Guide **Page 557** 

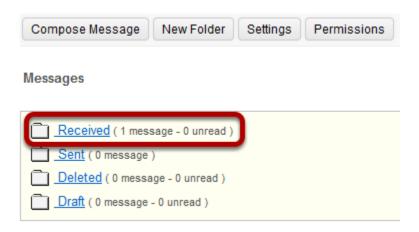

# How do I move a message?

A message can be moved from one folder to another for organizational purposes.

#### Go to Messages.

Select the **Messages** tool from the Tool Menu in your site.

#### Open the folder containing the message to be moved.

Select the folder name of the folder containing the message to be moved.

#### Select the message.

Select the checkbox to the left of the message to be moved.

#### Click Move.

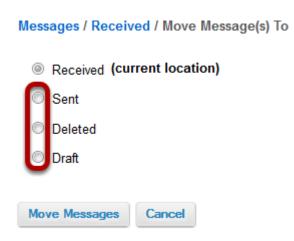

Sakai 10 Instructor Guide

Page 558

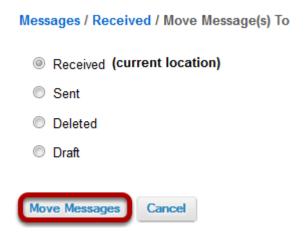

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Select the new folder for the message.

Select the folder where you would like the message to be moved.

#### **Click Move Messages.**

Select **Move Messages** to complete the move.

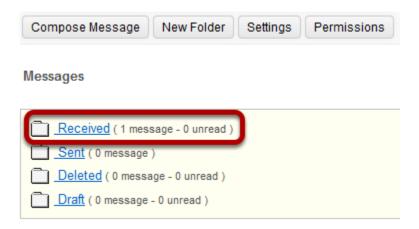

### How do I delete a message?

A message can be deleted if it is no longer needed.

#### Go to Messages.

Select the **Messages** tool from the Tool Menu in your site.

#### Open the folder containing the message to be deleted.

Select the folder name of the folder containing the message to be deleted.

#### Select the message.

Select the checkbox to the left of the message to be deleted.

#### Click Delete.

#### Confirmation message.

You will receive a confirmation message once your message has been deleted. Deleted messages are move to the **Deleted** folder.

# How do I determine who site participants can send a message to?

This feature gives the option to regulate each role's message composing permissions.

#### Go to Messages.

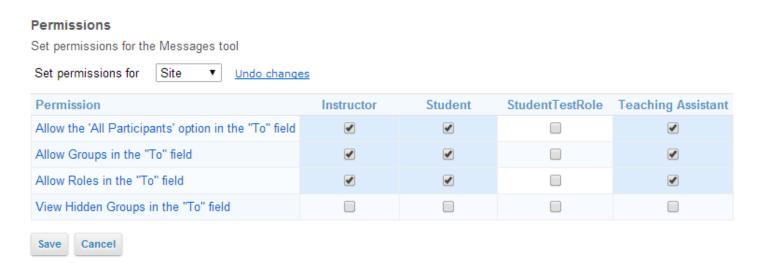

Select the **Messages** too from the Tool Menu in your site.

#### **Click Permissions.**

Discussion 1 SMPL101: Messages			
Compose Message	New Folder	Settings	Permissions

**Permissions** is located below the Course Site title.

#### Check the corresponding boxes for desired permissions.

Permissions are assigned on a role-by-role basis. For instance, to prevent a student from sending a message to "All Participants", un-check the **Student** Permission box located next to the option, "**Allow the 'All Participants' options to the 'To' field.**"

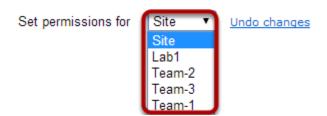

Note: These options will be visible when clicking the "To" text box in **Compose a Message**, within the **Message** tool.

Sakai 10 Instructor Guide

Page 562

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Use drop-down menu for separate permissions based on groups.

This option allows the user to change permissions for different groups. This way, each group has unique **Message** tool options.

Note: By default, this option may only be available for admin users.

#### Click Save.

Click Save or Cancel to quit.

# News

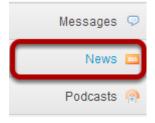

#### What is the News tool?

The News tool uses RSS to bring dynamic news to your site. RSS is a data format used to syndicate news on the web. It allows continuously updated content from a remote news site to appear in another web site.

To set up your site to display news, the instructor or site owner must specify a URL pointing to an RSS news feed. An RSS news feed is a specially formatted list of news articles. You can find RSS feeds by using an Internet search engine (e.g., Google or Yahoo). Sites that distribute news in RSS format are called "news feeds". The News tool is an RSS "news aggregator" (or news reader) that reads and displays content from RSS news feeds. You can usually identify an RSS feed by the .xml or .rss in the URL (e.g., <a href="http://www.nytimes.com/services/xml/rss/nyt/Movies.xml">http://www.nytimes.com/services/xml/rss/nyt/Movies.xml</a> or <a href="http://rss.cnn.com/rss/cnn\_topstories.rss">http://www.nytimes.com/services/xml/rss/nyt/Movies.xml</a> or <a href="http://rss.cnn.com/rss/cnn\_topstories.rss">http://rss.cnn.com/rss/cnn\_topstories.rss</a>).

In addition to news, some web sites use the RSS format for information that is updated often, such as blogs, events listings, or the revision history of a book. Site owners can add more than one News feed either when setting up the site or at a later time via <a href="Edit Tools">Edit Tools</a> in Site Info.

# To access this tool, select the News item from the Tool Menu of your site.

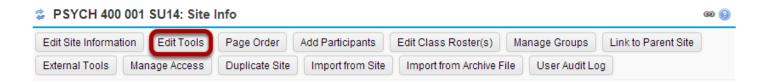

Note: Depending on how the news feed is named in your site, the title may appear differently in your Tool Menu list.

#### How do I add a News tool?

#### Go to Site Info.

Select the **Site Info** tool from the Tool Menu of your site.

#### Click Edit Tools.

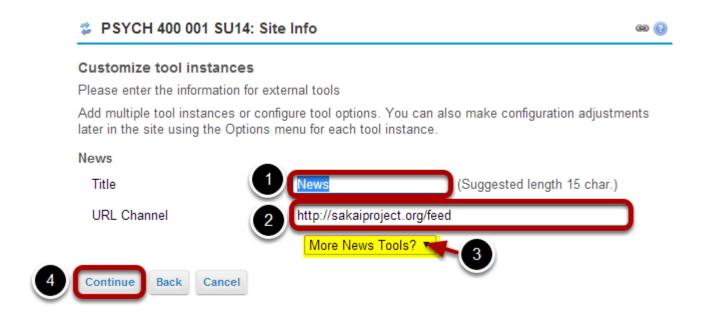

#### Select the check box next to News.

#### Click Continue.

#### Enter the News item information and save.

- 1. Enter a tool title. (The tool title will display in the Tool Menu of your site.)
- 2. Enter the URL of your RSS feed.
- 3. Optionally, if you want to add more than one news feed at a time, you can select to add additional items from the **More News Tools?** drop-down menu.
- 4. Click **Continue** to save your settings.

#### Click Finish to complete the site tools edit.

Sakai 10 Instructor Guide **Page 567** This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

#### How do I edit the News tool?

#### Go to News.

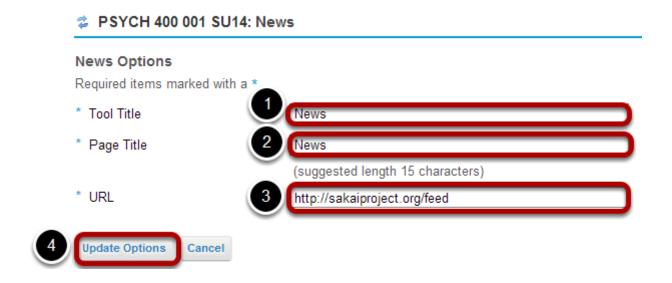

Select the **News** item from the Tool Menu of your site.

(If a News item is not already active in the site, you will need to to <u>Site Info</u> > <u>Edit Tools</u> to add it to your site first.)

#### **Click Options.**

#### Enter the News item information and save.

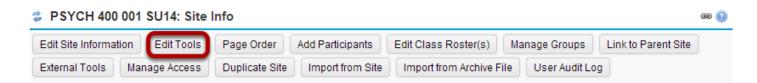

- 1. Enter a tool title.
- 2. Enter a page title for the tool. (The page title is the title that will display in the Tool Menu of your site.)
- 3. Enter the URL of your RSS feed.
- 4. Click **Update Options** to save your settings.

#### How do I delete a News tool?

#### Go to Site Info.

Select the **Site Info** tool from the Tool Menu of your site.

#### Click Edit Tools.

# De-select the box (i.e. remove check) next to the News tool you want to remove.

#### **Click Continue.**

#### Click Finish to complete the tool removal.

# **Podcasts**

#### What is the Podcasts tool?

The Podcast tool allows instructors to distribute audio, video and PowerPoint files to their students either manually or via a RSS feed. Students that subscribe to a site's RSS Podcast feed have the audio, video or PowerPoint content automatically downloaded to a "podcatcher" application of their choice.

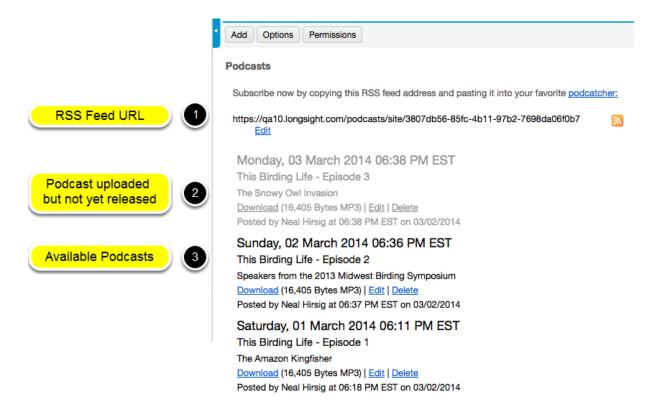

The Podcast tool is a convenient delivery mechanism for students to subscribe to a RSS feed and listen/view content on their Mobile devices.

Instructors can also edit the Podcast permissions allowing students to upload and manage podcast files.

# To access this tool, select Podcasts from the Tool Menu in your site.

#### **Example of a site Podcast.**

Items you may see on a Podcasts page include:

- 1. RSS feed URL
- 2. Podcasts that have been uploaded but not yet released
- 3. Available Podcasts

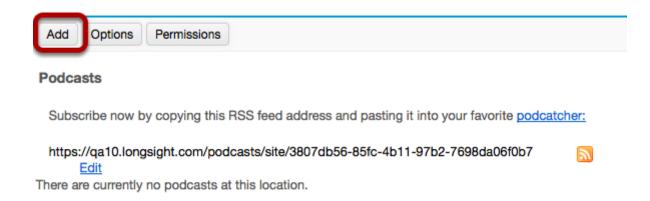

### How do I add a podcast?

#### Go to Podcasts.

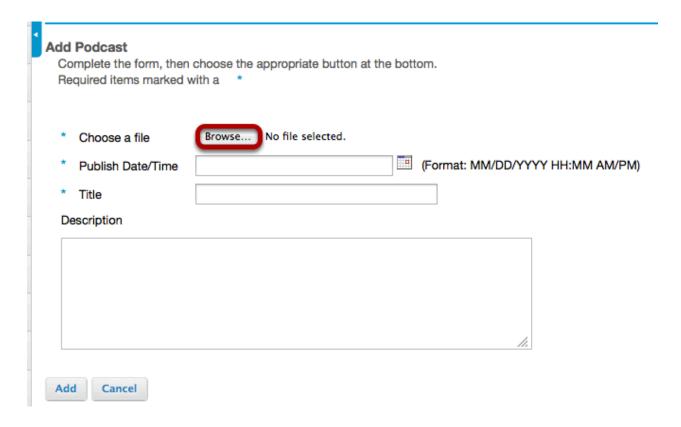

Select the **Podcasts** tool from the Tool Menu in your site.

#### Click Add.

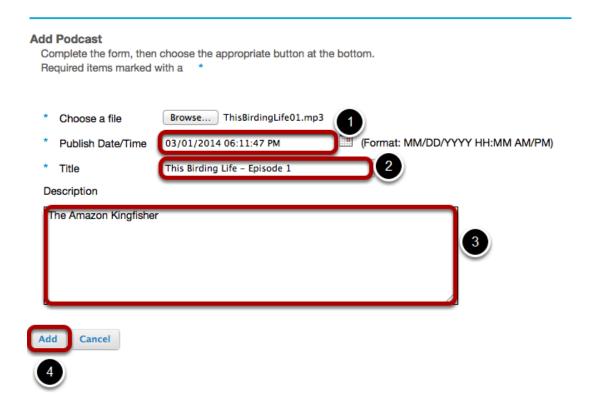

This displays the Add Podcast dialog box.

#### **Click Browse.**

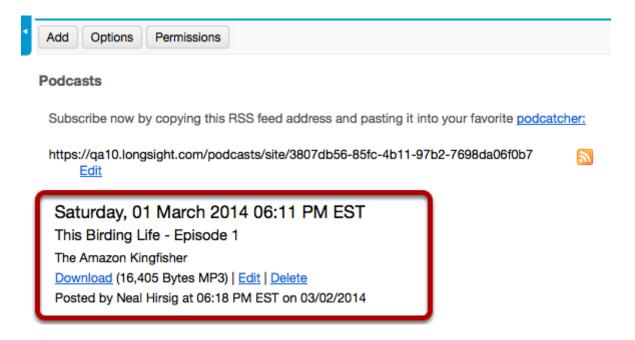

Click the **Browse** button to locate and select the audio (.mp3) or video (.mp4) or PowerPoint (.ppt) file for upload.

#### **Enter item information.**

- 1. Select a release Date/Time.
- 2. Enter a Podcast title.
- 3. Enter a description.
- 4. Click **Add**.

#### View podcast.

After saving, you will return to the Podcasts page with the new Podcast item listed.

#### Notice the Podcast folder location.

When the Podcast tool is added to the site, a "Public" Podcast folder is created in Resources automatically.

The Podcast folder created in the site Resources and all of the files uploaded are "Public" to allow users to subscribe and access the files through a podcatcher application.

Sakai 10 Instructor Guide

Page 576

## How do I subscribe to a podcast?

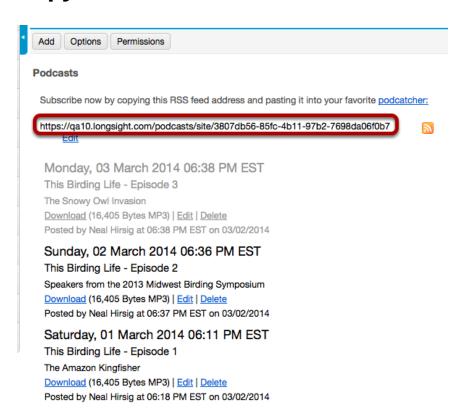

Instructors and students can subscribe to a site Podcast and have the Podcast files automatically downloaded to a "podcatcher" application of their choice (e.g. iTunes).

#### Go to Podcasts.

Select the **Podcasts** tool from the Tool Menu in your site.

### Copy the site's Podcast RSS feed URL.

Sakai 10 Instructor Guide

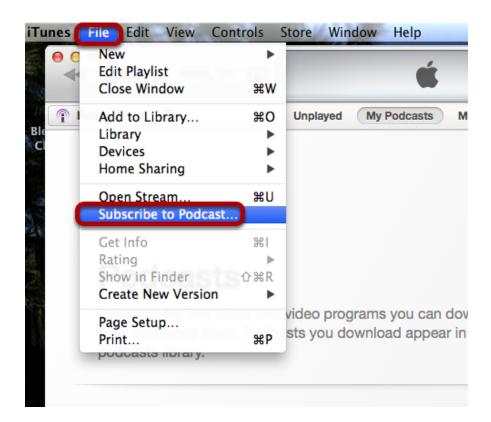

Page 577

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## Open your preferred podcatcher application (e.g. iTunes).

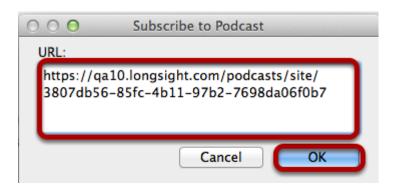

#### Click File / Subscribe to Podcast.

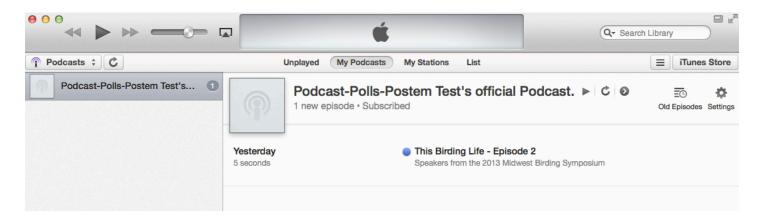

From the File menu, select Subscribe to Podcast.

#### Paste the URL.

Paste the site's Podcast RSS feed URL into the URL box, then click **OK**.

#### View subscribed podcast.

You are now subscribed. The image above displays the example Podcatcher application (iTunes) with a subscription to the site's Podcasts.

## How do I allow students to upload podcast files?

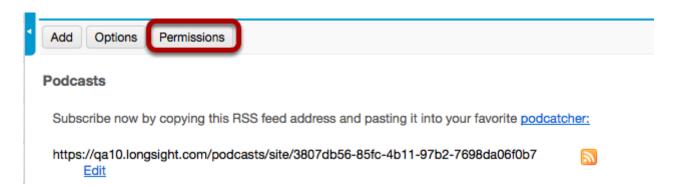

Instructors can edit the Podcast tool permissions to allow students to upload and manage the site's Podcast files. This provides a convenient mechanism for students to share audio, video and PowerPoint files.

#### Go to Podcasts.

Select the **Podcasts** tool from the Tool Menu in your site.

#### **Click Permissions.**

Sakai 10 Instructor Guide **Page 580** This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

## Modify the student tool permissions.

#### **Permissions**

Set permissions for Podcasts folder in worksite "PSYCH 400 001 SU14" (psych400\_001\_su14)

Undo changes Permission	Instructor	Student	Teaching Assistant
Create podcasts	<b></b>		
Read podcasts	<b>✓</b>		
Edit any podcasts	•		
Edit own podcasts	<b>✓</b>		
Delete any podcasts	<b>✓</b>		
Delete own podcasts	<b>/</b>		
Read hidden podcasts	<b></b>		
Save Cancel			

Under the Student column, check the boxes for **Create podcasts**, **Edit own podcasts**, **Delete own podcasts**, and then click **Save**.

Student users will now have an "Add" button on their display of the Podcast tool allowing them to add podcast files.

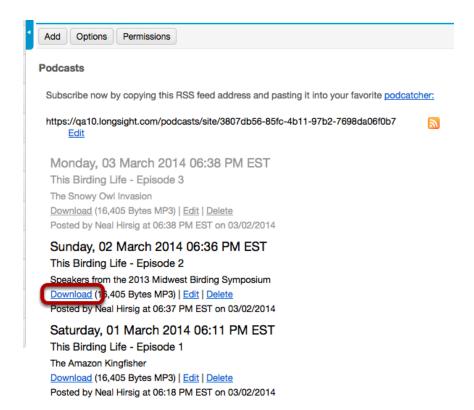

# How do I view or download an individual podcast?

#### Go to Podcasts.

Select the **Podcasts** tool from the Tool Menu in your site.

#### Click Download.

Find the podcast you want to view, and under its title, click **Download**.

When prompted, you may choose to open the file or save it to your computer.

Note: Podcasts are listed in order by date published.

## **Polls**

## What is the Polls tool?

The Polls tool allows instructors to post single question multiple choice survey questions on their site. Polls can be structured to elicit single or multiple responses to a question.

Results of a poll can be made available to students immediately, after voting, after the closing date, or never. Instructors can post any number of polls. If desired, instructor may also change the tool permissions to allow students to post poll questions.

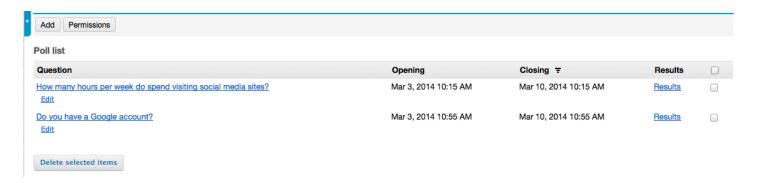

Participants may only vote once per poll.

Responses to poll questions are anonymous.

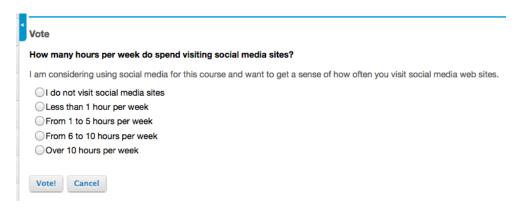

#### To access this tool, select Polls from the Tool Menu in your site.

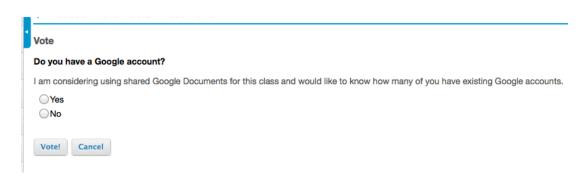

## **Example of a site Polls list.**

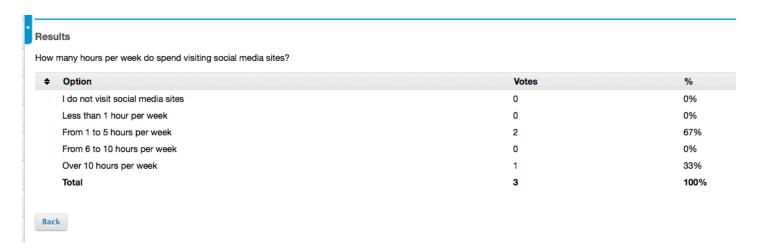

## **Example Polls.**

## **Example of Poll results.**

Sakai 10 Instructor Guide Page 585

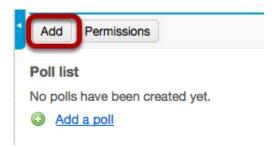

## How do I add a new poll?

#### Go to Polls.

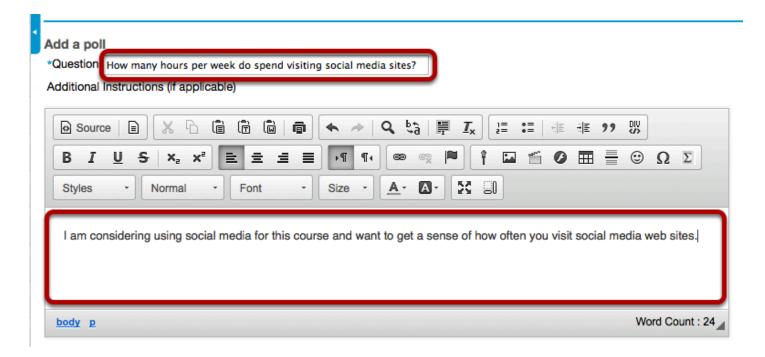

Select the **Polls** tool from the Tool Menu of your site.

Note: If the Polls tool is not available on your site by default, you can add it to your site under Site Info > Edit Tools.

#### Click Add.

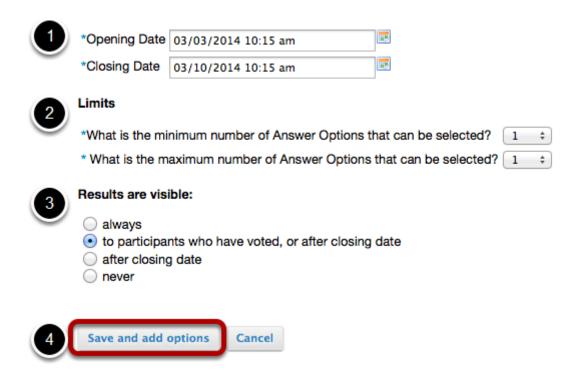

### Compose your poll question.

Enter the poll question in the box marked **Question** and add additional information in the Rich Text Editor below if needed.

## Specify the poll settings.

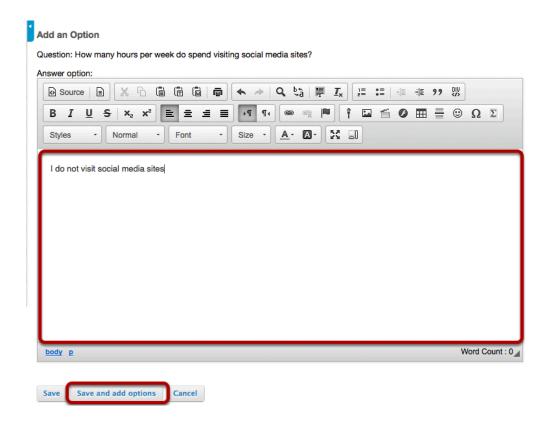

- 1. Specify availability time and date.
- 2. Indicate limits on number of answers selected.
- 3. Choose when to make the results visible.
- 4. Click **Save and add options** when finished.

Sakai 10 Instructor Guide

Page 587

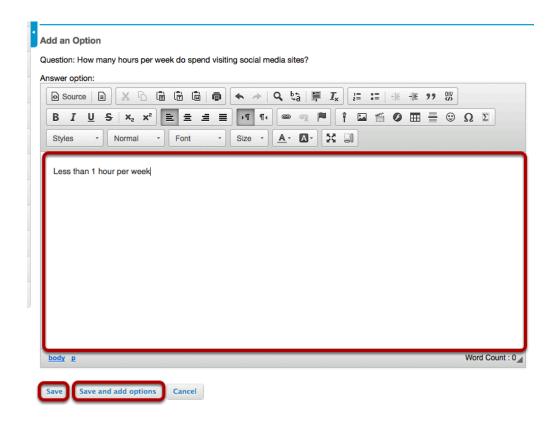

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Add the first answer.

Enter the first answer option in the text box, then click **Save and add options**.

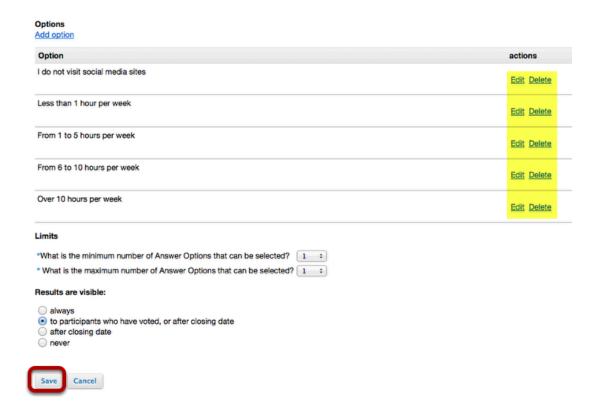

#### Add the second answer.

Enter the second answer option in the text box, then click **Save and add options**.

Continue this process of saving and adding options until you have added all of the options for the Poll question. On the last option click **Save**. This will display the Edit a Poll page with the poll options listed.

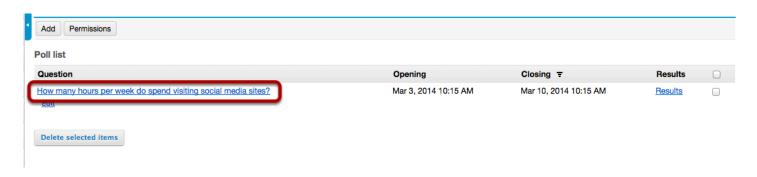

#### Click Save.

This displays the Polls list page. Click **Save** to save your poll.

Note: If you need to edit or delete an option, click on the Edit or Delete links to the right of the option text.

## To view the poll, click on the poll name.

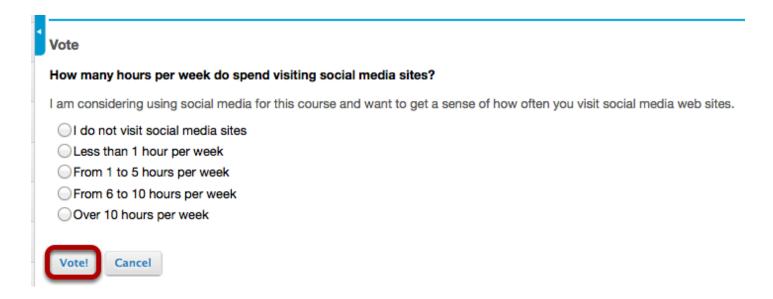

Sakai 10 Instructor Guide

## To view the results of the poll, click on Results.

#### **Example: Poll Results.**

Sakai 10 Instructor Guide Page 592

## How do I take a poll?

By default, students can respond to poll questions. All student responses to poll questions are anonymous.

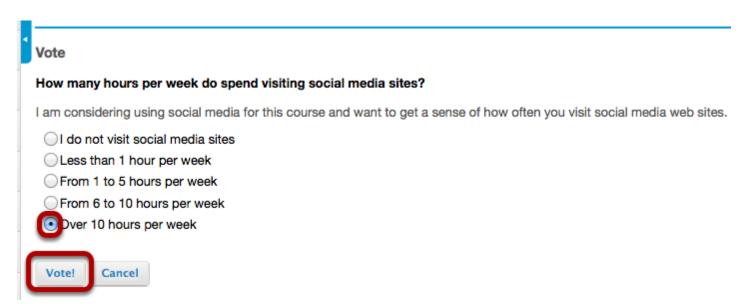

#### Go to Polls.

Select the **Polls** tool from the Tool Menu in your site.

#### Click on the name of the poll.

## Select an option, then click Vote!

This returns the display to the Polls list page with a reference number confirming you have responded to the poll.

Sakai 10 Instructor Guide

Page 593

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## Click Back.

Your reference number: 725de0a5-7c8b-4dd7-a00d-34212d83698b

This returns the display to the Polls list page.

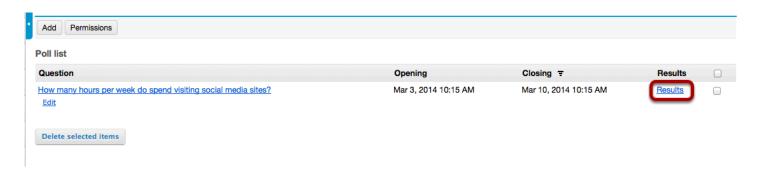

## How do I view poll results?

Instructors can view all poll results and can allow students to view individual poll results.

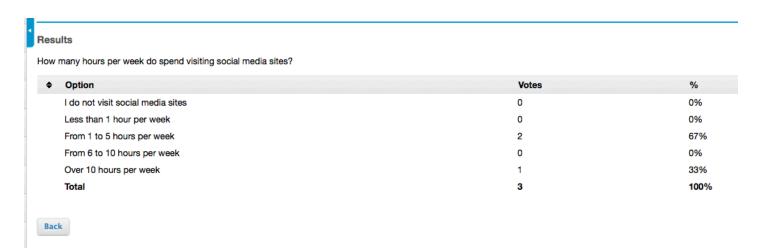

#### Go to Polls.

Select the **Polls** tool from the Tool Menu in your site.

## To view the results of the poll, click on Results.

### **Example: Poll Results.**

Sakai 10 Instructor Guide

Page 595

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

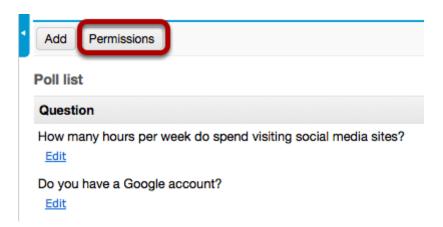

## How do I modify Polls tool permissions?

Instructors can modify the Polls tool permissions to allow students or other site participants to post and manage poll questions.

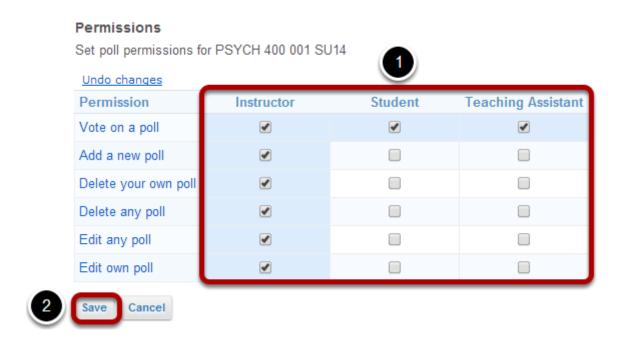

#### Go to Polls.

Select the **Polls** tool from the Tool Menu in your site.

#### Click Permissions.

## Modify the permissions for the roles listed.

- 1. Check the box next to each permission you would like to allow for a given role. (Deselecting a box will remove the corresponding permission.)
- 2. Click Save to save your changes.

Note: You may see different roles listed depending on the roles which exist in your site. A role must be present in the site in order for you to modify its permissions.

## **PostEm**

### What is the PostEm tool?

Instructors can use the PostEm tool to upload and distribute a comma-delimited (CSV) spreadsheet to present individual feedback and/or grades to students.

Instructors can upload as many feedback files as they want. Students only see their own individual feedback and/or grades.

The PostEm tool provides a convenient mechanism to post comments and grades for those instructors that regularly use Excel spreadsheet files to calculate grades. You might also use it to post class attendance records from a spreadsheet file.

PostEm CSV files must follow a particular format:

- The first column of the spreadsheet must contain the student usernames.
- · The first row must contain headings.

## To access this tool, select PostEm from the Tool Menu in your site.

## **Example of Class Attendance feedback.**

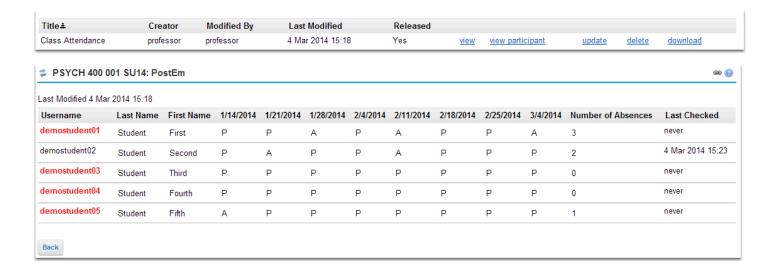

#### **Student View**

#### PSYCH 400 001 SU14: PostEm

Your Feedback		
Student ID	demostudent01	
Last Name	Student	
First Name	First	
1/14/2014	Р	
1/21/2014	Р	
1/28/2014	Α	
2/4/2014	Р	
2/11/2014	Α	
2/18/2014	Р	
2/25/2014	Р	
3/4/2014	Α	
Number of Absences	3	

Back

#### **Instructor View**

As the instructor you can see when a student has last checked their feedback. Any students who have never checked will appear in red.

## How do I add PostEm feedback?

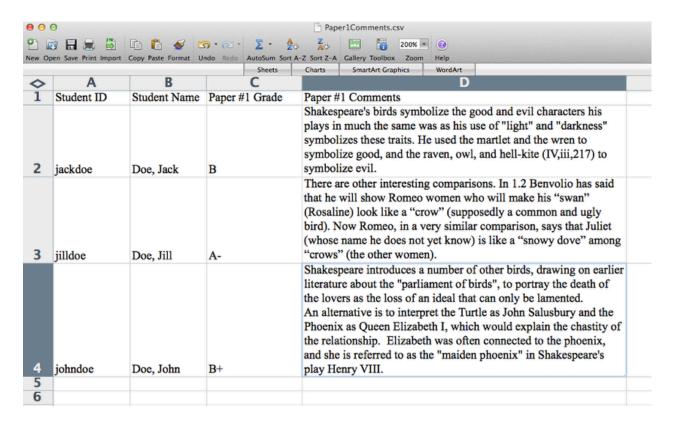

Instructors use a comma-delimited (CSV) spreadsheet file to present individual feedback and/or grades to students. This spreadsheet file must follow a particular format:

- Your file must be saved in .CSV format. You can save Microsoft Excel spreadsheets as CSV files.
- The first column of your file must contain individuals' usernames in lower case.
- The first row of your file must contain headings; every column must have a heading.

Once you have created your file, you can modify it as you wish, as long as you stay within the guidelines above.

Tip: You can download a CSV file that includes the student usernames under Gradebook > All Grades > Export as CSV (or from Gradebook2 > Tools > Export). You can also download a CSV file that includes the student usernames under Roster > Export.

### **Example of a properly formatted CSV file.**

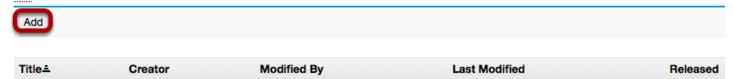

#### Go to PostEm

Select the **PostEm** tool from the Tool Menu of your site.

Note: The PostEm tool is sometimes named Feedback.

#### Click Add.

There are currently no items at this location.

#### **Enter a Title.**

#### Add/Update Feedback File

#### Instructions:

Your feedback file must be saved in .csv format.

The first column of your file must contain individual usernames.

The first row of your file must contain headings.

Title Paper #1 Grades/Comments

Enter a Title for the Feedback file. This is the title students will see when they go to PostEm to view their feedback.

Sakai 10 Instructor Guide

Page 602

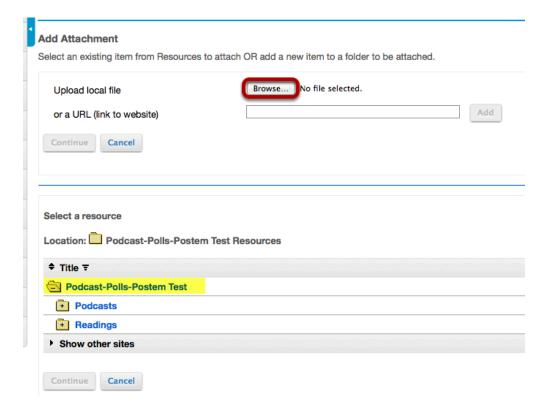

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

## Select your file.

Click the Choose a CSV file or URL from Resources button to select your file.

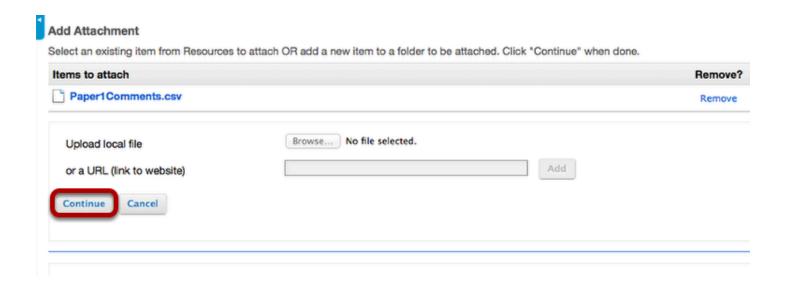

#### Click Browse..

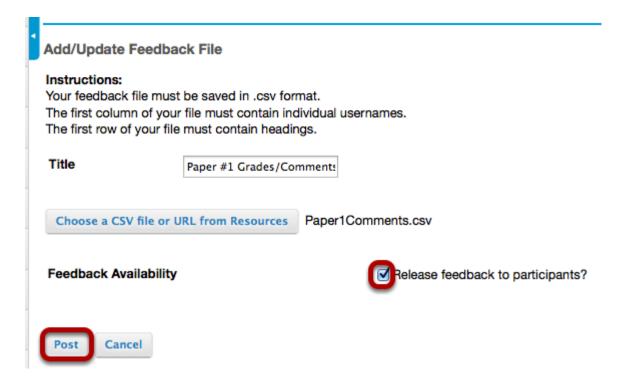

Click the **Browse** button to locate the file on your computer and select it for upload.

Note: If you have already uploaded the CSV file to Resources you could locate the file and select it from the Resources file listing.

#### Click Continue.

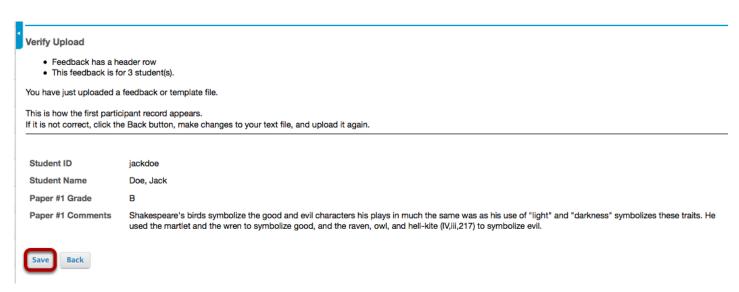

#### Release feedback and Post.

Check the box next to **Release feedback to participants?** and then click **Post**.

## Verify the upload.

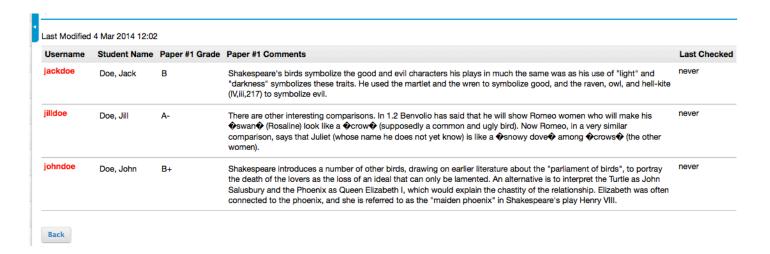

You will be prompted to verify your file upload. The first row of data will be previewed for you. If everything looks correct, click **Save**.

#### To view feedback for all students, click View.

#### View class feedback.

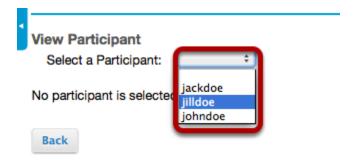

This displays all of the feedback and when (if ever) the student last checked their feedback.

## To view feedback for one student, click View Participant.

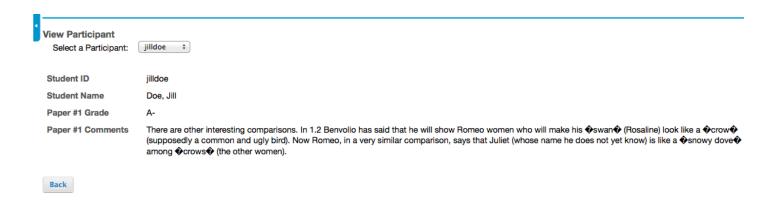

This displays the individual student's feedback.

#### Select the student's username.

Choose the student you want to view from the drop-down menu of participant usernames.

#### View individual feedback.

This displays the individual student's feedback.

## **Profile**

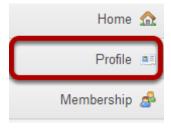

## What is the Profile tool?

The Profile tool contains basic user information, including names, and other optionally displayed information.

Your Profile is available in all of your sites throughout the system. It contains information about you, such as status messages, your photo, biography, contact information, social networking information (e.g. Twitter integration), connections, notification preferences, and privacy settings. Some institutions update fields in the Profile automatically when user accounts are created. Typical institutional updates include the user photo and email address. All Profile fields are optional.

Note: Some Profile options may be locked or unavailable depending on institutional settings.

## To access this tool, select Profile from the Tool Menu in My Workspace.

## How do I set up my profile?

Your Profile is available in all of your sites throughout the system. It contains information about you, such as status messages, your photo, biography, contact information, social networking information, and privacy settings. Some institutions update fields in the Profile automatically when user accounts are created. Typical institutional updates include the user photo and email address. All Profile fields are optional.

Note: Some Profile options may be locked or unavailable depending on institutional settings.

#### Go to Profile.

Select the **Profile** tool from the Tool Menu in My Workspace.

## **Changing Your Picture**

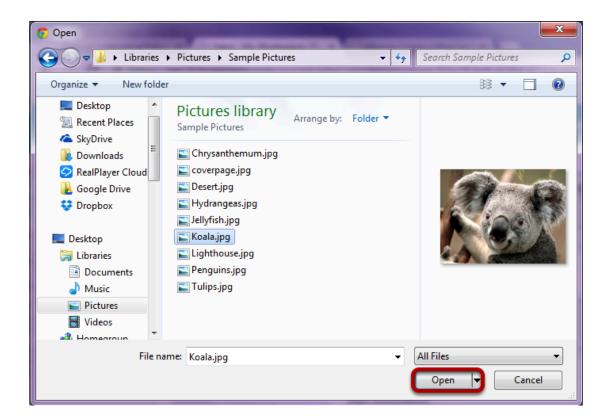

Mouse over the image area and select **Change picture** to upload a new photo.

#### Select a new picture and upload.

Click the Choose File button to browse your computer for a new image.

#### Select your new picture.

Once you have located the image you would like to use, select it and click **Open**.

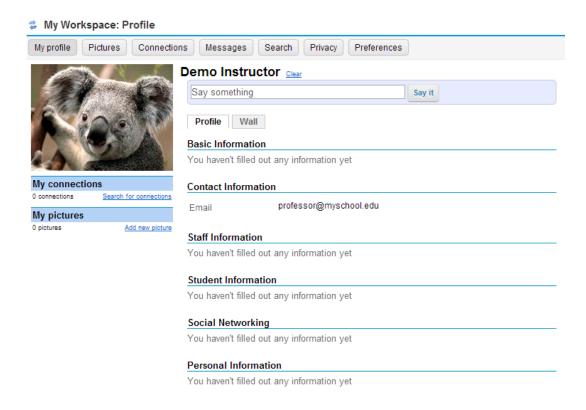

Note: Your image must be in a web-friendly format (such as .jpg, .gif or .png) and 2 MB or less in file size.

## Upload your new picture.

The filename of the picture you selected will appear listed. If this is correct, click the **Upload** button.

## Picture updated.

Sakai 10 Instructor Guide

Page 613

## **Editing your information.**

Mouse over the right side of information each section near the horizontal rule to display the editing option.

Click on the **Edit** link to modify or add your information.

#### **Basic Information.**

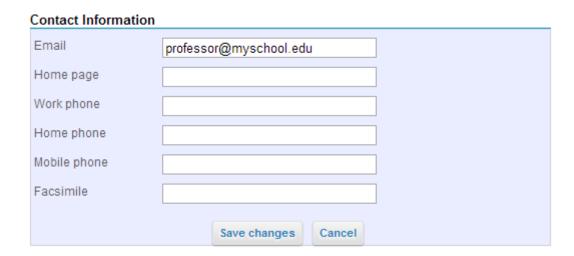

Enter a brief personal statement under **Basic Information** so that other system users can get to know a little bit about you, and then click **Save**.

The <u>Rich Text Editor</u> is available to you here, in case you would like to format your text.

Note: Remember that all fields are optional. You may also choose to show/hide some information in your Privacy settings.

#### **Contact Information.**

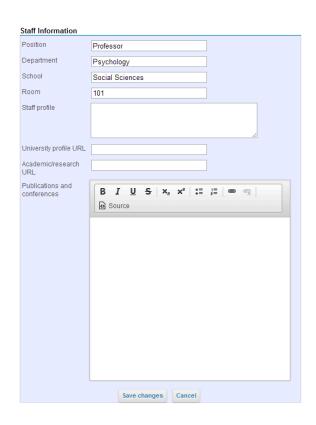

Often, the user's college email address is automatically populated in this area. If it is not, or if you prefer an alternate email address, you may enter it here.

You may also choose to enter your phone and/or fax numbers if desired.

Be sure to click **Save** to save any changes.

#### Staff Information.

Sakai 10 Instructor Guide

Page 617

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

If you are a staff member at your institution, the Staff Information section is a place to display more information about you and your role at the institution. For example, faculty members might choose to include a professional biography here, as well as information about research interests, publications, or the classes that they teach. Click **Save** to save any changes.

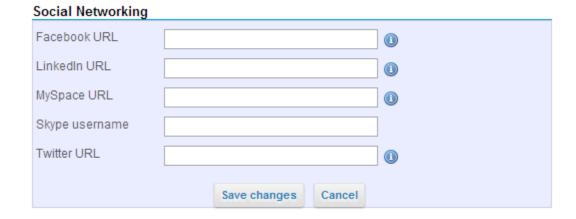

Note: The <u>Rich Text Editor</u> is also available to you in the Publications and Conferences field.

#### Student Information.

If you are a student at the institution, you may enter information about your degree or program tracks here. Click **Save** to save any changes.

#### Social Networking.

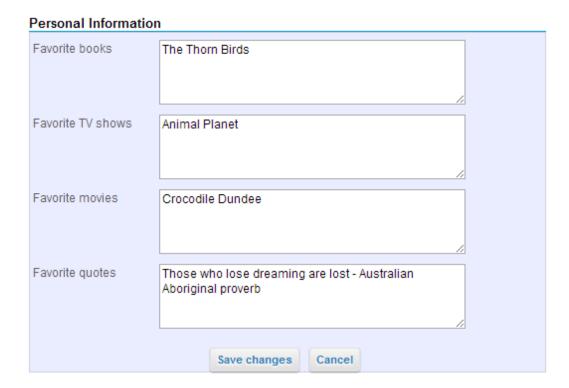

You may also include links to your social media accounts or contact information on social networking sites. Click **Save** to save any changes.

Sakai 10 Instructor Guide

Page 618

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **Personal Information.**

You may also choose to share information about your favorite books, TV shows, movies, or quotes. Click **Save** to save any changes.

Tip: Users can search for connections in Profile based on common interests.

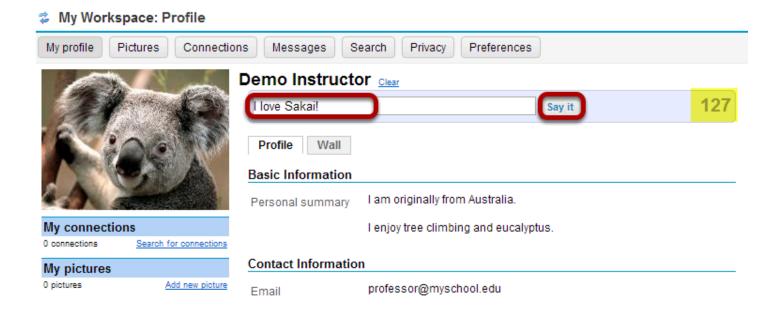

## How do I post to my wall?

You can post to your wall in the Profile tool by entering a status message, or by posting directly to your wall.

#### Go to Profile.

Select the **Profile** tool from the Tool Menu in My Workspace.

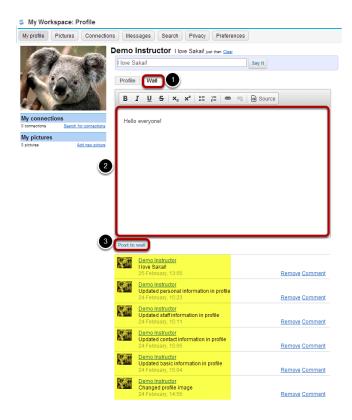

## Enter a status message.

Enter your message into the text box provided and then click the **Say It** button.

Note: Status messages are limited to 140 characters. You will see a counter to the right of the text box which tells you how many characters you have remaining.

## Post directly on your wall.

- 1. Click on the Wall tab.
- 2. Enter your text into the Rich Text Editor.
- 3. Click Post to wall.

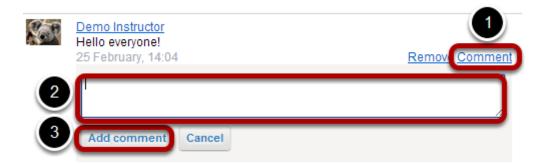

Note: Previously posted status messages, posts and updates will appear at the bottom of the screen.

#### Remove a post. (Optional)

If you would like to remove an existing message on your wall, click the **Remove** link next to the item you'd like to delete.

## **Comment on a post. (Optional)**

If you would like to comment on a wall post (your own, or someone else's):

- 1. Click the **Comment** link next to the post.
- 2. The screen will expand to show a text box below where you can add your comment. Enter your text here.
- 3. Click **Add Comment** to post your comment to the wall.

# How do I add pictures to my profile picture gallery?

## Go to Profile.

Select the **Profile** tool from the Tool Menu in My Workspace.

#### Click Pictures.

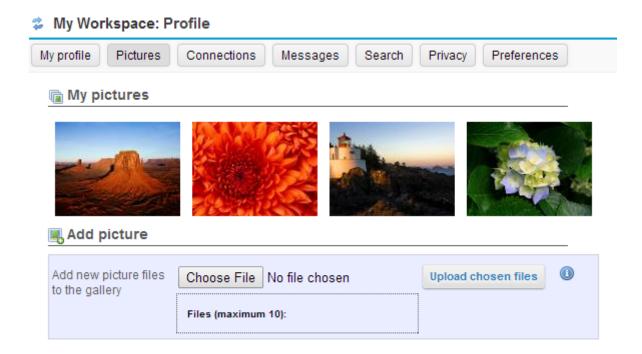

## Select your image files.

- 1. Click the **Choose File** button to browse for images on your local computer and select them for upload. You may select more than one image if you like. The maximum number of profile gallery images is 10.
- 2. Selected files will appear listed below the **Choose File** button. If you decide not to upload a given image, you can click **Delete** to remove a file from the list.
- 3. Once you have selected your file/s, click the **Upload chosen files** button.

Note: The combined file size of all images to upload should not exceed 20MB.

## View picture gallery.

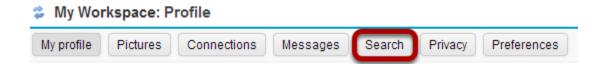

Once your images have been uploaded, they will display under "My Pictures".

## How do I search for and add connections?

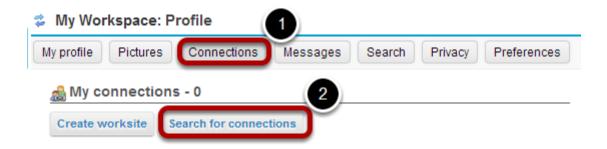

#### Go to Profile.

Select the **Profile** tool from the Tool Menu in My Workspace.

#### Click Search.

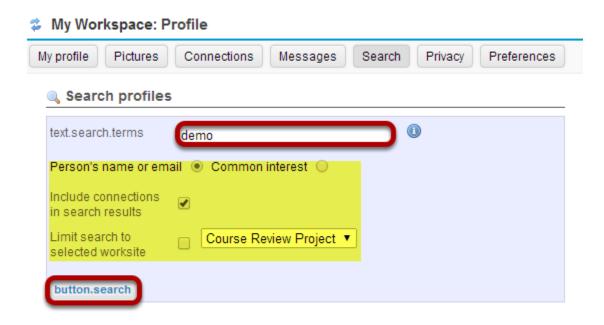

## Or, you can also go to Connections to view/search from there.

- 1. Click Connections.
- Then, click Search for Connections.

Sakai 10 Instructor Guide **Page 626** This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

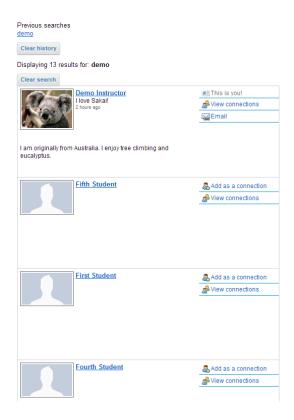

## Enter your search terms.

Enter a name or keyword to search for, and then click the **Search** button.

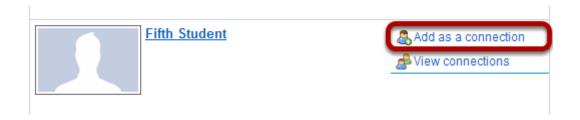

Note: Optionally, you can choose to search by name/email, or common interest. You may also include current connections, or limit the search to a particular course by selecting it from the drop-down menu.

## View search results.

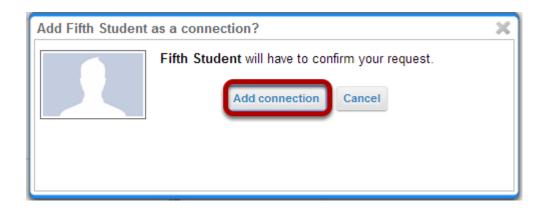

Search results will display at the bottom of the screen.

#### Add connections.

Click the **Add as a connection** link to send a connection request to the selected user.

## Connection request confirmation.

You will receive a notice letting you know that the user you have contacted will have to confirm the request before being added as your connection. To proceed with the connection request, click **Add connection**.

## Pending requests.

Note: Once you have sent a connection request to someone, you will see the text "Connection requested" displayed for that user until they accept or ignore the request.

## How do I send a message to a connection in Profile?

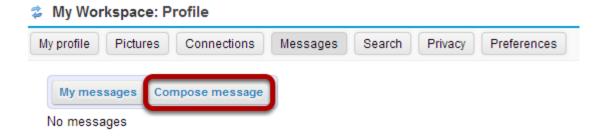

#### Go to Profile.

Select the **Profile** tool from the Tool Menu in My Workspace.

## **Click Messages.**

## Click Compose message.

## Enter your message and send.

- 1. Start typing the name of one of your connections to get a list of connections you can send a message to, then select them from the list.
- 2. Enter a subject.

3. Enter a message.4. Click **Send Message**.

## How do I change my privacy settings?

On your privacy page you can control what parts of your profile other people can see. You can tailor this so that certain information is only available to you, to your connections, or to everyone.

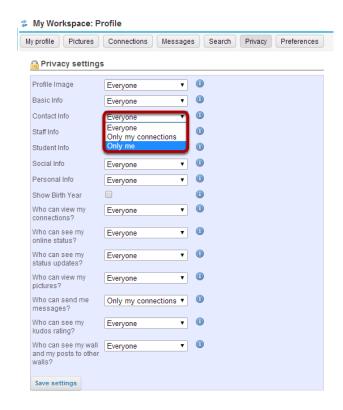

#### Go to Profile.

Select the **Profile** tool from the Tool Menu in My Workspace.

## Click Privacy.

## Modify your privacy settings.

You may use the drop-down menus to change the privacy settings for each of the items listed.

Note: Depending on your institutional Profile settings, some of these privacy settings may be locked or unavailable.

## **Click Save settings.**

If you make any changes, be sure to click **Save settings** to save your changes.

# How do I set my notification and other profile preferences?

On your preferences page you can control what emails are sent you when various actions occur, choose what widgets are shown on your profile, manage your preference to an officially provided image (if configured) as well as manage the Twitter integration for your status updates. All changes in preferences are optional.

Note: Depending on institutional settings, some of these options may not be available in your local instance.

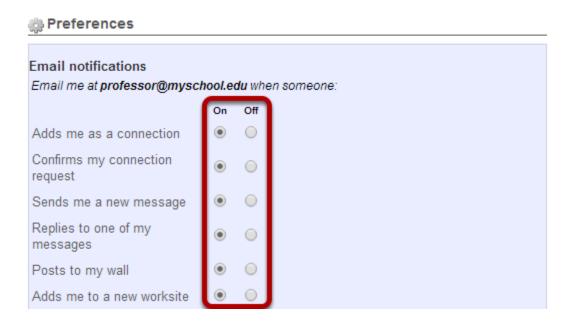

#### Go to Profile.

Select the **Profile** tool from the Tool Menu in My Workspace.

#### **Click Preferences.**

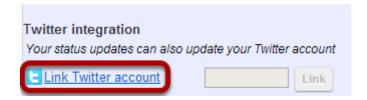

## Manage email notifications.

Click the radio buttons to adjust the settings on or off for each email notification preference.

## Manage Twitter integration.

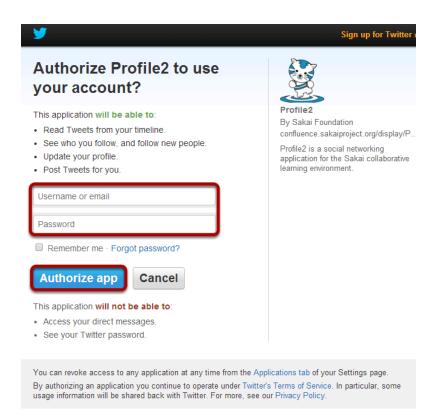

If you have an existing Twitter account, you may link it to your Sakai profile if desired.

Click **Link Twitter account** and a new window will open and connect to Twitter.

Note: The Twitter integration will post your Sakai status updates to your Twitter account. However, it does not post your other Tweets to Sakai.

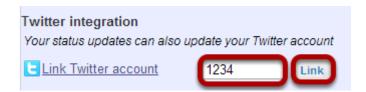

#### Grant access.

Log in with your Twitter username and password, and then click the **Authorize app** button to grant Profile2 access to post status updates.

You'll be presented with a PIN code.

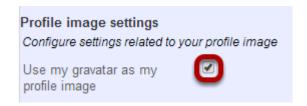

#### Enter the PIN and click Link.

Back on the preferences page, enter the PIN code in the box and click **Link**. Your details will be verified with Twitter.

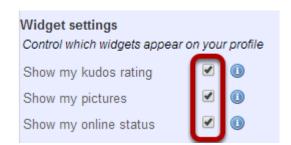

Note: You can disable the Twitter integration by clicking Unlink.

## Manage profile image settings.

If you have an existing gravatar and you would like to use that as your profile image, you may check the box here.

## Manage widget settings.

Check the box next to any of the available widgets to show them on your profile.

- **Show my kudos rating**: This will display your kudos rating on your profile once it has been calculated.
- **Show my pictures**: This will display pictures from your image gallery on your profile if selected.
- **Show my online status**: This will show whether or not you are currently online. If enabled, you can further control this in your privacy settings. If disabled, you will appear to be offline.

Sakai 10 Instructor Guide

## **Click Save settings.**

If you have made any changes to your preferences, be sure to click **Save settings** to save your changes.

## Resources

## What is the Resources tool?

The Resources tool allows instructors to share a wide variety of files with their students within a site. Individual users may also have Resources within their personal My Workspace area.

Instructors or site owners can upload files (for instance, word processing documents, spreadsheets, slide presentations, audio and videos), as well as create and post HTML (web) pages, simple text documents, library citations, and share links to useful web sites.

Instructors or site owners can organize these files and links into folders and subfolders making it easier for students to locate and access items. Folders and files in Resources can be moved or reordered within a site or copied from one site to another.

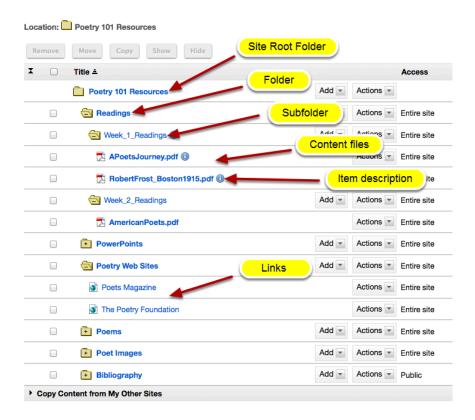

Files and folders can display contextual remarks, can be shown, hidden or viewable only during specific dates and times. Instructors can automatically notify site members by email that an item has been added to Resources.

Resources also allows users to upload multiple files using the <u>Drag and Drop</u> interface, or using the <u>WebDAV</u> protocol.

## To access this tool, select Resources from the Tool Menu in your site.

## **Example of a Resources page.**

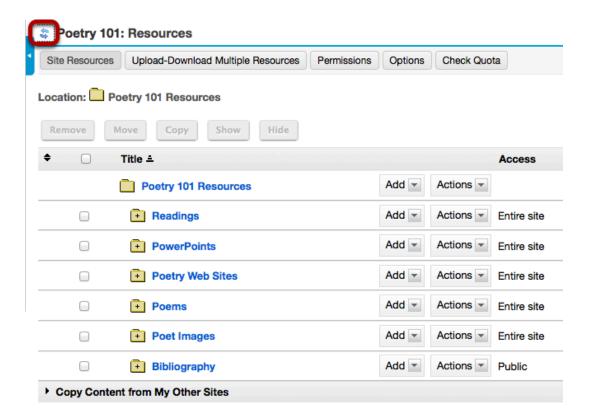

## How do I navigate the Resources tool?

There are a number of controls that determine the display of the Resources tool, making it easier to maneuver about within the tool space.

#### Go to Resources.

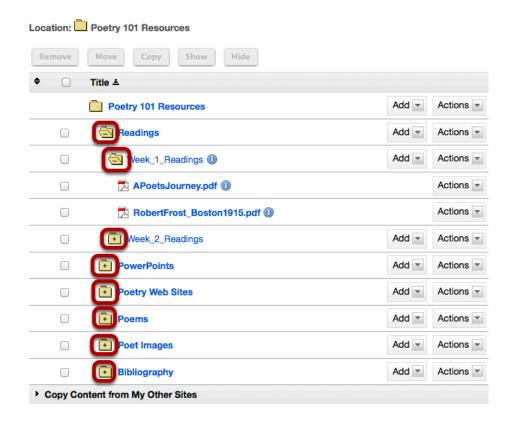

Select the **Resources** tool from the Tool Menu of your site.

#### Reset

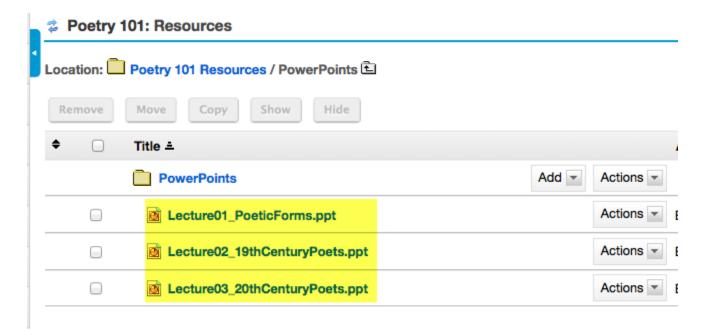

Clicking **Reset** will always return the Resources display to the root level with all the folders closed.

#### Plus / Minus

Clicking **Plus +** will open a folder, within the view of all of the folders. Clicking **Minus -** will close a folder.

## **Folder View**

Sakai 10 Instructor Guide

Page 642

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

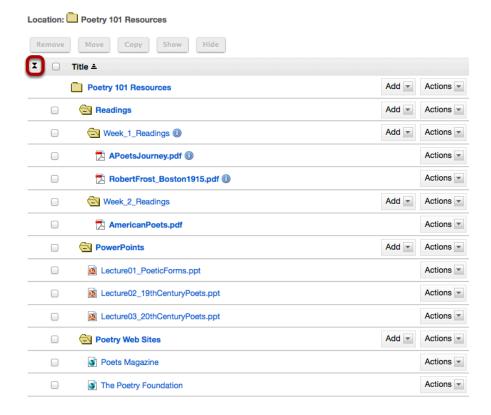

Clicking on the name of any folder will isolate the display to just the contents of that folder.

#### **Breadcrumb Trail**

When a folder or subfolder is isolated, a breadcrumb trail of links allows users to navigate the folders.

## **Expand All / Collapse All**

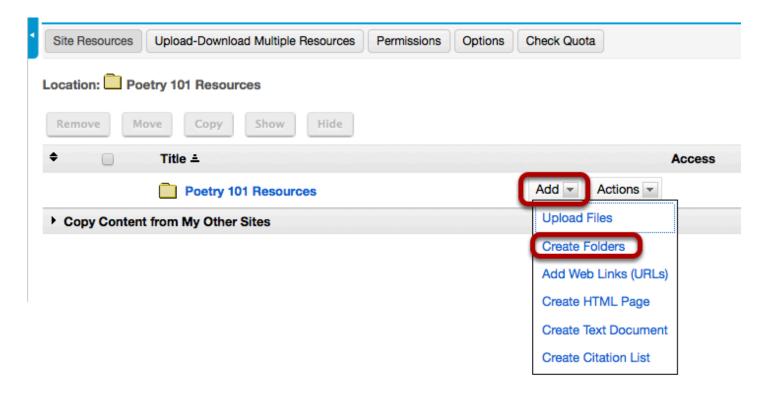

Clicking Expand All will open up and display the contents of all folders and subfolders. Clicking **Collapse All** will close all folders and subfolders. Expand All / Collapse All is a toggle button. Clicking it once will expand the display; clicking it again will collapse the display.

## How do I create folders?

#### Go to Resources.

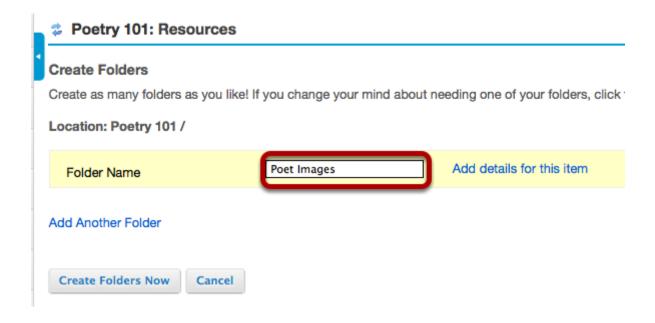

Select the **Resources** tool from the Tool Menu of your site.

## Click Add, then Create folders.

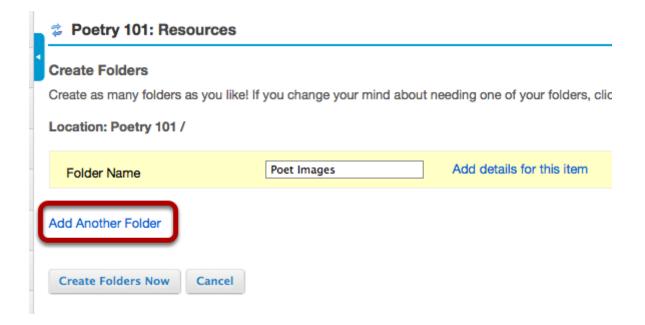

To the right of the site's root folder, from the **Add** drop-down menu, select **Create folders**. This displays the Create Folders page.

#### Enter the name of the folder.

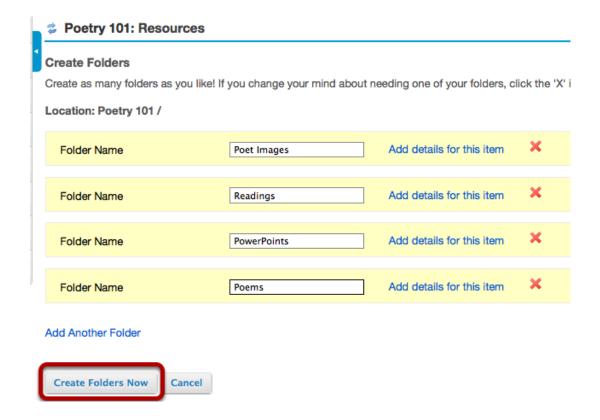

## Add multiple folders. (Optional)

If you would like to create multiple folders, click **Add another folder**.

Note: You can add as many folders as you want by clicking "Add another folder".

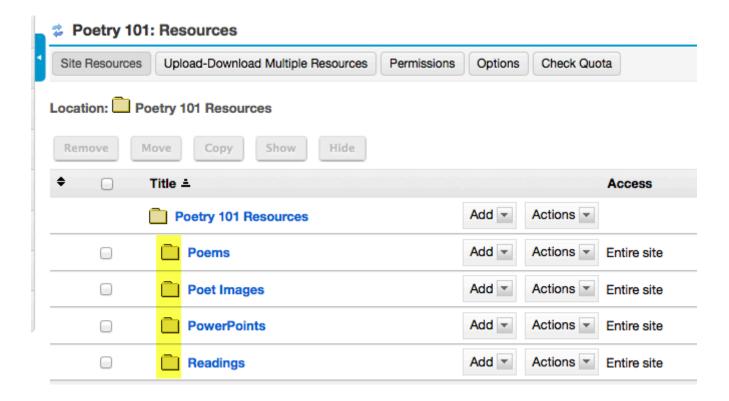

#### **Click Create Folders Now.**

To create the folder(s) in Resources, click **Create Folders Now**.

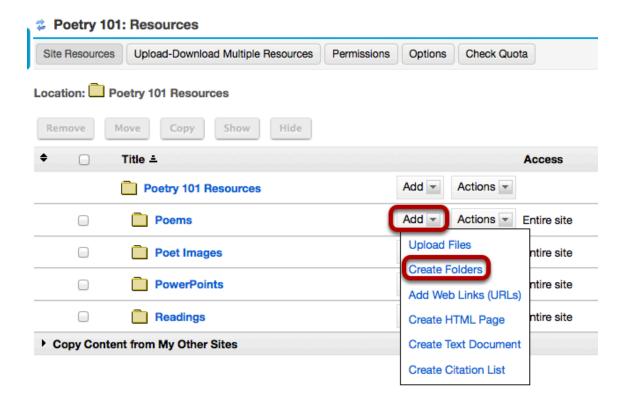

This returns the display to the Resources page with the newly created folder(s) displayed.

#### View folders in Resources.

Notice that the folders are displayed slightly indented to the root folder.

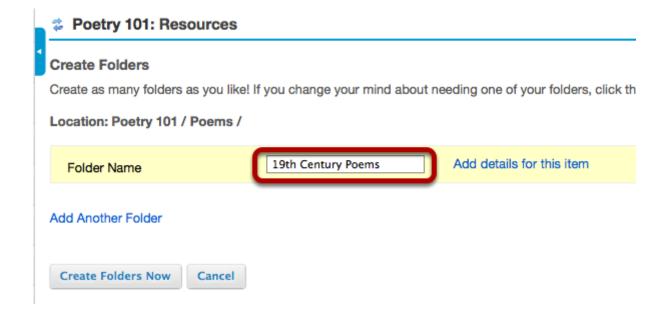

## **Create subfolders. (Optional)**

To create a subfolder within a folder, from the **Add** drop-down menu, select **Create Folders** to the right of the parent folder.

This displays the Create folders page.

#### Enter a title for the subfolder.

To create the subfolder(s) in Resources, click **Create Folders Now**.

This returns the display to the Resources page with the newly subfolder(s) displayed within the main folder.

#### View subfolders in Resources.

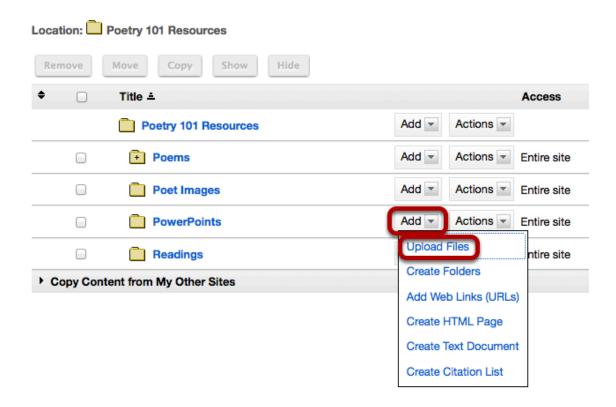

Notice that the subfolders are displayed slightly indented to the parent folder.

# How do I upload files?

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

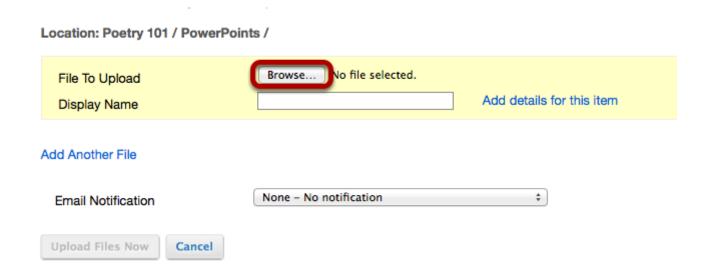

# Click Add, then Upload Files.

To the right of the folder you want to upload the file, from the **Add** drop-down menu, select **Upload file**.

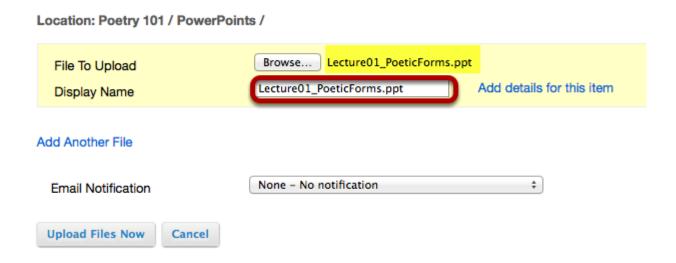

This displays the Upload Files page.

#### Click Browse.

Click **Browse** to locate and select the file on your computer.

# **Edit display name. (Optional)**

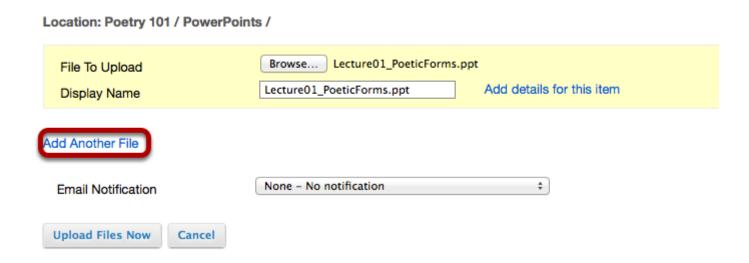

By default, the Display Name is the same as the file name. You can edit the Display name here. *Note: The selected file name will appear to the right of the Browse button.*

## View files in Resources.

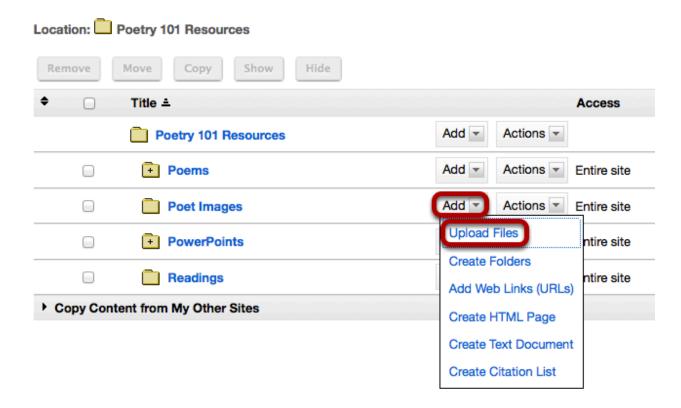

The files are uploaded and placed within the selected folder.

# How do I drag-and-drop files from my computer to a Resources folder?

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

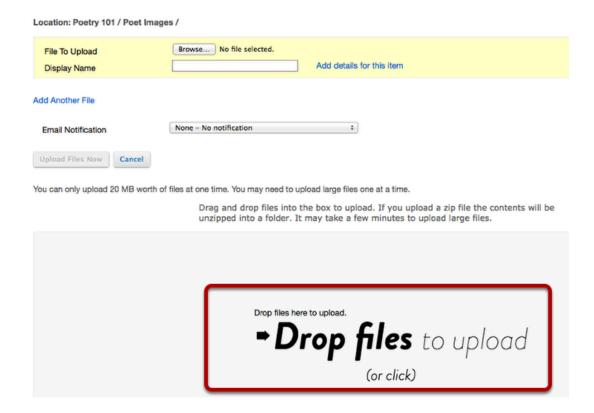

## Click Add, then Upload Files.

To the right of the folder you want to drag-and-drop files, from the **Add** drop-down menu, select **Upload Files**.

This displays the upload Files page.

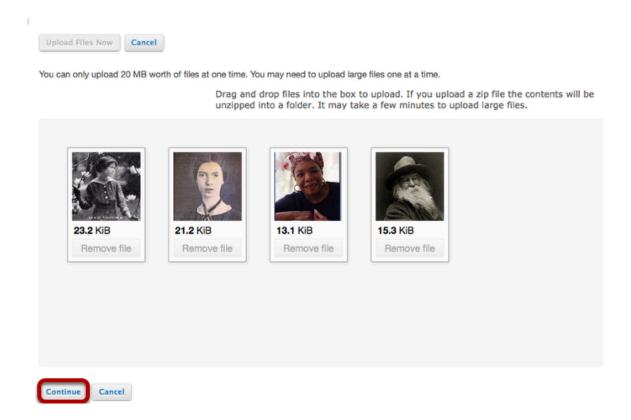

# Drag and drop files from your computer.

Drag files from your computer and drop them in box marked "Drop files to upload".

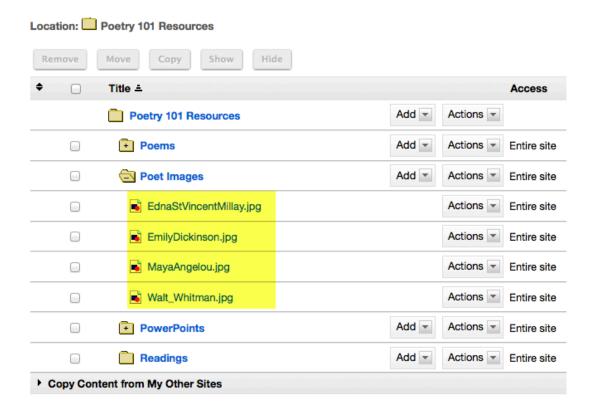

This will display thumbnails of the files that will be uploaded.

## **Click Continue.**

This uploads the files.

## View files in Resources.

The files are now located inside the selected Resources folder.

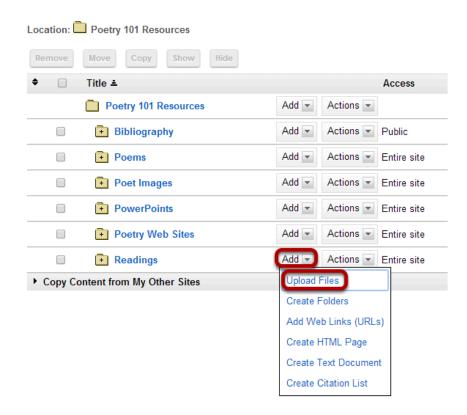

# How do I upload and unpack a zip file to a Resources folder?

There are two methods for uploading a zip file to Resources: drag-and-drop and the upload file functionality. Once you have uploaded the file, you may use the Actions / Expand Zip Archive functionality to unpack the zip file into its component files.

#### Go to Resources.

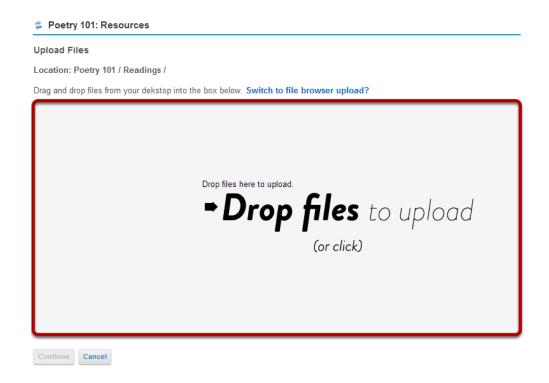

Select the **Resources** tool from the Tool Menu of your site.

## From the Add drop-down menu, select Upload Files.

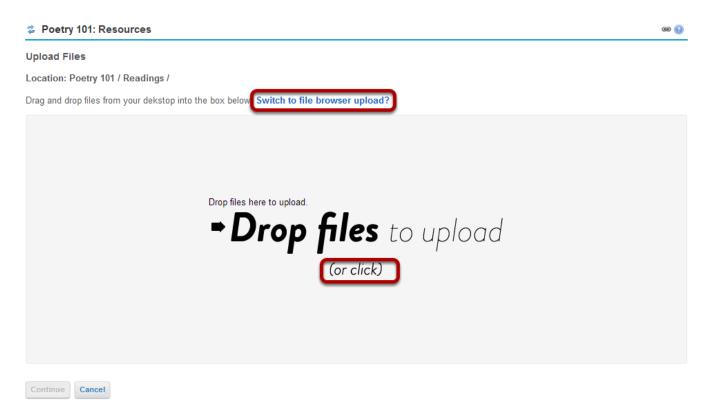

From the **Add** drop-down menu to the right of the folder where you want to upload the zip file, select **Upload Files**.

# Drag and drop the zip file from your computer.

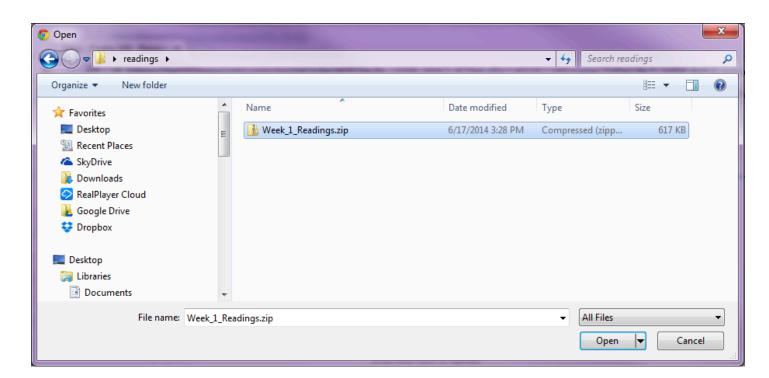

Drag the zip file from your computer and drop it in the box marked "Drop files to upload". This will display a thumbnail of the zip file that will be uploaded.

# Or, click to use the file browser upload.

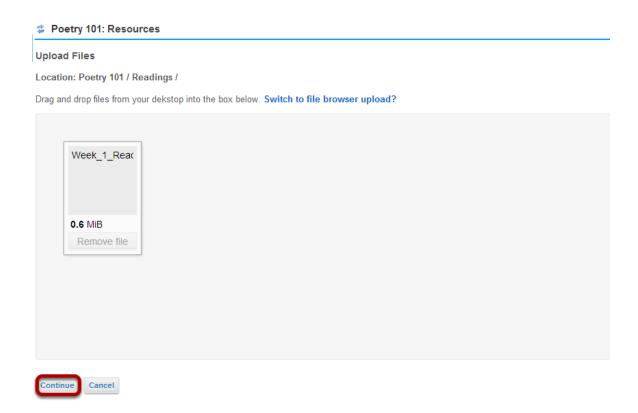

If you prefer to browse for your file instead, click on the **Switch to file browser upload?** link, or click once within the **Drop Files** area to go to the file browser view.

# Locate and select the file on your computer.

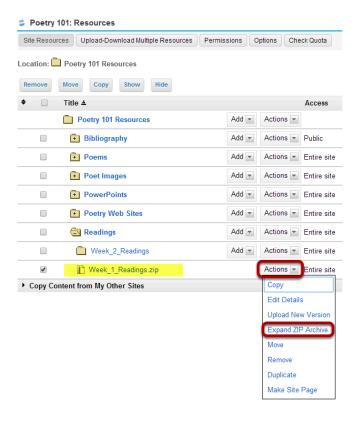

### Click Continue.

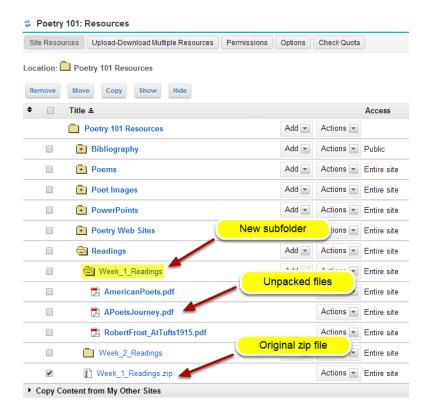

This uploads the zip file.

# Click Actions, then Expand Zip Archive.

From the **Actions** drop-down menu next to the zip file, select **Expand ZIP Archive**.

### View zip contents in Resources.

The zip file is automatically unpacked within the current folder.

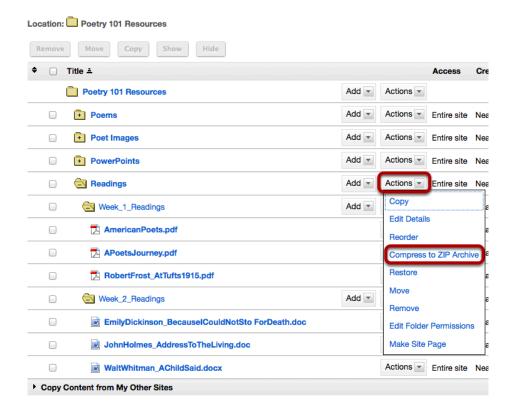

Note: A new subfolder within the current folder is created using the name of the zip file. The zip file content is unpacked within this new subfolder and the original zip file remains.

# How do I create a zip archive file in Resources?

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

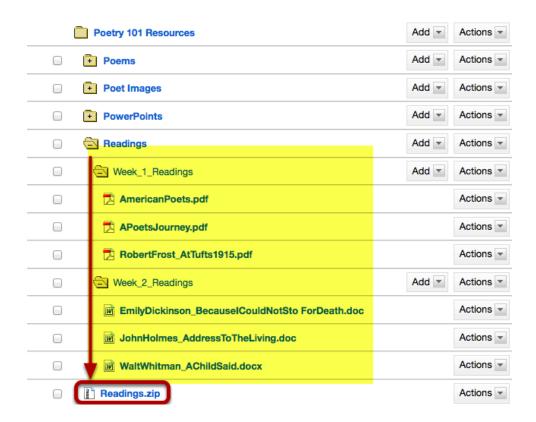

## Click Actions, then Compress Zip Archive.

To the right of the folder you want to zip archive, from the **Actions** drop-down menu, select **Compress to ZIP Archive**.

This creates a zip file.

# Zip file contents.

The zip file contains a copy of all of the subfolders and files inside the selected folder.

Note: The zip file is named the same as the Resource folder that was compressed. By default, the zip file is placed inside of the root folder of the site.

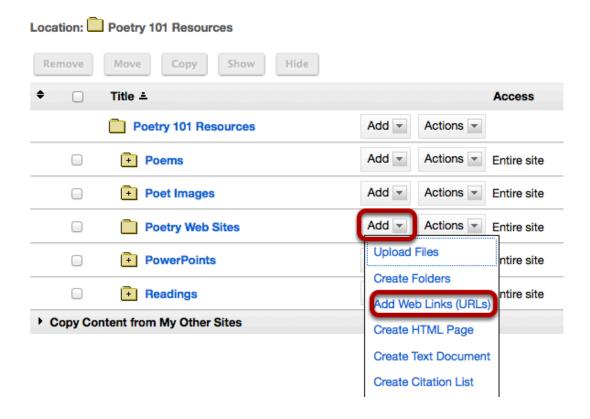

# How do I add a web link or URL?

Users can create links to web pages in Resources.

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

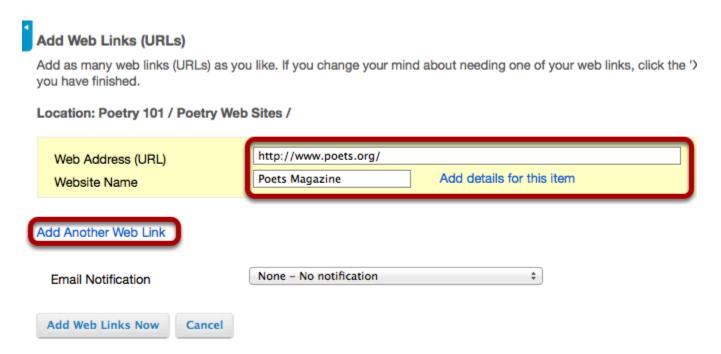

## Click Add, then Add Web Links (URLs).

To the right of the folder you would like to add the web link, from the **Add** drop-down menu, select **Add Web Links (URLs)**.

This displays the Add Web Links (URLs) page.

#### Enter web address.

Enter (or paste) the web site address (URL) and enter a name of the link.

You may also click **Add Another Web Link** to add additional links. (Optional)

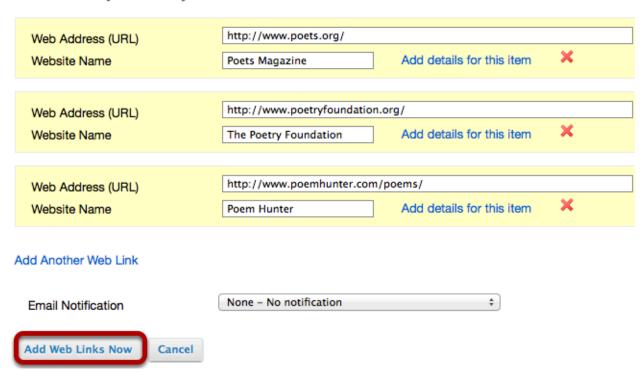

Sakai 10 Instructor Guide

This creates links to the web sites in the selected Resource folder.	

# How do I create a text document?

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

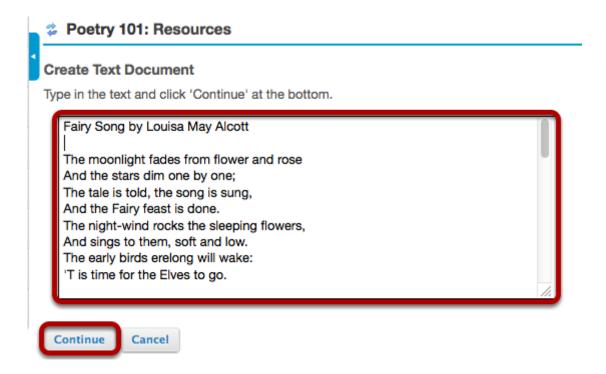

### Click Add, then Create Text Document.

To the right of the folder where you want to create the text document, from the **Add** drop-down menu, select **Create Text Document**.

This displays the Create Text Document page.

# Enter text, then click Continue.

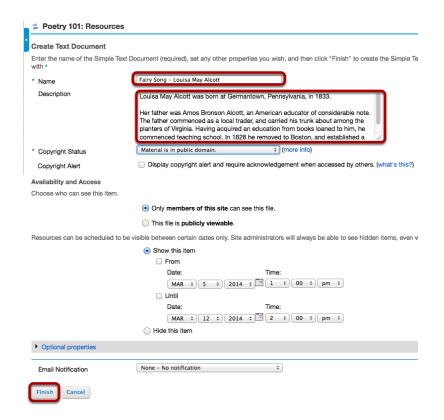

Enter (or paste) the text into the text box, then click **Continue**.

This displays The details page for the text document.

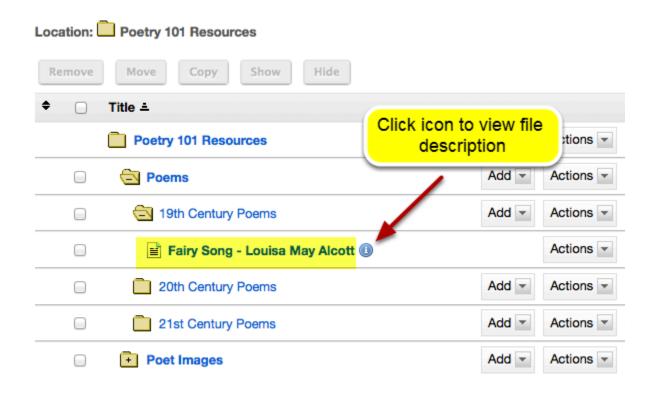

Page 673 Sakai 10 Instructor Guide This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

#### **Enter document information.**

Enter a Name for the text document, add additional data if needed, then click Finish.

#### View text document in Resources.

The text document has been placed in the selected folder.

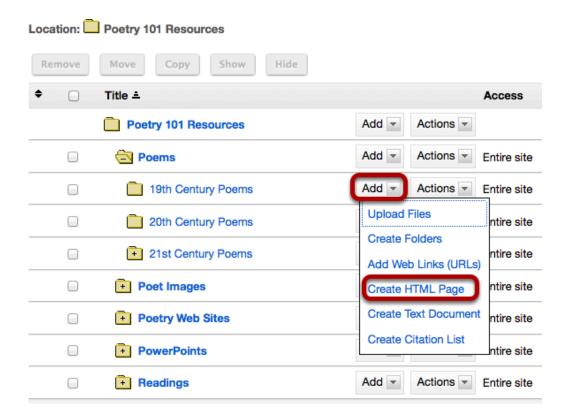

Note: You may click on the blue Information icon to the right of the file to see the item description.

# How do I create an HTML page?

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

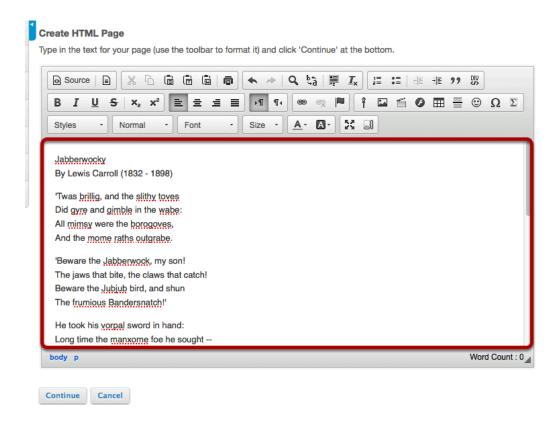

## Click Add, then Create HTML.

To the right of the folder where you want to create the HTML page, from the **Add** drop-down menu, select **Create HTML**.

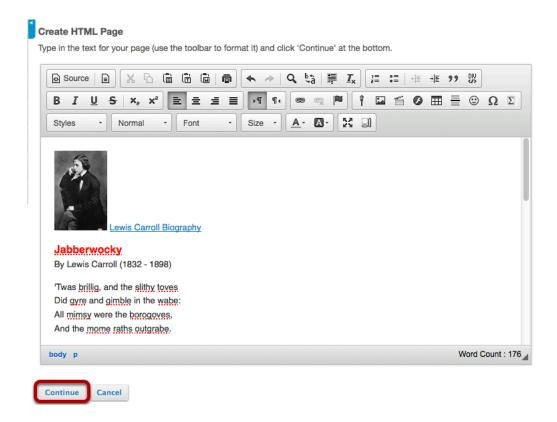

This displays the Create HTML page.

#### Enter document content.

Enter (or paste) the text content of the document into the document.

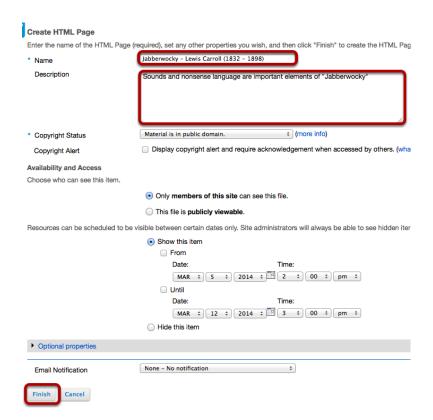

#### Use the Rich Text Editor to format or add links and media.

Use the <u>Rich Text Editor</u> tools to format the text, add images, links or other HTML items to the document.

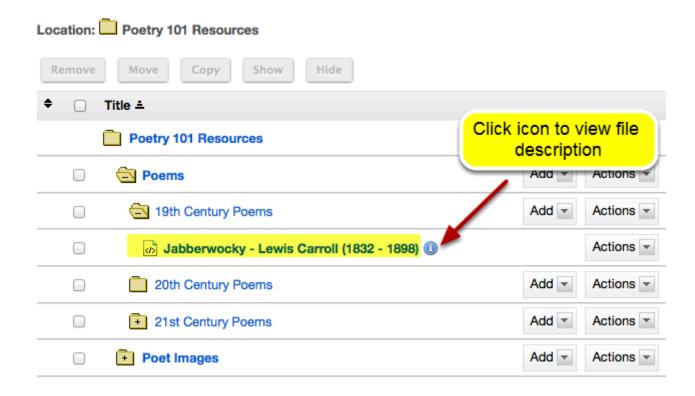

Click **Continue** to save your document when you are finished editing.

### Enter document details.

Enter a Name for the HTML document and any other data as needed, then click Finish.

### View HTML file in Resources.

The HTML page is created and placed in the selected folder.

Note: You may click on the blue Information icon to the right of the file to see the item description.

# How do I create a citation list?

Users can create a citation list for a books, journal articles, manuscripts, newspapers or musical compositions in Resources. Citations can either be added in two ways.

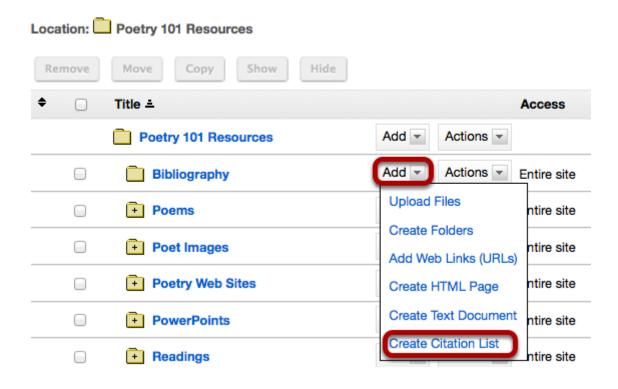

**Method 1**: Import a file in RIS (Research Information Systems) format.

Method 2: Manually create list.

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

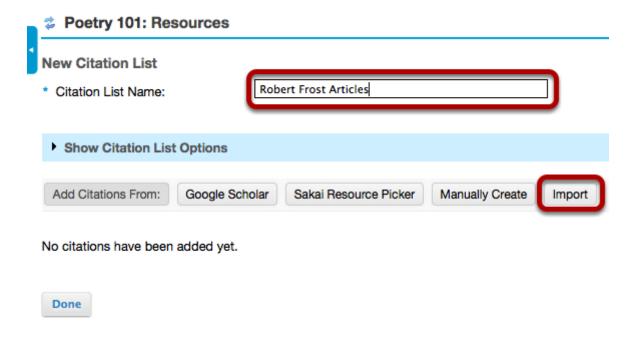

## Method 1: Import RIS file.

To the right of the folder you want to import the RIS citation list, from the **Add** drop-down menu, select **Create Citation List**.

This displays the New Citation List page.

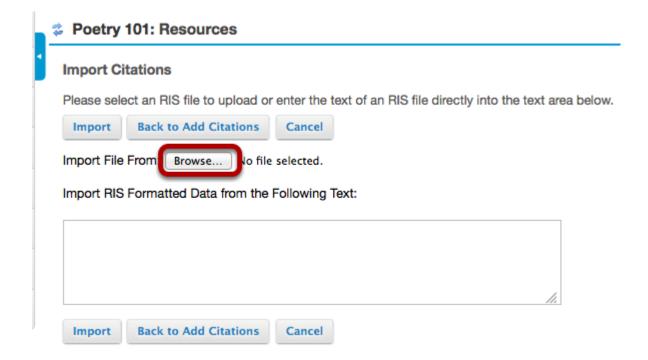

# Enter a name, then Import.

Enter a name for the citation list, then click Import.

This displays the Import Citations page.

#### Click Browse.

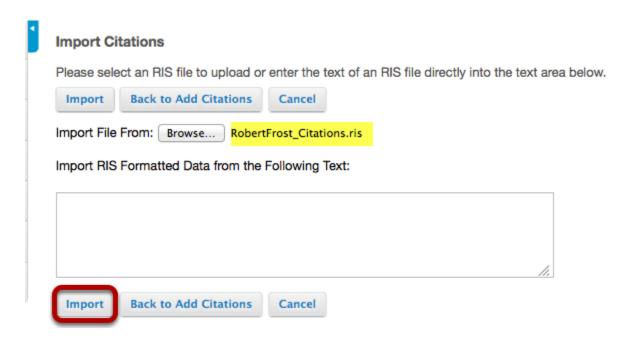

Click **Browse** to locate and select the .ris file on your computer.

Sakai 10 Instructor Guide

This returns the display to the Resources page with the file or folder now moved to the other folder.

# Method 3: Select multiple items, then click Move.

Check the boxes to the left of the files or folders you want to move to select several items at once, then click **Move**.

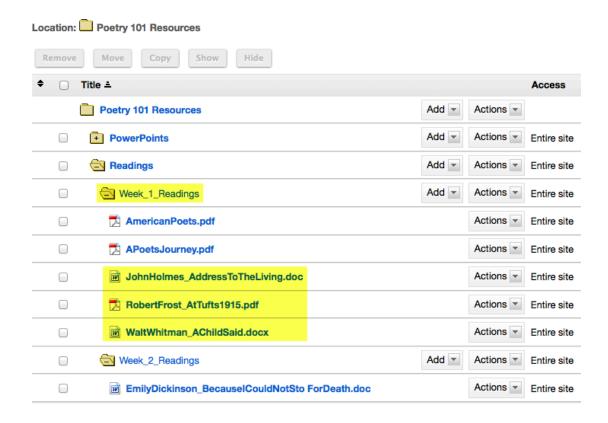

This places the Resource page in a temporary state to facilitate the moving of a file or folder. (Click Reset to cancel)

# Click the clipboard icon.

To the right of the folder you want to move the files or folders to, click the clipboard icon.

#### View moved files in new location.

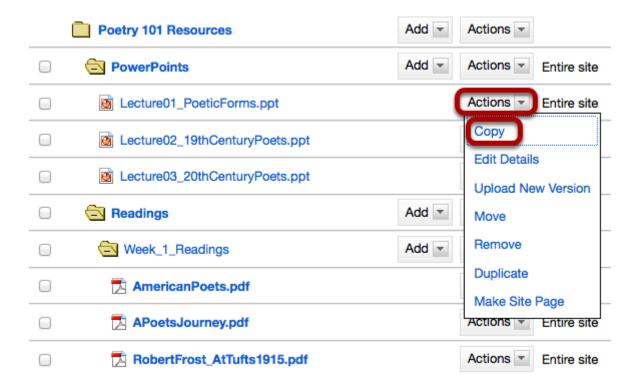

This returns the display to the Resources page with the files or folders now moved to the other folder.

# How do I copy a file or folder within Resources in the same site?

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

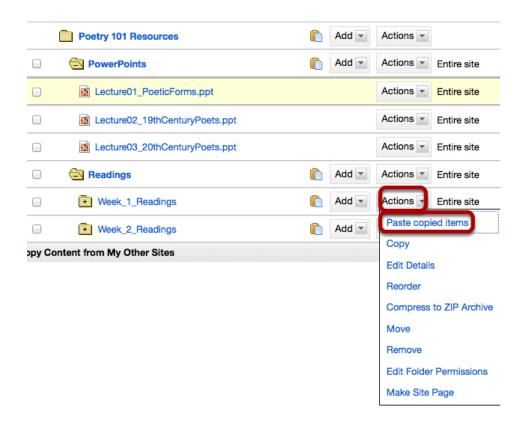

# Method 1: Click Actions, then Copy.

To the right of the file or folder you want to copy, from the **Actions** drop-down menu, select **Copy**.

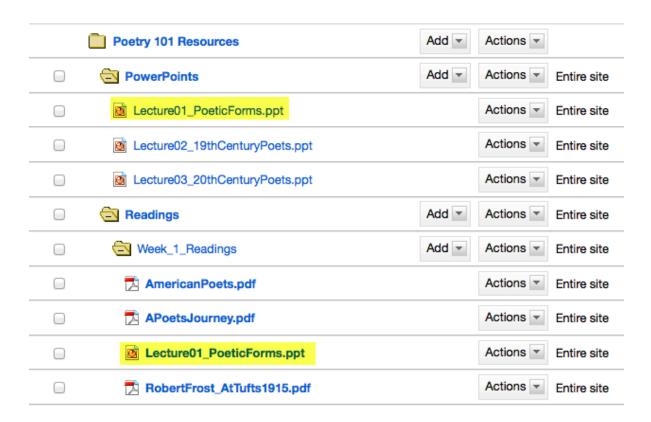

This places the Resource page in a temporary display state to facilitate the copying of a file or folder. (Click Reset to cancel)

## Click Actions, then Paste Copied Items.

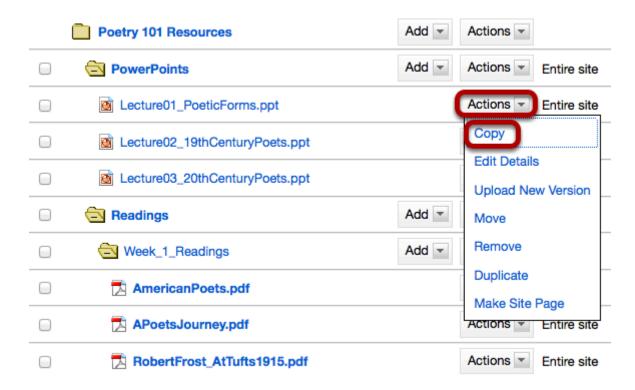

To the right of the folder you want to copy the file or folder to, from the **Actions** drop-down menu, select **Paste Copied Items**.

## View copied item.

This returns the display to the Resources page with a copy of the the file or folder in the other folder.

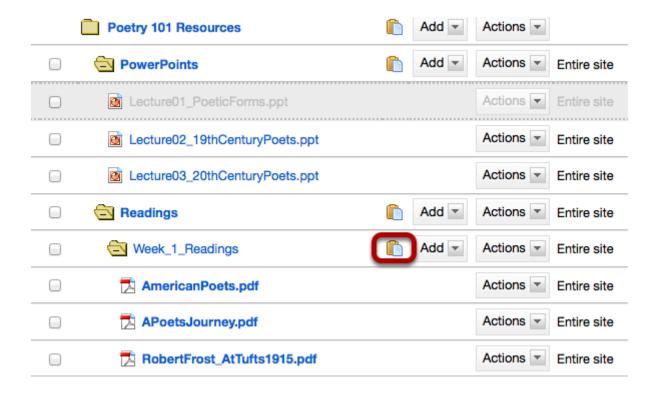

# Method 2: Click Actions, then Copy.

To the right of the file or folder you want to copy, from the **Actions** drop-down menu, select **Copy**.

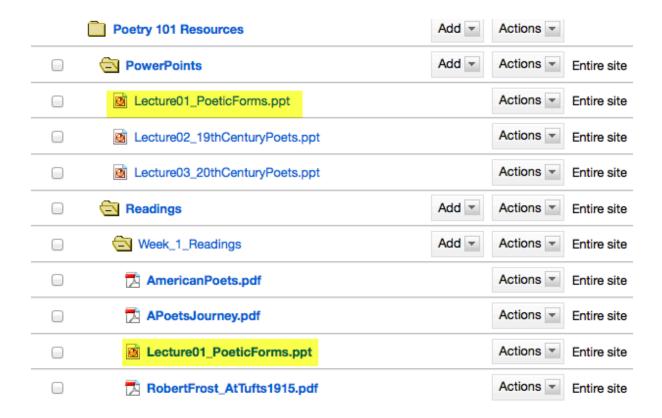

This places the Resource page in a temporary display state to facilitate the copying of a file or folder. (Click Reset to cancel)

## Click the clipboard icon.

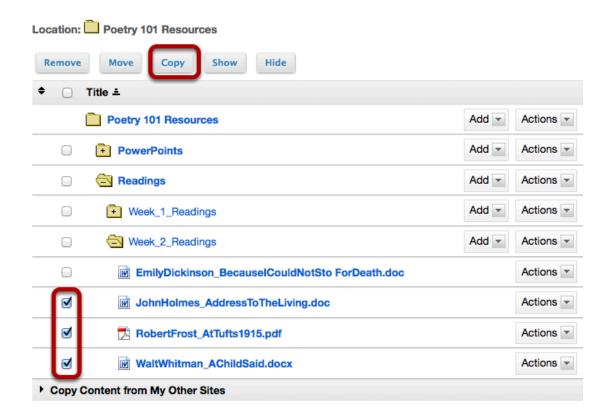

To the right of the folder you want to copy the file or folder to, click the clipboard icon.

## View copied item.

This returns the display to the Resources page with a copy of the file or folder in the other folder.

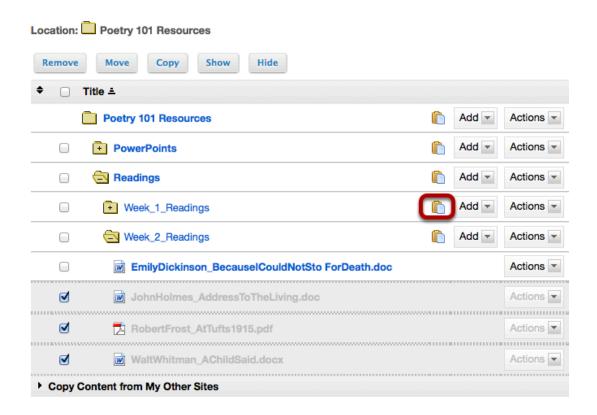

# Method 3: Select several items, then click Copy.

Check the boxes to the left of the files or folders you want to copy, then click **Copy**.

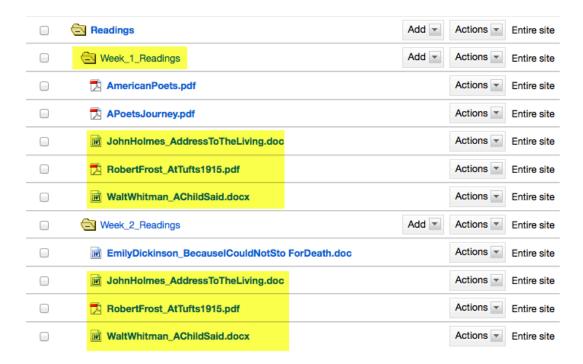

This places the Resource page in a temporary state to facilitate the copying of a file or folder. (Click Reset to cancel)

# Click the clipboard icon.

To the right of the folder you want to copy the file or folder to, click the clipboard icon.

## View copied item.

This returns the display to the Resources page with a copy of the files or folders in the other folder.

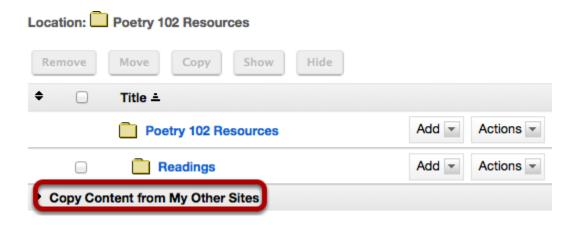

# How do I copy a Resources file or folder from one site to another site?

Instructors can copy a Resource file or folder from on site to another site.

#### Go to Resources.

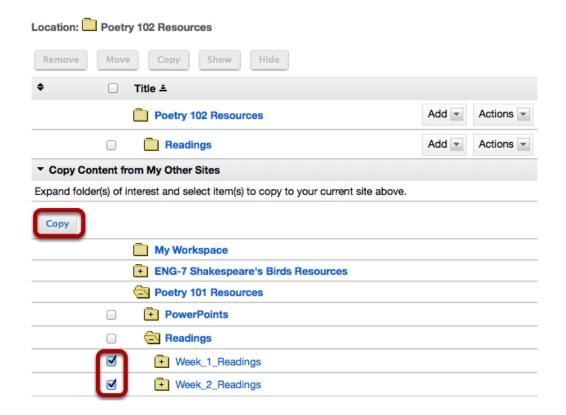

Select the **Resources** tool from the Tool Menu of the destination site.

# **Click Copy Content from My Other Sites.**

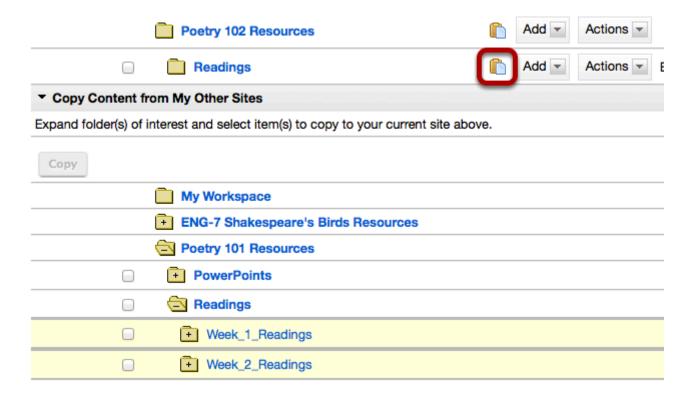

This displays the Resource folders located in your other sites.

# Select the files or folders you would like to copy, then click Copy.

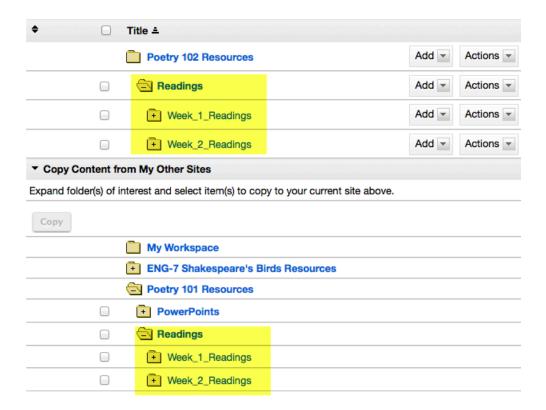

This places the Resources page into a temporary display state to facilitate the copying of files (Click reset to cancel).

# Click the clipboard icon.

To the right of the folder you want to copy the files or folders to, click the clipboard icon.

# View copied files.

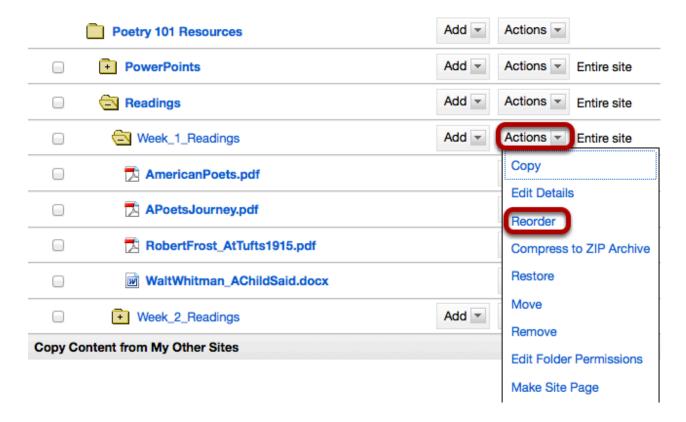

This places a copy of the files or folders into the Resources folder on the other site.

# How do I reorder files or folders within Resources?

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

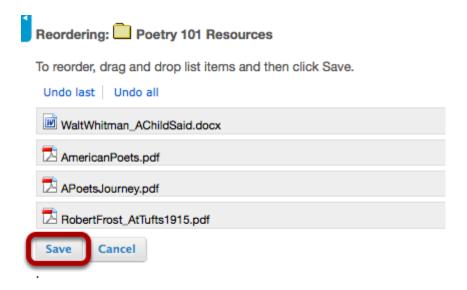

## Files: Click Actions, then Reorder.

To reorder the files in a folder, to the right of the folder, from the **Actions** drop-down menu, select **Reorder**.

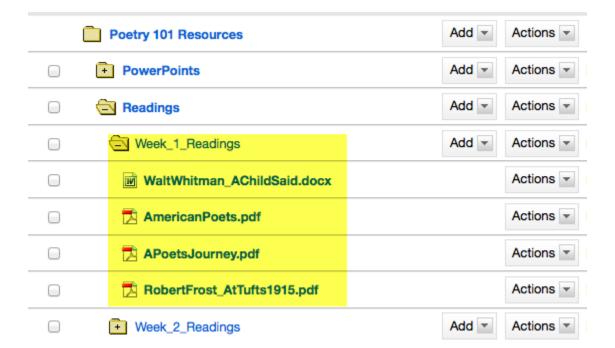

This displays the folder Reordering page.

### Reorder items and Save.

Click and drag the items into the desired order, then click **Save**.

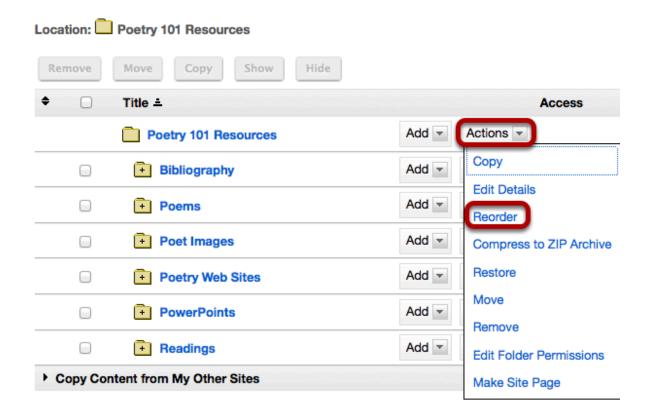

### View reordered items.

This reorders the placement of the files in the folder.

**Page 711** Sakai 10 Instructor Guide

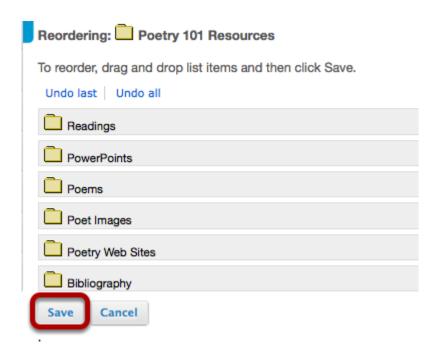

# Folders: Click Actions, then Reorder.

To reorder the folders on a site, to the right of the root folder, from the **Actions** drop-down menu, select **Reorder**.

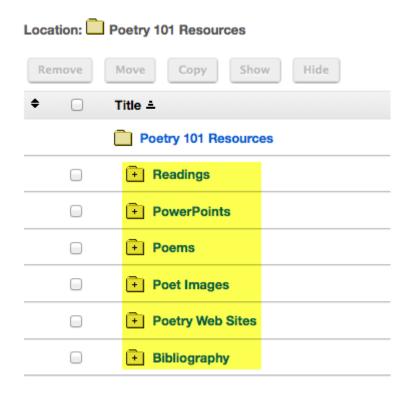

This displays the folder Reordering page.

### Reorder items and Save.

Click and drag the items into the desired order, then click **Save**.

### View reordered items.

This reorders the placement of the folders on the site.

# How do I remove a file or folder in Resources?

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

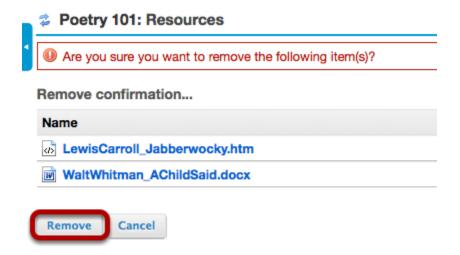

## Method 1: Select the item(s), then click Remove.

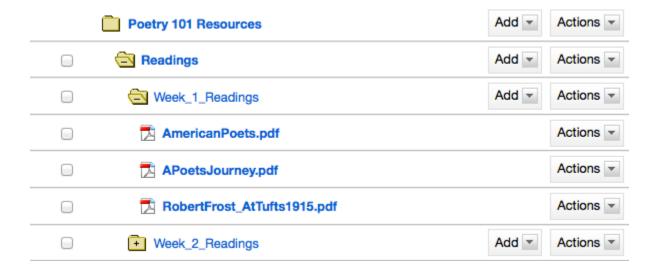

To remove a Resource file or folder select the item(s) by checking the boxes next to each one to be removed, then click **Remove**.

This displays the Remove confirmation page.

## Click Remove again to confirm.

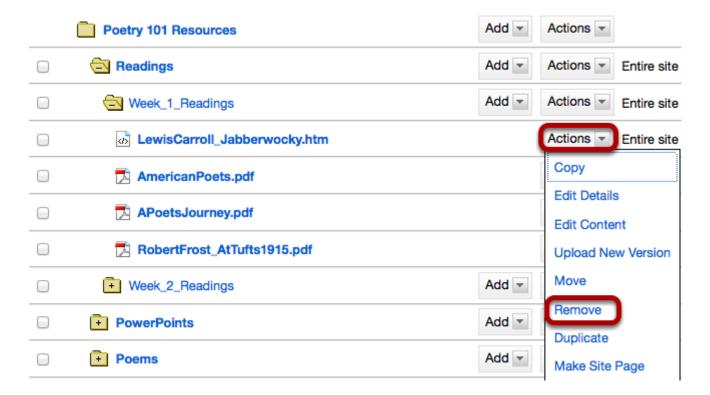

#### Items are removed.

Note: If you remove a folder, all of the items inside the folder are also removed.

Page 729 Sakai 10 Instructor Guide

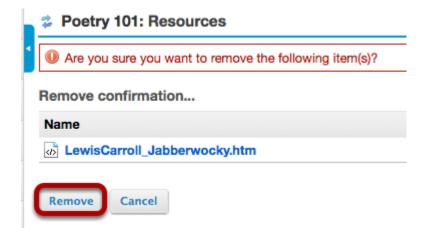

# Method 2: Click Actions,, then Remove.

To the right of the file or folder you want to remove, from the **Actions** drop-down menu, select **Remove**.

This displays the Remove confirmation page.

## Click Remove again to confirm.

#### The Item is removed.

This removes the item from Resources.

Note: If you remove a folder, all of the items inside the folder are also removed.

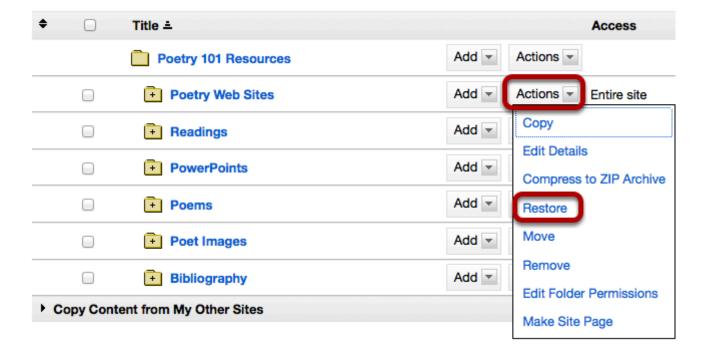

# How do I restore a removed file or folder in Resources?

Users can restore a file or folder they have previously removed from Resources.

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

# Click Actions, then Restore.

To restore a file or folder, to the right of the folder where the item(s) were removed, from the **Actions** drop-down menu, select **Restore**.

This displays the folder's Restoring page.

# Select the items to be restored, then click Restore.

#### Items are restored.

This restores the previously removed items back to the folder.

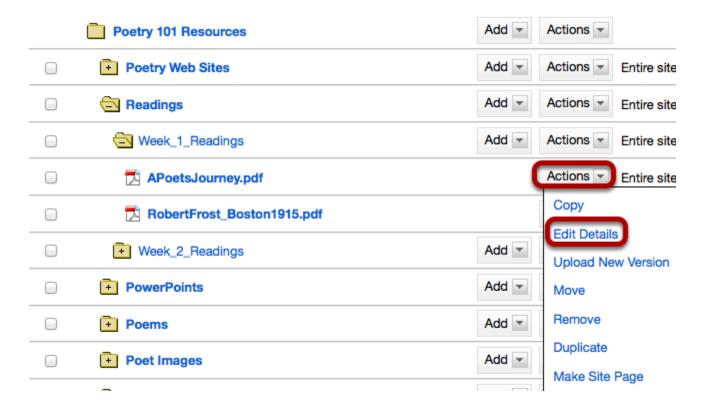

# How do I add and display contextual information about a file or folder?

Users can add a description to files and folders in Resources. Site participants can view these descriptions by clicking on the information icon located to the right of the item.

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

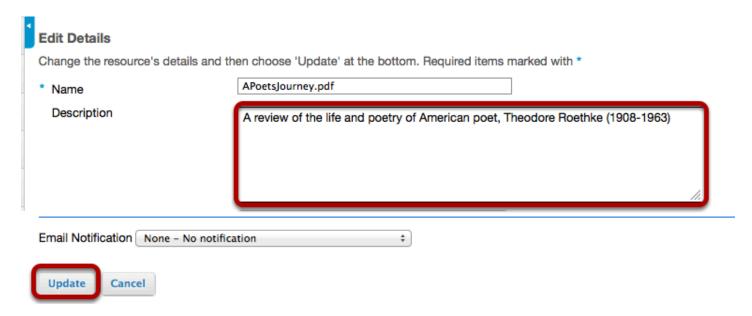

## Click Actions, then Edit Details.

To add contextual information, to the right of the file or folder, from the **Actions** drop-down menu, select **Edit Details**.

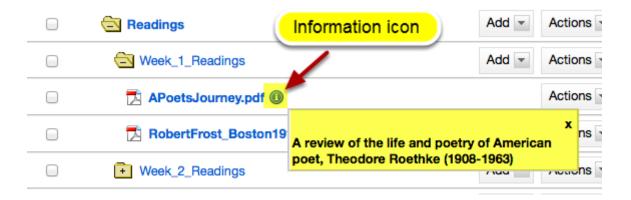

This displays the item's Edit Details page.

# Enter details, then Update.

Enter (or paste) a description of the file or folder in the **Description** box, then click **Update**.

#### View item details.

The description is now available to participants by clicking on the information icon.

# How do I notify site participants that content has been added to Resources?

Site owners can automatically notify participants via the Notifications feature that an item has been added to Resources. When used, site members receive an email containing details of the file or link that has been added to Resources.

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

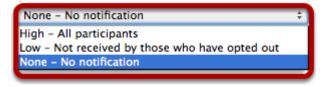

#### Add a content item.

See any of the following articles for more information on adding items to Resources:

- adding a file
- adding a URL
- adding a text document
- adding an HTML page
- adding a citation list

# When adding an item, select High or Low notification.

**Email Notification** 

#### Notes:

- When uploading a file, creating a web link, creating a text file, creating an HTML page or creating a citation, the Email Notification dialog box is displayed before confirming file creation.
- Selecting "High" will result in an email being sent to every site participant
- Selecting "Low" will result in an email being sent to only those participants that have not opted out of "Low" level notifications in their workspace Preferences.

# How do I obtain the URL for a file or folder in Resources?

Each file and folder in Resources has its own URL. Instructors can create links to folders or files in the Syllabus tool, Announcements tool or send an email to students containing the link.

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

## Click Actions, then Edit Details.

To obtain a file or folder's URL, to the right of the file or folder, from the **Actions** drop-down menu, select **Edit Details**.

This displays the Edit Details page for the item.

# Copy the URL.

Under Web Address (URL) section, copy the item's URL.

# **Copy short URL. (Optional)**

An alternative is to select **Short URL** check box and then copy a shortened version of the URL.

# How do I make a link to a Resources folder appear in the Tool Menu?

Instructors can create a link to a Resource folder and have that link appear as a button in the Tool Menu.

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

# Click Actions, then Make Site Page.

To create a link to a Resources folder, to the right of the folder, from the **Actions** drop-down menu, select **Make Site Page**.

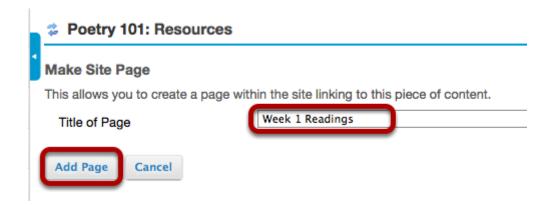

This displays the Make Site page.

Sakai 10 Instructor Guide

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# How do I create a group folder in Resources?

Instructors can create group folders in Resources that are only displayed to students assigned to that group. Instructors must first create the site groups. (See How do I create groups?)

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

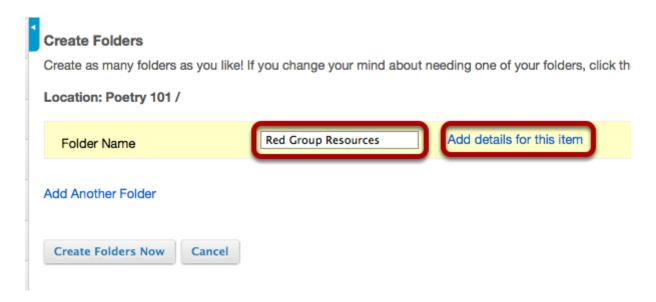

## Click Add, then Create Folders.

To create a Group folder, to the right of the root folder, from the **Add** drop-down menu, select Create Folders.

This displays the Create Folders page.

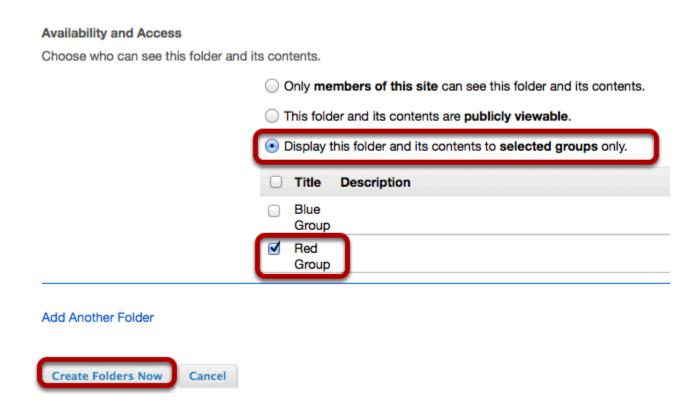

#### Enter name and add details.

Enter a name for the folder, then click **Add details for this item**.

This exposes the folder's detail properties.

# Enter item details, then create folder.

Sakai 10 Instructor Guide **Page 742**  Under **Availability and Access**, select **Display folder to Group**, select the group name, then click **Create Folders Now**.

# View group folder.

This creates a folder that is only displayed to members of the selected group.

#### Notes:

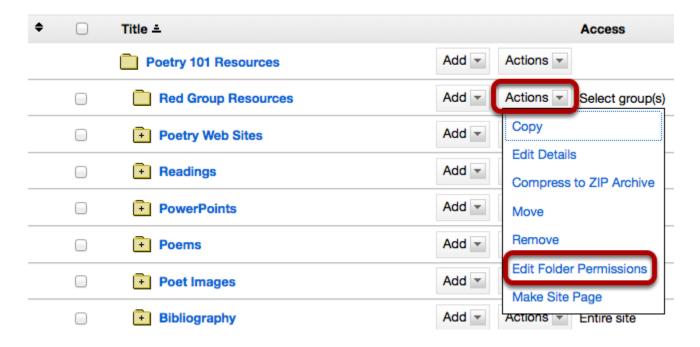

- Instructors and site managers can see and access all group folders.
- Students that are not a member of the group will not have the folder displayed in their Resources

# How do I allow group members to upload content to a group Resources folder?

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

## Click Actions, then Edit Folder Permissions.

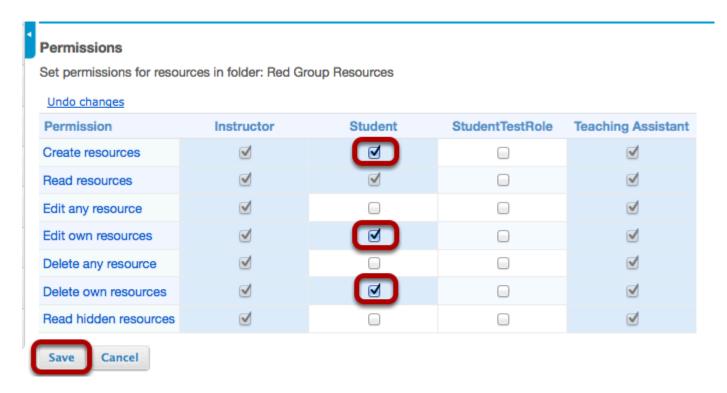

To grant uploading permission to group members, to the right of the group folder, from the **Actions** drop-down menu, select **Edit Folder Permissions**.

This displays the folder permissions dialog box.

Note: You will need to <u>make the folder a group folder</u> in order to limit uploading permissions to a single group.

# Modify student permissions and then Save.

In the student column, select **Create resources**, **Edit own resources** and **Delete own resources**, then click **Save**.

# Group members may now add and edit items.

This allows the students that are members of the group to upload and edit content in the group folder.

Students that are members of the group will have an "Add" and "Actions" button displayed in their view of the group folder.

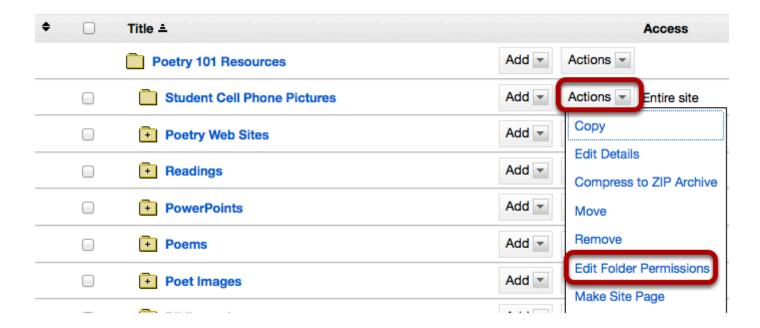

# How do I allow all students to upload content to a selected folder?

Instructors can allow all students to upload and edit file to a selected folder in Resources. Instructors must first create the folder. (See <u>How do I create folders?</u>)

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

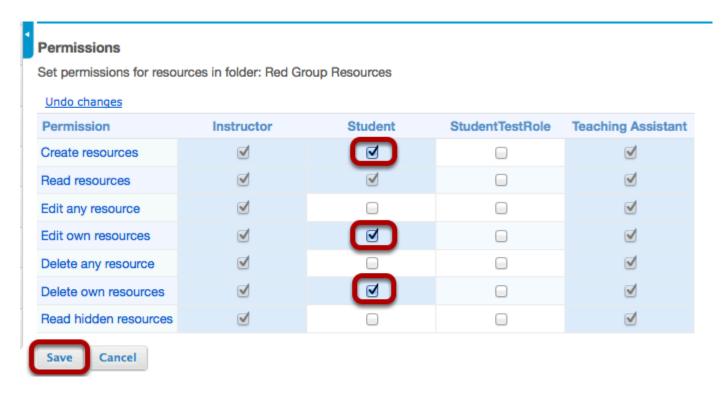

# Click Actions, then Edit Folder Permissions.

To grant uploading permission to all students, to the right of the folder, from the **Actions** drop-down menu, select **Edit Folder Permissions**.

This displays the folder permissions dialog box.

# Modify student permissions, then Save.

In the student column, select **Create resources**, **Edit own resources** and **Delete own resources**, then click **Save**.

# Students may now upload and edit items within the folder.

This allows the students to upload and edit content in the selected folder.

Students will have an "Add" and "Actions" button displayed in their view of the folder.

Sakai 10 Instructor Guide

# How do I make a file or folder publicly viewable?

Site owners can make a file or folder publicly viewable. This means that the file or folder can be viewed by anyone with the file or folder's URL. Some institutions also have a "Search Public Course and Project Sites" button on their gateway page that will allow publicly available files and folders to be searched and viewed.

#### Go to Resources.

Select the **Resources** tool from the Tool Menu of your site.

## Click Actions, then Edit Details.

To make a file or folder publicly viewable, to the right of the file or folder, from the **Actions** drop-down menu, seelct **Edit Details**.

This displays the Edit Details page for the item.

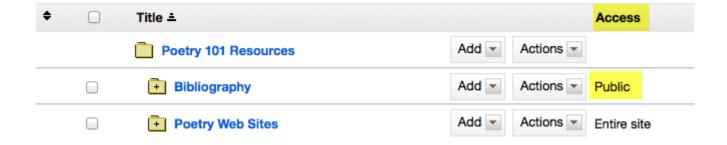

# Make item public, then Update.

# Availability and Access Choose who can see this folder and its contents. Only members of this site can see this folder and its contents. This folder and its contents are publicly viewable. Display this folder and its contents to selected groups only.

Under **Availability and Access**, select the radio button for **This folder and its contents are publicly viewable**, then click **Update**.

Note: This can be done with files as well.

# The Resources item is designated as Public.

Sakai 10 Instructor Guide

Page 749

# What is the Resources quota?

Each site's Resources has a quota. That is, the limit to the amount of Resource storage space (in megabytes MB or gigabytes GB) allowed by the institution. Users can see how much storage space is currently being used in Resources and view the allowed quota.

#### Go to Resources.

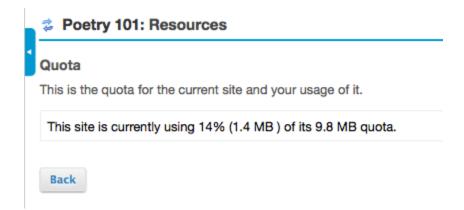

Select the **Resources** tool from the Tool Menu of your site.

## **Click Check Quota.**

This displays the Resources Quota page.

# Quota is displayed.

The amount of storage space currently being used and the site's quota will be displayed.

# How do I upload or download multiple resources?

Users can upload/download multiple resources using the WebDAV protocol. WebDAV allows users to transfer files and folders from their local computer to and from their site Resources.

WebDAV stands for "Web-based Distributed Authoring and Versioning". It is a set of extensions to the HTTP protocol that allows users to collaboratively edit and manage files on remote web servers.

Once users have set up WebDAV for a particular site Resources, their computer will treat the Resources like any other folder on their local system. Users are able to drag and drop files and folders from Resources just as they would in "My Computer" in Windows, or the "Finder" on a Mac.

For Windows, users can download AnyClient for WebDAV connections, or set up a connection using the native Windows WebDAV support.

Mac OS X 10.4 (Tiger) and newer supports secure WebDAV connections in the Finder. Mac users can also use Cyberduck or AnyClient.

Depending on your specific operating system version, you may find one method performs better than another.

Note: You may also upload multiple files using the <u>drag and drop feature</u> in Resources.

#### Go to Resources.

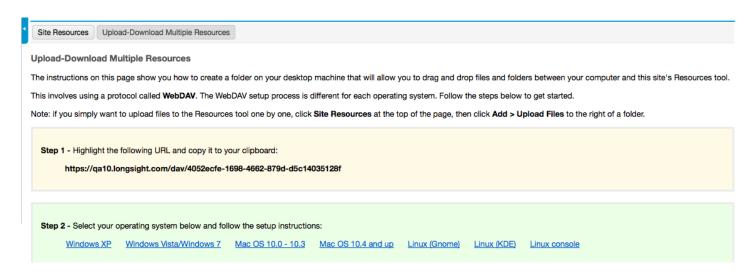

Select the **Resources** tool from the Tool Menu of your site.

# **Click Upload-Download Multiple Resources.**

To locate directions for setting up WebDAV on your computer, click **Upload / Download Multiple Resources**.

# WebDAV instructions will display.

This displays links to directions for setting up WebDAV for your computer's operating system. Locate your operating system in the list of supported systems shown, and follow the instructions provided for setting up WebDAV on your computer.

# **Rich Text Editor**

# What is the Rich Text Editor?

In most areas of the system where text can be entered, you can control the appearance of your text using the rich-text editor, sometimes called a WYSIWYG (What You See Is What You Get) editor. The rich-text toolbar has icons for editing and formatting your text. You may use the rich text editor to include images, links, audio and video as well as text.

Note: Pasting text into the rich-text editor should preserve most formatting, but some types of formatting, such as colored text, may need to be added manually in the editor after pasting.

The rich-text editor is based on an open-source application called CKEditor. For more information on the CKEditor, you may also refer to the <u>CKEditor 4 Documentation Site</u>.

Also, please refer to <u>Rich Text Editor Accessibility Guidelines</u> for more information on creating accessible content using the CKEditor.

#### **Rich Text Editor Toolbar**

The Rich Text Editor toolbar contains an array of icons. See What actions can I perform using the Rich Text Editor icons? for more information in individual icon functionality.

Note: Some configurations may not have all of the above tools and some may have additional tools.

# What actions can I perform using the Rich Text Editor icons?

Note: Depending on your implementation, you may have more icons or fewer icons available to you in the Rick Text Editor. There are several third party tools which integrate with the editor and display as additional icons in the editing toolbar (e.g. equation editors, video management applications, etc.). Also, some institutions hide seldom-used icons to make the appearance of the editing toolbar more compact.

# Standard Rich Text Editor icons allow the following features:

# Source

View or edit the document source code (for advanced users).

## **Templates**

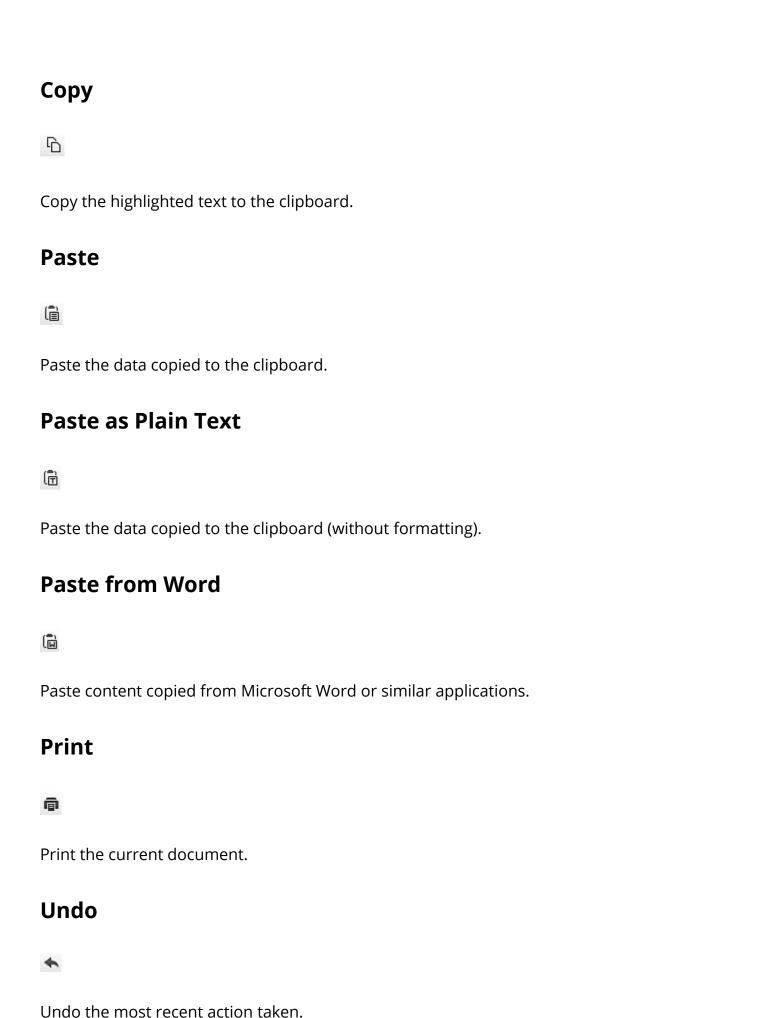

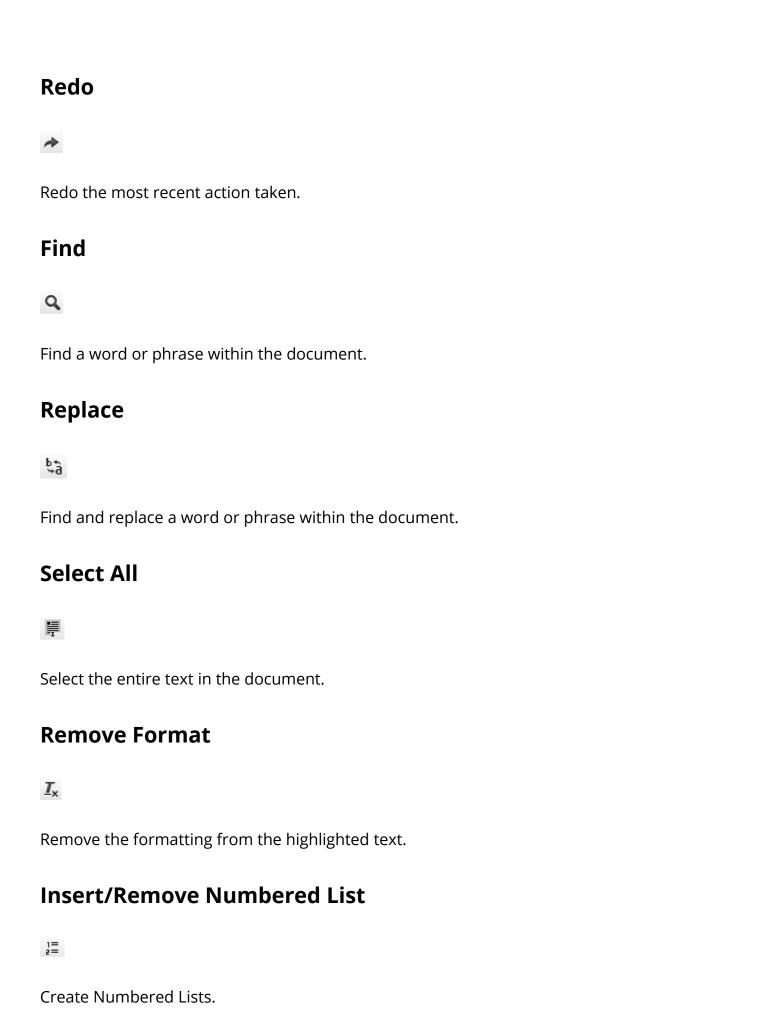

Select a layout template.

#### Cut

Cut the highlighted text to the clipboard.

## **Insert/Remove Bulleted List** •= Create Bulleted Lists. **Decrease Indent** ÷∥≣ Decrease the paragraph indent. **Increase Indent** #:|≣ Increase the paragraph indent. **Block** 99 Format a block of text to identify quotations. **Create DIV Container** DIV Creates a container to apply formatting beyond one block of text.

Bold

В

Applies Bold formatting to highlighted text.

## Italic I Applies Italic formatting to highlighted text. **Underline** U Applies Underline formatting to highlighted text. **Strike Through** S Applies Strike Through formatting to highlighted text. **Subscript** X Subscript the highlighted text. **Superscript** ×2 Superscript the highlighted text. ## **Unlink** Ę Remove hyperlink. **Anchor** Inserts or modifies a link anchor. **Record Audio Clip** Ŷ Create and display a voice recording. **Image** å Inserts images into the document. **Insert/Edit Movie** -Inserts a movie/audio player. Flash

Inserts a Adobe Flash element into the page.

#### **Table**

Creates a table with the defined number of columns and rows.

#### **Insert Horizontal Line**

Inserts a divider line (horizontal rule).

## **Smiley**

Inserts an emoticons image (smiley faces, email icon, light bulb, etc.).

## **Insert Special Character**

Inserts symbols & special characters (accented characters, trademark, currency symbol, etc.).

#### Add MathML Formula

Creates mathematical symbols using MathML language.

## **Styles**

Applies special styles to a block of text.

#### **Format**

Applies paragraph formatting to a block of text.

#### **Font**

Applies a specific font to a block of text.

#### Size

Applies a specific size to a block of text.

### **Text Color**

Changes the color of the text.

## **Background Color**

Changes the background color of the text.

#### **Maximize**

Maximizes the editor size inside the browser.

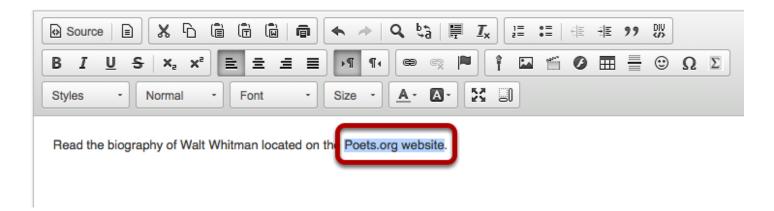

## **Show Blocks**

Shows where there are block elements boundaries in the text.

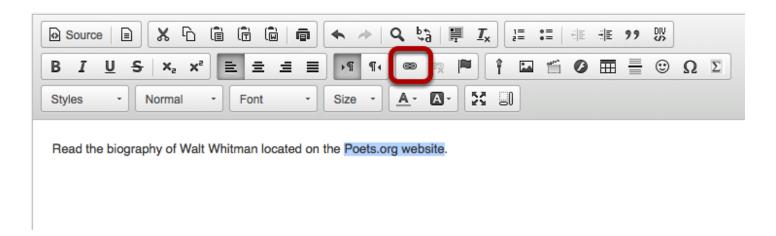

# How do I create a link to a web site in a text box?

#### Select the text.

In the text box, select the text you would like to serve as a link to a web site.

#### Click the Link icon.

This displays the Link dialog box.

## **Enter the URL.**

Enter or paste (CTRL-V - PC or COMMAND-V - MAC) the URL for the web page in the box marked URL.

#### Click OK.

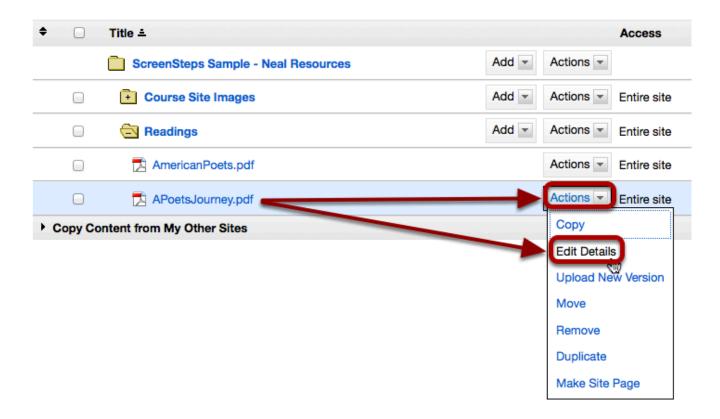

The selected text will display as an underlined link to the web site.

## How do I create a link to a Resources item in a text box?

#### Go to Resources.

Select the **Resources** tool from the Tool Menu in your site.

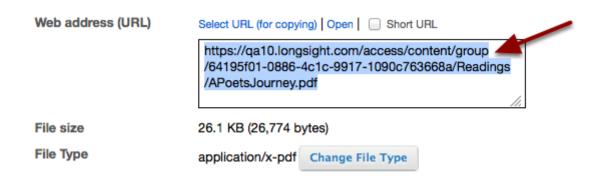

#### Click Actions, then Edit Details for the item.

Locate the item you want to link to in Resources and from the **Actions** drop-down menu, select **Edit Details**.

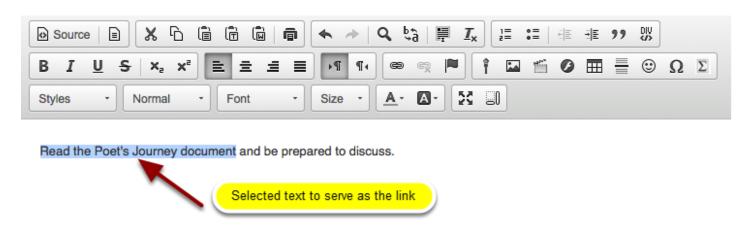

This displays the Edit Details page.

### Copy the item URL.

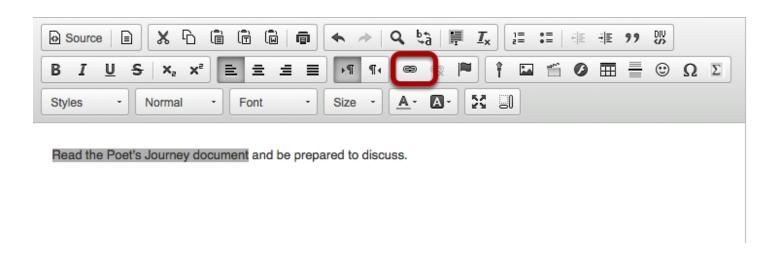

Copy the item URL to your computer's clipboard (CTR-C -PC or COMMAND-C - MAC).

## Go to the Rich Text Editor and select your text.

In the text box, select the text you would like to serve as a link to the folder or file.

#### Click the Link icon.

#### **Click Browse Server.**

This displays the Entity Picker. If you have any Forums, Assignments or Test & Quizzes posted, they will be displayed in the Entity Picker.

## Select the activity you want to link to.

This returns the display to the Link Properties dialog box with the URL of the activity listed in the URL box.

## Click OK.

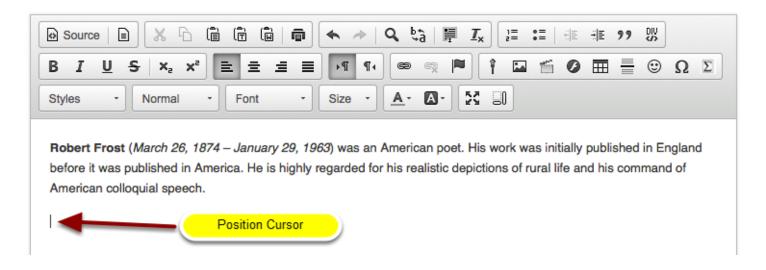

Message

After class, there will be an online discussion of Emily Dickinson's poem "Because I Could not Stop for Death"

When the item using the text box is posted, the selected text will display as a link to the activity.

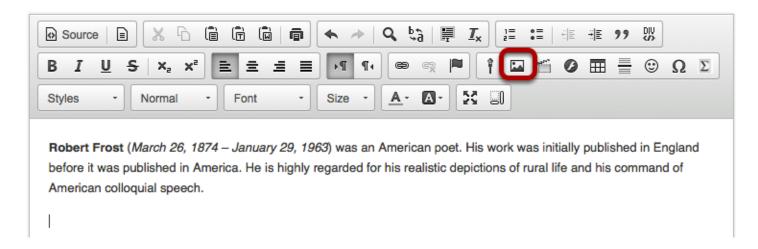

## How do I embed an image in a text box?

#### Position the cursor.

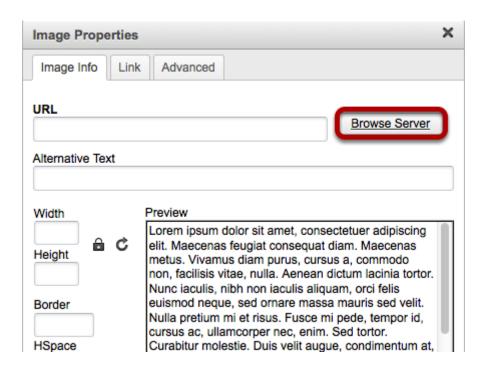

Position your cursor in the text box at the point you want to embed the image.

## Click on the Insert/Edit Image icon.

This displays the image properties dialog box

#### **Click Browse Server.**

This displays the entity picker. Your site Resource folders should be displayed

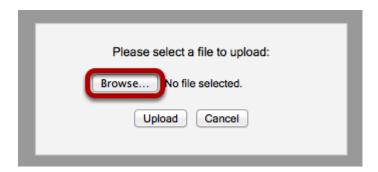

## Upload the image file.

Hover your cursor over the folder where you want to store the image file then click on **Upload File**.

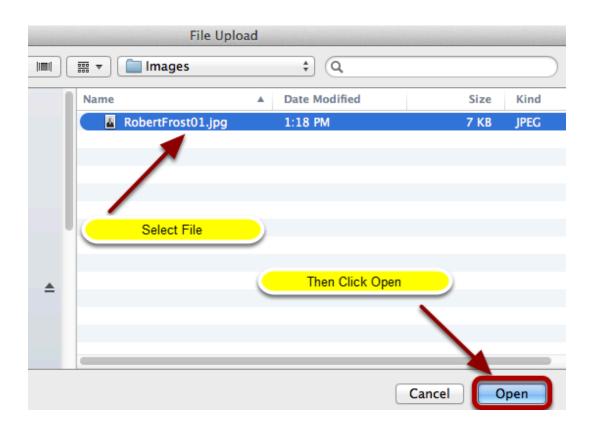

This displays an upload file dialog box.

#### **Click Browse**

This displays your computer's file locator.

## Locate and select the image file on your computer, then click Open

This will return the display to the upload file dialog box.

## **Click Upload**

This returns the display to the entity picker.

## Select the image to be embedded.

Click on the Plus Sign (+) to the left of the folder to expand the folder contents, and then select the image you want to embed in the text box.

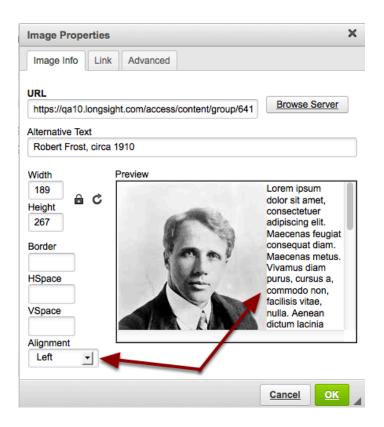

Your will be returned to the image properties dialog box with a preview of the embedded image.

## Modify image properties.

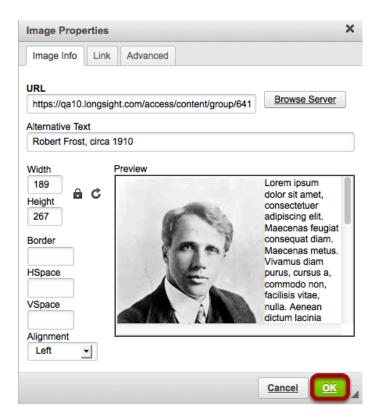

Adjust the image width and height if needed and add an alternative text for screen readers.

## Set the Alignment.

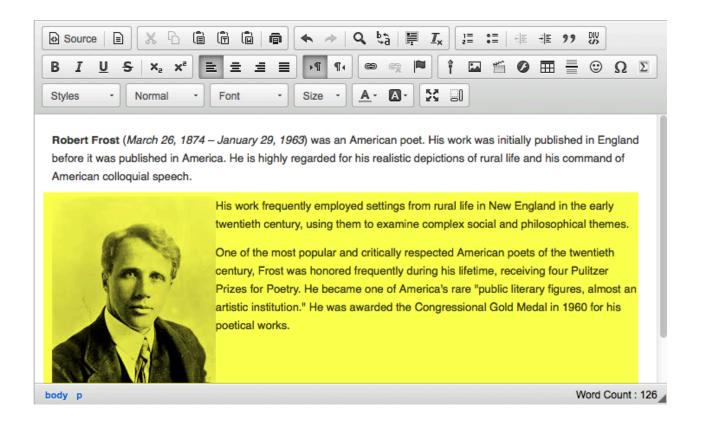

Set the Alignment (left or right) for the image if you want to surround the image with text.

#### Click OK.

This returns the display to the text box with the embedded image.

## Example of additional text displayed next to a left-aligned image.

## How do I embed a linked web image in a text box?

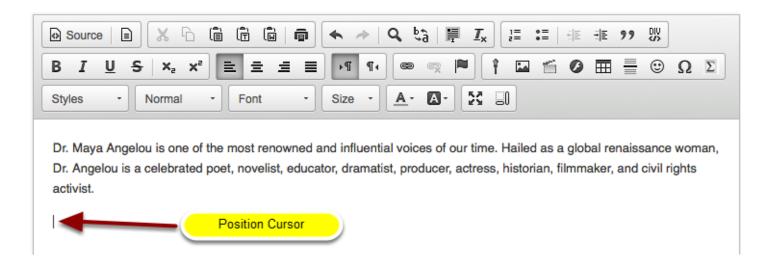

## Locate and copy the image link.

Locate the image on the web that you want to embed.

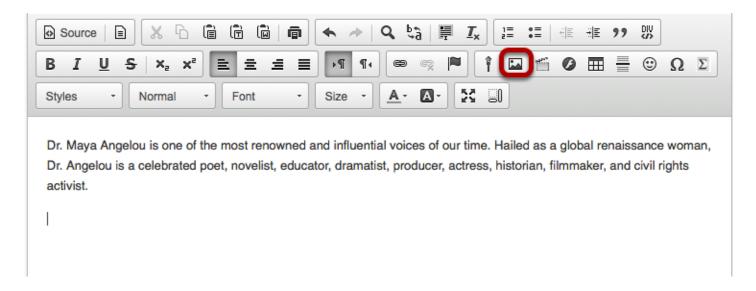

Right-Click the Image (PC) or CTRL-Click (MAC) the image and copy the image URL to your computer's clipboard (CTRL-C -PC or COMMAND-C - MAC).

#### Position the cursor.

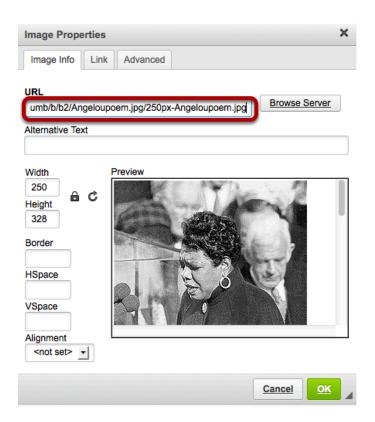

Position your cursor in the text box at the point you want to embed the web linked image.

## Click Insert/Edit Image icon.

This displays the Image Properties dialog box.

## Paste the URL.

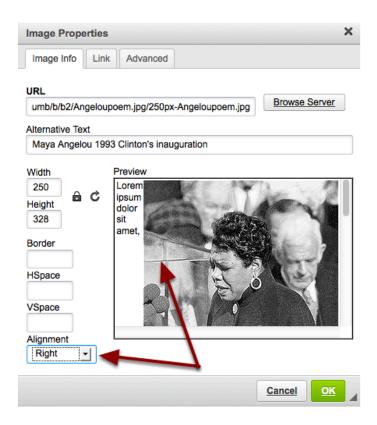

Paste the copied URL into the box marked **URL**. (Use CTRL-V - PC or COMMAND-V - MAC to paste.)

## **Modify image properties.**

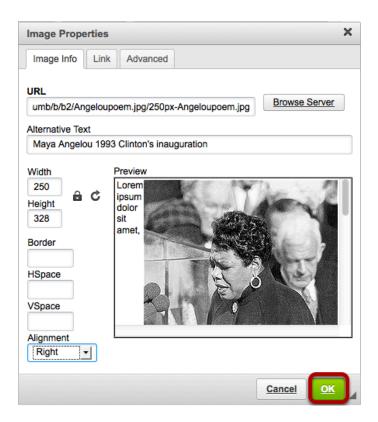

Adjust the image width and height if needed and add an alternative text for screen readers.

## **Set alignment. (Optional)**

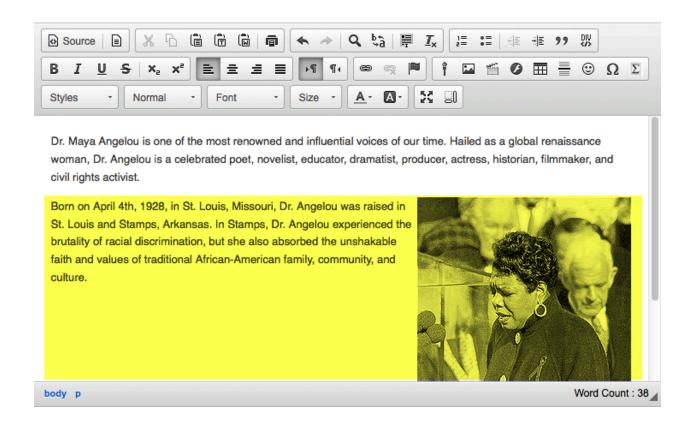

If you want to surround the image with text, set the Alignment (left or right) for the image.

#### **Click OK**

This returns the display to the text box with the embedded linked image.

## Example of additional text displayed next to a right-aligned image.

### Click Source again.

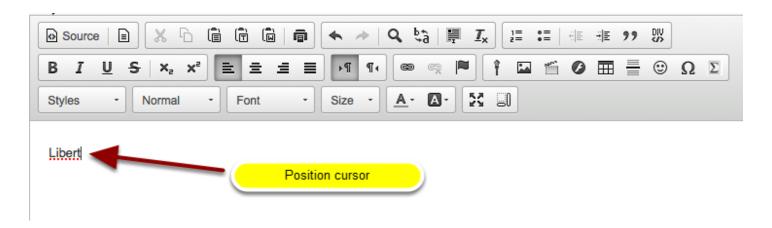

View this YouTube video of Robert Frost reciting his poem "Stopping by Woods on a Snowy Evening

This returns the text box display to normal editing mode. The embedded YouTube video will display as a box marked "iframe". When the item using the text box is posted, it displays the embedded YouTube video.

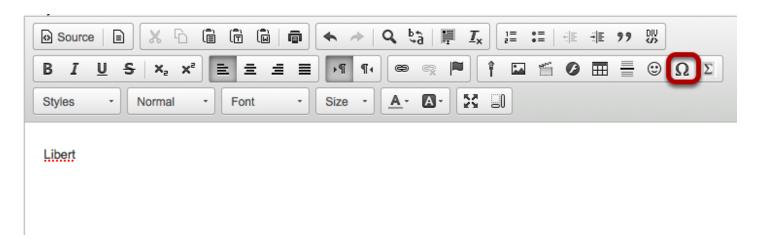

# How do I add special characters to a text box?

### Position the cursor.

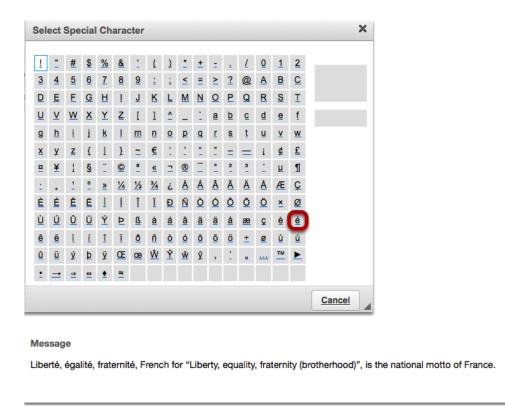

Position your cursor where you want to insert the special character or diacritical mark.

### Click the Insert Special Characters icon.

This displays the Select Special Character box.

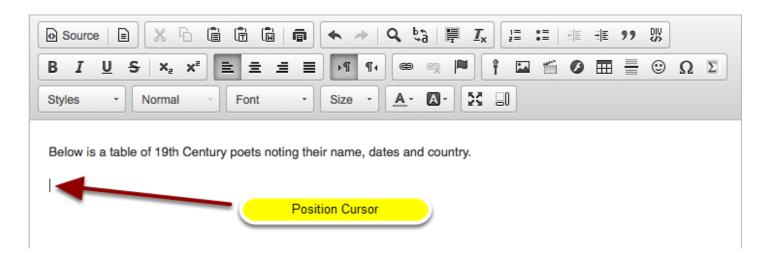

## Select the special character or diacritical mark you want to insert.

This displays the special character / diacritical mark in the text box.

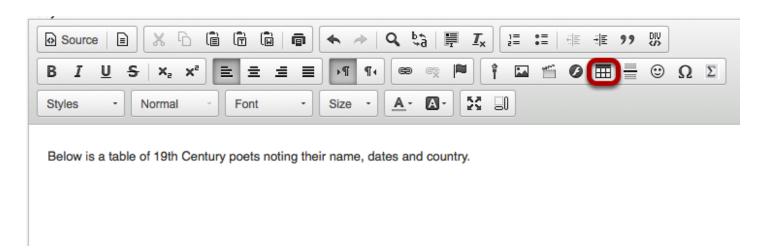

### How do I add/edit a table in a text box?

### Position the cursor.

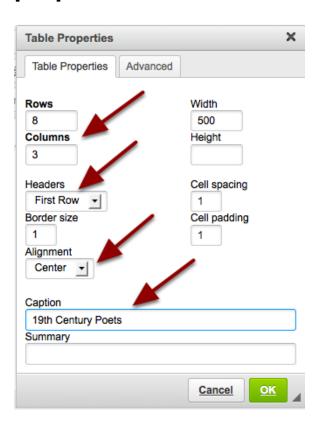

Position your cursor in the text box where you want the table to display.

### Click Table icon.

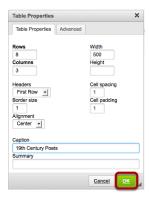

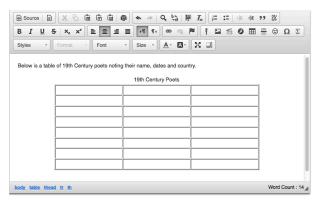

This displays the Table Properties dialogue box.

# Set the number of Rows, Columns and any other table properties needed.

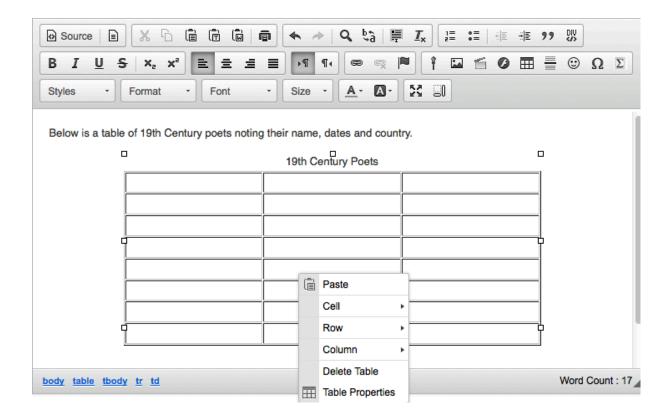

### Click OK.

This displays the table in the text box.

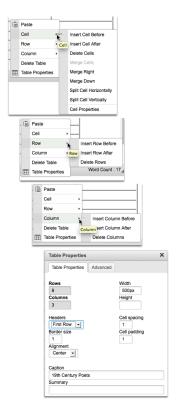

### Edit the table properties.

To edit the table properties, right-click (CTRL-click - MAC) on the table.

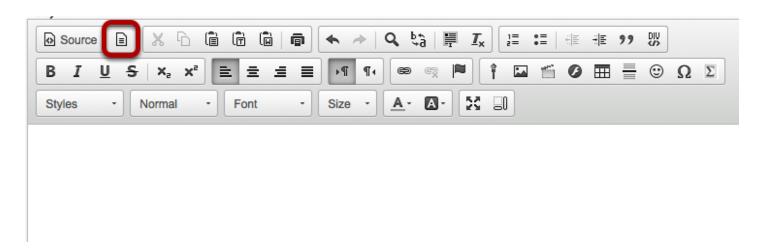

This displays the Edit Table dialog box.

## Select the Table Element that you want to edit (Cell, Row, Column, Table or Delete).

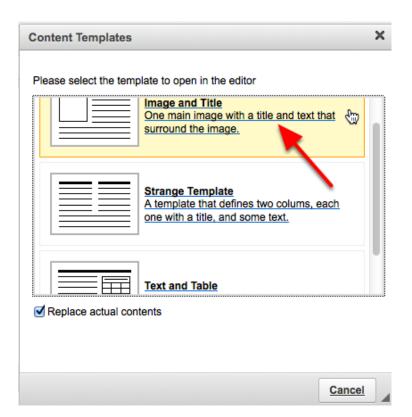

# How do I add a content template to a text box?

### Click the Template icon.

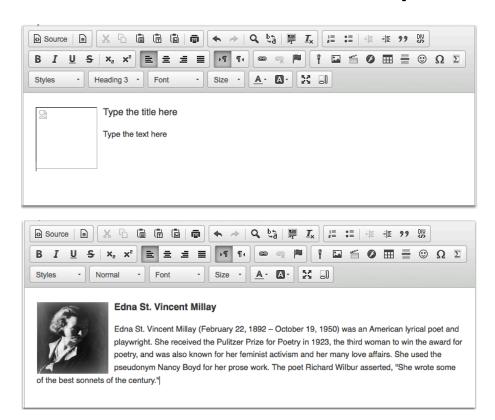

This displays the Content Template dialog box.

### Select the content template.

This displays the selected content template in the text box.

### Add content to the content template.

#### Example:

Type in the title and text.

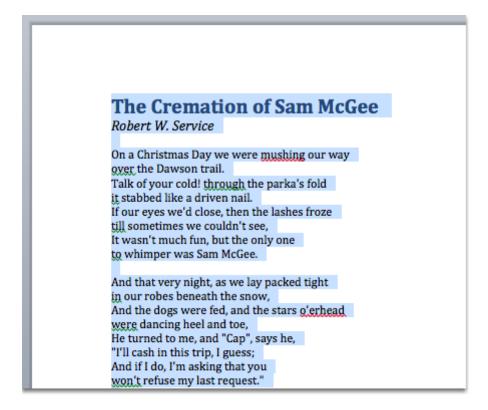

To insert an image:

- Right-Click (CTRL-Click MAC) the image and select Image properties.
- Enter the URL of the image in the box marked URL.
- Click OK

# How do I paste text from a Microsoft Word document to a text box?

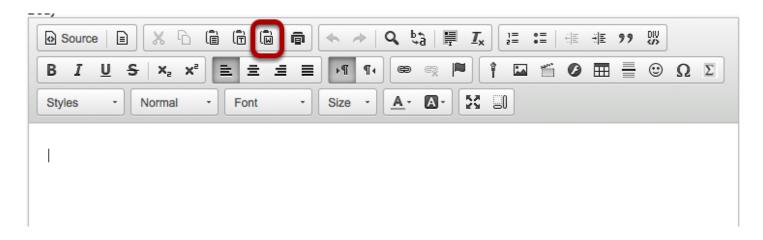

Note: In the most recent version of the Rich Text Editor, Word-specific tags are removed automatically when copied text is pasted into the editor.

### Copy the text from Word.

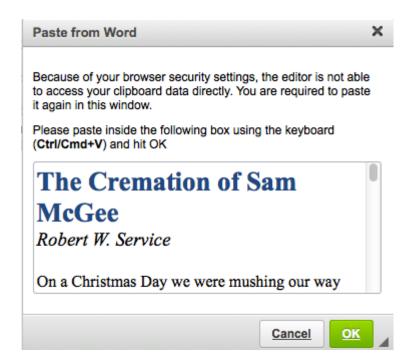

Copy the text in your MS Word document to your computer's clipboard (CTRL-C - PC or COMMAND-C - MAC).

### In the Rich Text Editor, click the Paste From Word icon.

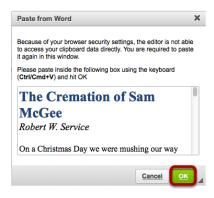

This displays the Paste From Word dialog box.

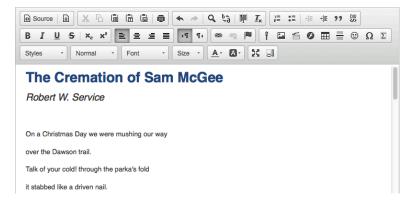

#### Paste the text.

Paste (CTRL-V -PC or COMMAND-V - MAC) the Word Document text into the Paste From Word dialog box.

### Click OK.

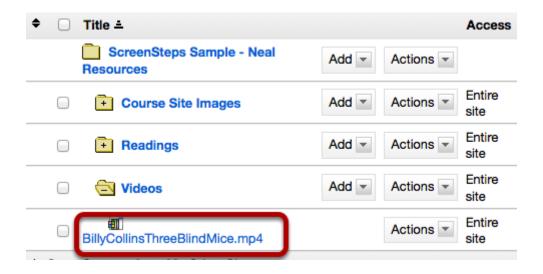

This displays the MS Word text in the text box.

## How do I embed an mp4 video in a text box?

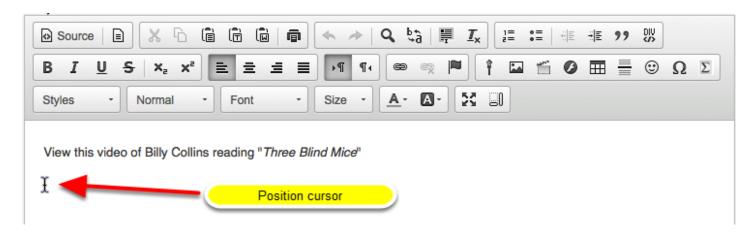

MP4 videos can embed in a text box using the **Rich Text Editor**. Other file types that can be embedded in a text box are .FLA, .F4V, .3GPP, .M4V or .MOV files.

### Upload your mp4 video file to a folder in Resources.

See How do I upload files? for more information on uploading.

## In the text box, position your cursor where you want to embed the mp4 video.

Sakai 10 Instructor Guide

### Click the Insert/Edit Movie icon.

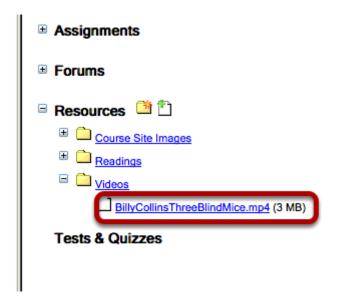

This displays the Movie Properties dialog box.

### **Click Browse Server.**

This displays the Entity Picker dialog box.

## Locate and select the mp4 video file that you want to embed in the text box.

This returns the display to the Movie Properties box with the URL for the video in the URL box.

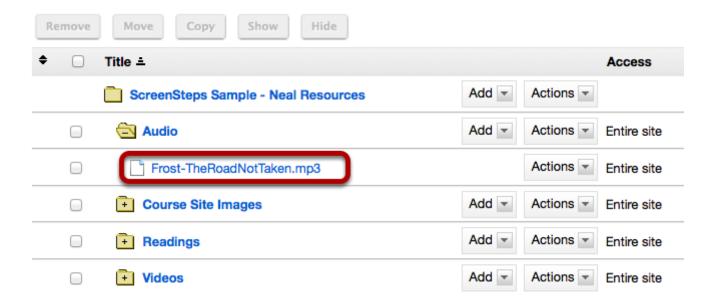

### Click OK.

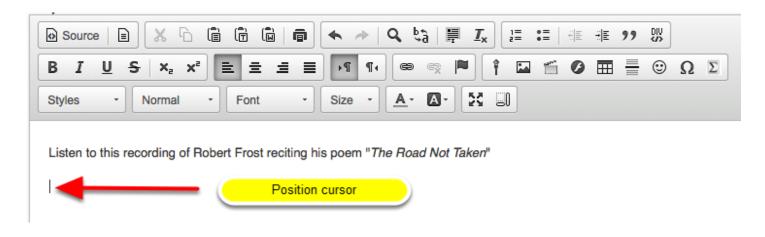

## How do I embed an mp3 audio in a text box?

### Upload the mp3 file to Resources.

See <u>How do I upload files?</u> for more information on uploading.

## In the text box, position your cursor where you want to embed the mp3 audio file.

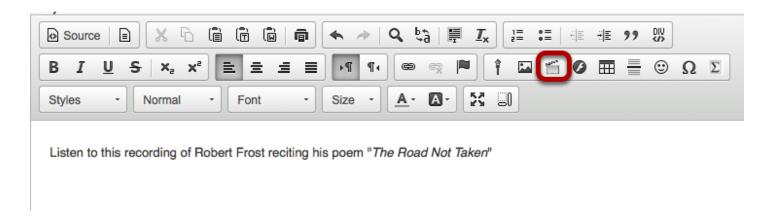

Sakai 10 Instructor Guide

Page 810

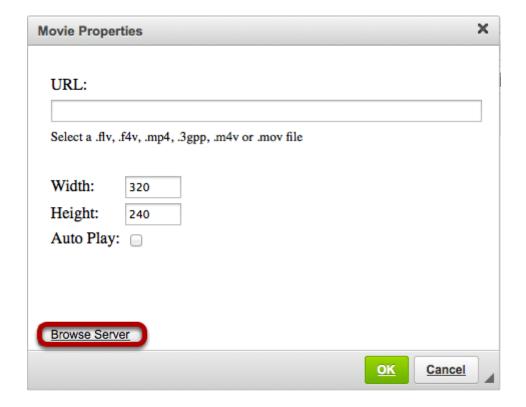

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### Click Insert/Edit Movie.

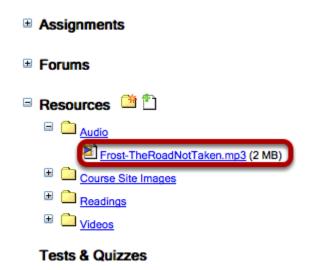

This displays the Movie Properties dialog box.

### **Click Browse Server.**

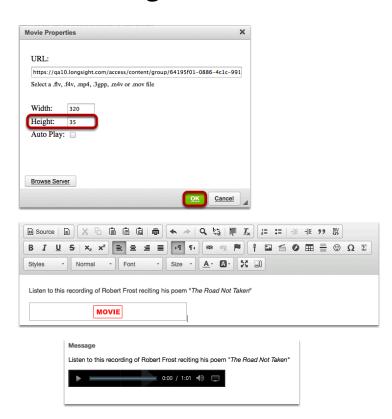

This displays the Entity Picker dialog box.

## Select the mp3 audio file you want to embed in the text box.

This returns the display to the Movie Properties dialog box with the URL of the mp2 audio in the box marked URL.

### Set the Height to 35, and then click OK.

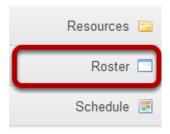

## Roster

### What is the Roster tool?

The Roster tool displays the number of site participants along with their names, photos, and profiles.

Note: The Roster tool does not allow instructors or site owners to add or remove participants from a site. (To do this, instructors or site owners must use the <u>Site Info</u> tool.)

## To access this tool, select Roster from the Tool Menu in your site.

Note: If you don't see the Roster tool listed in your site's Tool Menu, the site owner may have chosen not to use it.

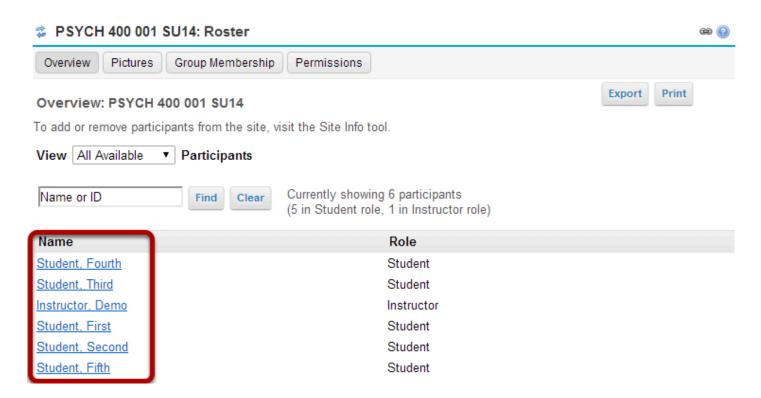

### How do I view/search the roster?

Note: Depending on your role and permissions, and the individual privacy settings on user profiles, some of the features below may not be available.

#### Go to Roster.

Select the **Roster** tool from the Tool Menu of your site.

### View list of class participants.

Enrolled users in the site will be listed here.

### Searching the roster.

To search the roster for a particular person, type their name or id in the search text box and then click **Find**.

Sakai 10 Instructor Guide

Page 816

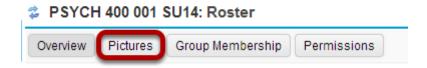

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## How do I view roster photos and/or profiles?

#### Go to Roster.

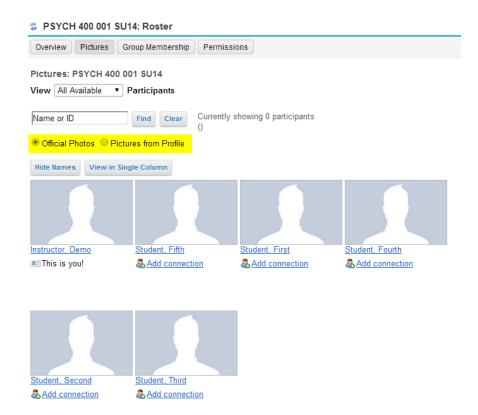

Select the **Roster** tool from the Tool Menu of your site.

### Viewing photos.

To view personalized photos that participants of your site have uploaded, at the top of the roster page, click **Pictures**.

### Profile photos for site participants will be displayed.

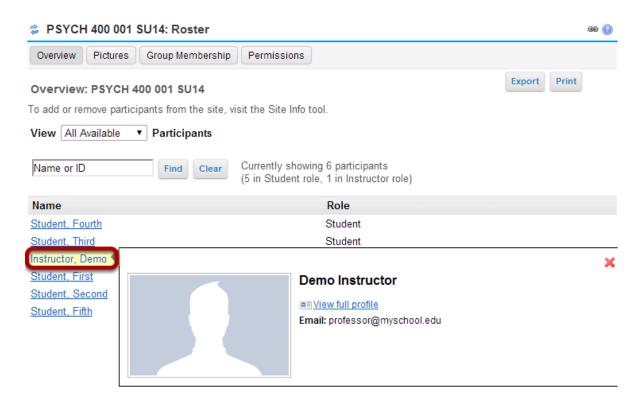

Note: You have the option to select the radio button for **Official Photos** or **Pictures from Profile** depending on whether you would like to view the official institutional ID photo (typically provided automatically during user account creation) or personal photos that users have uploaded themselves via the Profile tool.

Sakai 10 Instructor Guide

Page 817

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### Viewing profiles.

To view someone's profile, click the person's name or photo. Profile information that is available and that you have permission to view will be displayed.

# How do I view group membership in the roster?

Note: Depending on your role and permissions, and the individual privacy settings on user profiles, some of the features below may not be available.

#### Go to Roster.

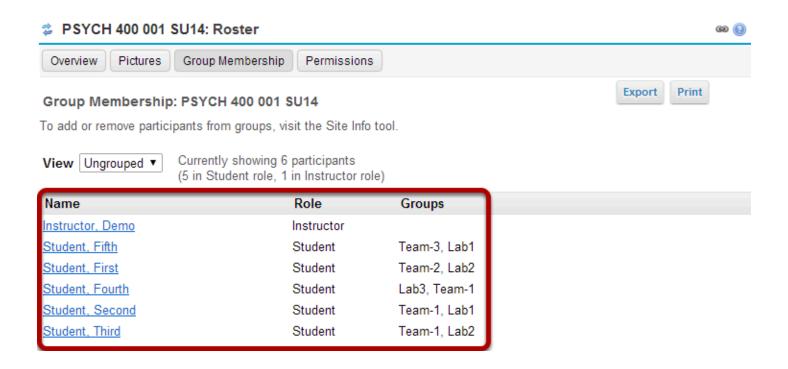

Select the **Roster** tool from the Tool Menu of your site.

### View group membership.

To view the group membership for the class, click the **Group Membership** button.

### Participant group information will be displayed.

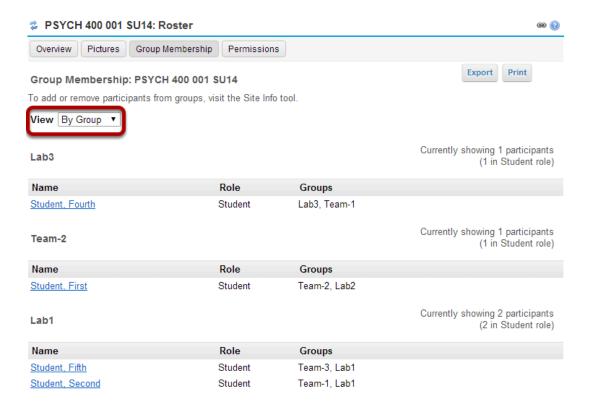

Sakai 10 Instructor Guide

Page 819

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Each site member will be listed along with their role in the course, and any of the groups to which they belong.

### View roster by group.

Select **By Group** from the View drop-down menu to see only members of specific groups or sections. (This drop-down list will be visible only if groups or sections exist.)

## How do I edit Roster tool permissions?

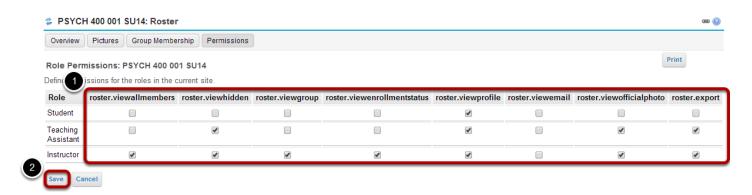

### Go to Roster.

Select the **Roster** tool from the Tool Menu of your site.

#### Click the Permissions button.

### Modify the permissions for the roles listed.

- 1. Check the box next to each permission you would like to allow for a given role. (Deselecting a box will remove the corresponding permission.)
- 2. Click **Save** to save your changes.

Note: You may see different roles listed depending on the roles which exist in your site. A role must be present in the site in order for you to modify its permissions.

## Schedule

### What is the Schedule/Calendar tool?

The Schedule tool allows instructors or site organizers to post events in a calendar format. The calendar has day, week, month, year, and simple list views.

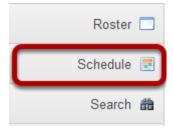

The Schedule can be used to post important dates in a class, such as start and end dates, assessment dates, etc.

Project sites may use Schedule to post key dates, such as deadlines.

All calendars from all sites you have access to are merged in your My Workspace Schedule.

Note: In some cases, local instances of Sakai have renamed the Schedule tool as Calendar on a system-wide basis; therefore, you may see it called the Calendar tool rather than Schedule tool.

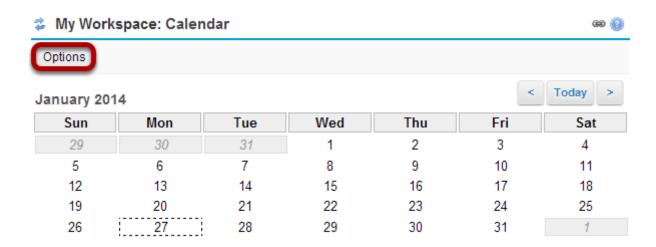

## To access this tool, select Schedule from the Tool Menu of your site.

# How do I customize my Schedule/Calendar display?

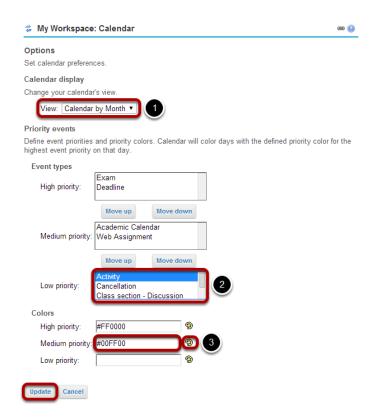

The Calendar tool (also referred to as the Schedule tool) can be customized according to your individual display preferences.

### **Calendar Options**

To modify the display , select the **Options** button.

### **Display Settings**

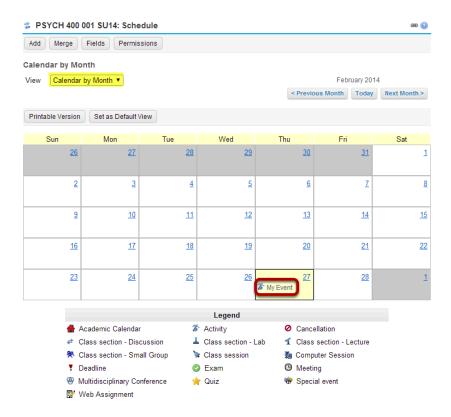

- 1. The drop-down menu under Calendar Display allows you to select your default view by *Month* or by *Day*.
- 2. You may define *High*, *Medium*, or *Low* priority for items on the Calendar. This will change the color of the item as it is displayed on your Calendar. Click on an item type in the list and select the **Move Up** or **Move Down** buttons to change the priority level of that item.
- 3. You may also specify custom colors for different priority levels. You may indicate the color by typing in a numerical *Hex color value*, or by clicking on the *color palate icon* to bring up a selection of web colors from which to choose.
- 4. Don't forget to click **Update** to save any changes.

## How do I view calendar item details?

#### Go to Schedule.

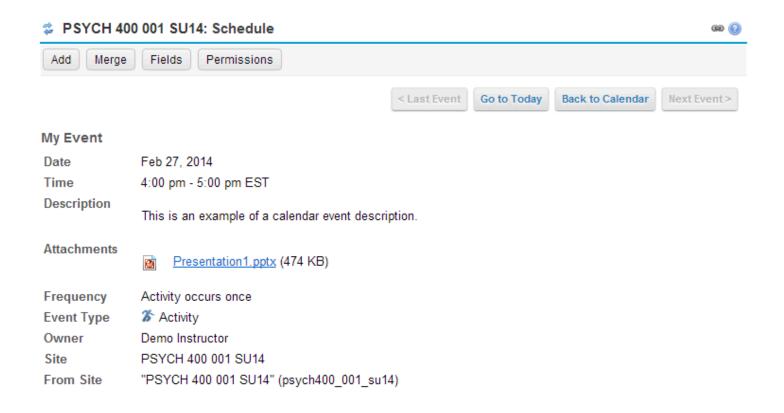

Select the **Schedule** tool from the Tool Menu in your site. (Remember that it may also be called **Calendar**.)

### Click on the item you want to view.

Tip: If you have concurrently scheduled events, it may be difficult to view their titles. To see more details for a particular day, from the "View" drop-down list, change your calendar's view to Calendar by Day or List of Events.

### View item details.

The item details will display.

Sakai 10 Instructor Guide

Page 827

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# How do I change the calendar view in the Schedule tool?

In Schedule, you can view your calendar by day, week, month, or year. You can also set the default view for your calendar.

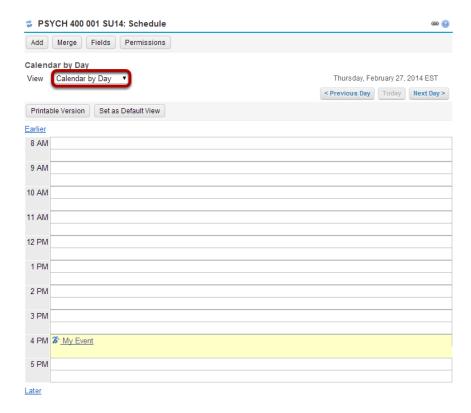

#### Go to Schedule.

Select the **Schedule** tool from the Tool Menu in your site. (Remember that it may also be called **Calendar**.)

### Select the desired view in the drop-down menu.

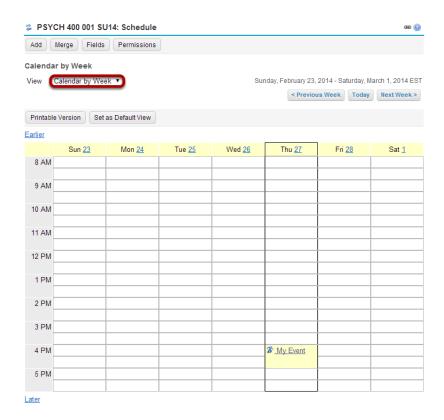

## Calendar by day.

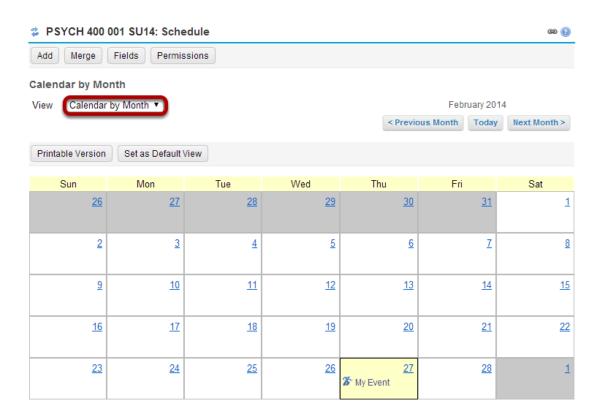

The item details will display.

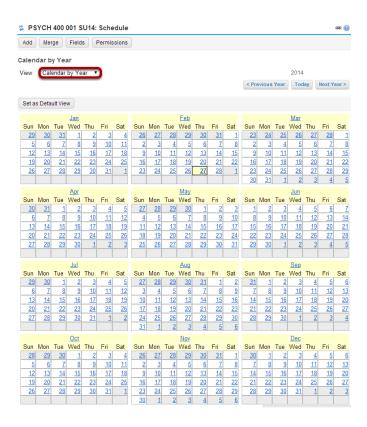

## Calendar by week.

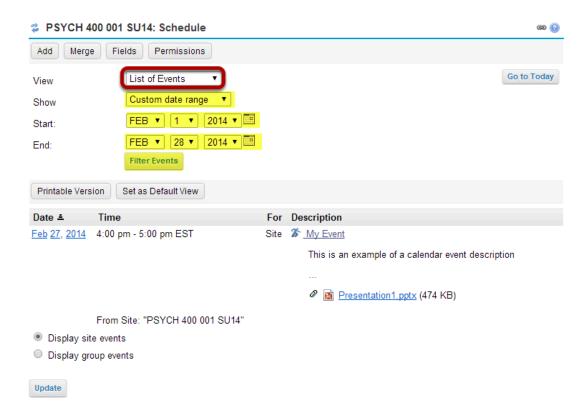

## Calendar by month.

## Calendar by year.

#### List of events.

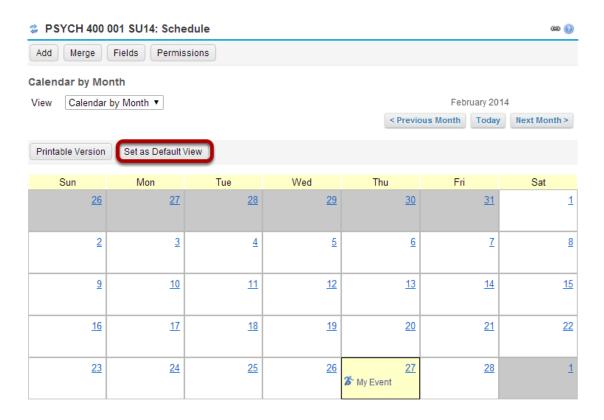

Sakai 10 Instructor Guide

Page 831

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Note: When viewing the calendar in list format, you also have the option to select a custom date range and filter events by start/end dates.

## Set default view of calendar.

If you have a preferred view (e.g. monthly view), click the **Set as Default View** button while viewing the calendar in your preferred view.

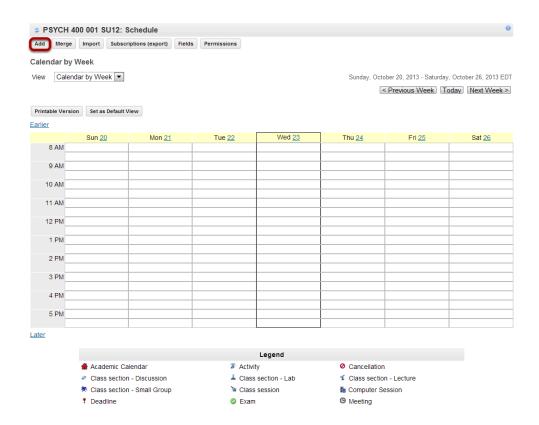

## How do I add items to the Schedule/ Calendar?

The Schedule tool allows instructors to post items to the class calendar. You may use the Schedule to post reminders about class activities and due dates. This lesson will show you how to add items to your class calendar.

#### Go to Schedule.

Select the **Schedule** tool from the Tool Menu in your site. (Remember that it may also be called **Calendar**.)

#### Click the Add button.

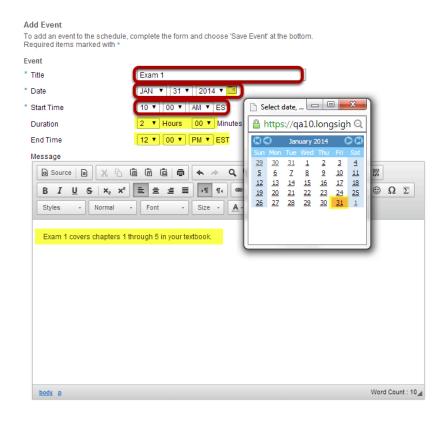

You will be taken to the default view of the calendar, the current date is highlighted.

Click on the **Add** button in the top left of the screen to create a new event.

Note: multiple day (overnight) events can not be added as a single event, they need to be added as an all day event with a frequency of daily.

#### Add event content.

You must enter a Title, Date, and Start Time to create an event. All other fields are optional.

- Your **Title** will be displayed on the calendar, so it is best to make it something short and informative. For this example, we have entered Exam 1.
- The **Date** is the day that the event takes place. You may select the date from the drop-down menus, or you may use the calendar icon to the right to bring up a pop-up calendar for selecting your date.
- The **Start Time** is the time of day when the event begins. For a live event, the start time is easy to determine. If your event is simply a reminder about required reading or other non-time-specific activities on a certain day, you may enter any time you choose.

If desired, you may also enter an event **Duration**, **End Time**, and **Message**.

- The **Duration** is how long the event will last. Selecting an amount of time from the Duration drop-down menus will automatically update your End Time accordingly.
- The **End Time** is when you expect the event to end. Selecting a time of day from the End Time drop-down menus will automatically update your Duration accordingly.
- You may also provide additional event details in the Message area. The rich text editor is
  available to you in the Message area, which means that you can format your text, or include
  images, links, or other embedded content as part of the event detail.

## **Display Options.**

- Display to site
- Display to selected groups

You may select to display the event to the whole site, or to selected groups. **Display to site** is the default.

Note: You must have existing groups (or sections) in your course for the groups option to appear.

## Display to selected groups.

- Display to site
- Display to selected groups

If you have groups in your class and you would like to post events that are only visible to specific groups, select the **Display to selected groups** option.

The menu will expand to show a listing of existing groups and you may select one or several groups from this list.

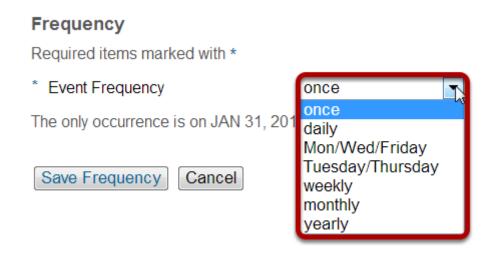

## Recurring events.

Frequency Activity occurs once

If your event happens more than once throughout the term, you have the option to modify the frequency of the event so that it posts to the calendar at specified intervals.

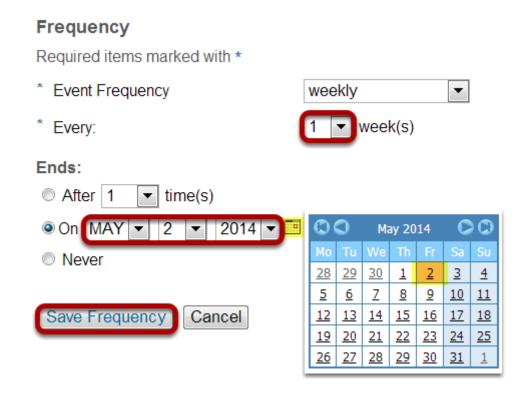

Click the **Frequency** button to add a recurring event.

## Select event frequency.

Select the frequency option from the drop-down menu that best describes your event.

## Specify interval and end date.

Does your event happen every week, every other week, or some other interval? Select the appropriate interval from the **Every** drop-down menu.

You also have the option to specify when the frequency **Ends**. You may select for it to end after a certain number of times, until a specific date, or never.

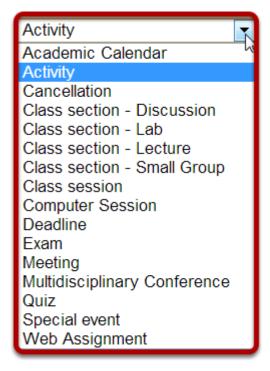

Page 836 Sakai 10 Instructor Guide

For example, if you are posting office hours and you want them to repeat on the same day and time each week until the end of the term, then you might select the last day of the term as the end date. You may enter this date using the drop-down menus, or by clicking on the calendar icon to select a date from the pop-up calendar.

Don't forget to click the **Save Frequency** button to save your changes!

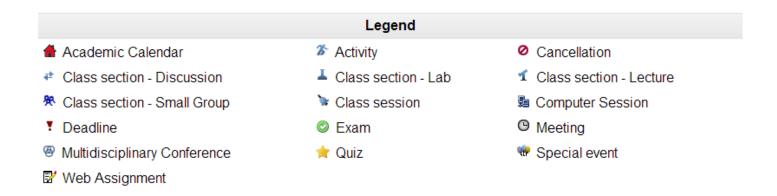

## Event type.

Event Type

Click on the **Event Type** drop-down menu to view all available types. The default event type is **Activity**.

## Selecting a different event type.

You may select a different event type if it is more appropriate for your calendar item. For example, for the Exam 1 event, you might select **Exam** as the event type.

Sakai 10 Instructor Guide

Page 837

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

The type of event that you choose controls the icon associated with that event when displayed on the calendar, as shown in the legend above. It will also control the priority of the item as specified in the user's individual preferences.

#### **Event location.**

Event Location

Building J, Room 407

If your event is happening in a specific location, you may enter the **Event Location** here.

Tip: For events with no physical location, you could enter Online, or Via Meetings Tool if you do not want to leave it blank.

#### File attachments

#### Attachments

No attachments Yet

You may attach a file to your event if desired.

For example, you might attach an agenda, a map or instructions on how to get to the location, or any other items that would be helpful for participants attending the event.

Click on the **Add Attachments** button to browse for and select your file.

### Save your event.

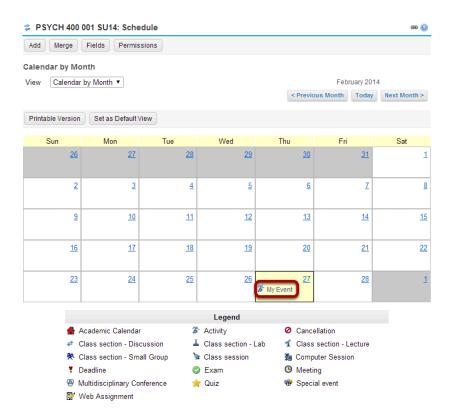

Once you have entered all of the information for your event, scroll all the way down to the bottom and click the **Save Event** button to post your event on the calendar.

## How do I edit a calendar item?

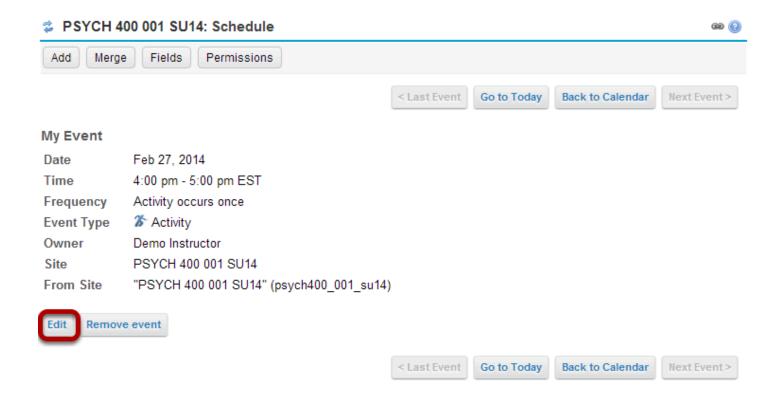

#### Go to Schedule.

Select the **Schedule** tool from the Tool Menu in your site. (Remember that it may also be called **Calendar**.)

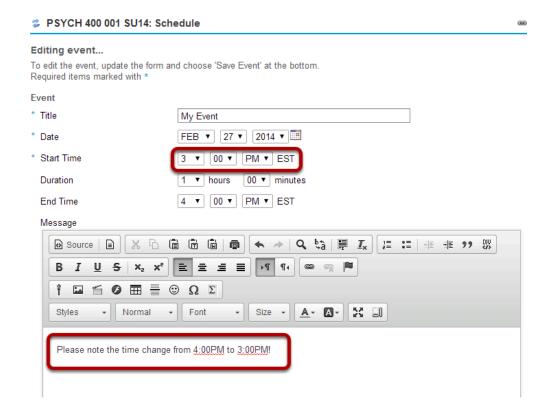

## Click on the item you want to edit.

#### Click Edit.

## Make your changes to the event.

Sakai 10 Instructor Guide

Page 840

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/bu/4.0/

## **Click Save Event.**

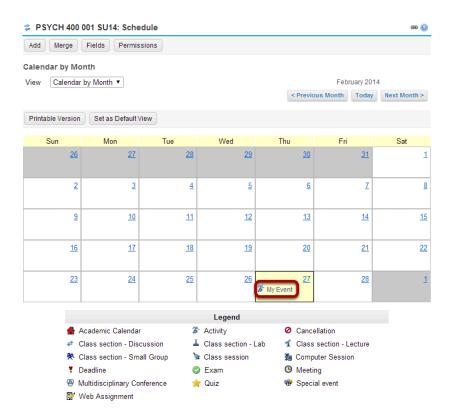

## How do I delete a calendar item?

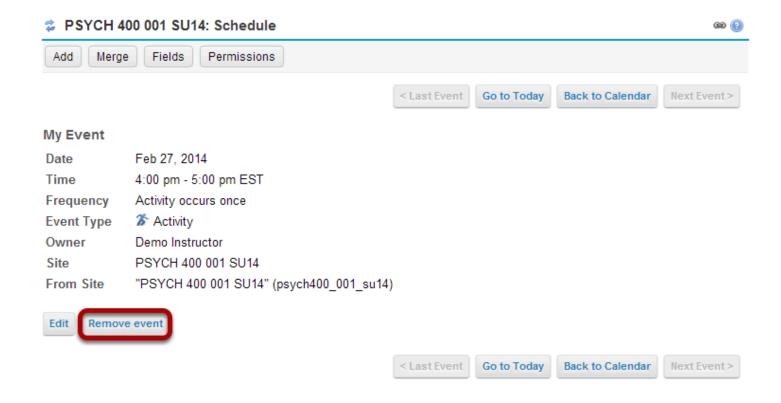

#### Go to Schedule.

Select the **Schedule** tool from the Tool Menu in your site. (Remember that it may also be called **Calendar**.)

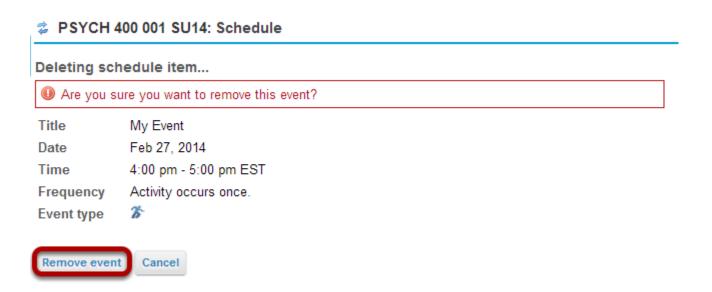

## Click on the item you want to delete.

## Click Remove event.

### Confirm removal.

You will be prompted to confirm the removal. If you are sure you want to delete the item, click **Remove event**.

Sakai 10 Instructor Guide

Page 843

## How do I print the Schedule/Calendar?

### Go to Schedule.

Select the **Schedule** tool from the Tool Menu in your site. (Remember that it may also be called **Calendar**.)

### **Click Printable Version.**

#### Print PDF.

Schedule for Demo Instructor - February 2014								
Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday		
						1		
2	3	4	5	6	7	8		
9	10	11	12	13	14	15		
16	17	18	19	20	21	22		
23	24	25	26	27 4:00PM: My Event	28	,		

A new window will open with a PDF version of the current calendar version displayed. Print or save the PDF file from this window.

Tip: The printable view will change depending on which view of the calendar you are currently viewing (i.e. day, week, month, year, or list). Be sure to <u>select your desired calendar view</u> for printing before clicking Printable Version.

# How do I merge the Schedule/Calendar with another site?

If you would like to combine calendar items from two or more sites, you may choose to merge the calendars.

Remember that all calendar entries for sites you have access to are automatically merged in your My Workspace Schedule.

Note: You must have appropriate level permissions (i.e. calendar owner) to merge calendars. Merged calendar items will only be visible for site participants who are active in both sites.

#### Go to Schedule.

Select the **Schedule** tool from the Tool Menu of your site. (Remember that it may also be called the Calendar tool).

## Click Merge.

Sakai 10 Instructor Guide

Page 846

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

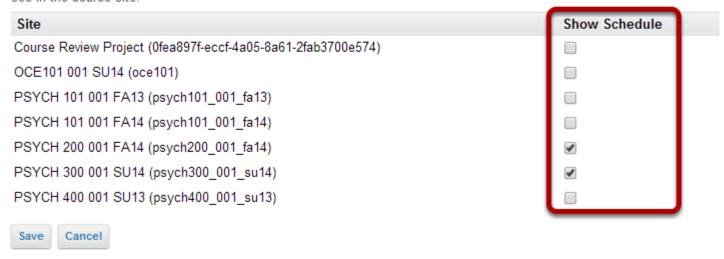

## Select calendars to be merged.

#### Merging calendars...

Select what calendars you want to merge into this site. This site's users will only see those events they had permission to see in the source site.

In the **Show Schedule** column, check the box next to any calendars from other sites that you would like to merge with the current site.

#### Click Save.

# How do I import Schedule/Calendar entries from a file?

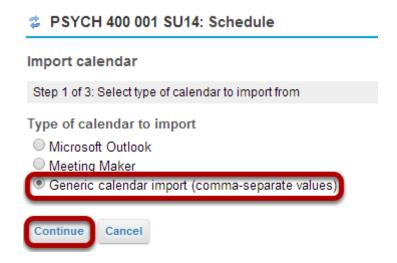

#### Go to Schedule.

Select the **Schedule** tool from the Tool Menu in your site. (Remember that it may also be called **Calendar**.)

## Click Import.

## Choose the import file format.

Select the type of calendar file you are importing (Microsoft Outlook, Meeting Maker, or Generic calendar import (comma-separate values)), and then click **Continue**.

## Choose your file.

#### Import calendar

#### Step 2 of 3: Reformat data and select the file to import

PSYCH 400 001 SU14: Schedule

To perform an import of generic calendar data, download the template package below. The package includes a 'Readme' file with instructions, as well as a CSV format example file that can be opened with Microsoft Excel or similar applications. Convert your data into the exact format shown in the CSV file to ensure compatibility.

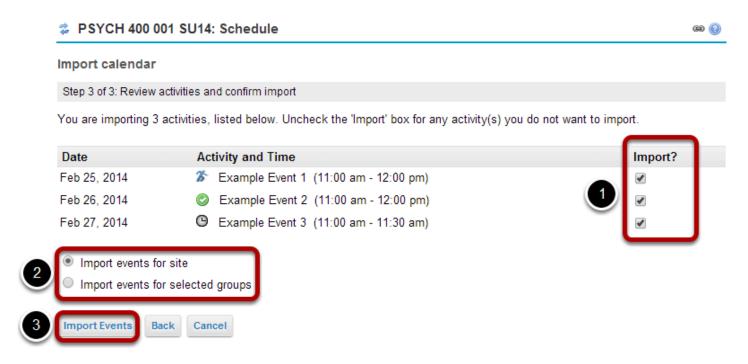

When you have your calendar information in the correct format, browse for the file below and upload it to the system.

Click the **Choose File** button to browse for and select your file, and then click **Continue**.

Note: Your import file must be in a specific format. For example, if you selected the generic calendar import option, you will see a link for a Generic Import Template that you can download to view an example of the correct import file format.

## Preview items and import events.

Sakai 10 Instructor Guide **Page 849**  You will now see a preview of the items to be imported. Verify that all the event information looks correct.

- 1. Remove the check mark for any items you don't want to import.
- 2. If you would like to import events for a specific group, select Import events for selected groups, and then select the desired group.
- 3. Click **Import Events** to complete the import.

# How do I modify Schedule/Calendar permissions?

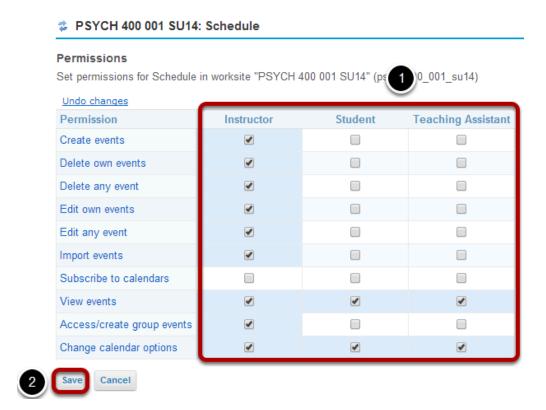

#### Go to Schedule.

Select the **Schedule** tool from the Tool Menu in your site. (Remember that it may also be called **Calendar**.)

## Click the Permissions button.

## Modify the permissions for the roles listed.

- 1. Check the box next to each permission you would like to allow for a given role. (Deselecting a box will remove the corresponding permission.)
- 2. Click **Save** to save your changes.

Note: You may see different roles listed depending on the roles which exist in your site. A role must be present in the site in order for you to modify its permissions.

## Search

## What is the Search tool?

Search allows you to search content created by tools within a worksite or course. It achieves this by creating an index of all content that other tools make available to the search tool. This index is updated automatically, so as content is added to the worksite or course, it will be indexed.

For example, if the worksite or course has an Email Archive, as emails are posted to the list, the content of those emails will be indexed and become searchable in the search tool. Or, if the site has documents uploaded to Resources, the documents will become searchable.

Search indexes many different types of content, including messages, web pages in HTML format, documents in DOC, PDF, or RTF format, spreadsheets in XLS format, and Wiki pages.

## To access this tool, select Search from the Tool Menu of your site.

## How do I perform a basic search?

#### Go to Search.

Select the **Search** tool from the Tool Menu of your site.

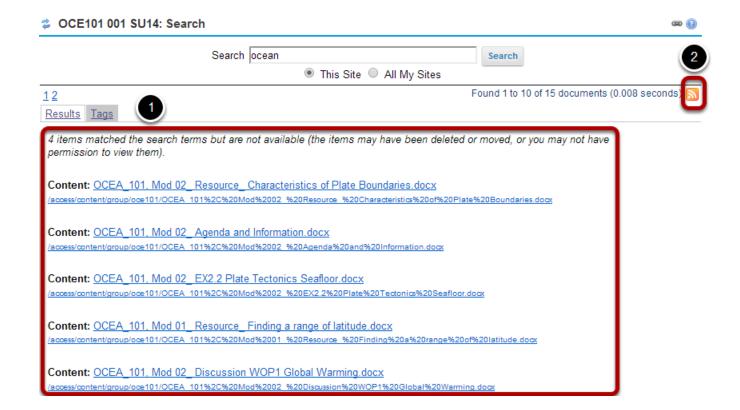

## Enter your search term/s.

On the Search page, you will find an entry box.

- 1. Enter the words that you want to search for. For example, "ocean".
- 2. Click the **Search** button.

#### View search results.

1. Your search results will be displayed.

Sakai 10 Instructor Guide

Page 854

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

2.	Notice that an RSS icon appears with the search results. This enables you to watch the search in your favourite RSS reader. (If you take some time to look at the <u>advanced search features</u> , you will find that you can generate RSS feeds of all sorts of information in the index.)							

## How do I perform an advanced search?

The Search Tool is driven by an index that contains multiple sub indexes. When using the tool for basic search, only 2 of these indexes are used: the context index, and the content index. The content index contains a stored and tokenized full text index of a digested form of the content. This means that a Word document uploaded to Resources will have had all its text extracted and indexed, whereas a video package may have had only the metadata indexed. When the search results are returned, it is this content that is shown with the matching terms highlighted.

The context index provides a keyword index of the source of the content. This is the worksite or course which contains the content. When the search tool performs a basic search, it adds a search term of +content:<currentsiteid> where <currentsiteid> is the context or site id where the search is being performed. This can be translated as "results must come from the current site".

You can search for terms within any of the indexes. For example to search only in announcements, you can use the search terms +tool:announcement +content:cowslip which will only return announcements containing the word cowslip.

The index currently contains the following named indexes.

- **content**: A tokenized, stored index of the digested content of the search documents
- context: A keyword stored index of the source context of the search document.
- tool: A keyword stored index of the tool name producing the search document.
- title: A tokenized stored index of the title of the search document.
- reference: A keyword stored index of the Sakai Entity reference.

#### Go to Search.

Select the **Search** tool from the Tool Menu in your site.

## **Advanced Search Options**

Use the search information below to enter advanced search strings into the search box.

#### **Lucene Search Information**

The Query Engine is based on Apache Lucene. For completeness the Apache Query documentation is included below. More information can be found at <a href="http://lucene.apache.org/java/docs/queryparsersyntax.html">http://lucene.apache.org/java/docs/queryparsersyntax.html</a>

#### **Terms**

A query is broken up into terms and operators. There are two types of terms: Single Terms and Phrases.

A Single Term is a single word such as "test" or "hello".

A Phrase is a group of words surrounded by double quotes such as "hello dolly".

Multiple terms can be combined together with Boolean operators to form a more complex query (see below).

Note: The analyzer used to create the index will be used on the terms and phrases in the query string. So it is important to choose an analyzer that will not interfere with the terms used in the query string.

#### **Fields**

Lucene supports fielded data. When performing a search you can either specify a field, or use the default field. The field names and default field is implementation specific.

You can search any field by typing the field name followed by a colon ":" and then the term you are looking for.

As an example, let's assume a Lucene index contains two fields, title and text and text is the default field. If you want to find the document entitled "The Right Way" which contains the text "don't go this way", you can enter:

title:"The Right Way" AND text:go

or

title: "Do it right" AND right

Since text is the default field, the field indicator is not required.

Note: The field is only valid for the term that it directly precedes, so the query

title:Do it right

Will only find "Do" in the title field. It will find "it" and "right" in the default field (in this case the text field).

Sakai 10 Instructor Guide

Page 857

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **Term Modifiers**

Lucene supports modifying query terms to provide a wide range of searching options.

#### Wildcard Searches

Lucene supports single and multiple character wildcard searches.

To perform a single character wildcard search use the "?" symbol.

To perform a multiple character wildcard search use the "\*" symbol.

The single character wildcard search looks for terms that match that with the single character replaced. For example, to search for "text" or "test" you can use the search:

te?t

Multiple character wildcard searches looks for 0 or more characters. For example, to search for test, tests or tester, you can use the search:

test\*

You can also use the wildcard searches in the middle of a term.

te\*t

Note: You cannot use a \* or? symbol as the first character of a search.

### **Fuzzy Searches**

Lucene supports fuzzy searches based on the Levenshtein Distance, or Edit Distance algorithm. To do a fuzzy search use the tilde, "~", symbol at the end of a Single word Term. For example to search for a term similar in spelling to "roam" use the fuzzy search:

roam~

This search will find terms like foam and roams.

Starting with Lucene 1.9 an additional (optional) parameter can specify the required similarity. The value is between 0 and 1, with a value closer to 1 only terms with a higher similarity will be matched. For example:

roam~0.8

The default that is used if the parameter is not given is 0.5.

## **Proximity Searches**

Lucene supports finding words are a within a specific distance away. To do a proximity search use the tilde, "~", symbol at the end of a Phrase. For example to search for a "apache" and "jakarta" within 10 words of each other in a document use the search:

"jakarta apache"~10

## **Range Searches**

Range Queries allow one to match documents whose field(s) values are between the lower and upper bound specified by the Range Query. Range Queries can be inclusive or exclusive of the upper and lower bounds. Sorting is done lexicographically.

mod date:[20020101 TO 20030101]

This will find documents whose mod\_date fields have values between 20020101 and 20030101, inclusive. Note that Range Queries are not reserved for date fields. You could also use range queries with non-date fields:

title:{Aida TO Carmen}

This will find all documents whose titles are between Aida and Carmen, but not including Aida and Carmen.

Inclusive range queries are denoted by square brackets. Exclusive range queries are denoted by curly brackets.

#### **Boosting a Term**

Lucene provides the relevance level of matching documents based on the terms found. To boost a term use the caret, "^", symbol with a boost factor (a number) at the end of the term you are searching. The higher the boost factor, the more relevant the term will be.

Boosting allows you to control the relevance of a document by boosting its term. For example, if you are searching for

jakarta apache

and you want the term "jakarta" to be more relevant boost it using the ^ symbol along with the boost factor next to the term. You would type:

jakarta^4 apache

This will make documents with the term jakarta appear more relevant. You can also boost Phrase Terms as in the example:

"jakarta apache"^4 "Apache Lucene"

By default, the boost factor is 1. Although the boost factor must be positive, it can be less than 1 (e.g. 0.2)

## **Boolean operators**

Boolean operators allow terms to be combined through logic operators. Lucene supports AND, "+", OR, NOT and "-" as Boolean operators(Note: Boolean operators must be ALL CAPS). OR

The OR operator is the default conjunction operator. This means that if there is no Boolean operator between two terms, the OR operator is used. The OR operator links two terms and finds a matching document if either of the terms exist in a document. This is equivalent to a union using sets. The symbol | | can be used in place of the word OR.

To search for documents that contain either "jakarta apache" or just "jakarta" use the guery:

"jakarta apache" jakarta

or

"jakarta apache" OR jakarta

AND

The AND operator matches documents where both terms exist anywhere in the text of a single document. This is equivalent to an intersection using sets. The symbol && can be used in place of the word AND.

To search for documents that contain "jakarta apache" and "Apache Lucene" use the guery:

"jakarta apache" AND "Apache Lucene"

+

The "+" or required operator requires that the term after the "+" symbol exist somewhere in a the field of a single document.

To search for documents that must contain "jakarta" and may contain "lucene" use the query:

+jakarta apache

NOT

The NOT operator excludes documents that contain the term after NOT. This is equivalent to a difference using sets. The symbol! can be used in place of the word NOT.

To search for documents that contain "jakarta apache" but not "Apache Lucene" use the query:

"jakarta apache" NOT "Apache Lucene"

Note: The NOT operator cannot be used with just one term. For example, the following search will return no results:

NOT "jakarta apache"

Page 860 Sakai 10 Instructor Guide

\_

The "-" or prohibit operator excludes documents that contain the term after the "-" symbol.

To search for documents that contain "jakarta apache" but not "Apache Lucene" use the query: "jakarta apache" -"Apache Lucene"

### **Grouping**

Lucene supports using parentheses to group clauses to form sub queries. This can be very useful if you want to control the boolean logic for a query.

To search for either "jakarta" or "apache" and "website" use the query:

(jakarta OR apache) AND website

This eliminates any confusion and makes sure you that website must exist and either term jakarta or apache may exist.

## **Field Grouping**

Lucene supports using parentheses to group multiple clauses to a single field.

To search for a title that contains both the word "return" and the phrase "pink panther" use the query:

title:(+return +"pink panther")

## **Escaping Special Characters**

Lucene supports escaping special characters that are part of the query syntax. The current list special characters are

To escape these character use the \ before the character. For example to search for (1+1):2 use the query:

\(1\+1\)\:2

## **Section Info**

## What is the Section Info tool?

The Section Info tool provides a way for instructors to efficiently manage sections of a class. The tool is designed to help an instructor manage a course that may consist of lectures, labs, discussions, studio work, recitations, or any combination thereof. Information you may add about a section includes days, time, assigned teaching assistant, room, current enrollment, available slots, maximum enrollment, and the section category.

The Section Info tool is designed to work with other tools, such as Announcements, Gradebook, and Tests & Quizzes.

You may assign teaching assistants (TAs) to each section and they can only view and edit grades for their assigned sections. A section may have any number of assigned teaching assistants.

Note: Depending on your implementation, you may have the option to automatically or manually manage section membership from the Options page in the Section Info tool. Membership information can be based on official registration information, or you can manually control section membership. However, when you select manual mode and then return to automatic mode, you will lose all the changes you made while in manual mode.

## To access this tool, select Section Info from the Tool Menu in your site.

## How are sections different than groups?

Sections and groups are very similar in some respects. They both allow instructors to manage subsets of students within a site. For example, both groups and sections allow instructors to filter and view one section of students at a time in the Gradebook. However, sections and groups also differ in several key ways.

#### **Sections**

Sections are subsets of site participants. A section may have a variety of data attached to it, such as category, days of the week, times, and an assigned teaching assistant (in a course site only). Depending on how the software is implemented at a given location, the Section Info tool may be loaded with official course sections. Alternately, an instructor may be able to set up sections manually.

- Sections are managed through the Section Info tool.
- You may provide additional information about a section, such as title (required), days, start time, end time, maximum size, and location.
- Sections must be assigned to a given category. Categories include lecture, lab, discussion, studio, and recitation.
- In a course site, an instructor may assign a teaching assistant to a section.
- You have the option to allow students to switch or sign up for sections.
- Participants may not be in more than one section in a given category.
- Sections may be populated with official data, depending on implementation.

## Groups

Groups are also subsets of participants for a given site. However, groups are not preloaded with official course data, and are created by the instructor or site owner instead. Groups are useful to organize study groups, project teams, and other, non-official subsets of worksite participants.

- Groups are managed through the Site Info tool. They are also accessible through Worksite Setup in My Workspace.
- · Groups may have a title.
- Groups are not populated with official course data.
- · Groups do not have an assigned teaching assistant.

## How do I create a section?

Sections may or may not be populated with official course data, depending on implementation. If they are not automatically created, then you may create them if you have the appropriate role. Participants (e.g., students) cannot create or modify sections.

Note: If your implementation has an automatic feed, you will have the option to automatically or manually manage section membership from the Options page in the Section Info tool.

Membership information can be based on official registration information, or you can discontinue section and membership updates from the registration system and manually control everything. However, when you select manual mode and then return to automatic mode, you will lose all the changes you made while in manual mode.

#### Go to Section Info.

Select the **Section Info** tool from the Tool Menu in your site.

#### Click Add Sections.

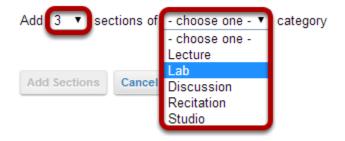

#### Select the number of sections and a category.

#### Add Sections

To begin, choose the category and number of sections to create.

Select the number of sections you want to create (e.g. 3) and then choose the category for your sections from the drop-down menu:

- Lecture
- Lab
- Discussion
- Recitation
- Studio

Note: The name of a category is the only thing that differentiates it from other categories. For instance, a Lab section will function exactly as a Discussion section in the Section Info tool.

#### Enter the section information.

Location

# Add Sections To begin, choose the category and number of sections to create. Add 3 v sections of Lab v category Name \* Lab1 Section Size Unlimited number of students in section Limit number of students in section to 15 Meeting Details Day Monday Tuesday Wednesday Thursday Friday Saturday Sunday Start time 10:00 AM PM End Time 12:00 AM PM AM PM

Add day(s) with a different meeting time and/or location

Building J, Room 123

- 1. **Name**: In the Name field, give your section a name. If you don't enter a name, the name of the category plus a number will be the default name (e.g., Lab1, Lab2, Lab3).
- 2. **Section Size**: Choose a either Unlimited number of students in section or Limit number of students in section to. For the second choice, enter the maximum number of members allowed in the section.
- 3. **Meeting Details**: Select which days of the week this section meets.
- 4. **Start/End Time**: Enter the time the section meets. Enter the time and minutes, for example, 8:00. Check next to AM or PM to indicate time of day.
- 5. **Location**: Enter a short location identifier for where the section meets, up to 20 characters maximum.

If you have chosen to add more than one section at a time, repeat the process above for the other sections.

#### Click Add Sections.

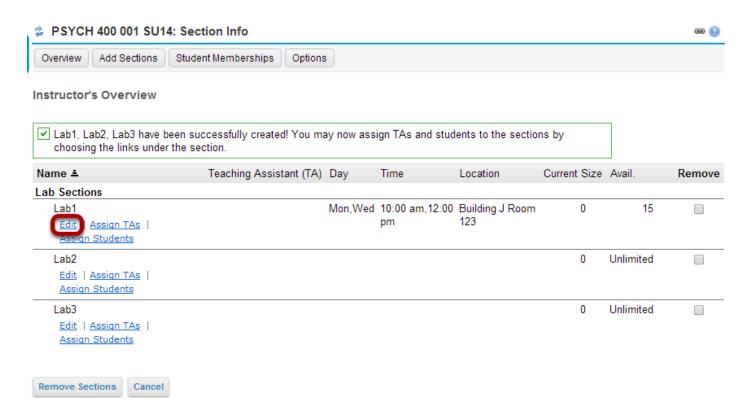

When you are finished entering your section information, click **Add Sections**.

# How do I edit a section?

#### Go to Section Info.

Select the **Section Info** tool from the Tool Menu in your site.

#### Click Edit.

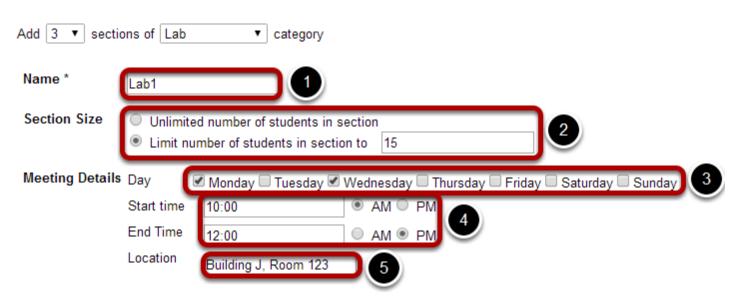

Click the Edit link under the section you want to edit.

#### Edit the section information.

#### **Add Sections**

To begin, choose the category and number of sections to create.

Add day(s) with a different meeting time and/or location

You will be able to edit any of the fields that you entered when you created the section.

- 1. **Name**: In the Name field, give your section a name. If you don't enter a name, the name of the category plus a number will be the default name (e.g., Lab1, Lab2, Lab3).
- 2. **Section Size**: Choose a either Unlimited number of students in section or Limit number of students in section to. For the second choice, enter the maximum number of members allowed in the section.
- 3. **Meeting Details**: Select which days of the week this section meets.
- 4. **Start/End Time**: Enter the time the section meets. Enter the time and minutes, for example, 8:00. Check next to AM or PM to indicate time of day.
- 5. **Location**: Enter a short location identifier for where the section meets, up to 20 characters maximum.

#### Click Update.

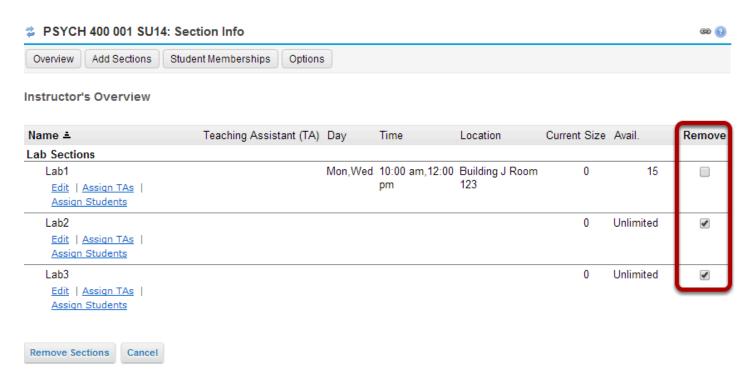

When you are finished editing your section information, click **Update** to save your changes.

#### How do I delete a section?

#### Go to Section Info.

Select the **Section Info** tool from the Tool Menu in your site.

#### Select the section(s) to be deleted.

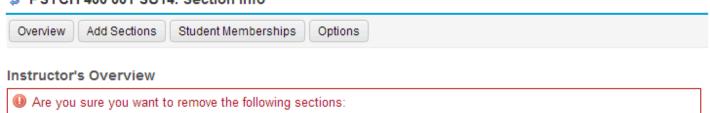

In the **Remove** column, check the box(es) for the section(s) you would like to delete.

#### **Click Remove Sections.**

#### Confirm removal.

- Lab2
- Lab3

Students in these section(s) will be 'unassigned' (not in any section of this type). Please use the 'Assign Students' link under another section to assign them to a new section.

You will be prompted to confirm the deletion of the selected sections. If you want to proceed, click **Remove**.

Click one or more student names in the list of site participants on the left, and then use the right arrow button to add the selected student(s) to the section list on the right.

## **Click Assign students.**

When you have finished adding students to the list on the right, click the **Assign students** button.

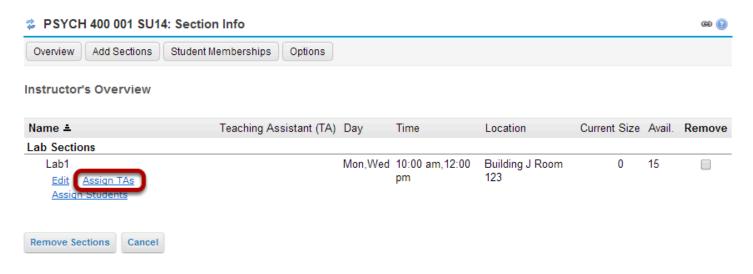

# How do I add teaching assistants to a section?

Adding TAs to a section allows them to view and edit student information, such as grades, within their assigned sections.

#### Go to Section Info.

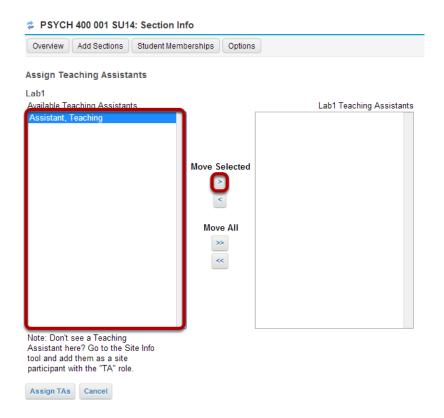

Select the **Section Info** tool from the Tool Menu in your site.

#### Click Assign TAs.

**Page 874** Sakai 10 Instructor Guide This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

#### Select from the list of available TAs.

Click one or more TA names in the list of Available Teaching Assistants on the left, and then use the right arrow button to add the selected TA(s) to the section list on the right.

Note: Users must be enrolled in the site with a TA role in order to appear in this list.

#### Click Assign TAs.

When you have finished adding TAs to the list on the right, click the **Assign TAs** button.

# Sign-Up

# What is the Sign-Up tool?

Creation of the Sign-up tool was motivated by requests from faculty who wanted to replace the "sign up sheets on the door" with an online alternative. Faculty needed a system that would allow students to sign up for office hours, meetings, review sessions and other events in one convenient place. This tool can also be used in project sites to create meetings for the participants.

Various scheduling, participation, recurrence, and notification arrangements can be made. An instructor can assign participants to timeslots or allow them to select their own choices. If a timeslot is full, the instructor can allow participants to add themselves to a wait list, which automatically "promotes" a participant when a slot becomes available and sends an email notification. The Sign-up tool is group- and section-aware which gives instructors the ability to set up office hours or meetings which are visible only to their sections or to a group.

#### Who can use the tool?

In course sites, the instructors have permission to create meetings and students are allowed to sign up for them. Instructors can permit students in any of the courses they teach to sign up for a meeting.

In project sites, the maintainer (i.e. site owner) can create meetings and everyone can sign up for them.

Note: if you would like to grant permission to students to create meetings, please contact your system administrator to modify the permissions for your site.

# To access this tool, select Sign-Up from the Tool Menu of your site.

# What are Sign-Up meeting types?

There are three types of events or meetings:

- Open meetings
- · Single slot meetings
- Multiple slot meetings

Note:All meeting types can be set up as recurring events, which creates several different meetings under the same title according to a given schedule. See <u>How do I create a meeting?</u> for information on the meeting frequency setting.

#### Open meetings.

**Meeting Details** 

Title: Guest Speaker

Organizer: Demo Instructor

Location: Fine Arts Building

Category: Optional

Meeting Date: Tuesday, March 25, 2014
Time Period: 6:00 PM - 8:00 PM

iCalendar link: B Download

Available To: Show site(s)/group(s) details

Description:

We will have a guest speaker on campus discussing contemporary topics in modern psychology.

This is an open session meeting. No sign-up is necessary.

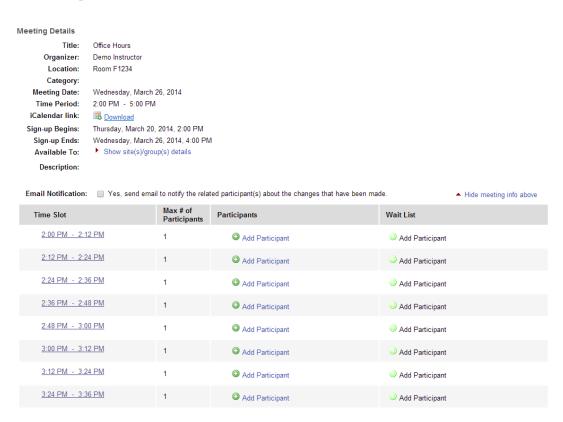

This option creates a single timeslot for an event or meeting, serving as an announcement. No attendance list is kept, so participants who plan to attend are not required to sign up.

## Single slot.

A single timeslot is created, an attendance list is maintained, and the number of participants can be limited or unlimited. Participants are required to sign up in order to appear on the attendance list.

#### Multiple slots.

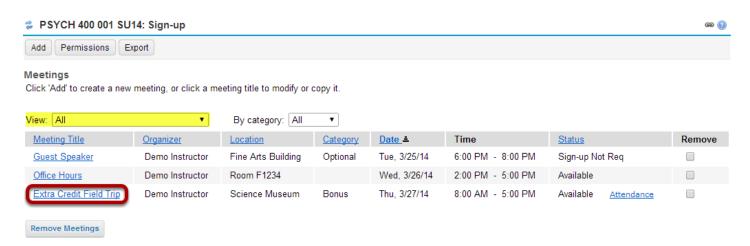

A single time span can be divided into any number of timeslots of equal length, under a single meeting name. For example, a two hour meeting could have four half-hour slots, three 40-minute slots, or eight quarter-hour slots. The timeslots can also be defined at irregular times over different days. For each slot a maximum number of participants is specified. Participants are required to sign up in order to appear on the attendance list. The resulting series of timeslots can be removed or modified individually. (This option does not automatically set up a recurring meeting.)

# How do I view meetings in Sign-Up?

#### Go to Sign-Up.

Select the Sign-Up tool from the Tool Menu of your site.

#### Meetings page.

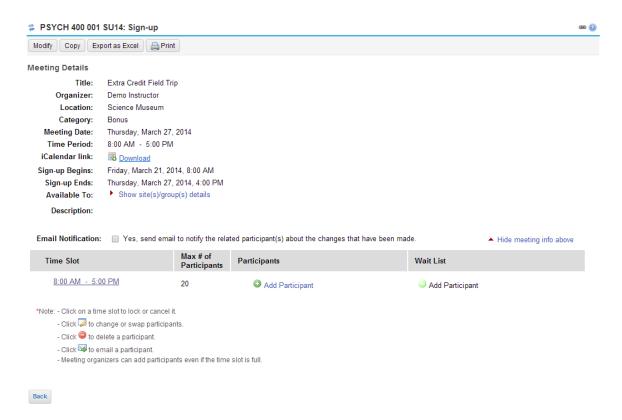

On entry, the Sign-up tool displays the list of meetings, if any, already created in the site. By default all future meetings will be displayed.

The site's meetings are listed here in table format including title, location, date, time, and so forth. They can be ordered with the column headings and filtered with the "View" selection box. Recurring meetings, those created as a set with a single title, can be expanded or contracted with the checkbox. Checking the box below, or checking the plus sign next to the meeting entitled "Presentations," would reveal several meetings of that title on different days or times. Meetings can be removed (via the checkbox on the right of each). On this page, permissions can be set and meeting data exported (via the links on the top).

Click on a meeting title to brings up its meeting details.

Note: For a view that includes past meetings, choose **All** in the drop down menu next to **View**.

#### Meeting details.

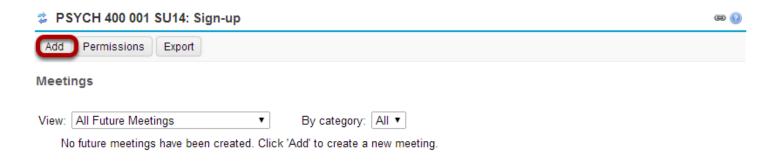

Detailed settings and timeslots, for a particular meeting, are listed here. The meeting details can be modified or copied into a new meeting, or exported or printed. In the Time Slot table, timeslots can be edited. The organizer view shows those signed up and those on the waitlist; the student or participant view shows a "Sign-up" button (not visible below), active if the sign-up period has commenced.

# How do I create a meeting?

#### Go to Sign-Up.

Select the **Sign-Up** tool from the Tool Menu of your site.

#### Click Add.

After you click **Add** the meeting information screen will appear where you can enter all of the information for your meeting.

#### Enter a title.

This field will identify the meeting in this site's list of meetings.

#### **Change organizer. (Optional)**

If there is more than one instructor or site owner, you may select a different name in the dropdown menu. It will default to the user who is currently logged in.

#### Enter a location.

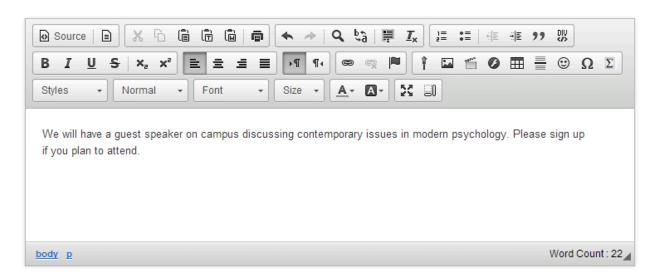

This field will appear in the Meeting Details.

#### **Enter a category. (Optional)**

Category:	Optional

#### Enter a description of the meeting or event.

Description:

This field appears on the Meeting Details and the student Sign-up screen.

#### Add attachments. (Optional)

You may click the **Add Attachments** button if you would like to browse for and attach a file to your meeting.

#### Enter start and end times.

Fill out the date (with, optionally, the date picker) and the time showing when the meeting will begin and end.

Sakai 10 Instructor Guide

Page 884

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Note: The 24-hour clock is not available, so AM and PM must be used.

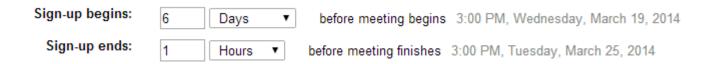

#### Select meeting frequency.

\* Meeting Frequency:

To set up recurring meetings, choose an option here. Any of the meeting types can be recurring. Selection of a meeting frequency other than "Once Only" will create a series of entries in the meetings table with the same name but different details, where any of the individual entries can be modified as necessary.

#### Select begin and end times for sign-up.

Enter the point at which the meeting should be opened for sign-up. Before then, participants will not have an active Sign-up button next to a meeting entry. To allow immediate sign-up, choose "Start Now" from the drop-down box.

Also, enter the point relative to the meeting at which to close the sign-up process. This blocks further sign-up by participants, and also blocks cancellation of a meeting for which a participant has already signed up. This period is measured from the scheduled meeting end, allowing signup even after the meeting has started, when that is appropriate.

Note: Sign-Up begin and end times are only available for single slot and multiple slot meetings.

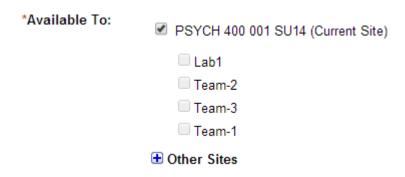

#### Take attendance.

If you wish to take attendance for this meeting, select the **Attendance** check box.

Sakai 10 Instructor Guide **Page 885** 

#### Specify meeting availability.

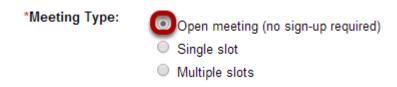

This field allows you to determine who can sign up for the meeting. You can limit sign-up to members of a group (defined on this site) or extend the sign-up offer to the membership of other sites, by selecting the appropriate checkboxes. The option to extend to other sites allows inclusion of those sites' members, or groups defined there. The other site must also have the Sign-up tool in order for its members to participate. (The default setting is members of this site only.)

#### Choose meeting type.

The relevant options for each of the three meeting types appear when that meeting type is selected via its radio button. See <a href="What are Sign-Up meeting types">What are Sign-Up meeting types</a>? for more information.

#### **Open meeting**

#### Single slot.

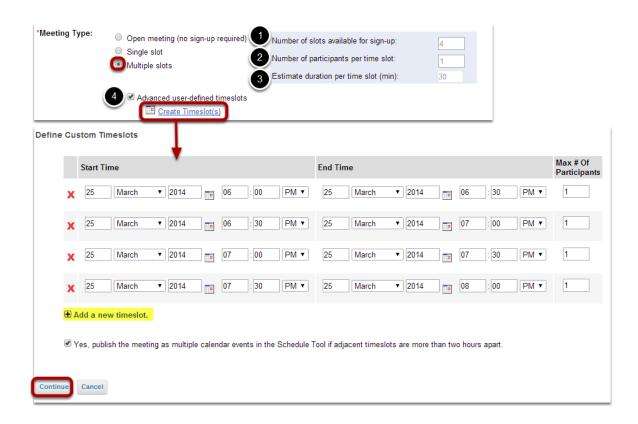

Options to choose between **Max number** (in which case, enter the number of participants allowed) and **Unlimited**.

Sakai 10 Instructor Guide

Page 886
This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Multiple slots.

Options create timeslots, either computed to occupy a single continuous time span, or occupying separate irregular time spans manually defined, covering one or more days. Each method creates a single meeting with multiple entries in a timeslot table.

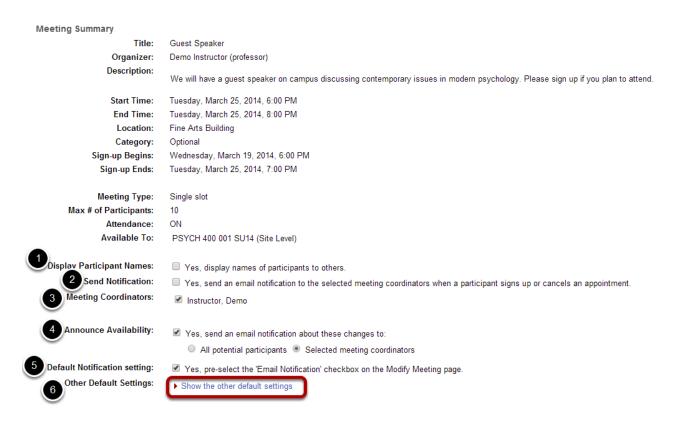

- 1. **Number of slots available for sign-up**: Enter the number of individual timeslots over which to divide the meeting time.
- 2. **Number of participants per slot**: Enter the number of people that can sign up for each slot.
- 3. **Estimate duration per timeslot (min)**: This figure, in red, is calculated as a function of the total meeting time span and the number of slots available, and cannot be edited. It allocates the available time across the slots. For example, if the number of slots is defined to be 5, and the start and end times of the meeting span two hours, the duration will be set to 24 (120 minutes divided by 5). A number of slots that does not divide the period evenly will give rise to a warning message and an adjustment of the total span. Note: In any case, the resulting timeslots can be edited, after the meeting is published, through the "Modify" process by selecting "Advanced user-defined timeslots." See below, "Editing a meeting."
- 4. **Advanced user-defined timeslots**: Allows a multiple-slot meeting to be defined as a set of irregular timeslot choices, over several days at different times. (Each person can sign up for only one.) Select this checkbox," then select the "Edit Timeslots" link that appears. Enter new timeslots with the "Add a new timeslot" link, edit the data, and delete extraneous ones with the red X. This option does not allow unlimited participation. A warning that this meeting covers more than one day can be ignored.

#### Click Next.

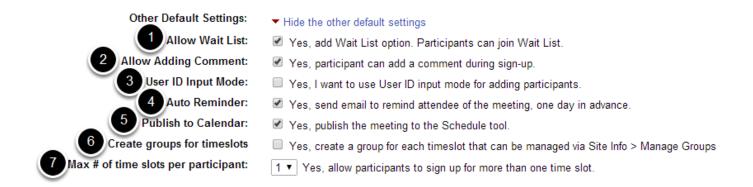

Continue to the second page by clicking **Next**. This will take you to the Meeting Summary, to verify the details set so far, then complete the meeting settings.

#### Review settings and select notification preferences.

- 1. **Display Participant Names**: "Yes" means that names of participants will be visible to others.
- 2. **Send notification**: Check the appropriate box to manage email notifications when participants sign up or cancel.
- 3. **Meeting Coordinators**: Select the coordinators to receive notifications, if enabled.
- 4. Announce Availability: "Yes" means that all the potential participants will receive e-mail announcing that this meeting has been published.
- 5. **Default Notification setting**: "Yes" means that the notification box will be selected on the modify meetings page.
- 6. Other Default Settings: Click Show the other default settings to view additional meeting options.

#### Other default settings.

#### Other settings include:

- 1. **Allow Wait List**: "Yes" means that a Wait List will be kept, and participants can join it if this meeting is filled to capacity.
- 2. **User ID Input Mode**: Yes, I want to use User ID input mode for adding participants. allows organizer to use User Id rather than choosing from drop down list. Useful for very large classes where drop down list is very long.
- 3. Allow Adding Comment: "Yes" means that a participant can add a comment during sign-up.
- 4. **Auto Reminder**: "Yes" means that all attendees of the meeting will receive an e-mail reminder one day in advance.
- 5. **Publish to Schedule**: "Yes" means that the meeting will appear on this site's Schedule or Calendar tool, regardless of attendance status of the current user.

#### Publish your meeting.

Publish by clicking either **Publish** or **Assign Participants & Publish**. You have the option of assigning participants or allowing them to choose their own timeslots. If you do not choose to assign participants at this time, you may do so later by editing the meeting settings.

Sakai 10 Instructor Guide

# How do I edit a meeting?

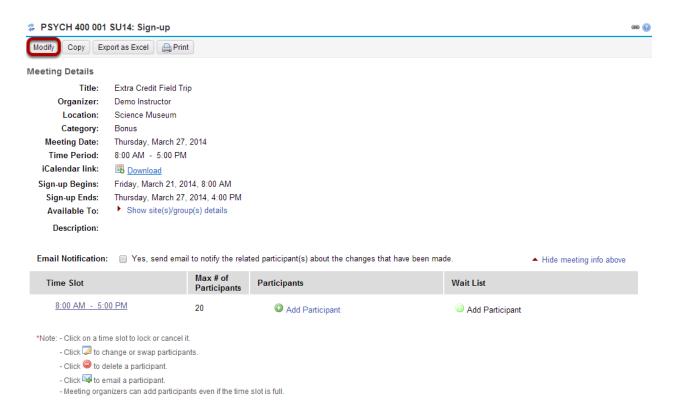

#### Go to Sign-Up.

Select the **Sign-Up** tool from the Tool Menu of your site.

#### Click on a meeting title.

#### Click Modify.

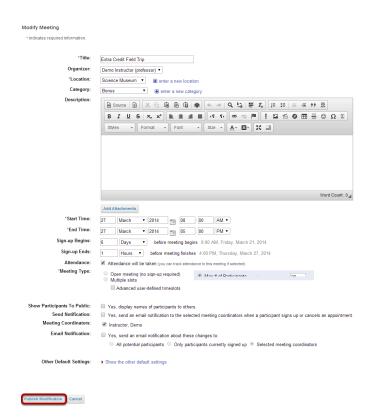

To change any of the initial settings of the meeting, use the **Modify** option shown at the top of Meeting Details.

Sakai 10 Instructor Guide

Page 890

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/bu/4.0/

#### Edit meeting settings and publish.

The information described in <u>How do I create a meetings?</u> will be shown for editing the settings of your choice.

The timeslots can be adjusted by selecting "Advanced user-defined timeslots" (if not already specified for this meeting), then selecting the "Edit Timeslots" link that appears; timeslots can be combined, removed, or added.

In a recurring meeting, you can choose to limit the change by selecting "Modify current only" or to modify all of the sessions in the rest of the series by selecting "Modify all future recurring meetings." After modifying a meeting, you may elect to send e-mail notification to participants via the checkbox above the timeslot table.

Click **Publish Modification** when you are finished making changes.

#### To lock or cancel a timeslot:

Sakai 10 Instructor Guide

Page 891

This work is licensed under a Creative Commons Attribution 4.0 Intl. License http://greative.commons.org/licenses/bu/4.0/

Click it in the timeslot table and use the options presented underneath it. Note that you can first move participants to another timeslot using the edit buttons beside individual entries as described above.

#### To copy a meeting:

Click on the meeting name to open the details, and then click the **Copy** link at the top. You now have a display entitled **Copy this meeting**. Change the settings as desired, including the title if you want a new meeting name, and then click **Publish New Meeting**.

Note: Some settings will not be available to edit. You cannot copy a multiple-slots meeting into a new single-slot meeting, for instance.

# How do students or participants sign-up for meetings?

#### Go to Sign-Up.

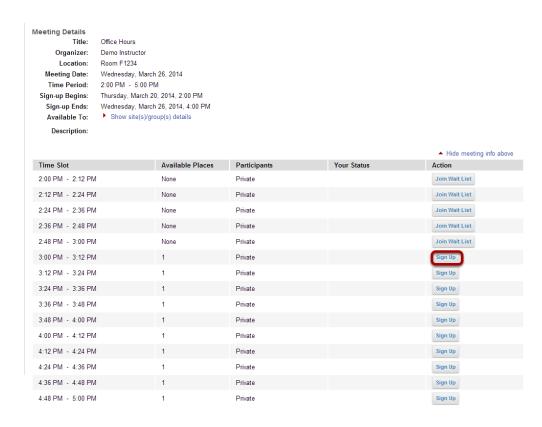

Select the **Sign-Up** tool from the Tool Menu of your site.

#### Click on a meeting title.

Note: If a Meeting Status message shows that the meeting is not yet open to sign-up, note the beginning sign-up time shown.

#### Click Sign Up.

Click the button labelled **Sign Up** beside the timeslot you want.

If the meeting is full and your instructor has given the Wait List option, you will be able to add your name to the Wait List by clicking Join Wait List. If space becomes available, you will be added to the list of attendees, and notified by email.

Notes: If your instructor has allowed, you will see a comment field where you can type a message, which is seen only by the instructor. If a lock icon appears in Meeting Details next to a timeslot, your instructor has removed that timeslot from further sign-up.

#### Add a comment. (Optional)

#### Complete Sign-Up

Office Hours Title: Room F1234 Location:

3:00 PM - 3:12 PM, Wednesday, March 26, 2014 Time Slot:

Participant Name: First Student

#### Click Finish.

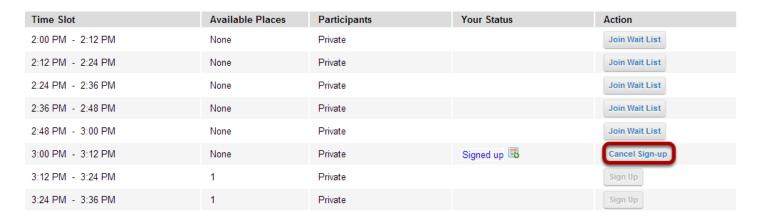

#### View your status.

Time Slot	Available Places	Participants	Your Status	Action
2:00 PM - 2:12 PM	None	Private		Join Wait List
2:12 PM - 2:24 PM	None	Private		Join Wait List
2:24 PM - 2:36 PM	None	Private		Join Wait List
2:36 PM - 2:48 PM	None	Private		Join Wait List
2:48 PM - 3:00 PM	None	Private		Join Wait List
3:00 PM - 3:12 PM	None	Private	Signed up	Cancel Sign-up
3:12 PM - 3:24 PM	1	Private		Sign Up
3:24 PM - 3:36 PM	1	Private		Sign Up

Once you have signed up, you will see **Signed up** in the **Your Status** column for this meeting.

# **Cancel Sign-up. (Optional)**

You may cancel any appointment you have signed up for, within the time period allowed by your instructor, by clicking the **Cancel Sign-up** button.

# How do I export meeting data?

The Export operation provides a rich set of data, in spreadsheet form, for a set of meetings or for a single meeting, including the list of those who have signed up.

The ".xls" file thereby created can be opened in Excel or some other spreadsheet application to show several sheets, as follows.

- Attendees' Schedules [for meeting organizers]: a datasheet with columns that show the meeting's details, with one row for each meeting attendee signed up.
- Events Overview: a chart of all meetings selected as they appear in the Meetings page.
- · For each meeting, a named sheet
- Chart showing the meeting title and details, plus a list of attendees [for users with that privilege], the wait list, and comments.

#### Go to Sign-Up.

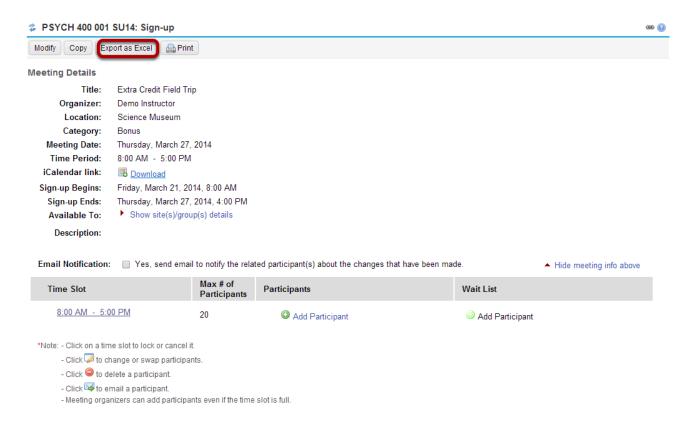

Select the Sign-Up tool from the Tool Menu of your site.

#### **Export a single meeting:**

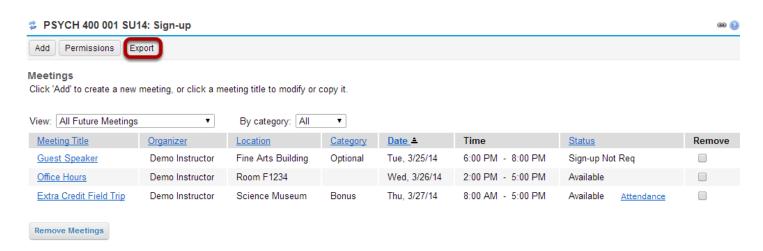

Click on the title of the meeting you want to export to view its details.

#### **Click Export as Excel.**

Click **Export as Excel** from the meeting details screen.

## **Export a set of meetings:**

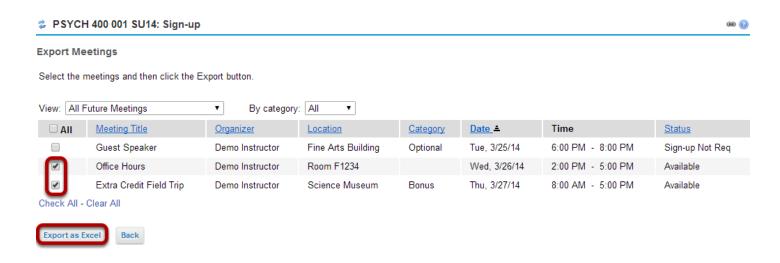

On the main Meetings page, click the **Export** link.

Sakai 10 Instructor Guide

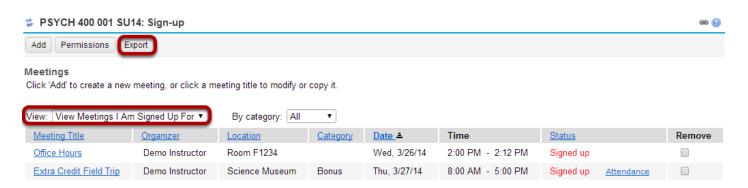

Page 897

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/bu/4.0/

#### Select the meetings desired, and click Export as Excel.

#### View All Meetings I Am Signed Up For.

An individual can select **View All Meetings I Am Signed Up For** to see scheduled commitments on the screen, and then select **Export** to save or print that list shown in the Events Overview sheet.

Sakai 10 Instructor Guide

# How can I use the Sign-Up tool in my site?

The Sign-up tool can be used in a variety of ways for teaching arrangements. The list below explains some, but is by no means exhaustive.

#### Schedule special office hours.

To hold an advance sign-up for special office hours on a problem set, including students from two different classes: Choose a day, define a block of time, set up multiple slots available to both sites' members, and then adjust the timeslots as desired. For example, suppose the instructor wants to schedule a 3-hour block of time for office hours with some 15-minute slots and some 30-minute slots and a 15-minute gap for a break. Here is the procedure:

- 1. Set up a 3-hour meeting called "Office Hours Problem Set" with 15-minute timeslots according to the "Multiple slots" instructions. In the "Available To" field, leave the current site checked and open the "Other Sites" list to check the other class's site (which must also have the Sign-up Tool), as well.
- 2. After publishing the meeting to get the initial allocation of timeslots, click the meeting name, and then click 'Modify,' check the box next to "Advanced user-defined timeslots" and click "Edit Timeslots."
- 3. Adjust the timeslots as needed. Edit the start and end times to change the time period to 30 minutes on some slots. Delete a 15-minute slot, to reserve a break time.
- 4. Invite the students of both classes to sign up. The entry will appear to them under a single title "Office Hours Problem Set" with several timeslots specified by start and end times.

#### Schedule in-class presentations.

To schedule in-class presentations either by individuals or groups:

- 1. Recurring Method: Set up a single-slot recurring meeting within the time of the class period. This method is easy, but it produces several separate meetings and allows an individual student to sign up for more than one presentation slot by mistake.
- 2. Multiple-slot Method: Create one meeting using "Advanced user-defined timeslots," specifying additional new timeslots for each class period as needed. This method requires more manual entries, but produces only one meeting with several date options, preventing an individual student from signing up for more than one.

In each case, ask the students to indicate the topics of their presentations by typing them in the comment area when they sign up.

#### Estimate attendees for a review session.

To get an estimate of how many students would attend a review session, set up a meeting with no limit on the number of participants who can sign up. This is useful in choosing a room of adequate size for the session.

#### Schedule a multi-day meeting.

To set up a two-day recurring meeting, use the "Advanced timeslots" and "Meeting frequency" options. For example, suppose a group of six pharmacy students on professional rotations in the field are to return to campus for consultations together on Friday afternoon and Saturday morning every other week, from April until the end of July. In the Pharmacy site, the meeting organizer sets it up according to this procedure:

- 1. Add a new meeting, entitled "Fri-Sat Campus Consult," with the appropriate location and description
- 2. Select the "Advanced user-defined timeslots" and specify the first week's timeslots, say, Friday April 1st, 4:00 6:00 PM, and Saturday April 2nd, 9:00 11:00 AM. The maximum enrollment value is irrelevant, as participants will be added manually. Delete extra timeslots via the red X.
- 3. For the meeting frequency, select "Biweekly" and specify an end date of Sunday July 31st.
- 4. Set the other parameters as appropriate for the circumstances (display names, use e-mail notifications, no wait lists, no comments, and so forth).
- 5. Select the button "Assign participants and publish" and select the participants for both timeslots, also checking the box "Yes, assign participants to the same timeslot for all occurrences." In each resulting meeting, if desired, select the timeslot and lock against further participant sign-up. (Note that the creation of a site group of the intended six students would allow association of the group by name, obviating this step.)

This creates a series of nine meetings under a single title, Fridays and Saturdays on alternate weeks, with the same group of participants.

#### Solicit input on preferred meeting dates.

To determine the best schedule for a series of meetings with a group of participants—for example, student tutorials-- define a weekly time by soliciting input from the participants on several choices. Select the optimal choice, and copy that timeslot across several weeks as a recurring meeting. When an exception must be handled, adjust that particular meeting according to the "Editing a meeting" instructions. Here is the detailed procedure:

1. Using a representative week, such as the first week of the term, create a new meeting for each possible timeslot across the various weekdays, and ask the participants to sign up for all candidate meetings that they can attend on a weekly basis. You might name these

- meetings "Tutorial Option Monday, 3-5", Tutorial Option Thursday, 9-11," and so forth. Select "single slot," and "unlimited participation" for these meetings.
- 2. When the sign-up period has ended (as you specified in the meeting details), find the best choice for the regular timeslot, one that includes all or most participants. Each meeting will have to be opened or exported to see the list of participants who signed up. Click the chosen candidate meeting and choose "Copy." (See above.) The "Meeting frequency" setting can be switched to Weekly, and the "End After" date set to the end of the term, producing a population of meetings across the desired duration. The rejected candidate meetings can be deleted with "Remove."
- 3. Any of the separate meetings generated by the multiple-slot definition can be can be modified, if it becomes necessary: To make the series visible, in the Meetings list, either expand it alone or select the checkbox labelled "Expand all recurring meetings." For the meeting in question, click on "Modify," and select "Modify current only" at the top of the page, as you change the time or date.

# How do I manually add users to meetings?

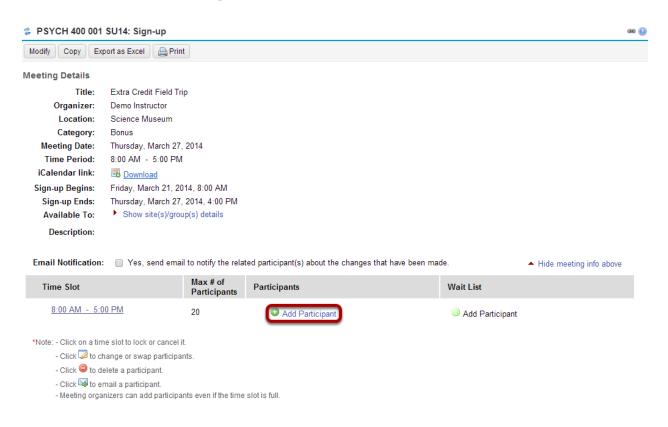

# Go to Sign-Up.

Select the **Sign-Up** tool from the Tool Menu of your site.

# Click on a meeting title.

# **Click Add Participant.**

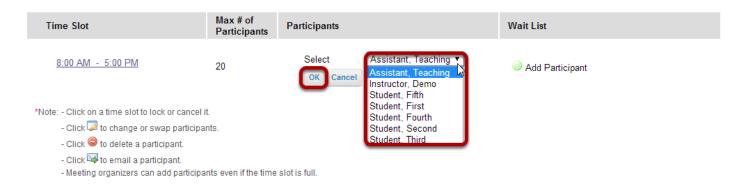

Sakai 10 Instructor Guide

Page 902

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# Select a user from the drop-down menu, then click OK.

# The user is now signed up for that meeting.

Names of those signed up will appear in the **Participants** column of the timeslots table, adjacent to the time slots they chose. A red "delete" button and a pencil-and-pad "edit" button, which allows that participant to be replaced with another, appears next to each name.

Note: The appearance of a small blue bubble icon to the right of the name means that the participant has added a comment at the time of sign-up, which can be seen by clicking on that icon.

Sakai 10 Instructor Guide

Page 903

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# How do I add meetings to the site Schedule or Calendar?

If you create a meeting without the Schedule tool on the site, but add the Schedule tool later, you can add each meeting individually to the Schedule's calendar:

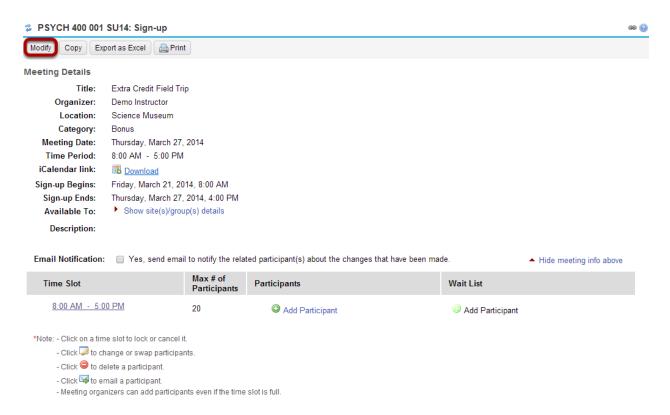

# Go to Sign-Up.

Select the Sign-Up tool from the Tool Menu of your site.

# Click on a meeting title.

# Click Modify.

To change any of the initial settings of the meeting, use the **Modify** option shown at the top of Meeting Details.

# Click Show other default settings.

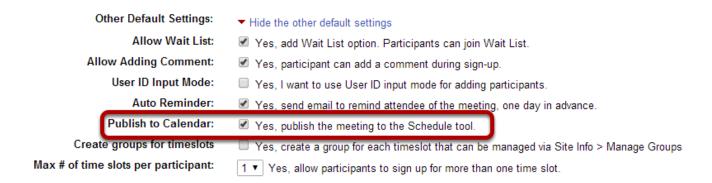

The information described in <u>How do I create a meetings?</u> will be shown for editing the settings of your choice.

Sakai 10 Instructor Guide

Page 905

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **Check Publish to Calendar.**

Select the check box next to **Publish to Calendar.** 

# **Click Publish Modification.**

# How do I modify Sign-Up tool permissions?

The set of permissions applies to the use of the Sign-up Tool across the site, not to any particular meeting. Permissions can be granted, by role,, with an interface for doing so that resembles that of other tools. The "Permissions" link shows, for each realm of grouping—(1) site (all members), and (2, 3, ...) group, for each group defined on that site, a labelled button that leads to an authorization matrix. For groups that do not include the site organizer as a member, the group button is not active in the Permissions settings and the site organizer cannot adjust the settings.

Only certain permissions in certain contexts are meaningful. The privilege "create.site" addresses creation of new meetings, so, if that box is checked in the "access" row, representing users with student status, students will have the "Add" link on their Meetings page. If "create.site" is not checked for the access role, but "create.group" is checked in the "access" row for a site group (defined in Site Info), then student members of that group will have the "Add" link, and be able to create meetings, for that group only. If groups are defined, the "view" and "attend" permissions must be checked for that group realm, as stated on screen, in order for group members to sign up. No adjustment will allow the Sign-up button to appear for meeting organizers. For more details, contact your system administrator.

# Go to Sign-Up.

Select the **Sign-Up** tool from the Tool Menu of your site.

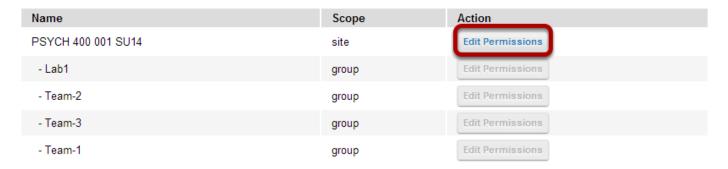

#### Click the Permissions button.

# Select the permissions you want to edit (e.g. site).

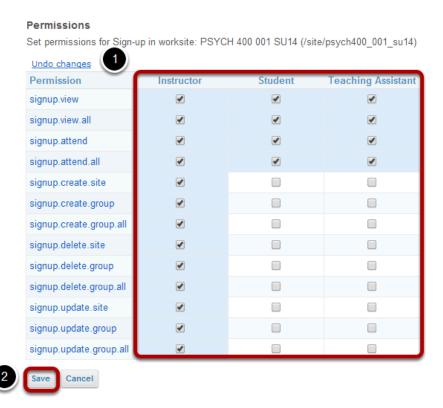

#### **Permissions Update**

For participants to view or attend a meeting open only to their specific group(s), you must grant the view and attend permission at the group realm level.

- \*Note:
- The Edit Permission button is only available to administrators or users with the realm.upd permission for the current site or group.
   Contact your system administrator to be granted this permission.
- In each group realm, only the permissions view, attend, create.group, delete.group and update.group can be modified. Other
  permission settings at this level do not apply and have no effect.

# Modify the permissions for the roles listed.

- 1. Check the box next to each permission you would like to allow for a given role. (Deselecting a box will remove the corresponding permission.)
- 2. Click **Save** to save your changes.

# Site Info

# What is the Site Info tool?

Site Info tool contains many of the course management features needed for instructors to customize and manage their courses. Instructors may edit and rearrange the tools on their course toolbar, add participants, manage groups, publish or unpublish their course, import content from another site, and track participant enrollment activity.

If you have limited site permissions (i.e. participant), you'll see only the site's description and your group memberships, if applicable, in Site Info.

Note: The functions of the Site Info tool are also available through the <u>Worksite Setup</u> tool, which is available from the Tool Menu when you are in My Workspace.

# To access this tool, select Site Info from the Tool Menu of your site.

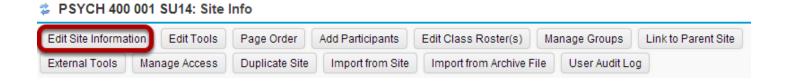

# How do I edit the site information?

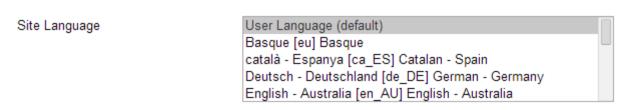

#### Go to Site Info.

Select the **Site Info** tool from the Tool Menu of your site.

#### Click Edit Site Information.

## Select site language.

If desired, you can change the default language for your site to any of the available languages listed. Languages in this list will vary depending upon the language pack(s) installed on your instance.

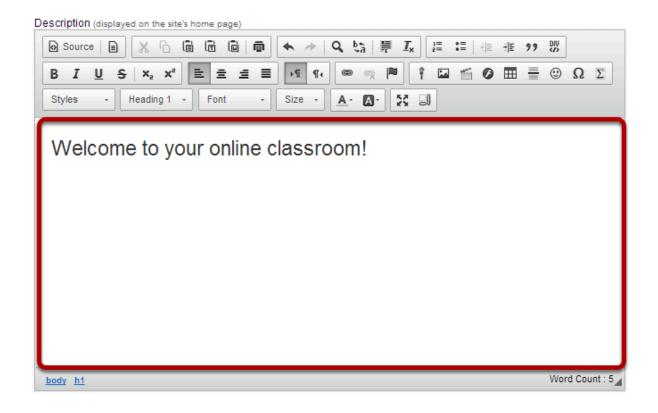

Click on the desired language to select it.

Sakai 10 Instructor Guide

Page 912

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

# Enter a site description.

The information entered into the description area will appear on the site's home page. You may use the Rich Text Editor here to enter your description.

# Enter a short description.

Short Description (displayed in publicly viewable list of sites. Max 80 characters) Psych 400 online class

You may also enter a short description (with a maximum of 80 characters). This short description will display in the publicly viewable list of sites.

## Select a theme.

Appearance (Theme) Site will display this theme. If your instance has a selection of themes or "skins" installed, you may select a theme from the drop-down menu. The theme controls the banners, colors and images displayed throughout your site.

## Enter the site contact information.

Site Contact Name
 Site Contact Email

Enter the name and email address for the site contact. (This is typically the site creator, owner, or instructor.)

#### Click Continue.

Click **Continue** to save your changes.

# How do I choose which tools will be available in my course?

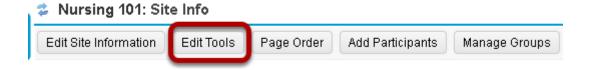

Sakai has many different tools available to use in your course or project site. You may choose which tools you want to use and may add or remove tools at any point.

#### Go to Site Info.

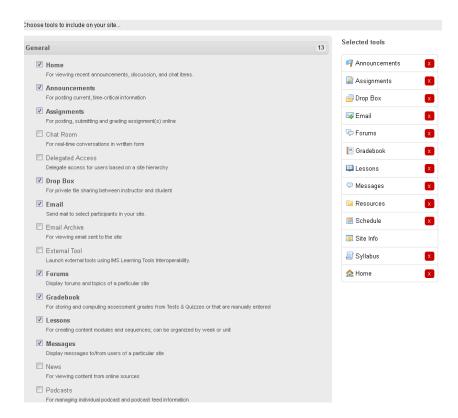

Select the **Site Info** tool from the Tool Menu of your site. Site Info offers several options for managing your course site.

#### Click Edit Tools.

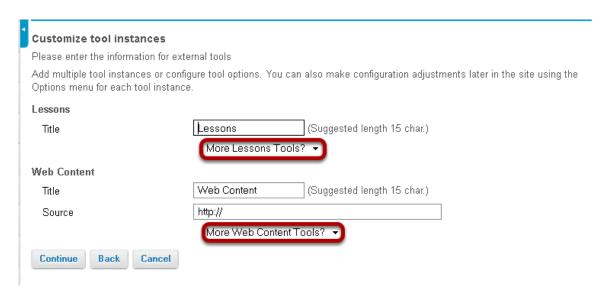

# Select your set of tools.

As you select tools from the "General" list on the left side of the screen, they are added to the "Selected tools" list on the right side of the screen. The right side of the screen displays the tools you have selected.

# Add multiple instances of some tools. (Optional)

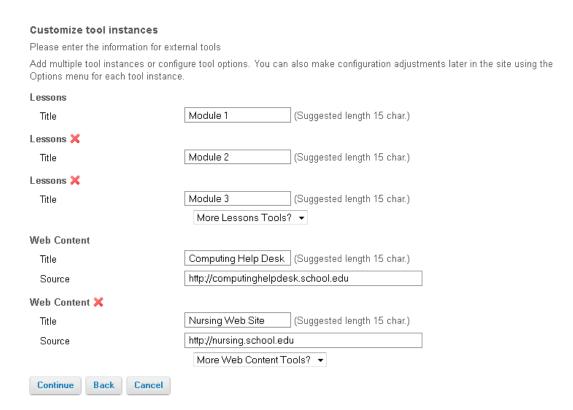

The Lessons tool may be used as a single tool on the Tool Menu where students click to see all Lessons, or there can be multiple Lessons tools added to the Tool Menu so that each tool is a separate Lesson. See the <u>Lessons tool tutorial</u> for more information.

The Web Content tool points to any URL you enter and you may create as many of these as you want.

Click on the **More Lessons Tools?** or **More Web Content Tools?** drop-down menus to add additional instances of these tools.

#### **Example: Multiple tool instances.**

The example above shows three Lessons tools (Module 1, Module 2 and Module 3) and two Web Content tools (Computing Help Desk and Nursing Web Site).

## **Click Continue.**

Once you have made all of your tool selections, scroll down and click **Continue**.

#### **Confirm tool selection**

#### Confirming site tools edits for Nursing 101

```
You have selected the following for your site (added tools highlighted):
```

```
Home (Home)
    Announcements (Announcements)
    Resources (Resources)
    Assignments (Assignments)
    Drop Box (Drop Box)
    Chat Room (Chat Room)
    Computing Help Desk (Computing Help Desk) ( http://computinghelpdesk.school.edu )
    Site Info (Site Info)
    Email (Email)
    Forums (Forums)
    Module 1 (Module 1)
    Module 2 (Module 2)
    Module 3 (Module 3)

Click **Save** at the bottom of the screen to save your reorder.

#### **Hide Tools from students**

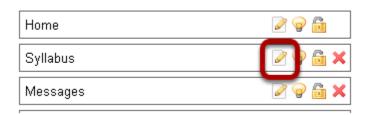

Click the light bulb icon to hide a tool. Click it again to make the tool available again. The gray light bulb means the tool is hidden from students. \ The yellow light bulb means the tool is visible to students.

# Example: Toolbar with hidden tools from the instructor's view

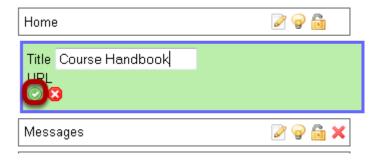

Site Info and Resources are hidden from students but appear to the instructor in italics.

#### **Rename Tools**

The pencil icon allows you to rename a tool. Click the pencil icon to open the edit screen.

#### Type the new name for the tool.

In this example, the Syllabus tool was renamed as the Course Handbook. \ Click the green check mark to save your work

#### Disable a tool.

The padlock tool disables a tool for student use. If I disable the Announcements tool, students will not be able to access it by any means. The tool is automatically hidden in the Tool Menu if it is disabled. The padlock appears closed if the tool is disabled, and open if the tool is usable by students.

#### Remove a tool.

The red X icon removes the tool from the Tool Menu. It has the same affect as removing a tool using the Edit Tools option in Site Info.

# Save your work.

Click the **Save** button at the bottom of the list to save your changes.

# How do I add users to my course or project?

For most institutions, student enrollment for registered courses is handled automatically through integration with the institutional student information system. However, if your institution allows site owners to add other participants such as TAs, Designers, etc., this article will walk you through the steps on how to add users.

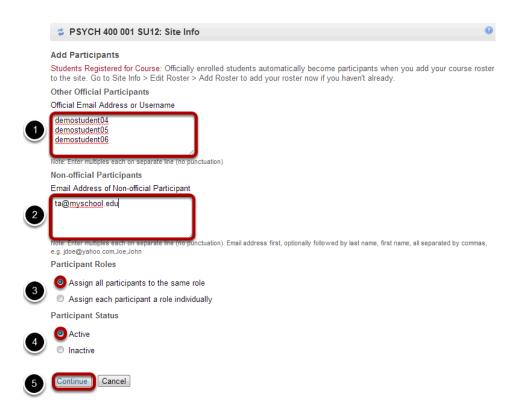

#### Go to Site Info.

Select the **Site Info** tool from the Tool Menu of your site.

## **Click Add Participants.**

# Add participant information.

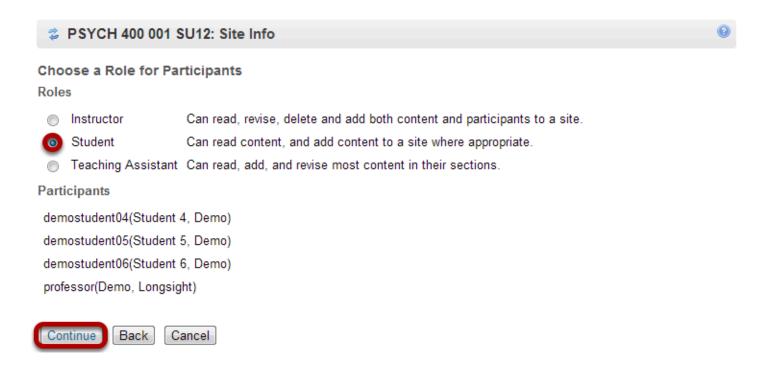

Sakai 10 Instructor Guide

Page 923

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

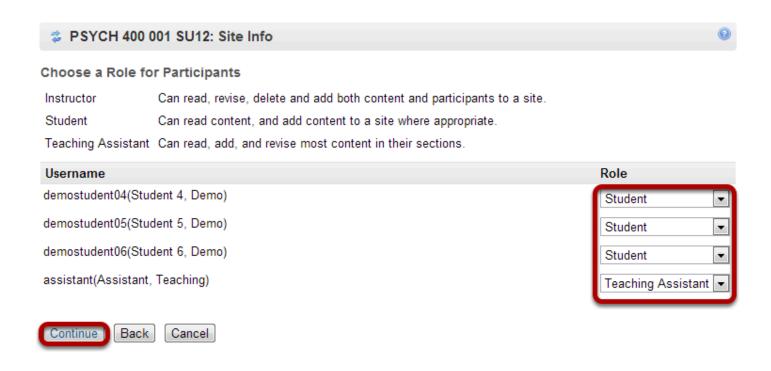

- 1. For participants with official usernames, under "Other Official Participants", type each participant's username, one per line.
- 2. For participants without official usernames, under "Non-official Participants", enter their email addresses, one per line.
- 3. Under "Participant Roles", choose whether to give all your newly added participants the same role or different roles (i.e. student, instructor, TA, etc.).
- 4. Under "Participant Status", choose whether to let your newly added participants use the site right away by selecting **Active**, or keep them from accessing the site for now by selecting **Inactive**.
- 5. Click Continue.

# Choose participant role.

For the default option of **Assign all participants the same role**, select the radio button for the desired role and then click **Continue**.

## Select individual participant roles.

If you chose to **Assign each participant a role individually**, use the drop-down menus to the right of the participants names to select each participant's role, and then click **Continue**.

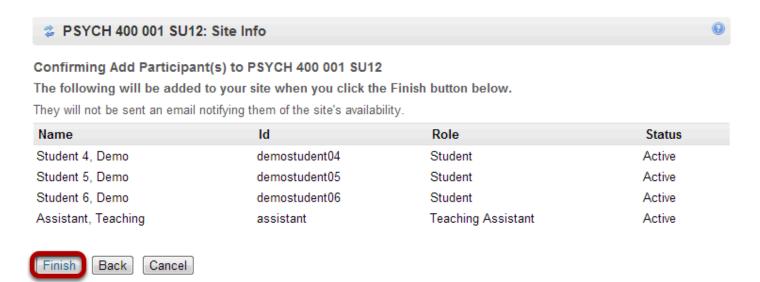

#### Choose to send or not send a notification email.

You may choose the **Send Now** option to send a notification email to participants if desired. The default setting is **Don't send**.

Click the **Continue** button.

# Confirm addition of participants.

Review the list of site participants and their roles to confirm that they will be added to your site. If the information is correct, click the **Finish** button.

Sakai 10 Instructor Guide

# How do I remove users from my course or project?

Note: Sakai does not destructively delete user data when removing users from a site. Therefore, if you remove a user from your site, and then later reinstate that user, all of the user's activity within the site will remain intact once you add the user back into the course or project.

#### Go to Site Info.

Select the **Site Info** tool from the Tool Menu of your site.

# Select user(s) to remove.

In the **Remove** column, check the box in the row for the user(s) you want to remove from your site.

Tip: You can remove all users from the site by checking the box at the top of the column right next to the Remove column header. However, be sure that you uncheck yourself so you don't remove your own access!

## **Click Update Participants.**

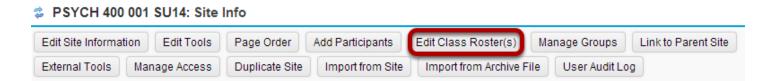

# How do I add a class roster?

Note: Permissions for adding or deleting rosters in a given site may vary depending on your system's institutional enrollment implementation. In most cases, adding rosters by class or section is subject to automated roster updates.

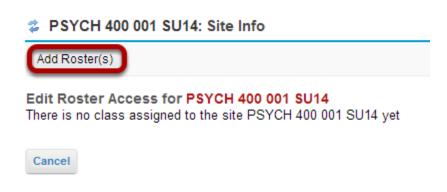

#### Go to Site Info.

Select the **Site Info** tool from the Tool Menu of your site.

#### **Click Edit Class Rosters.**

#### Click Add Roster.

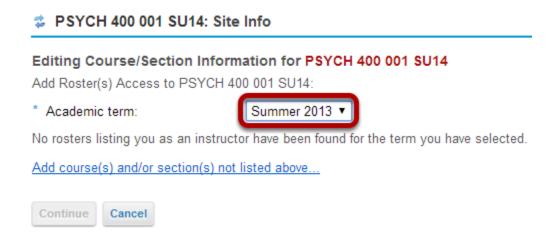

Sakai 10 Instructor Guide

# Select the term and class(es).

From the drop-down menu, select the appropriate academic term.

If you are listed as the instructor of record for certain courses in your course catalog, those courses and their sections will be listed.

## Or, select to add courses not listed above.

- 1. Select the Subject.
- 2. Select the Course.
- 3. Select the Section.

Sakai 10 Instructor Guide

Page 929

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/bu/4.0/

- 4. If you are not listed as the instructor of record for a course, enter the instructor's username. An email message requesting the instructor's authorization for the site will be sent.
- 5. You have the option of adding any information that may facilitate the authorization of your site request.
- 6. Click **Continue** to add the roster.

Tip: If you have more rosters to add, click on the **Save and add another section** link to add additional sections.

# Click Add Class(es).

#### Request Site Access: PSYCH 400 001 SU14...

Please confirm the addition of the following sections to your class site.

#### Class Information

The following class(es) were already assigned to this site:

You have indicated the following class(es) to add to this site:

Discussion 1 SMPL101 (Requested)

# How do I create groups?

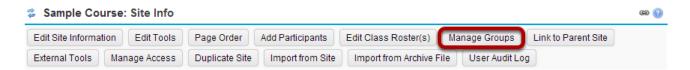

You may create groups in your site in several different ways:

- Manually create and assign users to a group.
- Create joinable groups that site participants can elect to join.
- Automatically generate groups by user role, number of groups per site, or number of users per group.
- · Import group information from a file.

#### Go to Site Info.

Select the **Site Info** tool in the Tool Menu of your site.

# Click on Manage Groups.

Click on the Manage Groups button.

# Manually create a group.

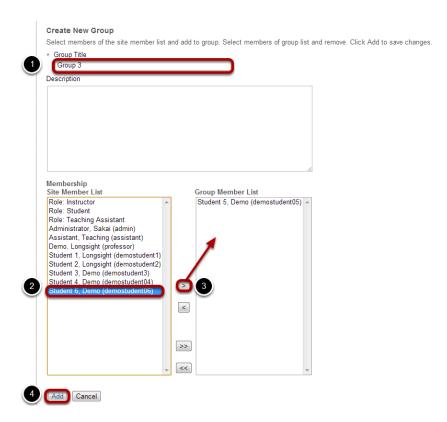

Click the **Create New Group** button.

Sakai 10 Instructor Guide

Page 932

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## **Enter group information.**

- 1. Enter a title for the group.
- 2. In the Site Member List, click on a site participant/s in the membership list to select the user/s.
- 3. Click on the right arrow button > to move the selected participant/s over to the Group Member List area.
- 4. Once you have indicated all of the desired group members, click on the **Add** button to create the group.

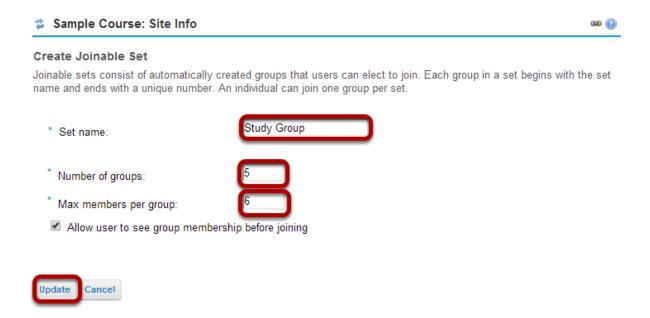

Tip: You may select more than one name at a time in the participant list by using SHIFT+Click to select a range of consecutive names, or CTRL+Click to select more than one non-consecutive name.

# Create a joinable group.

Click the Create New Joinable Set button.

## Specify the joinable set details.

You will need to enter a **title** for the set of groups. Each group will begin with the same name and end with a unique number. Also, you need to indicate the **number of groups** and **max members per group** for the site. Optionally, you may select the **Allow users to see group membership before they join a group** checkbox.

# Automatically generate groups.

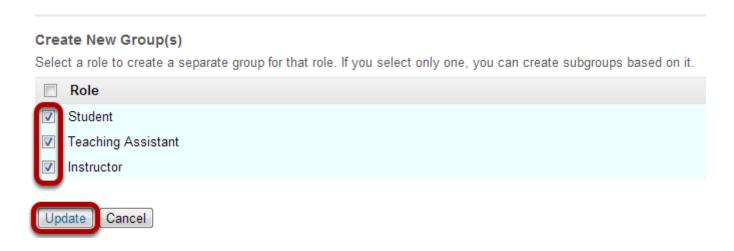

Click on the **Auto Groups** button.

Sakai 10 Instructor Guide

Page 934

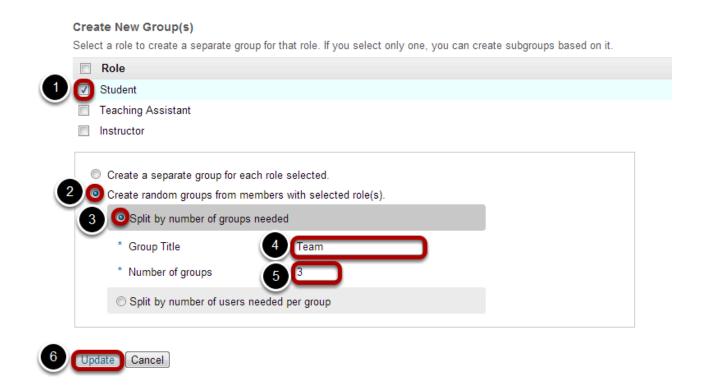

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Create groups by role.

To create separate groups for different user roles in the course, select one or more roles and then click **Update**.

#### Create random groups by number of groups.

- 1. Select a single role from which to create subgroups (e.g. Student).
- 2. Select the **Create random groups from members with selected role(s)** radio button.
- 3. Select the **Split by number of groups needed** radio button.

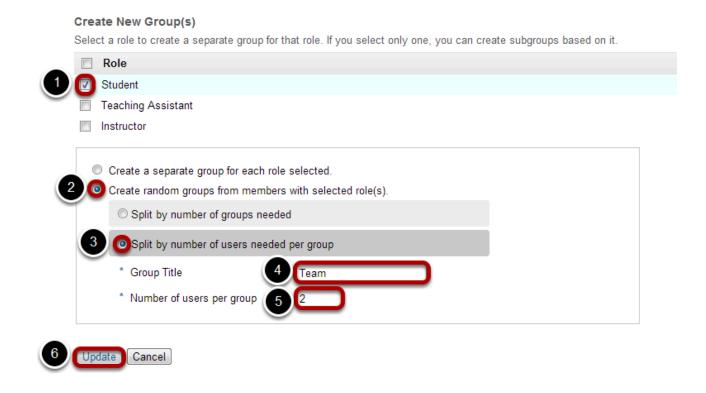

Sakai 10 Instructor Guide

Page 935

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

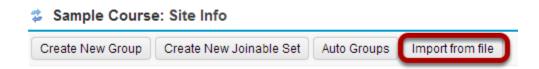

- 4. Enter a **Group Title**. This title will serve as the basis for all of the group names. Numbers will be appended to the title.
- 5. Enter the **Number of groups** you would like to have for the site. Users will be randomly assigned to each group and distributed as equally as possible.
- 6. Click the **Update** button to auto-generate your groups.

#### Create random groups by number of users per group.

- 1. Select a single role from which to create subgroups (e.g. Student).
- 2. Select the **Create random groups from members with selected role(s)** radio button.
- 3. Select the **Split by number of users needed per group** radio button.
- 4. Enter a **Group Title**. This title will serve as the basis for all of the group names. Numbers will be appended to the title.
- 5. Enter the **Number of users per group** you would like to have. Users will be randomly assigned to each group and the number of groups is determined by the class size divided by number of users per group.
- 6. Click the **Update** button to auto-generate your groups.

# Import from file.

Sakai 10 Instructor Guide

Page 936

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/bu/4.0/

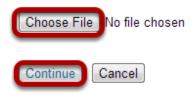

Click on the **Import from file** button.

#### Choose file.

Upload a file containing the groups you wish to create

#### File requirements

- . The CSV file should contain the group details in the columns: group title, username.
- · Columns must be in the order above, but do not include a row of column headers.
- Fields must be comma separated, contain no spaces between fields and each field surrounded with double quotes if it is to contain a space.

Click the **Choose File** button to browse for and select your import file.

Your import file should be in comma-separated (CSV) format with two columns of data. The first column should contain the group title, and the second column should contain the username of the site participant. Do not include a column header row and do not include spaces.

Once you have uploaded your file, click **Continue**.

# How do I link to a parent site?

Parent sites can be useful in managing large courses with many sections, or a program that has a central site.

For example: Course ABC1234 has 15 sections. There are three TAs in this course who are each managing five sections. There can be a parent course called ABC1234 and then three child courses (Sections 1234,2345,3456; Sections 4567,5678,6789; Sections 7891,8912,9123). TAs are assigned only to the sections they manage. The content, announcements, communications, etc., can take place at the parent course level. Graded items and gradebooks will be housed at the child course level.

Or another example: The Nursing program has a site where all nursing students get information and communicate with program administrators. This site would be the parent site and each of the 15 Nursing courses can be child courses to the parent site.

Note: Participants will only access the sites in which they are enrolled. So in the Nursing example above, students would only see the nursing courses in which they are enrolled, and the parent site. They would not see the other Nursing child courses in which they are not enrolled. In the ABC1234 example, students would only see their own child courses and the parent site, not all three child courses.

#### Go to Site Info.

Select the **Site Info** tool from the Tool Menu of your site.

#### Click Link to Parent Site.

Sakai 10 Instructor Guide

Page 938

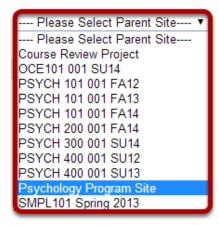

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# Select the parent site from the drop-down menu.

Linking this site to a parent site does not affect membership or permission or tool behavior or tool content in either the parent or child sites. Linking to a parent site simply means that for users who are members of both sites and have permission to view both sites, they will see navigation hints and breadcrumb navigation showing site links between the parent and child sites. A site can have many child sites pointing to it, but a child site can have only one parent.

#### Click Set Link.

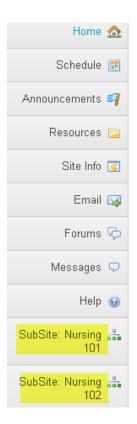

Linking this site to a parent site does not affect membership or permission or tool behavior or tool content in either the parent or child sites. Linking to a parent site simply means that for users who are members of both sites and have permission to view both sites, they will see navigation hints and breadcrumb navigation showing site links between the parent and child sites. A site can have many child sites pointing to it, but a child site can have only one parent.

Psychology Program Site

Set Link Cancel

# Example: Parent/child sites in the parent site.

In the parent site, the child courses show up in the Tool Menu.

# Example: Parent/child sites in the child site.

In the child site, the link the parent site is above the Tool Menu.

# How do I control site access?

#### Go to Site Info.

Select the **Site Info** tool from the Tool Menu of your site.

# **Click Manage Access.**

# Select your Site Status (i.e published or unpublished).

# Site Status Publishing your site makes it available to the site participants. Publish site Leave as Draft - accessible only to site maintainers

Published sites are available to all site participants. If the site is left as draft, or <u>unpublished</u>, only instructors/site owners may access it.

# Select your Site Visibility setting.

# Site Visibility Your site's existence can be kept private, or it can be listed (along with any items in it you make public) Private Display in public site list

If site visibility is set to **Display in public site list**, all people with access to the Sakai system may search for your site from the <u>Worksite Setup</u> tool. If set to **Private**, your site will not show up in a search.

# **Select your Global Access setting.**

#### **Global Access**

Global access settings allow you to decide who has access to your site once it is published.

In addition to the participants you've added, you can open your site so that anyone with a valid login can join it.

- Limited to whom I add manually, or through automatic roster updates
- Allow anyone to join the site with valid login id

In most cases, site owners keep the default value for **Limited to whom I add manually, or through automatic roster updates**. This will restrict enrollment to people that you add or that are enrolled automatically from your institution's registration system.

If the site is set to **Display in public site list** (above) AND the option **Allow anyone to join the site with valid login id** is selected, anyone in your system may search for and join your site.

# How do I duplicate a site?

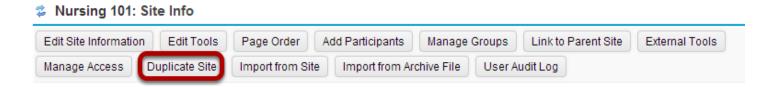

Duplicating a site makes an exact copy of the content of your current site. Student participation and grades are NOT copied to the duplicate site.

Note: Your institution may or may not have this option enabled.

#### Go to Site Info.

Select the **Site Info** tool from the Tool Menu of your site.

# **Click Duplicate Site.**

#### Enter a title for the new site.

# Click Duplicate.

Click **Duplicate**. The new site is added to your list of sites. You will be automatically enrolled in the new site as the site owner. No one else will be enrolled automatically so other users will need to be enrolled.

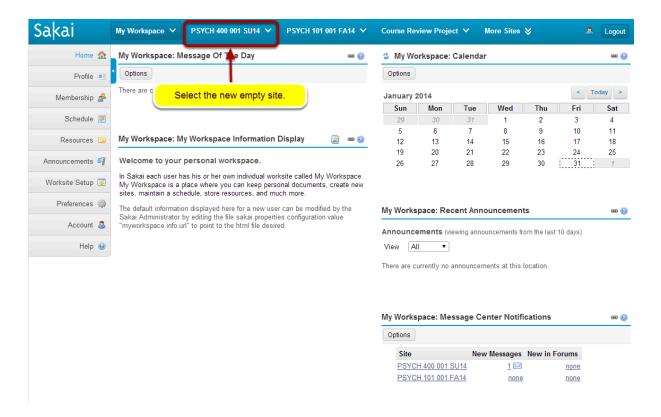

Sakai 10 Instructor Guide

Page 943

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# How do I copy my content from one site to another?

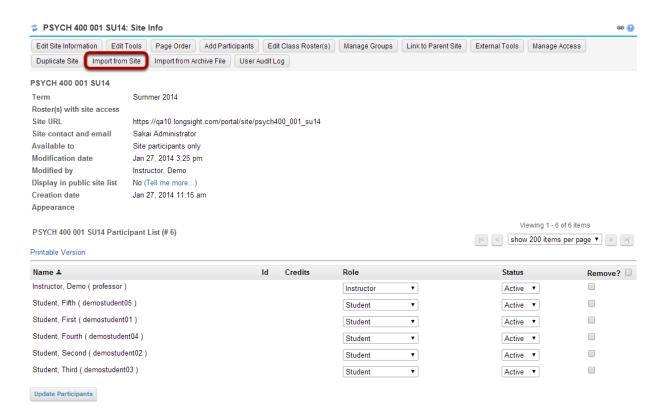

Navigate to the new, empty site where you would like to copy the content.

Be careful to select the empty course shell that will be the destination for the content you are about to copy. (You do not want to overwrite an existing course with a blank site, as this will delete your content.)

Select the Site Info tool in the Tool Menu.

# Select the Import from Site button.

# Click the "I would like to replace my data" link.

#### **Import Data**

Please choose a method below to proceed:

#### I would like to replace my data

Any existing data will be overwritten, replaced by your import data. This method allows you to import Gradebook settings.

#### I would like to merge my data

Your imported data will merge with existing data. This method does not import Gradebook settings.

#### I would like to merge my user(s)

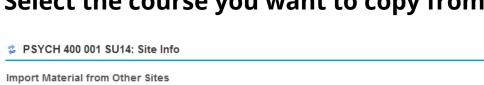

Your imported user(s) will merge with existing users. This method does not import roster-provided users.

Selecting the option to replace your data will transfer your site content, as well as your Gradebook settings.

Tip: If you have existing content that you do not want to overwrite, or if you do not want to import Gradebook settings, you could choose the "merge my data" link instead.

Sakai 10 Instructor Guide Page 945

# Select the course you want to copy from.

You can replace material in one of your sites by importing material from another site that you own. Any existing data will be overwritten, replaced by your import data.

Course Review Project

Import Material from Other Sites

- PSYCH 101 001 FA12
- PSYCH 101 001 FA13
- PSYCH 101 001 FA14
- PSYCH 200 001 FA14
- PSYCH 300 001 SU14

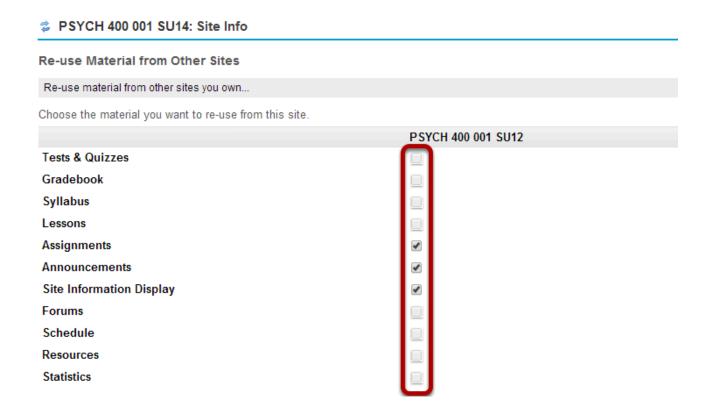

PSYCH 400 001 SU13

#### Click Continue.

# Choose the material you would like to copy.

You may select all of the tools or a subset of tools if you prefer. Only tools that are active in the current site are shown in this listing. If a tool selection box is grayed out, that means that the tool is not active in the other site. A tool must be active in both sites in order to be copied.

### Click Finish.

Once you have made your tool selections, click **Finish** to complete the import.

Note: The content import process may take a while depending on how much content you have, or if your institution has a queue for course imports on the server. Please wait for the process to finish.

Sakai 10 Instructor Guide

Page 947

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# How do I import content from an archive file?

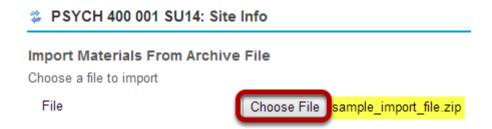

#### Go to Site Info.

Select the **Site Info** tool from the Tool Menu of your site.

# **Click Import from Archive File.**

# Choose a file to import.

Click the **Choose File** button to browse for and select your import file. Once you have located your file, the filename will display on this screen.

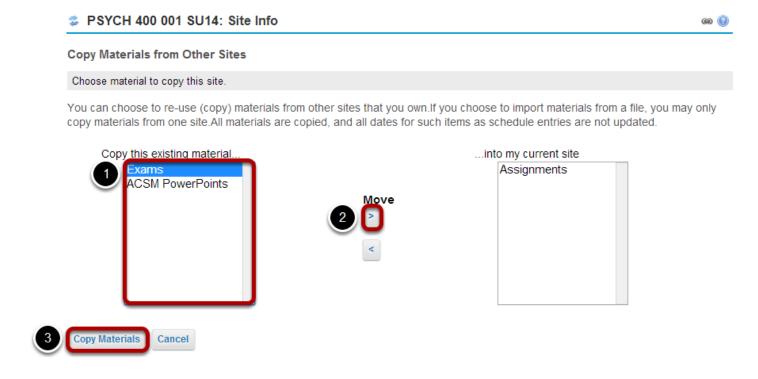

Note: Sakai supports several import file types (e.g. IMS Common Cartridge Archives, Blackboard Archive files, etc.). However, you may need to check with your system administrator to determine the file import options currently enabled on your system and the best file format for you to use.

# Click Import.

Click the **Import** button and wait for the file to be uploaded and processed. Depending on the size of the file, this may take some time.

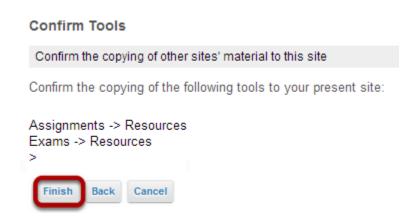

# Select the content to be imported.

You will see a list of content types from your import file on the left.

- 1. Click on the item you want to import to select it. (You may select multiple items using CTRL+Click for PC or CMD+Click for Mac).
- 2. Use the right pointing arrow button under **Move** to move the item(s) over to the list of material to be imported.
- 3. Click **Copy Materials** to import the selected content.

# Confirm the import.

Sakai 10 Instructor Guide
Page 949

# What is the User Audit Log?

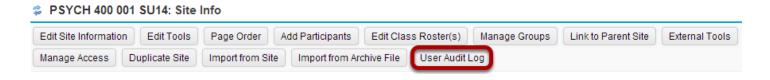

The User Audit Log displays manual enrollment and user update information for your site. If anyone adds a user, removes a user, or changes a user's role in the site, a log of the change will be noted here.

Note: Currently this log displays add/remove/update events, for manually updated events only. It does not display automated course enrollment activity such as events handled via Web Services or other SIS integration.

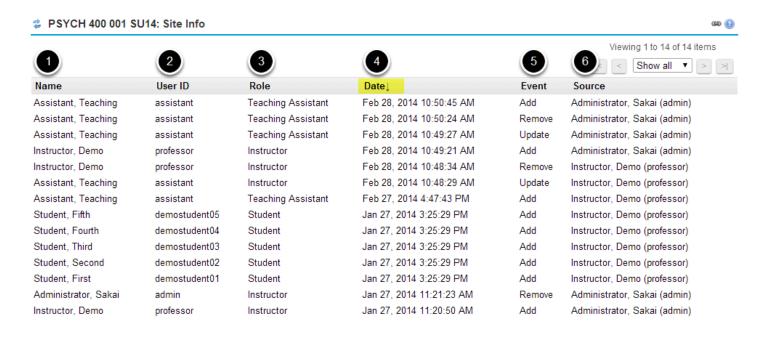

#### Go to Site Info.

To access this feature, select the **Site Info** tool from the Tool Menu of your site.

# Click User Audit Log.

#### View event information.

The following information will display:

- 1. **Name**: The name of the user account that was modified.
- 2. **User ID**: The user id of the user account that was modified.
- 3. **Role**: The role of the user account that was modified.
- 4. **Date**: The date and time that the change was made.
- 5. **Event**: The type of change that was made to the account (i.e. add user to course, remove user from course, or update user role).
- 6. **Source**: The name and user id of the account that initiated the event.

Note: You may sort by any of the columns by clicking on the column heading. Click on the heading again to sort in the opposite direction (ascending/descending).

# **Statistics**

# What is the Statistics tool?

The Statistics tool allows authorized users (typically instructors or site owners) to view site usage statistics and user activity events.

Summary statistics can be viewed the initial tool landing page. These summary reports present a quick overview of site usage. Additionally, custom reports may be created on the Reports page for more detailed reporting.

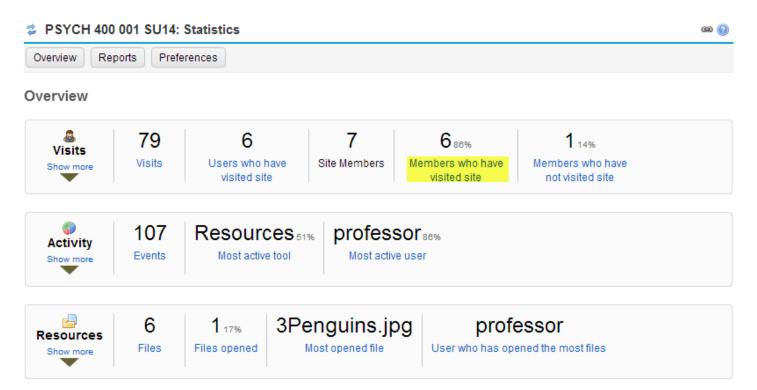

# To access this tool, select Statistics from the Tool Menu of your site.

# How do I view summary reports in the Statistics tool?

Note: Depending on the system configuration, statistics may be updated instantly or on a regular time interval (e.g., once per day). Also, site visits and/or presence time in site may not be enabled on the system. (Ask the system administrator to enable these items if needed.)

# **View Overview reports.**

Summary reports are displayed on the Statistics tool landing page for Visits, Activity, and Resources.

The following information is displayed for **Visits** from the Overview page:

- Visits: Total number of site visits.
- Users who have visited site: Total number of distinct users that visited the site.
- Site members: Total number of users that are member of the current site.
- **Members who have visited site**: Total number and percentage of users that are site members and have visited the site. This number may be different from Unique Visits if there are visits from users that are no longer members of the site.
- Members who have not visited site: Total number and percentage of users that are site
  members and have not visited the site.

Sakai 10 Instructor Guide

Page 954

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

Average presence time per visit: Average time an user stays present on the site, per visit.

The following information is displayed for **Activity** from the Overview page:

- **Events**: Total number of site activity events (from the list specified on the tool Preferences page).
- **Most active tool**: The tool that generated most events (from the list specified on the tool Preferences page). Hovering the mouse over the value will display the full tool title.
- **Most active user**: The user that generated most events (from the list specified on the tool Preferences page). Hovering the mouse over the user EID will display the full user name.

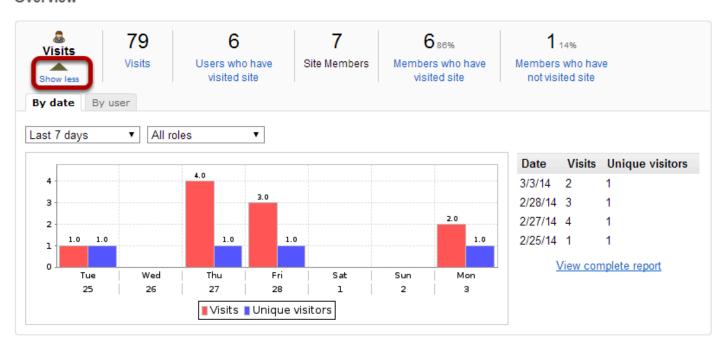

The following information is displayed for **Resources** from the Overview page:

- Files: Total number of existing site files (folders excluded) from the Resources tool.
- **Files opened**: Total number and percentage of site files (folders excluded) from the Resources tool that were already opened for reading.
- **Most opened file**: The site file (from the Resources tool) that were most opened for reading. Hovering the mouse over the value will display the full resource file name.
- **User who has opened the most files**: The user that opened most site files (from the Resources tool) for reading. Hovering the mouse over the user EID will display the full user name.

Note: A more detailed report can be obtained by clicking on any of the items above (e.g., clicking on **Members who have not visited site** will display a report of all site users that never visited the site).

#### View Visits details.

#### Overview

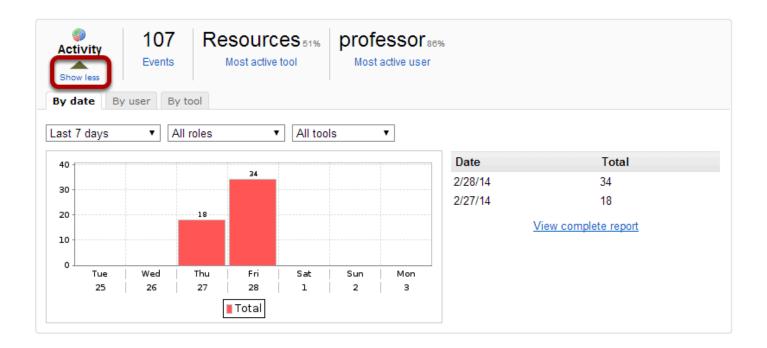

Clicking the **Show more/less** link will expand or collapse the Visits report. The act of entering a site is considered a site visit.

Clicking the **Show more** link will present a chart and table view for a quick view of visits statistics.

- Clicking **By date** or **By user** will group statistics by date or user, respectively.
- Selecting Since site creation, Last 365 days, Last 30 days or Last 7 days will filter statistics accordingly.
- Clicking on the chart image will produce a maximized version of the image.
- Clicking on View complete report will display the full data for the current displayed statistics.

Note: On the same login date, if an user enters/exits the same site multiple times only one visit will be recorded.

#### View Activity details.

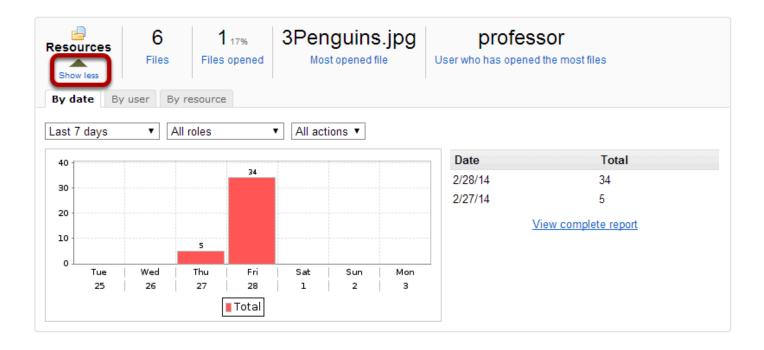

Clicking the **Show more/less** link will expand or collapse the Activity report. Events generated by tool actions (e.g., new chat message, resource opened, etc.) are considered activity.

Clicking the **Show more** link will present a chart and table view for a quick view of activity statistics.

- Clicking on By date, By user or By tool will group statistics by date, user or tool, respectively.
- Selecting Since site creation, Last 365 days, Last 30 days or Last 7 days will filter statistics accordingly.
- Clicking on the chart image will produce a maximized version of the image.
- Clicking on View complete report will display the full data for the current displayed statistics.

Sakai 10 Instructor Guide **Page 956** 

#### View Resources details.

Clicking the **Show more/less** link will expand or collapse the Resources Overview report. Any file/folder item related activity (new, open, edit or delete) will display in this report.

Clicking on **Show more** link will present a chart and table view for a quick view of resource activity statistics.

- Clicking on By date, By user or By resource will group statistics by date, user or file, respectively.
- Selecting Since site creation, Last 365 days, Last 30 days or Last 7 days will filter statistics
  accordingly.
- Clicking on the chart image will produce a maximized version of the image.
- Clicking on View complete report will display the full data for the current displayed statistics.

Note: On the Overview page, resource statistics refer to files from the Resources tool only.

# How do I create and run a report?

#### Go to Statistics.

Select the **Statistics** tool from the Tool Menu of your site.

# **Click Reports.**

#### Click Add.

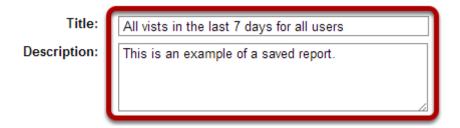

# Title your report.

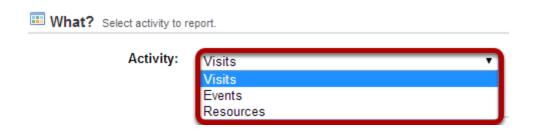

If you plan to save your report, you will need to title it. Click on the **Show** link next Report to expand and display the title and description area.

# **Enter a title and description. (Optional)**

#### **Select What?**

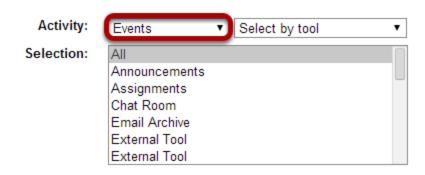

This option allows to configure the type of activity to report. You can choose to report on Visits, Events, or Resources.

#### **Visits**

Select **Visits** to report on site visits.

#### **Events**

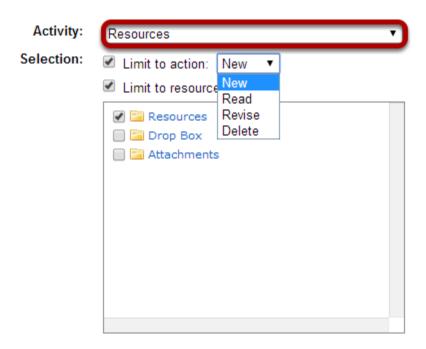

Sakai 10 Instructor Guide

Page 959

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Select **Events** to report on activity (either by tool or by event). Click on the desired tools/events in the list of tools displayed. You may also select **All** to display events for all available tools.

#### Resources

Select **Resources** to report on file/folder activity. This selection can be filtered by:

- **Action**: New (file uploaded/folder created), Read (file opened for reading), Revise (file details or contents changed) or Delete (file/folder deleted).
- Resources: Restricts report to selected files/folders or to files under selected folders.

#### Select When?

This option allows to configure the time period to report.

- All: All activity since site creation.
- Last 7 days: Activity from the last 7 days.
- Last 30 days: Activity from the last 30 days.

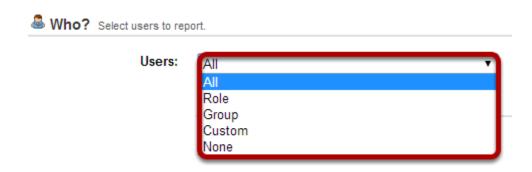

Sakai 10 Instructor Guide

Page 960

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

- Last 365 days: Activity from the last 365 days.
- **Custom**: Activity from a user-specified date interval.

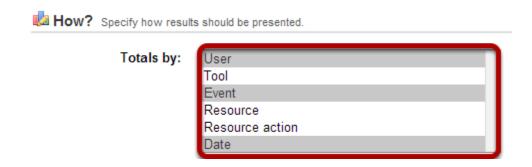

#### Select Who?

This option allows to configure the users to report.

- **All**: All site users.
- **Role**: Users with the a user-specified role.
- **Group**: Users with the a user-specified group.
- **Custom**: Users selected from the presented list. Multiple users can be selected pressing the CTRL (for disjoint selection) or ALT (for range selection) keys while clicking with the mouse.
- **None**: To report users that doesn't match all the specified report conditions (e.g., selecting "Visits" + "All" date + "None" will report users that never visited the site).

#### **Select How?**

This option allows to configure how the report will be presented. **Totals by**: Defines how to group report data (eg, selecting "User" + "Date" will present a report grouped by user and date). Multiple fields can be selected pressing the CTRL (for disjoint selection) or ALT (for range selection) keys while clicking with the mouse.

- **Number of results**: Allows to limit the number of report results.
- **Presentation**: Defines how the report will be presented (table and/or chart).
- Chart type: Defines the type of chart to be presented (bar, pie or timeseries (line or bar)).
- **Chart data source/Chart series source**: Defines the main source of chart data. Only fields selected on Totals by will be selectable.

Sakai 10 Instructor Guide

Page 961

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

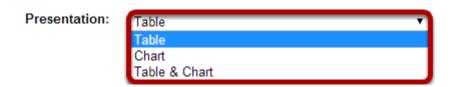

• **Grouped by**: (Bar chart only) Defines the grouping field for chart data. Only fields selected on Totals by will be selectable.

# **Limit number of results. (Optional)**

Number of results: 

Limit to: 20

#### **Select Presentation format.**

# **Click Save Report.**

Click **Save Report** to save this report to your list of custom reports.

Tip: If this is a one-time report that you do not want to save, you may select Generate Report instead to run it without saving.

# Click on the report title to run the report.

# My reports My reports Private reports, available for this site only. Add All vists in the last 7 days for all users This is an example of a saved report. Edit | Duplicate | Delete

# How do I modify preferences in the Statistics tool?

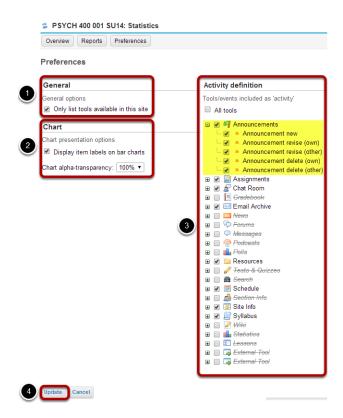

#### Go to Statistics.

Select the **Statistics** tool from the Tool Menu of your site.

#### Click Preferences.

# Set your site preferences for reports.

Check the boxes next to the items you want to select.

#### 1. General options:

• **List only tools available in site** will automatically filter the list of tools presented on the Report editing page with the tools available in site.

#### Chart presentation options:

- **Display item labels on bar charts**: This option will display labels with total values on charts that don't require labels to be shown (e.g., Pie charts always require values to be displayed).
- Charts alpha-transparency: This option allows to specify a transparency level for rendered charts.
- Tools/events processed as 'Activity': This option allows to select the tool events that will count as Activity on the tool Overview page.
  - Clicking on **All tools** will always use all existing tool events. Since tools can be added/ removed from a site or made available/unavailable on current instance, this option ensures that all tools are always selected.
  - Clicking on a Tool will select/unselect all related tool events.
  - Clicking on a Event will select/unselect only that event.
- Click **Update** to save your settings. Note: You also may click the + symbol next to individual tools to expand and show distinct events within a given tool.

# **Syllabus**

# What is the Syllabus tool?

The Syllabus tool provides a place in the course site for the instructor to post a syllabus and for students to access the syllabus.

# **Instructor Options for Posting a Syllabus**

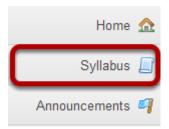

**File Attachment**: Instructors may add a document (ie, .pdf, .docx) as an attachment to the Syllabus tool. Students may download, open, and print the file at their convenience. In order to make an edit to a syllabus that is posted using this option, the instructor will need to make the edit to the original document on their computer, remove the attachment and replace it with the edited document.

**Webpage from Document**: Instructors may create a webpage syllabus from a text document using the Rich Text Editor in the Syllabus tool. Instructors may copy and paste the text from the document into the Rich Text Editor to create a webpage version of your file. Students may read the document in the Syllabus tool, and there is also a "print" option to print the syllabus. Any edits the instructor wants to make to the syllabus can be done directly in the Rich Text Editor.

**Multi-Part Syllabus**: Instructors can create a multi-part syllabus by adding one syllabus item at a time. This allows the instructor to reorder or remove individual items in the syllabus. The Syllabus tool allows users to bulk add items by number of items or by dates. If the instructor likes to organize the syllabus by weeks or class meetings, this is good option to use.

**Point to Webpage**: If the instructor has a syllabus posted on a webpage, the instructor may direct the Syllabus tool to that syllabus.

# To access this tool, select the Syllabus from the Tool Menu of your site.

Sakai 10 Instructor Guide

Page 976

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# How do I create a multi-part syllabus based on number of items needed?

You can create a multi-part syllabus based on the number of items needed, outlined here, or using a date and calendar format in the "How do I create a multi-part syllabus by dates?" tutorial.

# Go to Syllabus.

Select the **Syllabus** tool from the Tool Menu of your site.

#### Click Bulk Add.

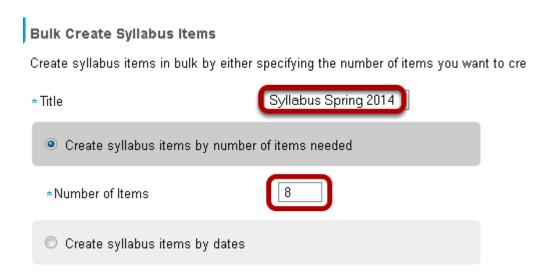

# Type in title for the syllabus.

Sakai 10 Instructor Guide **Page 977** This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

# Select "Create syllabus items by number of items needed" and enter the number of items.

#### Click Post.

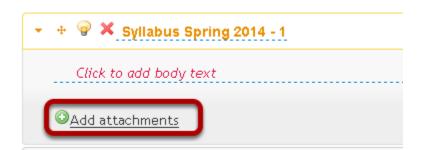

You will be taken to a screen where you see the number of items requested and may edit them there.

# Click the arrowhead icon to the left of an item to expand the item.

This allows you to add a file as an attachment to this syllabus item, or to open the Rich Text Editor to create content directly in the Syllabus item.

#### Add an attachment to this Syllabus item. (Optional)

Browse for the file on your computer, or attach a copy from the Resources in your course.

Page 979 Sakai 10 Instructor Guide

### AND/OR add content using the Rich Text Editor.

Clicking this link opens the Rich Text Editor which allows you to enter the content, or copy and paste from Word into the Rich Text Editor to create the content.

# Edit the heading of a syllabus item.

By default, the headings are the title of the syllabus appended with a number. Hover your mouse over the heading to make the pencil icon appear. Click the pencil icon to enable the editing of the heading.

# Add start and/or end dates for each syllabus item. (Optional)

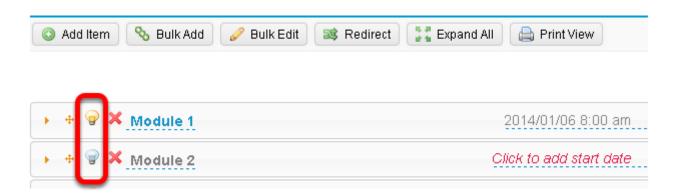

Sakai 10 Instructor Guide

Page 980

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Adding start and/or end dates allows you to determine a time range for when students may view this syllabus item. Click **Click to add start date** or **Click to add end date** and use the drop down menus to select the date and time. Click the checkmark to save your work.

### OR manually hide/release the Syllabus item. (Optional)

Click the lightbulb icon to hide a Syllabus item. If the icon is yellow, the item is available to students. If gray, hidden from students. In the above example, Module 1 is available to students on January 1, 2014 at 8am. Module 2 is hidden from students until the instructor clicks the lightbulb icon again to change it from gray to yellow.

# Rearranging syllabus items.

Click any syllabus item and drag it to the location where you want it.

Sakai 10 Instructor Guide

Page 981

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# Delete syllabus item.

Click the red X icon beside any syllabus item to delete it. Confirm that you want to delete the item by clicking **Delete**.

# How do I add my syllabus as a file attachment?

# Go to Syllabus.

Select the **Syllabus** tool from the Tool Menu in your site.

#### Click Add Item.

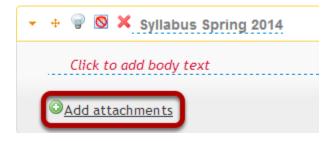

An "Add Item" window opens where you type the name of the item - "Syllabus Spring 2014" for example.

# Type the Title of the item

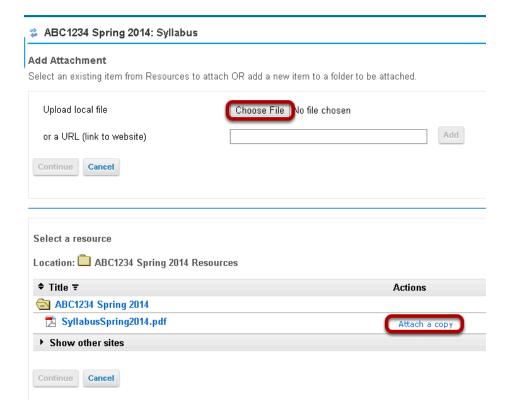

Click Add.

### **Add Attachments**

Click the **Add attachments** button to browse for your file.

# Browse for your file.

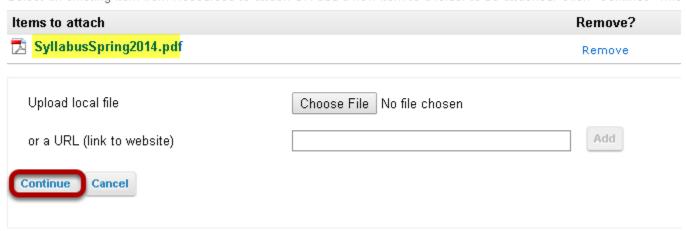

To select the file from your computer, click the **Choose File** button. OR if the file is in your Resources, you may attach it by clicking **Attach a copy**.

#### Confirm the file selection.

#### Add Attachment

Select an existing item from Resources to attach OR add a new item to a folder to be attached. Click "Continue" whe

The file name will be displayed. Click **Continue**.

# **Publish Your Syllabus**

You will be returned to the main Syllabus screen. To publish your syllabus, click the gray light bulb icon. The icon turns yellow to signify that the syllabus is published.

# **Add Start and End Dates. (Optional)**

Sakai 10 Instructor Guide

# How do I create a syllabus using cut and paste from a document?

# Go to Syllabus.

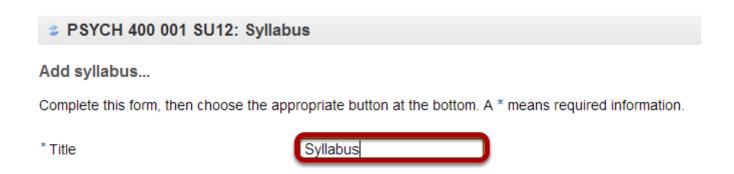

Select the **Syllabus** tool from the Tool Menu in your site.

#### Click Add Item.

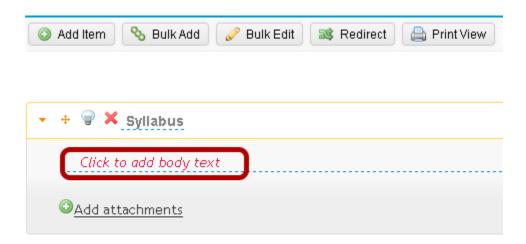

An "Add Item" window opens where you type the name of the item.

#### Enter a title.

A title is required. You may enter something simple, such as "Syllabus" here.

# Open the Rich Text Editor.

Click Click to add body text to open the Rich Text Editor.

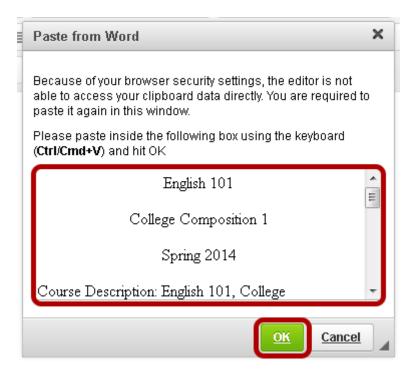

#### Click the Paste from Word icon.

Click to add body text

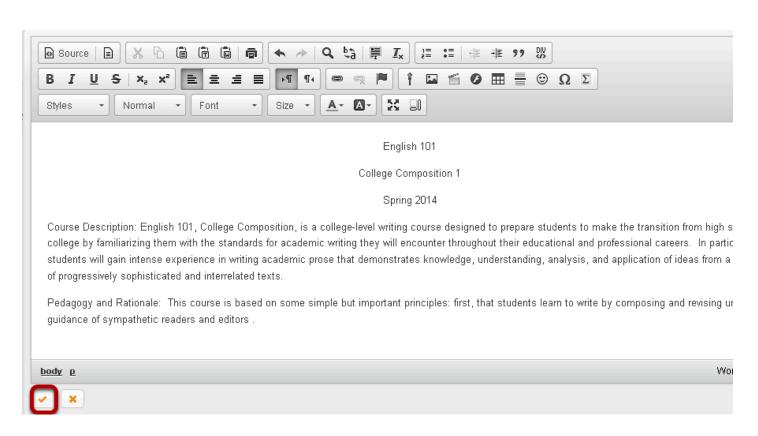

A "Paste from Word" window opens where you paste the text from your document.

#### Paste the text into the Paste from Word window.

#### Click OK

#### Make edits to the text in the Rich Text Editor.

Sakai 10 Instructor Guide

Page 989

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Review the text to make sure it appears as you intend. Make any edits using the formatting icons built into the Rich Text Editor. When you are done, click the orange check icon in the bottom left corner of the Rich Text Editor.

# Publish your syllabus.

You will be returned to the main Syllabus screen. To publish your Syllabus, click the gray light bulb icon. The icon turns yellow to signify that the syllabus is published.

# Add start and end dates. (Optional)

To restrict student access to a certain time frame, click **Click to add start date** and/or **Click to add end date**. Select your date and time as illustrated above, using the drop-down menus. Click the check mark icon when you are done.

Sakai 10 Instructor Guide

# How do I create a multi-part syllabus by dates?

You can create a multi-part syllabus using a date and calendar format, outlined here, or based on the number of items needed in the "How do I create a multi-part syllabus based on the number of items needed?" tutorial. The date and calendar format creates a specific syllabus item for each meeting time of the class.

# Go to Syllabus.

Select the **Syllabus** tool from the Tool Menu in your site.

#### Click Bulk Add.

# Type in title for the syllabus.

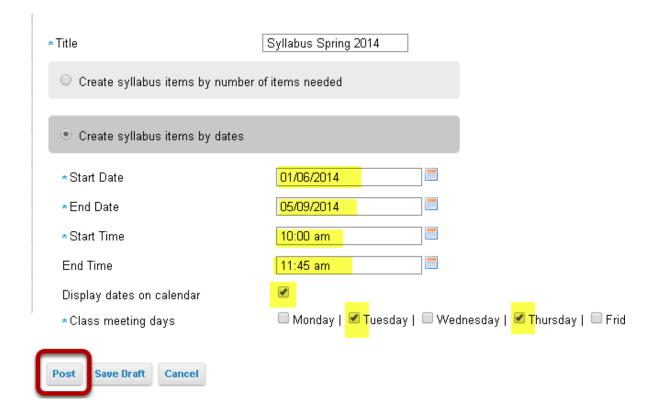

Sakai 10 Instructor Guide

Page 994

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# Select "Create syllabus items by dates".

- Fill in the start date and the end date of the semester using the Calendar icons.
- Add the start time of the class and an optional end time.
- Select whether or not you want the items added to the calendar
- Select which days of the week this course will meet
- Click Post

# Click the arrowhead icon to the left of an item to expand the item.

This allows you to add a file as an attachment to this syllabus item, or to open the Rich Text Editor to create content directly in the Syllabus item.

## Add an attachment to this syllabus item.

Browse for the file on your computer, or attach a copy from the Resources in your course.

### AND/OR add content using the Rich Text Editor.

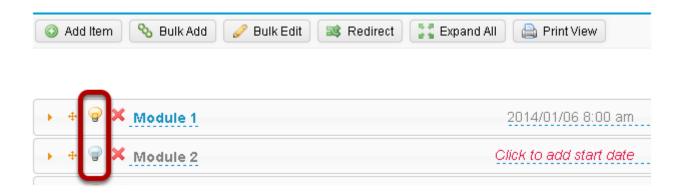

Clicking this link opens the Rich Text Editor which allows you to enter the content, or copy and paste from Word into the Rich Text Editor to create the content.

# Edit the heading of a syllabus item.

By default, the headings are the title of the syllabus appended with a number. Hover your mouse over the heading to make the pencil icon appear. Click the pencil icon to enable the editing of the heading.

# Hide/release the syllabus item. (Optional)

Click the lightbulb icon to hide a Syllabus item. If the icon is yellow, the item is available to students. If gray, hidden from students. In the above example, Module 1 is available to students

Sakai 10 Instructor Guide

# **Tests & Quizzes**

# What is the Tests & Quizzes tool?

The Tests & Quizzes tool allows instructors to create online assessments (i.e., tests, exams, quizzes, and surveys) for delivery via a web interface to students or other groups. It was designed primarily to administer tests, but instructors may also create assessments to gather survey information or informal course feedback. Assessments are created question by question, or through already prepared text, or through import from a formatted XML file.

The Tests & Quizzes tool offers many settings that allow instructors to control the layout, delivery, grading, student review options, and metadata of the assessment. These settings can be adjusted during the authoring. A bundle of values for the settings defines an Assessment Type, which allows instructors to store and re-use the settings of successive assessments. Common system-defined assessment types are already provided, and new ones can be created and saved.

Assessments in this tool fall into the two categories-- Working Copies and Published Copies, which represent the instructor and student phases, respectively. Authoring by the instructor takes place in Working Copies; a new assessment appears in that category. The act of publication makes the assessment available to students and moves it to the Published Copies category, where submissions and results become available.

# To access this tool, select Tests & Quizzes from the Tool Menu in your site.

# **Tests & Quizzes tool landing page. (Student View)**

OCE101 001 SU14: Tests & Quizzes

#### Assessments

#### Take an Assessment

The assessments listed below are currently available for you to take. To begin, click on the assessment title.

Title ≛	Time Limit	Due Date/Time
Module 01 Quiz	20 min	2014-Mar-02 04:51 PM
Module 02 Quiz	20 min	2014-Mar-09 04:54 PM

#### **Submitted Assessments**

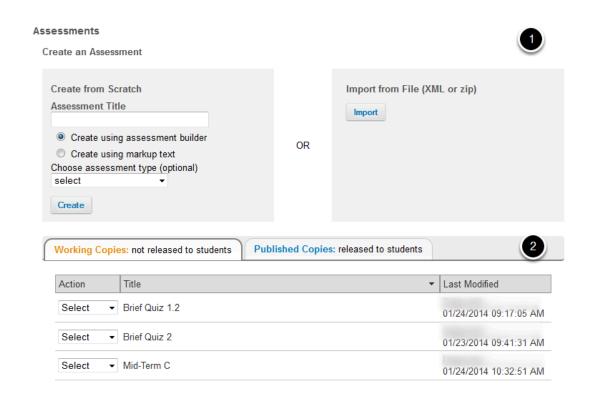

View All Submissions/Scores |

Title	Statistics	Recorded Score	Feedback Available	Individual Score	Time	Submitted
-------	------------	----------------	--------------------	------------------	------	-----------

Note: Assessments which are past the due date but still available for late submissions will appear in the list with the Due Date/Time shown in red. Assessments which are not currently available do not show up in the Take an Assessment list at all.

Sakai 10 Instructor Guide Page 1001

# **Tests & Quizzes tool landing page. (Instructor View)**

On entry, the Tests & Quizzes tool shows a two-part interface:

- 1. Options for creating a new assessment.
- 2. A list of existing assessments, the Working Copies (under development) and Published Copies (deployed to students) on different tabs.

Page 1002 Sakai 10 Instructor Guide This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

# How do I create an assessment in Tests & Quizzes?

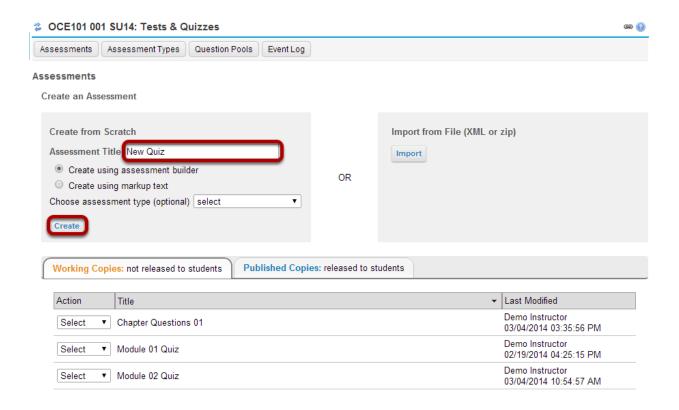

The Tests & Quizzes tool allows you to create online assessments (i.e., tests, quizzes, exams, and surveys) for your students or other groups. It was designed primarily to administer tests, but you may also create assessments to gather survey information or informal course feedback. Grading for most question types is done automatically, and grades can be posted automatically to an online gradebook.

This lesson will show you how to create a simple assessment and add a single question. Refer to the Instructor Guide for additional topics.

# Go to Tests & Quizzes.

Select the **Tests & Quizzes** tool from the Tool Menu of your course.

#### Create a new assessment.

Sakai 10 Instructor Guide

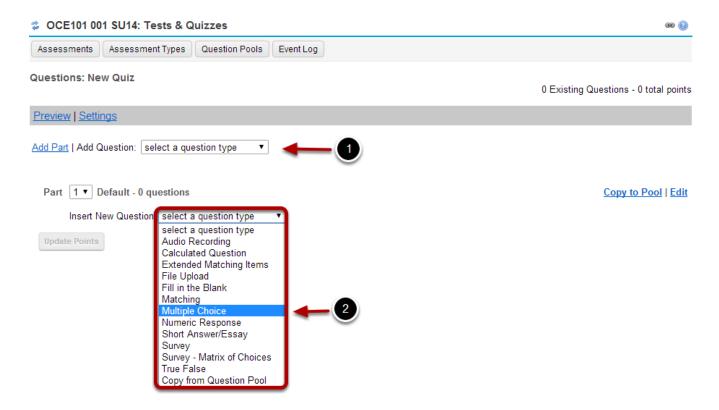

Page 1003

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Give your new assessment a title and click the **Create** button. The "Create using assessment builder" option (shown selected) asks you to write questions one by one, with a simple example given below. For the other methods of creating an assessment, see <u>How do I create an assessment from markup text or cut and paste?</u> and <u>How do I import questions into a new assessment or question pool?</u>

Note: You cannot have more than one assessment with the same title.

# Add a question.

To add a question, you can use either of the following drop-down menus:

- 1. Add Question
- 2. Insert New Question

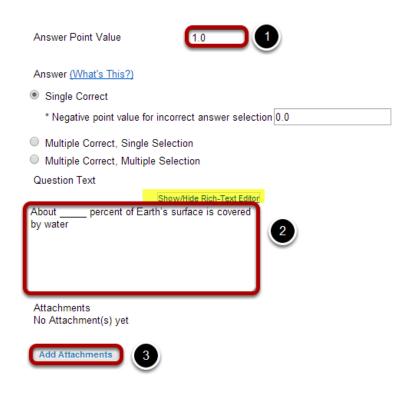

Let's add one of the more common question types. Select **Multiple Choice** from the drop-down menu.

Sakai 10 Instructor Guide

Page 1004

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

# Set the general question options.

Most question types allow you to specify:

- 1. Answer Point Value
- 2. Question Text
- 3. Attachments (optional)

For these general parameters, see <u>How do I add a new question (with the assessment builder)?</u> Other options regarding the answer and configuration are specific to the question type.

Note: The <u>Rich Text Editor</u> is available for use in composing your questions. Click on the **Show/Hide Rich Text Editor** link above the text entry box to display the editor.

# Choose number of correct responses (for multiple choice).

- Single Correct
  - Enable Negative Marking
  - Enable Partial Credit
     Reset to Default Grading Logic
- Multiple Correct, Single Selection
- Multiple Correct, Multiple Selection

Sakai 10 Instructor Guide

Page 1005

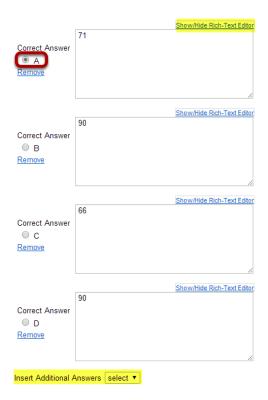

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

You can choose to have a **Single Correct** response, **Multiple Correct**, **Single Selection**, or **Multiple Correct**, **Multiple Selection**.

If you select **Single Correct** (the default) you also have the option to **Enable Negative Marking** or **Enable Partial Credit** if desired. Negative marking deducts points from the student's score if the student selects the wrong answer. Partial credit allows you to specify a percentage of the question points to be awarded for selecting an incorrect but still partially acceptable answer.

Choose the radio button for the correct response option you would like to use. For this example, we will keep the default.

#### Enter the answer choices (for multiple choice).

Enter all of the possible answer choices for this question. (Notice that the rich text editor is also available for the answers. You may use the editor to format your answer choices or add images, links, etc. if desired.)

There are four answer choices provided by default. If you need more choices, use the **Insert Additional Answers** drop-down menu to indicate the number of additional answer choices needed.

Be sure to indicate the correct answer by selecting the radio button for the correct response.

Sakai 10 Instructor Guide

Page 1006

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## Choose whether or not to randomize answers (for multiple choice).

The default setting is **No** for randomizing answers. If you would like the answer choices to appear in a random order each time a student takes the assessment, select **Yes**.

Tip: Remember that if you answer choices contain items like "all of the above" or "A and B are correct" randomizing the order could cause confusion with the answer key.

### Choose whether or not to require rationale.

The default setting is **No** for requiring rationale. If you want students to write an explanation for why they chose a particular response, select **Yes**.

# **Assign to part. (Optional)**

If you have multiple parts in your assessment, you may assign the question to a different part.

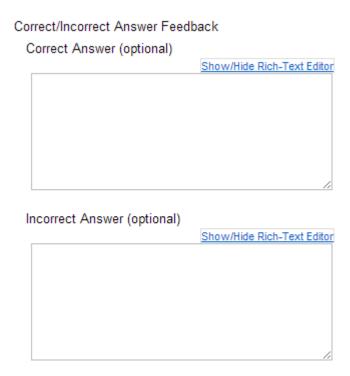

# Assign to pool. (Optional)

If you have an existing question pool and would like to copy this question to the pool, select the pool name here.

Sakai 10 Instructor Guide Page 1007

# **Provide answer feedback. (Optional)**

If you would like to provide feedback for students based on if they answer the question correctly or incorrectly, enter your feedback here.

# Save your question.

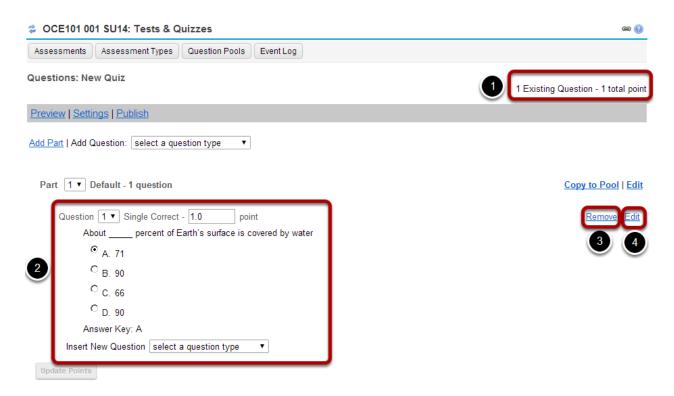

Once you have entered all of your question information, click **Save** to return to the edit assessment screen.

Sakai 10 Instructor Guide

Page 1008

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### Continue adding questions.

Repeat the steps above to add additional questions to your assessment. As you add questions, note the following:

- 1. The total number of questions in the assessment, as well as the total points will be displayed in the upper right corner of the content area.
- 2. You may view your questions the assessment editing screen, along with the answer key shown below each question.
- 3. If you would like to delete a question, click the **Remove** link to the right of the question.
- 4. If you need to make a change to an existing question, click the **Edit** link to the right of the question.

Tip: An assessment must have at least one question, and the question must be worth greater than zero in order to add the assessment to the Gradebook.

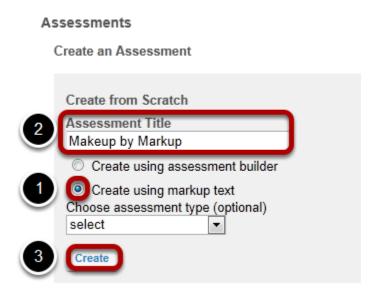

Page 1009 Sakai 10 Instructor Guide This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

# How do I create a new assessment using markup text or cut and paste?

### Go to Tests & Quizzes.

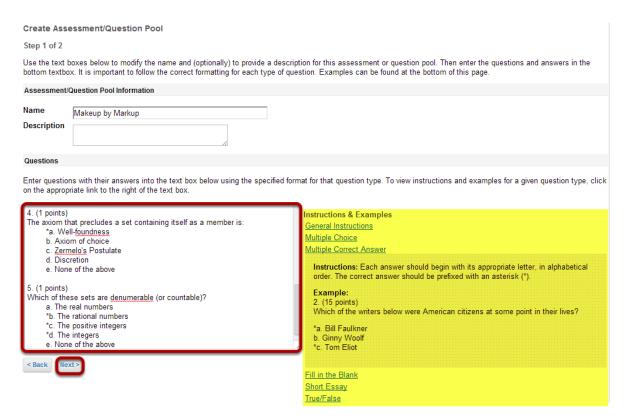

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

### Create your assessment.

- 1. Choose the **Create using markup text** radio button.
- 2. Enter a title for the assessment.
- 3. Click Create.

# Paste your questions.

In this screen, you will see fields for the name and description of the your assessment, and for the questions. Enter your questions into the questions window and then click **Next**.

Note: Your questions must be written in a specific format. Refer to the "Instructions and Examples" shown on this screen for the correct format.

Sakai 10 Instructor Guide

Page 1011

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

### Write your questions in advance.

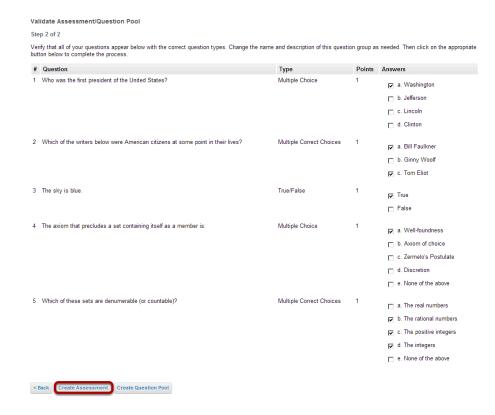

```
File Edit Format View Help

4. (1 points)
The axiom that precludes a set containing itself as a member is:
    *a. Well-foundness
    b. Axiom of choice
    c. Zermelo's Postulate
    d. Discretion
    e. None of the above

5. (1 points)
Which of these sets are denumerable (or countable)?
    a. The real numbers
    *b. The rational numbers
    *c. The positive integers
    *d. The integers
    e. None of the above |
```

Tip: You may find it convenient to prepare questions in advance and then copy and paste them into the question area. Refer to the mark-up text format required and then type up your questions in a text editor. Then, copy and paste your questions into the markup text area.

## Check your questions.

Sakai 10 Instructor Guide Page 1012

Check that your questions meet your expectations. If everything looks correct, click **Create Assessment** to create a new assessment.

(Alternately, you may click **Create Question Pool** to create a new question pool instead of a new assessment.)

# Continue editing your exam.

You may now make further changes as described in <u>How do I create an Assessment (i.e. Test or Quiz)?</u>, starting from "Add a question."

Tip: Remember that you still need to <u>publish your assessment</u> before students can view and submit it.

# How do I add a new question (with the assessment builder)?

Questions can be added to a new or existing assessment with the assessment builder.

In general, the instructor clicks "Add," chooses a question type, and supplies the parts that are called for by that question type. This article covers the general settings common to most question types. For additional information on specific questions types, please refer to the individual articles for the appropriate question type.

### Go to Tests & Quizzes.

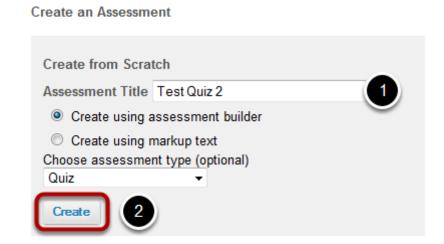

Select the **Tests & Quizzes** tool from the Tool Menu of your course.

### Select an assessment.

Questions may be added to any assessment. Select an existing assessment or create a new one.

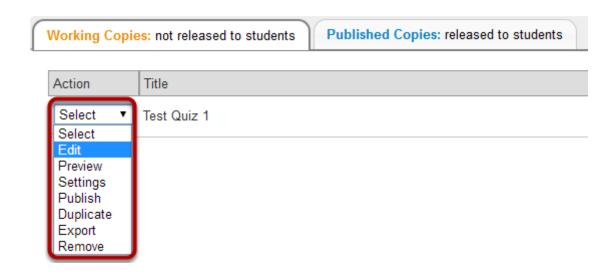

Note: You may also add a question directly to a question pool.

### Create a New Assessment.

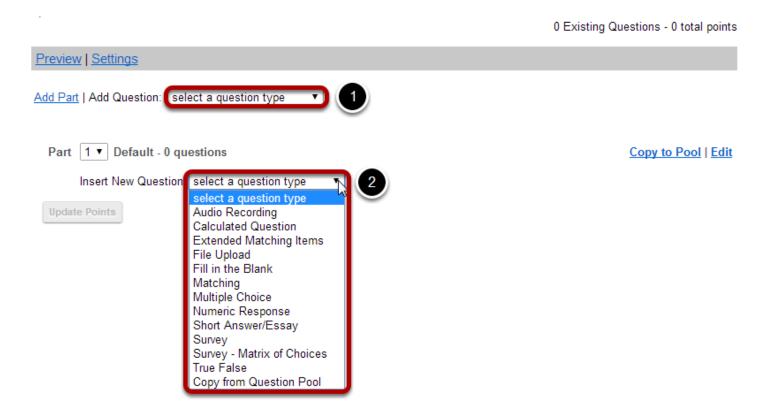

For more information on creating new assessments, see <a href="How do I create an assessment?">How do I create an assessment?</a>

### Or edit an existing assessment.

### Add a question and choose the question type.

To add a question, you can either:

- 1. Use the **Add Question** field at the top by selecting the question type from the drop-down list. The added question will be placed at the end of the sequence.
- 2. Use the **Insert New Question** field provided after each question by selecting the question type from the drop-down list. The new question will be placed there in the sequence.

Sakai 10 Instructor Guide

Page 1015

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

Note: There are several different types of questions you can add. Most of these can be auto-graded. (Short Answer/Essay, Audio Recording, and File Upload must be graded manually.) Refer to the individual help articles for each specific question type for more information on how to add questions of those types.

# Set the point value for the question.

Answer Point Value	10	
--------------------	----	--

Enter the point value for this question. Questions may be worth any point value you choose. In this example, the question is worth 10 points.

Tip: Keep in mind that the point value of all the questions in the assessment will equal the point value of the assessment in the Gradebook. So, if you want your assessment to be worth a total of 100 points, you should assign point values to your questions accordingly.

## **Display points?**

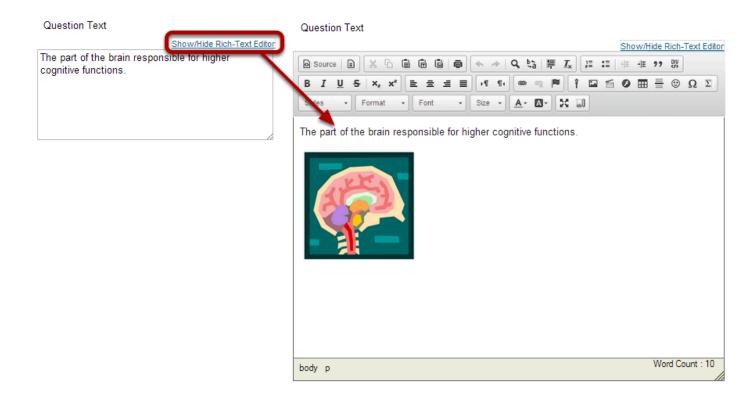

Display Point Value while student is taking the exam

Yes No

Do you want students to see the point value as they are taking the test? If so, leave the default setting of **Yes**. If you prefer that students do not see the point value for the question, select **No**.

Sakai 10 Instructor Guide Page 1016

### Enter the question text.

Enter the text of your question into the text box provided. You may also click on the Show/Hide Rich-Text Editor link in the top right corner of the text box to load the WYSIWYG html editor. The rich text editor allows you to format your question text and/or add images, links, or other resources.

Note: This section will vary depending on the type of question you are adding.

### Add attachments.

Attachments No Attachment(s) yet

If you would like to attach a file to the question, you may click on the Add Attachments button to browse for and upload a file. Most multiple choice questions do not contain file attachments; however, in some cases you may want to provide students with a file in order to answer the question. For example, you could attach an audio file, a reference document, or other resource.

# **Require rationale?**

The default setting is **No** for requiring a rationale. If you would like students to be required to enter a reason for selecting a given response, select **Yes**.

## Assign to part.

You may have more than one part in an assessment if you choose. If you have more than one part, and you would like to assign this question to a different part, you may do so using the **Assign to Part** drop-down menu.

# Assign to question pool.

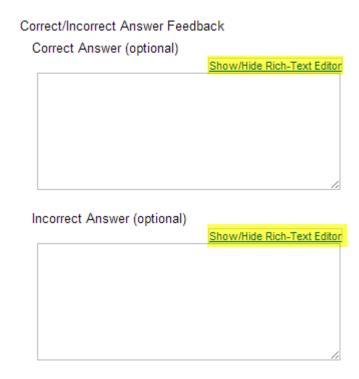

If you would like to add this question to a question pool, you may do so using the **Assign to Question Pool** drop-down menu. Adding a question to a pool places a copy of the question in the pool, but leaves a copy of the question in the current assessment. Question pools can be used to create assessments from a pool of questions and can be shared among courses and instructors. (You may also copy an entire set of questions into a question pool, as opposed to copying it individually as shown here.) See <u>What is a Question Pool?</u>

Sakai 10 Instructor Guide

### Add feedback.

You may optionally add feedback to this question which the student will receive when the question is graded. Feedback may be different based on if the student answered correctly or not. The rich text editor is also available here if you would like to format your feedback.

# Save your question.

When all of the question parameters are specified to your satisfaction, click **Save**.

# How do I create a multiple choice question?

A multiple choice question in an assessment provides pre-written choices from which the student will select. You can restrict the correct answers to one selection, or require allow multiple selections (one or more) for a correct answer.

### Go to Tests & Quizzes.

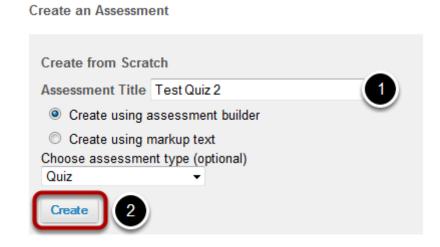

Select the **Tests & Quizzes** tool from the Tool Menu of your course.

### Select an assessment.

A multiple-choice question may be added to any assessment. Select an existing assessment or create a new one.

Note: You may also add a question directly to a question pool.

### Create a New Assessment.

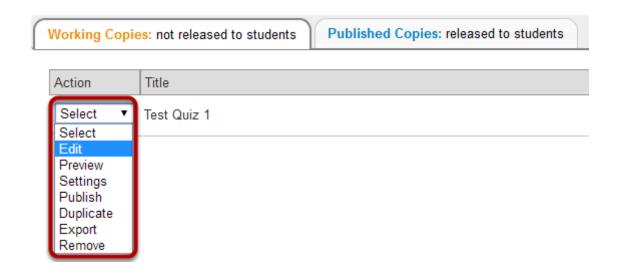

For more information on creating new assessments, see **How do I create an assessment?** 

Sakai 10 Instructor Guide

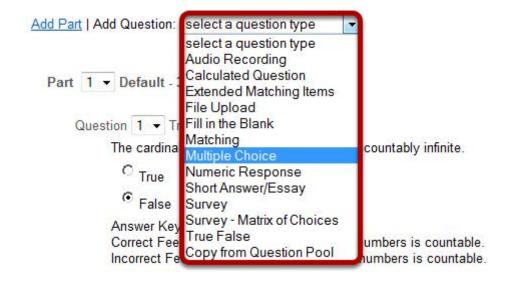

Page 1020

# Choose the answer configuration.

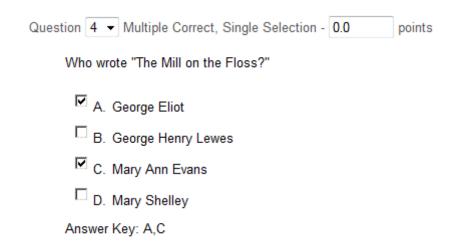

Answer Point Value	6
Answer (What's This?)	
<ul><li>Single Correct</li></ul>	
Multiple Correct, Single Selection	
<ul> <li>Multiple Correct, Multiple Selection</li> </ul>	n

### Single correct.

Aı	nswer (What's This?)	
0	Single Correct	
	* Negative point value for incorrect answer selection	0.0

A single correct answer grants all of the points to that selection. Selecting that configuration reveals a field for optional designation of negative points, incurred for any single incorrect selection.

### **Multiple Correct, Single Selection**

A multiple correct, single selection answer grants all of the points to more than one single selection.

Sakai 10 Instructor Guide Page 1022 If more than one of the answer selections is correct, then each can be checked, and a student who checks either of those selections (via radio buttons) earns all of the points. An example is shown above.

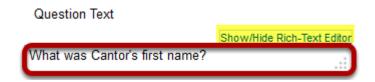

### **Multiple Correct, Multiple Selection**

- Multiple Correct, Multiple Selection
  - Right Less Wrong
  - All or Nothing

A multiple correct, multiple selection answer requires several selections and allows different policies for granting the points.

- The option Right Less Wrong means that the points possible will be reduced by each box checked wrongly, either affirmed for a selection that should not be included, or left empty for a selection that should be included in the correct answers.
- The option **All or Nothing** means that all points are granted for a fully correct answer only; any other combination of affirmed and empty check boxes earns no points.

### **Add Question Text.**

Type the question into the text box provided.

Note: You may also use the Rich Text Editor by clicking on the Show/Hide link above the text box.

### Add attachment. (Optional)

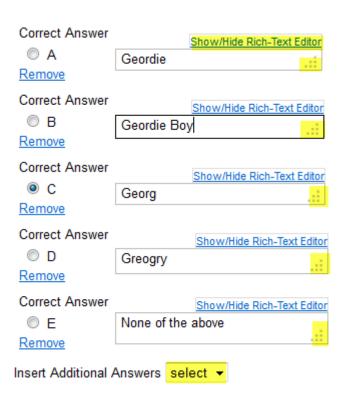

Click **Add Attachments** to browse for and select a file attachment if desired.

Sakai 10 Instructor Guide

Page 1023

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

### Enter the question answers.

Type the answers in the text boxes provided, and indicate the correct answer by selecting the appropriate letter in the **Correct Answer** column.

#### Note:

- You may click the "Show/Hide" link to switch between plain text (shown) and rich text entry.
- To expand or shrink the text boxes, drag the corners.
- For more possible answers, choose a number from the drop-down list Insert Additional Answers.

# Choose whether or not to randomize answers (for multiple choice).

The default setting is **No** for randomizing answers. If you would like the answer choices to appear in a random order each time a student takes the assessment, select **Yes**.

Tip: Remember that if you answer choices contain items like "all of the above" or "A and B are correct" randomizing the order could cause confusion with the answer key.

Sakai 10 Instructor Guide

Page 1024

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# Choose whether or not to require rationale.

The default setting is **No** for requiring rationale. If you want students to write an explanation for why they chose a particular response, select Yes.

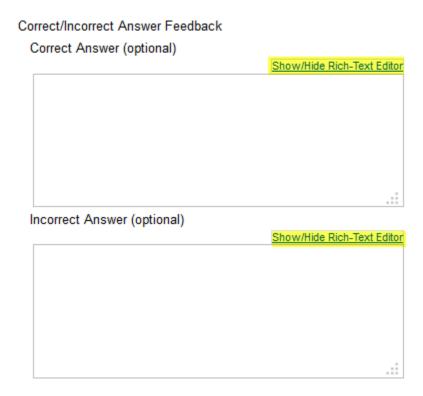

# Assign the question to a portion of the assessment and/or a Question Pool. (Optional)

- 1. The question can be added to a specific portion of the assessment, such as Part 1 or Part 2 (depending on how many parts exist). Part 1 is the default location.
- 2. The question may also be added to a **Question Pool**, if desired.

Sakai 10 Instructor Guide Page 1025 This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

# Add answer feedback. (Optional)

Feedback is optional text available for the student to review after the particular question is graded. For matching questions, the feedback option is offered for correct and/or incorrect answers, if desired.

Tip: To edit with **Rich-Text Editor**, click the hyperlink to open the full menu.

### Click Save.

Click **Save** to save the question (or **Cancel** to exit).

# **Provide model answer. (Optional)**

Answer: Provide a model answer to show students and to assist graders along with any feedback.

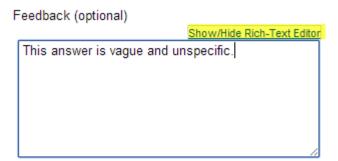

Model Short Answer (optional)

Provide a model answer to the short answer/essay question in order to show students a generic version of the expected answer. It may also assist graders with feedback.

Note: To edit with **Rich-Text Editor**, click the hyperlink to open the full menu.

### **Provide Feedback. (Optional)**

**Feedback** is optional text available for students to view after the particular question is graded.

Note: To edit with **Rich-Text Editor**, click the hyperlink to open the full menu.

### Click Save.

Click **Save** to save the question (or **Cancel** to exit).

# How do I add a fill in the blank question?

This allows for a fill in the blank question to be added to a new or existing assessment. This question type presents users with a question followed by a text box in which they enter the answer; each user's answer is compared to a list of allowed answers.

### Go to Tests & Quizzes.

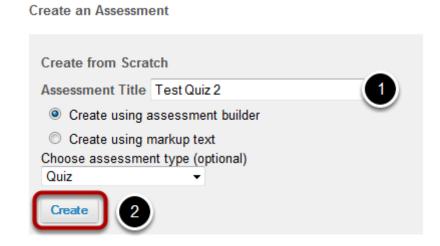

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

### Select an assessment.

A fill in the blank question may be added to any assessment. Select an existing assessment or create a new one.

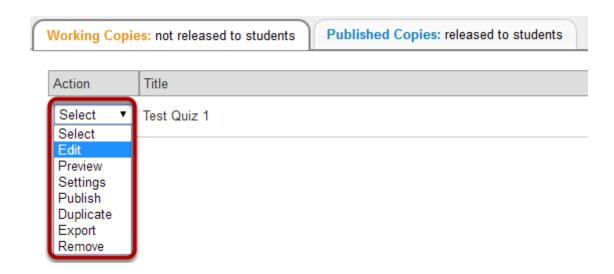

Note: You may also add a question directly to a question pool.

### Create a New Assessment.

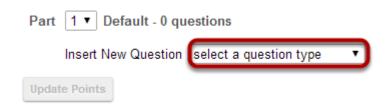

For more information on creating new assessments, see **How do I create an assessment?** 

### Or edit an existing assessment.

# Select Fill in the Blank from drop-down menu.

After selecting **Fill in the Blank** from the drop-down menu, the program will open additional options for the question.

### Add an Answer Point Value.

This allows for the **Answer Point Value** to be manually inputted.

### **Add Question Text.**

# Defining Answers Place curly brackets "{}" around word(s) requiring blank response field(s). Example: Roses are {red} and violets are {blue}. Insert a pipe "|" between answer options like synonyms. Example: {They are|They're} very happy. Insert an asterisk (\*) for one or more wildcard characters. Example: It's raining {c\*} and {d\*s}. Show/Hide Rich-Text Editor

Type the **Question Text** into the text box provided.

Note: If preferred, click the hyperlink to open the **Rich-Text Editor**.

## **Select Case Sensitive or Mutually Exclusive options**

#### Case sensitive?

When checked, a student's response must match the correct answer exactly with respect to upper and lower case. Example: if the correct answer is "ABC" and a student's response is "aBc", then the response would be marked as incorrect.

#### Mutually exclusive?

When checked, questions including more than one blank with identical answer options must have unique answers. Example: The sides of a coin are {heads|tails} and {heads|tails}. Correct answer: heads, tails. Half correct answer: heads, heads.

Check either box if the correct answer is case sensitive and/or the question has more than one acceptable answer.

Sakai 10 Instructor Guide Page 1043

# **Add Attachment. (Optional)**

Click on Add Attachments to browse for and select a file attachment if desired.

# Assign the question to a portion of the assessment and/or a Question Pool. (Optional)

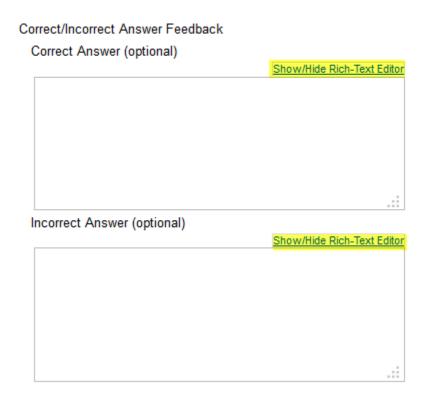

- 1. The question can be added to a specific portion of the assessment, such as Part 1 or Part 2 (depending on how many parts exist). Part 1 is the default location.
- 2. The question may also be added to a Question Pool, if desired.

# **Add Question Text.**

Question Text

#### **Defining Answers**

Place curly brackets "{}" around numeric value(s) requiring blank response field(s). Example: 3\*3={9}.

Range:Insert a pipe "|" between a range of values.

Example: The price is {12.2|14.5}. Student answer between 12.2 and 14.5 will be considered valid.

Scientific notation: A period MUST be used as the decimal point marker and the letter "E" or "e" for exponent.

Example: {6.022E23} to express Avogrado's number.

Complex numbers should be in the form (a + bi) where "a" and "b" need to have explicitly stated values.

Example: {1+1i} is valid whereas {1+i} is not. Similarly, {0+9i} is valid whereas {9i} is not.

#### Acceptable Characters

Only numbers, decimal point markers (period or comma), sign indicators preceding a number (e.g., -5), or spaces (e.g., as thousand separators, 5 000) are allowed within curly brackets. **NOTE:** For scientific notation, a period MUST be used as the decimal point marker.

Any other characters (e.g., \$ or %) can be placed outside brackets, if needed. For example: 3/10= {30}% (Only 30 will need to be entered in the blank response field.)

When defining a range of values, the value preceding the pipe "|" must be smaller than the value after the pipe (e.g., {12.2|14.5}).

Type the **Question Text** into the text box provided. Be sure to read the details on how to define answers properly, the three different forms of answers **(Range, Scientific notation**, and **Complex numbers**), and acceptable characters.

**Defining Answers** 

Place curly brackets "{}" around numeric value(s) requiring blank response field(s). Example: 3\*3={9}.

- **Range**: Insert a pipe "|" between a range of values. Example: The price is {12.2 | 14.5}. Student answer between 12.2 and 14.5 will be considered valid.
- **Scientific notation**: A period MUST be used as the decimal point marker and the letter "E" or "e" for exponent. Example: {6.022E23} to express Avogrado's number.
- **Complex numbers** should be in the form (a + bi) where "a" and "b" need to have explicitly stated values. Example: {1+1i} is valid whereas {1+i} is not. Similarly, {0+9i} is valid whereas {9i} is not.

#### Acceptable Characters

Only numbers, decimal point markers (period or comma), sign indicators preceding a number (e.g., -5), or spaces (e.g., as thousand separators, 5 000) are allowed within curly brackets. NOTE: For scientific notation, a period MUST be used as the decimal point marker. Any other characters (e.g., \$ or %) can be placed outside brackets, if needed. For example: 3/10= {30}% (Only 30 will need to be entered in the blank response field.) When defining a range of values,

Sakai 10 Instructor Guide

# **Add Question Text.**

#### Question Text

Define variables to use in this question below. Reference them in the question text by putting them in single curly braces eg. {x}. Variable names are alpha-numeric but must begin with an alpha character

Place double curly braces (e.g. {{y}} around a formula name, to define where the student's input box will display. Formula names are alpha-numeric but must begin with an alpha character.

You may define acceptable tolerance as a constant (0.01) or percentage (1.5%) of the answer. (Defaults to 0.01.)

Type the **Question Text** into the text box provided. This is the information that the student will see, including the variable and formula placeholders (see examples below).

**Variables**: Define variables to use in this question below. Reference them in the question text by putting them in single curly braces eg. {x}. Variable names are alpha-numeric but must begin with an alpha character.

Example: Kevin has {x} apples. Jane eats {y}. How many does Kevin have now? {{z}}

**Formulas**: Place double curly braces (e.g. {{y}} around a formula name, to define where the student's input box will display. Formula names are alpha-numeric but must begin with an alpha character.

Example: Solve:  $COS({a}) * ({c} - {b}) = {{z}} Formula z would be <math>COS({a}) * ({c} - {b})$ 

Keep in mind the following:

- You may define acceptable tolerance as a constant (0.01) or percentage (1.5%) of the answer. (Defaults to 0.01.)
- Variables and formulas support decimals. Default is 3.
- Valid Operators: + \* / ^ ()
- You can use the following math functions: SIN, COS, TAN, ASIN, ACOS, ATAN, ABS, EXP, SIGN, SQRT, FACTORIAL, LOG10, LOG, and LN.
- There are two built-in constants, PI(3.14...) and e(2.718...). Use them in your answer expression.
- Variables and Formulas cannot have the same name.

Note: To edit with **Rich-Text Editor**, click the hyperlink to open the full menu.

Sakai 10 Instructor Guide Page 1053

## **Click Extract Variables and Formulas.**

Click the Extract Variables and Formulas button to create the variables and formulas.

# Define ranges of variable values.

Change the Min, Max, and Decimal Places for all of the variables to define their ranges of valid values.

# Enter the formula.

Enter the mathematical expression for each Formula, inserting the Variables where needed.

# **Add Attachment. (Optional)**

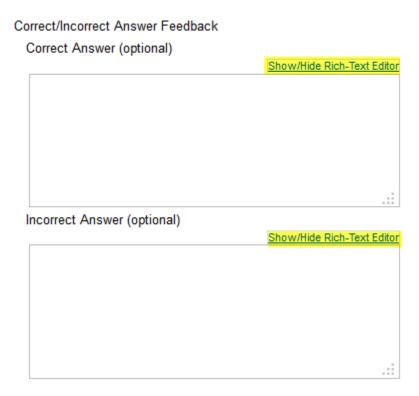

Click **Add Attachments** to browse for and select a file attachment if desired.

# Assign the question to a portion of the assessment and/or a Question Pool. (Optional)

- 1. The question can be added to a specific portion of the assessment, such as Part 1 or Part 2 (depending on how many parts exist). Part 1 is the default location.
- 2. The question may also be added to a **Question Pool**, if desired.

# Add feedback for correct answer and/or incorrect answer. (Optional)

Feedback is optional text available for the student to review after the particular question is graded. For numeric response questions, the feedback option is offered for correct and/or incorrect answers, if desired.

Note: To edit with **Rich-Text Editor**, click the hyperlink to open the full menu.

Sakai 10 Instructor Guide Page 1055

# **Click Save.**

Click **Save** to save the question (or **Cancel** to exit).

# How do I add an audio recording question?

This explains the process of adding an audio recording question to any type of assessment. This question type presents users with a question that they must answer audibly. A recording utility opens and allows users to record the answer using a microphone.

# Go to Tests & Quizzes.

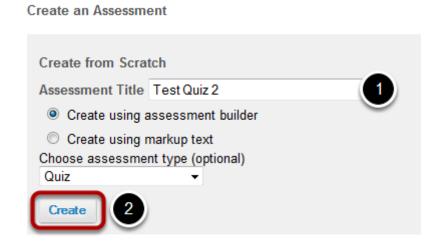

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

## Select an assessment.

An audio recording question may be added to any assessment. Select an existing assessment or create a new one.

Note: You may also add a question directly to a question pool.

## Create a New Assessment.

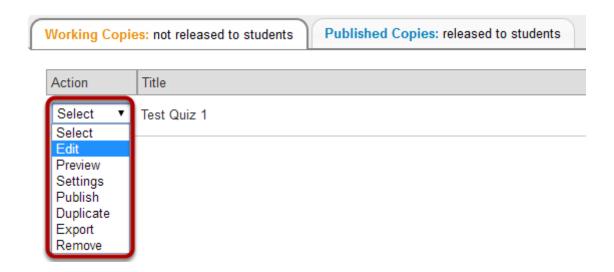

For more information on creating new assessments, see **How do I create an assessment?**

# How do I add a file upload question?

This allows for a file upload question to be added to a new or existing assessment. This question type presents a question or assignment that requires the user to upload a file.

# Go to Tests & Quizzes.

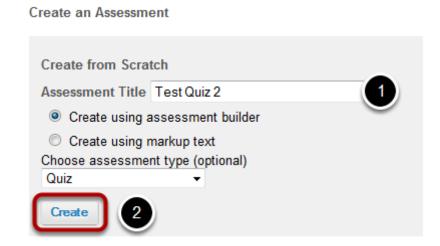

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

## Select an assessment.

A file upload question may be added to any assessment. Select an existing assessment or create a new one.

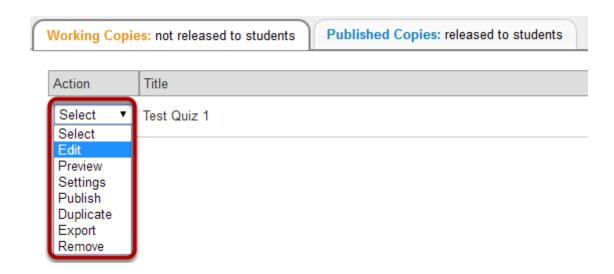

Note: You may also <u>add a question directly to a question pool</u>.

## Create a New Assessment.

For more information on creating new assessments, see **How do I create an assessment?** 

# Or edit an existing assessment.

# Select File Upload from the drop-down menu.

After selecting **File Upload** from the drop-down menu, the program will open additional options for the question.

## Add an Answer Point Value.

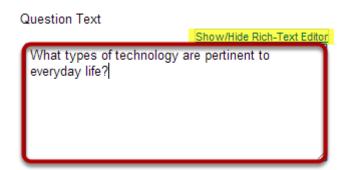

This allows for the **Answer Point Value** to be manually inputted.

Sakai 10 Instructor Guide

Page 1062

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# **Add Question Text.**

Type the **Question Text** into the text box provided.

Note: To edit with **Rich-Text Editor**, click the hyperlink to open the full menu.

# **Add Attachment. (Optional)**

Click **Add Attachments** to browse for and select a file attachment.

# Assign the question to a portion of the assessment and/or a Question Pool. (Optional)

- 1. The question can be added to a specific portion of the assessment, such as Part 1 or Part 2 (depending on how many parts exist). Part 1 is the default location.
- 2. The question may also be added to a **Question Pool**, if desired.

Sakai 10 Instructor Guide

Page 1063

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# **Provide Feedback. (Optional)**

**Feedback** is optional text available for students to view after the particular question is graded.

Note: To edit with <u>Rich-Text Editor</u>, click the hyperlink to open the full menu.

# Click Save.

Click **Save** to save the question (or **Cancel** to exit).

Sakai 10 Instructor Guide

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

# How do I add an extended matching items question?

An extended matching question presents a set of options, numbered, and a set of circumstances in a table. The answers to be filled in by students, in the table, comprise one or more of the numbers indicating options for each circumstance. This question type is more complex than others, and should be planned in advance.

# Go to Tests & Quizzes.

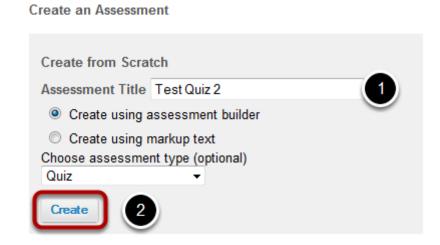

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

### Select an assessment.

An extended matching question may be added to any assessment. Select an existing assessment or create a new one.

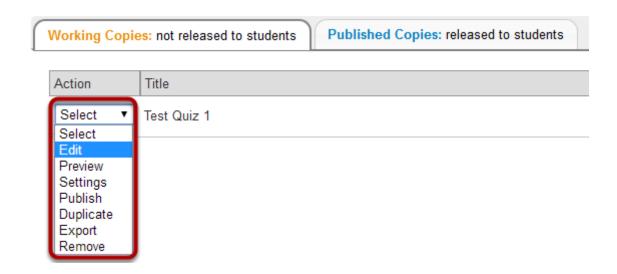

Note: You may also <u>add a question directly to a question pool</u>.

#### Create a New Assessment.

For more information on creating new assessments, see <u>How do I create an assessment?</u>

## Or edit an existing assessment.

# Select Extended Matching Items from drop-down menu.

After selecting **Extended Matching Items** from the drop-down menu, the program will open additional options for the question.

## Add an Answer Point Value.

This allows for the **Answer Point Value** to be manually inputted.

# Enter the Theme, Options, Lead In, and Items.

The **Theme**, **Options**, **Lead In** and **Items** make up the question. **Theme** and **Lead In** are provided to orient the student. Each component is explained below.

Sakai 10 Instructor Guide

Page 1066

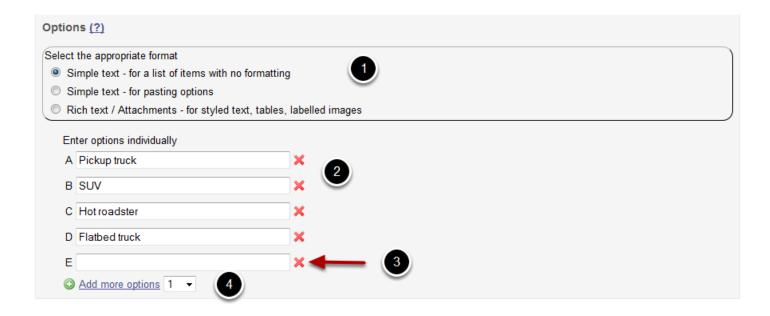

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## **Theme**

The theme describes the main topic/domain that the item set will address, and is linked to the learning objectives. Type the theme in the text field.

## **Options**

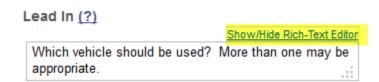

The options list consists of the potential answer choices to the item, and includes the distracters that are the incorrect or less likely answers for this particular item. The options should be homogeneous, or "the same kind of thing" such as drugs, organisms, cells or investigations, and should be listed only as words or short phrases.

- 1. Choose the format. The **Simple text** option gives one text field, for inserting your own prewritten labeled list.
- 2. Type one short options in each text field.
- 3. Remove unnecessary options with the red X.
- 4. To add more option fields, select a number from the drop-down box and click on the plus sign or the link.

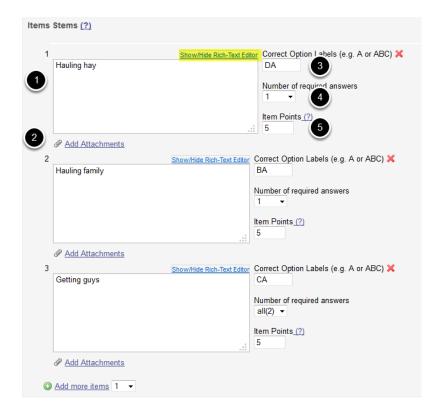

Sakai 10 Instructor Guide Page 1067

### Lead in

The lead-in statement explains the general association between the stem and the option list. In the R-type format, the options list (for example, 8 or more potential diagnoses) is summarized in the lead-in statement, for example, "For each of the following patients presenting to the Emergency Room, select the most likely diagnosis." The lead-in should provide clear instructions how the student should respond to the item set. You may switch between plain text and the Rich-Text Editor

### **Items Stems**

The stem or item describes the case and what is required from the student. It usually consists of a clinical scenario and a question, for example "A 30yr old man presents with... Select the most likely diagnoses."

1. Type each item stem in a text field. You may switch between plain text and the Rich-Text Editor.

Sakai 10 Instructor Guide

Page 1068

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

- 2. Add any attachments necessary to explain the item stem. (Optional)
- 3. Specify the correct answers as option labels.
- 4. Give the number of labels that comprise the correct answer.
- 5. Specify the item points. If the number of required answers is more than one, each correct answer will receive its proportion of the item points.

# Assign the question to a portion of the assessment and/or a Question Pool. (Optional)

- 1. The question can be added to a specific portion of the assessment, such as Part 1 or Part 2 (depending on how many parts exist). Part 1 is the default location.
- 2. The question may also be added to a **Question Pool**, if desired.

## Click Save.

Click **Save** to save the question (or **Cancel** to exit).

Sakai 10 Instructor Guide Page 1069

# How to I add multiple parts to an assessment?

This explains how to create additional parts to assessment. Parts are often used to set up random question sets that pull questions from question pools.

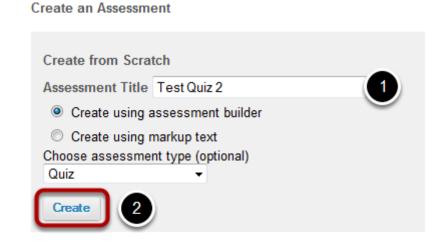

# Go to Tests & Quizzes.

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

## Select an assessment.

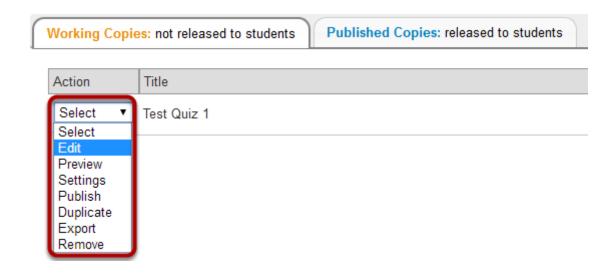

Additional parts may be added to any assessment. Select an existing assessment or create a new one.

### Create a New Assessment.

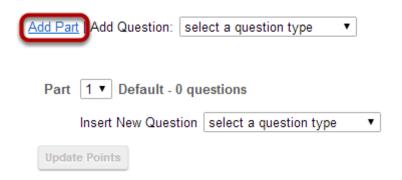

For more information on creating new assessments, see **How do I create an assessment?** 

# Or edit an existing assessment.

## Click Add Part.

Click Add Part hyperlink, located right next to Add Question.

# Add a Title.

Type a **title** into the text box provided.

Note: If the part title is marked as the Default, the title will not appear to assessment takers.

Sakai 10 Instructor Guide

Page 1071

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# **Add Information. (Optional)**

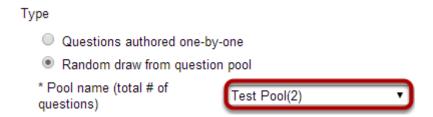

Use the text box provided to type **Information** about the created part.

# Add an Attachment. (Optional)

Select **Add Attachment(s)** to add an attachment to the created part.

# Select Part Type.

Select between the option to author questions one-on-one or to draw questions randomly from a **Question Pool**. The **Question Pool** can be selected using the drop-down menu.

# If "random draw from question pool" is selected, select number of questions

* Number of questions	2

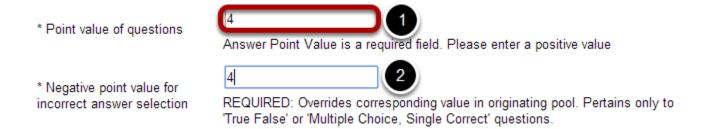

Sakai 10 Instructor Guide

Page 1072

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Type number of questions into text box provided.

# If "random draw from question pool" is selected, select a point value of questions.

- 1. Type an **answer point value** into text box provided. An **Answer Point Value** is required in this portion of Tests & Quizzes.
- 2. Type a negative point value if a question is answered incorrectly. (Optional)

Note: Point values entered here override any value that was inputted for individual questions in a corresponding Question Pool. Any form of negative point value applies to True False, Multiple Choice and Single Correct questions only.

# If "random draw from question pool" is selected, choose a type of randomization.

Type of randomization

A student's questions are randomized each time an assessment is submitted

A student's questions are randomized once for all submissions

Click the corresponding circle to select between the option to randomize student questions each time an assessment is submitted or the option to randomize student questions once for all submissions.

# **Add Metadata. (Optional)**

Metadata	
Objective	World Geography
Keyword	Geography
Rubric	Random

Sakai 10 Instructor Guide

Page 1073

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/hv/4.0/

Enter **Metadata**, such as the **objective**, **keyword**, and **rubric**, into the text boxes provided.

# Click Save.

Click **Save** to save the question (or **Cancel** to exit).

# How do I use assessment parts?

Assessments are subdivided into parts, but may consist of only one part that comprises all the questions. Parts allow you to create sections of an assessment, each with its own title, questions, question pool draws, attachments (for resources or directions), and question ordering.

When you create a new assessment, a part (i.e., section) called "Default" is created automatically. If you leave it named "Default", that title will not appear on your assessment; to change the part's name, click Edit. You can begin adding questions immediately to "Default", or you can add your own parts.

New parts will be listed in the order you create them. You can re-order parts within an assessment, and edit each part individually.

Your assessment must contain at least one part, but you can remove any of the additional parts you create. You can also remove the "Default" part, as long as you've already created another part to replace it.

For more information on adding parts, see **How do I add multiple parts to an assessment?** 

# Go to Tests & Quizzes.

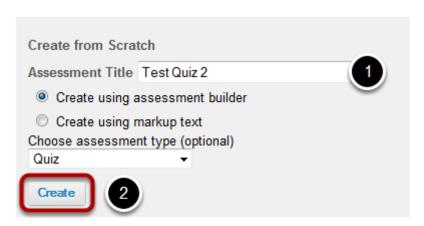

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

# Select an assessment.

Parts may be edited in any assessment. Select an existing assessment or create a new one.

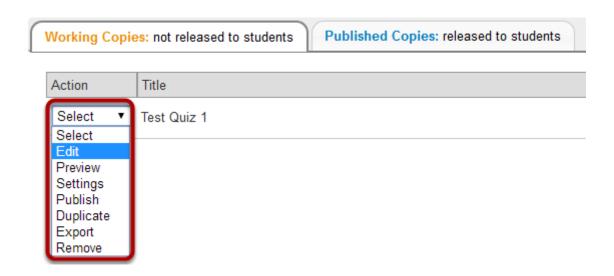

### Create a New Assessment.

#### Create an Assessment

For more information on creating new assessments, see <a href="How do I create an assessment?">How do I create an assessment?</a>

# Or edit an existing assessment.

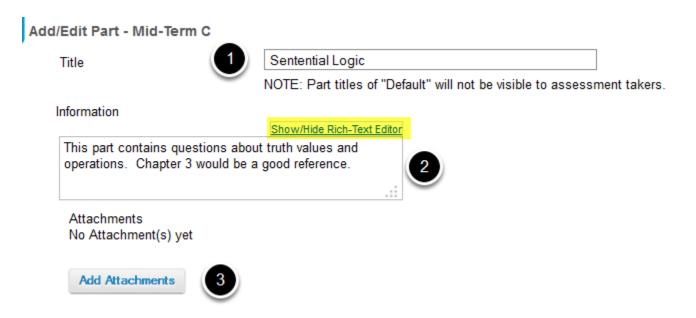

# Edit a part.

In Tests & Quizzes, open the assessment and find the part. To edit the name and any of the information and settings associated with a part, next to that part's name, click Edit.

Sakai 10 Instructor Guide Page 1076

# Specify the identification and information for students.

- 1. On the part editing screen, next to "Title", type a name for this part.
- 2. Under "Information", you can use the rich-text editor to enter a brief description or instructions.
- 3. To add attachments, click **Add Attachments**.

## Choose a linear Part or a random-draw set of questions.

Туре	
Questions authored one-by-one	
<ul> <li>Random draw from question pool</li> </ul>	
* Pool name (total # of questions)	Select a question pool(###) 🔻
* Number of questions	
* Point value of questions	Answer Point Value is a required field. Please enter a positive value
* Negative point value for incorrect answer selection	0  REQUIRED: Overrides corresponding value in originating pool. Pertains only to 'True False' or 'Multiple Choice, Single Correct' questions.
Type of randomization	A student's questions are randomized each time an assessment is submitted     A student's questions are randomized once for all submissions
Question ordering (not available for rand  As listed on Assessment Question  Random within Part	•

Sakai 10 Instructor Guide

Page 1077

This work is licensed and on a Creeking Commons Attribution 4.0 Intl. License, http://greeking.commons.com/licenses/hu/4.0/

Under **Type**, use the radio buttons to indicate whether you'll be authoring questions one by one, or using a random draw from one of your question pools. Each choice will activate its own set of further options. The active options for the Questions authored one-by-one (linear) choice are shown. If Random draw were chosen, the fields marked with asterisks, and the field **Type of randomization** would be activated.

For the random draw option, use the drop-down list to choose the name of the pool from which to draw them, and use the accompanying text boxes to indicate the number and point value of questions, and type of randomization, which applies only to repeated assessments attempts.

Under "Question ordering", for the type **Questions authored one-by-one**, use the radio buttons to either dictate the order of questions, or allow a random ordering (of all authored questions) within the part.

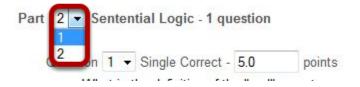

#### Enter metadata and Save.

Under "Metadata", you may use the text boxes to record any objectives, keywords, or rubrics. (Optional)

To save your changes, click **Save**. To cancel them, click **Cancel**.

# Arrange parts.

New parts will be listed in the order you create them. To switch the order of two parts, before a part's name, change the number in the drop-down list next to "Part". For example, if you have three parts, and you want the third part to appear first, use the drop-down list to change the 3 to 1. The third part will become the first part and the first part will become the third. The example illustrated will exchange the places of Parts 1 and 2.

Sakai 10 Instructor Guide Page 1078 Your assessment must contain at least one part, but you can remove any of the parts you create. You can also remove the "Default" part, as long as you've already created another part to replace it.

# Remove parts.

You can remove the Part and its questions altogether or remove the Part as a section and retain its questions.

Note: The first part listed on the editing screen will not have the Remove option. To remove the first part, you must switch its order with another part (if you don't have another part, you'll have to create one), and then click Remove.

### Choose to remove.

In the open assessment, find the part. Next to the part's name, click **Remove**.

# Choose to delete or combine the questions.

1. On the subsequent confirmation screen, choose between the following:

Remove part and all questions.

Remove part only and move question(s) to (use the accompanying drop-down list to choose another part).

Click Remove.

Sakai 10 Instructor Guide Page 1079

# What is a question pool?

A question pool is a set of questions, identified by a name, that belongs to you (not the worksite). You can share a question pool with others, and others can share theirs with you.

Questions pools are set up in advance of an assessment, for convenience. When you are ready to give your students an assessment (a test or quiz), you can pull questions from your pools and also from pools that have been shared with you.

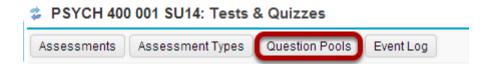

Question pools serve as the basis for random-draw questions. To give each student a different question on the same subject, set up a question pool with several equivalent questions on that subject, and then add a random-draw question using that pool.

Question pools can be subdivided into subpools, and those subpools can be further subdivided, for organization that reflects your teaching methods.

# Go to Tests & Quizzes.

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

# **Click Question Pools.**

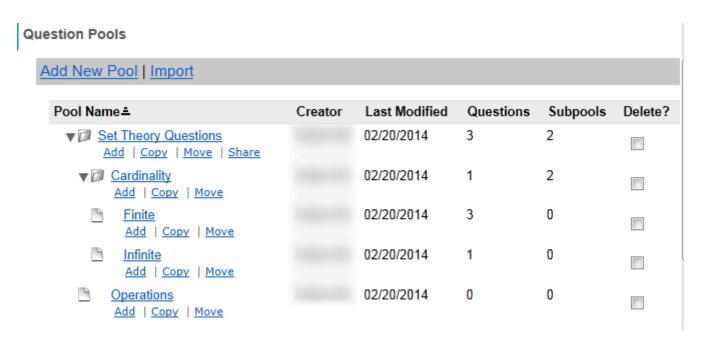

Sakai 10 Instructor Guide

Page 1080

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **Question Pool Example.**

Here we see a question pool (e.g. Set Theory Questions) that contains three questions at the top level and also a subpool (e.g. Cardinality) with questions of its own and subpools of its own.

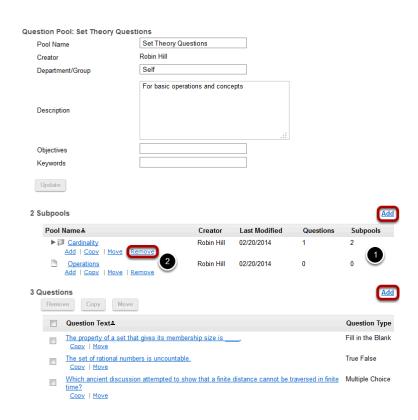

Tip: A question pool can contain both questions of its own and subpools.

You will see question pools that you have authored as well as question pools that have been shared with you by their authors.

Note: Question pools are not identified by course site, as they are associated with a specific owner rather than worksite.

Page 1081 Sakai 10 Instructor Guide This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

#### Contents of a question pool.

Clicking on the name of the pool, in this case Set Theory Questions, shows its two subpools and its three questions.

- 1. Both subpools and questions can be added with the **Add** links.
- 2. Subpools can be removed with the **Remove** links.

To create a new Question Pool, see <u>How do I add, copy, move, or remove a Question Pool</u>?

Page 1082 Sakai 10 Instructor Guide This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

# How do I add, copy, move, or remove a question pool?

Creation of a question pool consists of assigning a name and composing the questions, analogous to composing the questions of an exam. Question pools can serve as test banks for assessment questions, including random draw questions. For an overview, see <a href="What is a Question Pool?">What is a Question Pool?</a>

Note: Because a question pool cannot be given to students as is, no exam settings are available.

#### Go to Tests & Quizzes.

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

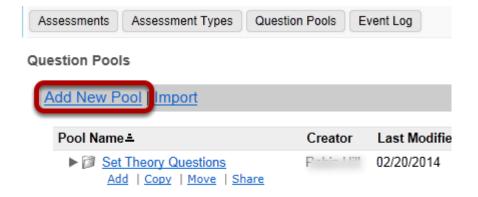

#### **Click Question Pools.**

#### Add a question pool.

You can add a new Question Pool as an empty container for future questions.

#### Click Add New Pool.

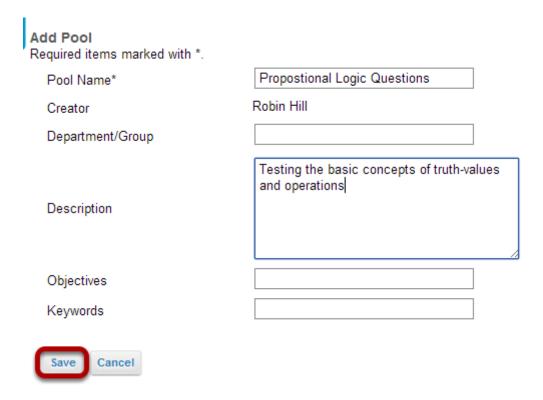

Sakai 10 Instructor Guide

Page 1083

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Any question pools already available to you will show. Choose to either add a new one, or import a pool from another site. (See <u>How do I import questions into an assessment or a Question Pool?</u>)

#### Enter the pool details and Save.

Enter the data you desire and **Save** the Question Pool.

#### The question pool is ready for adding questions.

To open the pool for authoring and editing of questions, click on its name. (For more information on adding questions to a pool, see <a href="How do I add a question to a question pool">How do I add a question to a question pool</a>?)

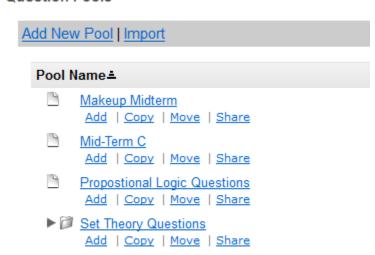

Sakai 10 Instructor Guide

Page 1084

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

#### Copy or move a question pool.

#### **Question Pools**

Decide on the destination for the question pool. You can either choose question pool TOP as the destination, which will move the pool to the top level or create a copy of the pool at the top level, or you can choose an existing question pool, which create a subpool of it. In this example, we will copy the pool Mid-Term C into a subpool of Makeup Midterm.

Click Copy (or Move). Unless you chose question pool TOP in the previous step, the original pool will become a subpool of the chosen destination pool.

Note: To move a pool from question pool TOP to question pool TOP would have no effect, and is not allowed.

#### Select the source question pool.

# Add New Pool | Import Pool Name Makeup Midterm Add Copy Move | Share Mid-Term C Add | Copy | Move | Share Propostional Logic Questions Add | Copy | Move | Share Set Theory Questions Add | Copy | Move | Share

Sakai 10 Instructor Guide

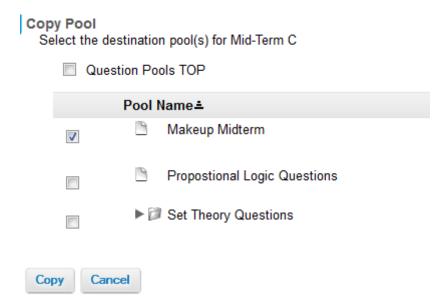

Page 1085

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

In the Question Pools screen, select either **Copy** or **Move**. To reveal existing subpools for a question pool (or a subpool), click the triangle next to its title.

Note: To move a pool from question pool TOP to question pool TOP would have no effect, and is not allowed.

#### Specify the destination.

On the Copy Pool (or Move Pool) screen, use the check boxes to select the destination pool or subpool. Choose question pools TOP to elevate a subpool to question pool status. To reveal existing subpools for a question pool (or a subpool), click the triangle next to its title.

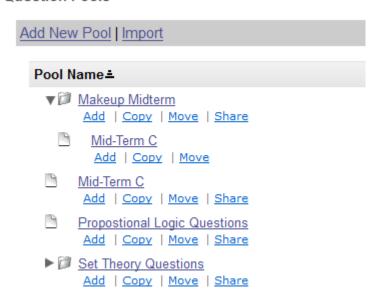

Sakai 10 Instructor Guide

Page 1086

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Copy (or Move).

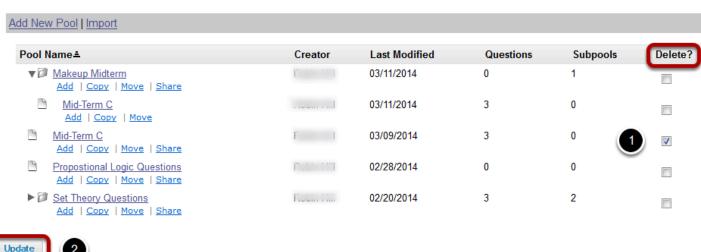

#### **Question Pools**

Click **Copy** (or **Move**). You will see a new question pool list, reflecting the new arrangement. Our example shows that Mid-Term C has been copied into a subpool of Makeup Midterm. In the case of a copy, the original question pool remains.

#### To remove a question pool.

#### **Question Pools**

In the Question Pools screen:

1. Click the checkbox in the **Delete** column.

Sakai 10 Instructor Guide

Page 1087

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

2. Click <b>Update</b> .		

#### How do I add a question to a question pool?

A question pool consists of questions developed in advance and saved for use in assessments.

#### Go to Tests & Quizzes.

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

#### **Click Question Pools.**

#### Select the pool.

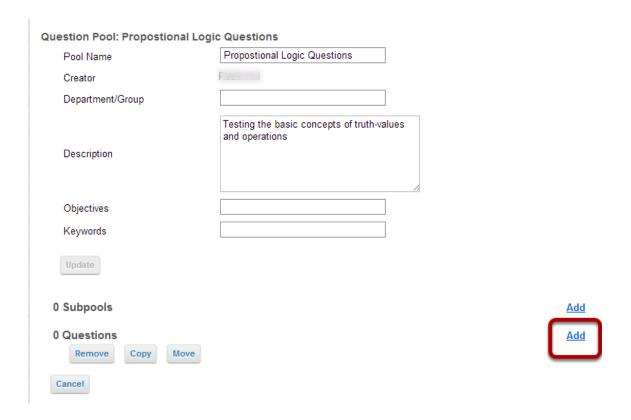

#### **Question Pools**

Select the pool that you wish to augment by clicking on its name.

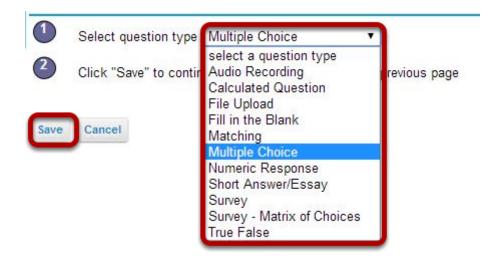

Sakai 10 Instructor Guide Page 1089

#### Click Add.

You will see the question pool details, and links for adding subpools and questions. In the Questions section, click the **Add** link on the right hand side of the screen.

#### Create a new question by choosing its type.

All of the standard question types are available in the drop-down menu. (See the help articles on individual question types for more information on adding specific types of questions to the pool.)

Sakai 10 Instructor Guide

Page 1090

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

Select the type of question you want to add and then click <b>Save</b> .	
	_

# How do I copy questions from the question pool?

This allows for questions from a particular Question Pool to be copied and added to a new or existing assessment.

Note: Questions copied from a pool are presented in the order listed in the assessment. To deliver questions randomly from a pool, see <u>How do I set up a random question set?</u>

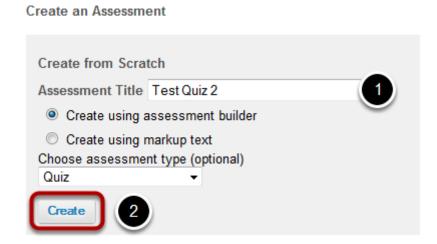

#### Go to Tests & Quizzes.

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

#### Select an assessment.

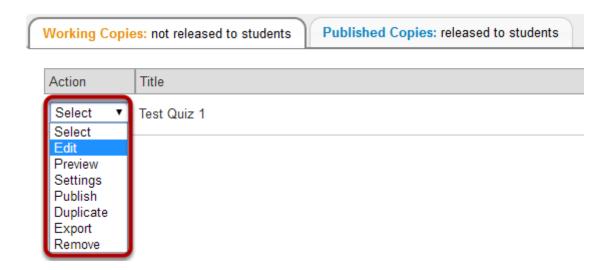

A question copied from a question pool may be added to any assessment. . Select an existing assessment or create a new one.

#### Create a New Assessment.

For more information on creating new assessments, see <a href="How do I create an assessment?">How do I create an assessment?</a>

#### Or edit an existing assessment.

#### Select Copy from Question Pool from the drop-down menu.

#### Select a question pool.

#### **Question Pools**

Select a question pool from which you would like to copy questions into the current assessment.

Select a question pool from the list.

Part 1 ▼ Random draw from new - 10 questions Update Questions

The questions for this part were generated from the question pool, new, on Friday, March 14, 2014 at 1:30:05 PM EDT. To get latest changes made to the pool, click Update Questions or click Edit for this Part and then click Save. Clicking Preview or Publish will automatically update the pool-drawn questions as will exporting an assessment.

Update Points

Sakai 10 Instructor Guide Page 1097

#### How do I import and export assessments?

The import and export operations allow you to download an assessment or question pool created in the Tests & Quizzes tool into an external file, and to upload from such an external file, or a format-compliant file obtained elsewhere, into an assessment or question pool. The file comprises the entire assessment, including its title, settings, questions, and other options.

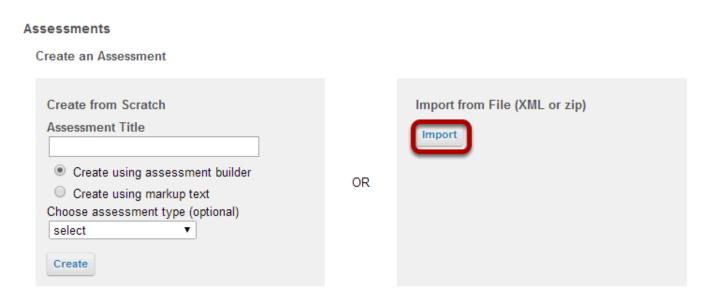

Two export formats are available, IMS QTI 1.2 and IMS Content Packaging. Content Packaging will capture links and attachments in your questions and package the file as a .zip file; you must transfer links and attachments yourself if you use IMS QTI. Both formats create an XML file of your questions with all the components labeled according to the IMS standards.

Tip: Many publishers provide test bank cartridges in IMS format. You may want to use this option if you are importing questions provided by your textbook publisher.

#### Go to Tests & Quizzes.

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

#### To import an assessment, click Import.

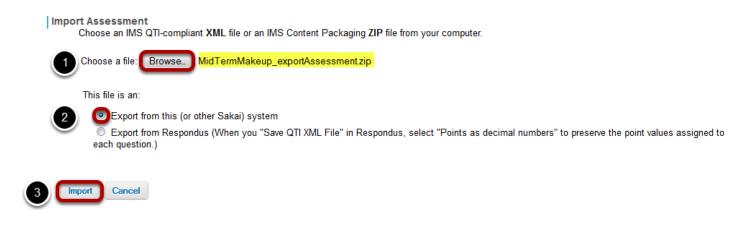

Sakai 10 Instructor Guide

Page 1099

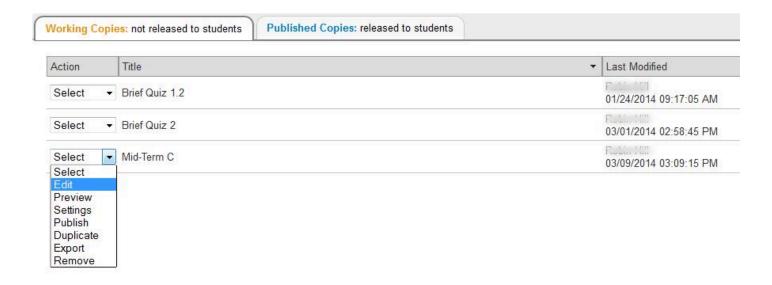

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Select your file, and click Import.

- 1. **Browse** to the file on your own computer system and open it, so that it shows the file name next to the button.
- 2. Click the radio button indicating its source for correct processing. (Tests & Quizzes supports files saved in QTI format.)
- 3. Click the **Import** button.

#### View your assessment.

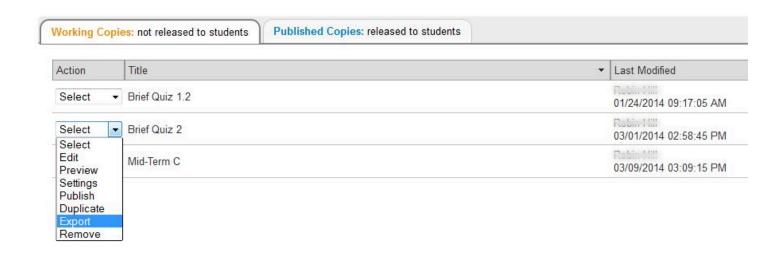

In the lower area of Tests & Quizzes, you will see a new assessment. (It will have the title of the downloaded assessment, not a title from your external file name.) You may now edit the assessment questions, or select Settings to change the title and other settings.

Sakai 10 Instructor Guide Page 1100

#### To export an assessment.

The export will create a new file on your system, suitable for saving for further use or porting to another IMS-compliant system.

#### Select the assessment.

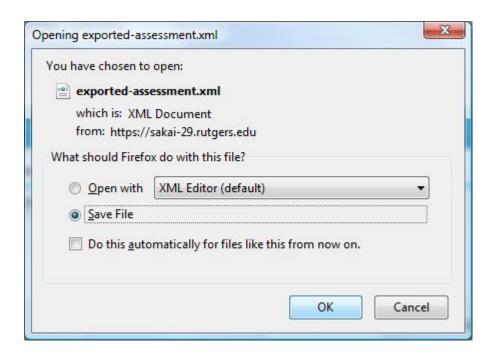

Use the drop-down menu next to the assessment title. Click **Export**.

#### Choose the export type and export.

- 1. Select the export type. Your choice will depend not only on whether you wish to capture links and attachments, but also on the import capabilities of the intended destination.
- 2. Click the **Export** button.

#### Save (download) the file to your own system.

The exact prompts and steps will depend on your browser, but you may be prompted for the action to take. The resulting file can be stored for later import.

#### How do I import a question pool?

A question pool is a set of questions of any types that belongs to the author and others with whom the author shares it. See <a href="What is a Question Pool?">What is a Question Pool?</a>

A question pool is available to the author in any worksite in which that person has permission to create assessments, and will show in the list of Question Pools.

You can import a question pool from a saved assessment, or from a file provided by a publisher or exported from another system.

Note: There is currently no way to export question pools, but the questions can be <u>exported in the</u> <u>form of an assessment</u>.

#### Go to Tests & Quizzes.

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

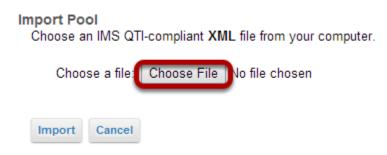

#### **Click Question Pools.**

#### Select Import.

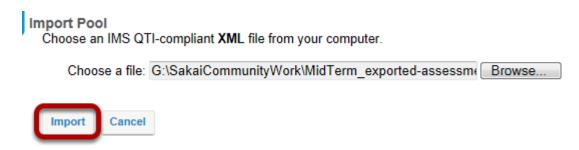

Add New Pool Import

#### Click Choose File.

Click the **Choose File** button to browse for and select the import file on your computer.

#### Click Import.

Once you have located the file, click **Import**.

#### The question pool is imported to the site.

You will see the question pool, under the name it was given in the import file, in your list of question pools.

Sakai 10 Instructor Guide

Page 1104

#### How do I share a question pool?

By default, only you will be able to access the question pools you create, but you can share your question pools with other instructors from within the system.

You can only share a question pool with a user who has permission to create assessments, and you must share the question pool from a site for which both you and the user have such a role; it does not have to be the site where you created the pool.

Once someone shares a question pool with you, you can then access the pool from any site in which you have the ability to create assessments, unless the creator of the pool revokes access.

Pool owners will see the names of everyone with whom they've shared the pool on the Share Pool screen in all of their own sites. If someone with whom a pool has been shared is not a member of the site the pool owner is viewing, that person will be listed under "Site Members with Access" with the role of "anonymous\_access".

Removing a user from a site does not remove access to any question pools you've shared with him or her; you must revoke access using the instructions below.

#### Go to Tests & Quizzes.

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

#### **Click Question Pools.**

Sakai 10 Instructor Guide

Page 1105

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Choose to share the question pool.

#### Question Pools

Make sure that the other pool author is a participant with a role that allows creation of assessments. In Tests & Quizzes, go to **Question Pools**. Under the name of the pool you wish to share with that person, click **Share**.

#### Grant access.

- 1. Next to the person's name, click **Grant Access**.
- 2. Click **Share**.

#### The other participant is an author.

#### **Question Pools**

Add New Pool   Import					
Pool Name≛	Creator	Last Modified	Questions	Subpools	Delete?
► Makeup Midterm  Add   Copy   Move   Share		03/11/2014	0	1	
Mid-Term C Copy   Remove me		03/13/2014	3	0	

Sakai 10 Instructor Guide Page 1106

The other person will now see the pool, under the same name, with your name as **Creator**, in his or her **Question Pools** list, with options to edit the shared question pool (by clicking on its name, as usual), **Copy** it to another pool, or withdraw (**Remove Me**).

#### How do I create a survey?

This allows for a survey to be added to a new or existing assessment. There are two types: a basic survey and a matrix of choices survey.

#### Go to Tests & Quizzes.

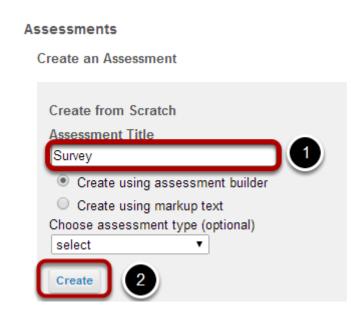

Select the **Tests & Quizzes** tool from the Tool Menu in your site.

#### Select an assessment.

A survey question (either a basic survey or a matrix of choices) may be added to any assessment. Select an existing assessment or create a new one.

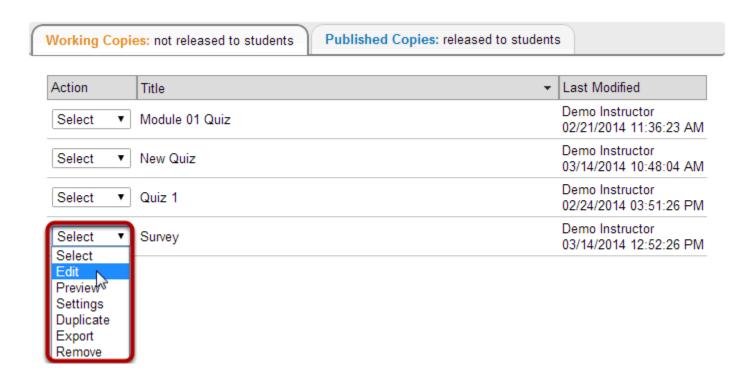

Note: You may also <u>add a question directly to a question pool</u>.

#### Create a new assessment.

For more information on creating new assessments, see **How do I create an assessment?** 

#### Or edit an existing assessment.

## For a basic survey, select Survey from the drop-down menu.

After selecting **Survey** from the drop-down menu, the program will open additional options for the question.

#### Add an Answer Point Value.

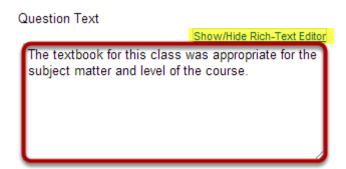

This allows for the **Answer Point Value** to be manually inputted.

Sakai 10 Instructor Guide

Page 1109

#### **Add Question Text.**

Type the question text to the text box provided.

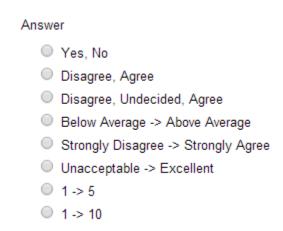

Note: To edit with **Rich-Text Editor**, click the hyperlink to open the full menu.

#### **Add Attachment. (Optional)**

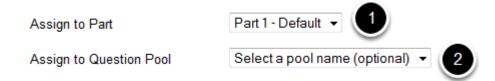

Click **Add Attachments** to browse for and select a file attachment.

#### Select Answer(s) from list.

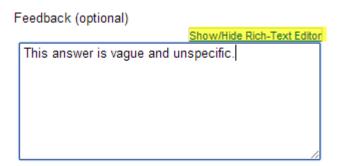

Select an answer or answers from the list. However, it is only possible to select one circle.

## Assign the question to a portion of the assessment and/or a Question Pool. (Optional)

- 1. The question can be added to a specific portion of the assessment, such as Part 1 or Part 2 (depending on how many parts exist). Part 1 is the default location.
- 2. The question may also be added to a **Question Pool**, if desired.

#### **Provide Feedback. (Optional)**

**Feedback** is optional text available for students to view after the particular question is graded.

Note: To edit with **Rich-Text Editor**, click the hyperlink to open the full menu.

#### Click Save.

Click **Save** to save the question (or **Cancel** to exit).

Sakai 10 Instructor Guide

Page 1111

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## For a matrix of choices survey, select Survey - Matrix of Choices from the drop-down menu.

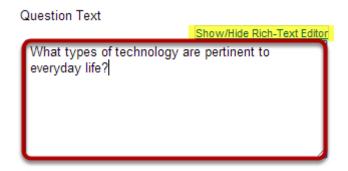

After selecting **Survey - Matrix of Choices** from the drop-down menu, the program will open additional options for the question.

#### Add an Answer Point Value.

This allows for the **Answer Point Value** to be manually inputted.

#### **Add Question Text.**

Type the **Question Text** into the text box provided.

Note: To edit with **Rich-Text Editor**, click the hyperlink to open the full menu.

Sakai 10 Instructor Guide

Page 1112

#### Add Attachment.

Click **Add Attachments** to browse for and select a file attachment.

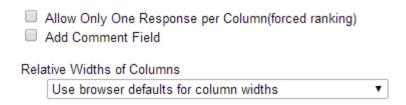

#### **Select Answer Options.**

	column choice #1	column choice #2
row choice #1	Θ	Θ
row choice #2	0	Θ
ow Choices (press	"Return" key after	each choice)
Column Choices (pr	ess "Return" kev af	ter each choice)
Column Choices (pr	ess "Return" key af	ter each choice)
Column Choices (pr	ess "Return" key af	ter each choice)
Column Choices (pr	ess "Return" key af	ter each choice)

Input the desired choices for **Row Choices** and **Column choices** in the corresponding boxes. Press **Return** after each choice to separate.

Sakai 10 Instructor Guide Page 1113

#### Regulate Response Ranking, Comments and Column Width

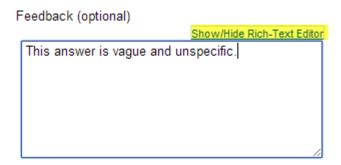

Check the boxes if **forced ranking** is desired or to include a **Comment Field** in the survey. The drop-down menu is available to regulate column and row **width**. The widths are based in percentages.

### Assign the question to a portion of the assessment and/or a Question Pool.

- 1. The question can be added to a specific portion of the assessment, such as Part 1 or Part 2 (depending on how many parts exist). Part 1 is the default location.
- 2. The question may also be added to a **Question Pool**, if desired.

#### Provide Feedback (optional).

**Feedback** is optional text available for students to view after the particular question is graded.

Note: To edit with **Rich-Text Editor**, click the hyperlink to open the full menu.

## How do I inspect and adjust the settings of an assessment?

The settings of a test or quiz are complex, and offer many options. In many cases, the default values will work, but should be reviewed. The modification of a setting in one section will not change settings in other sections.

#### Go to Tests & Quizzes.

Select the **Tests & Quizzes** tool from the Tool Menu of your course.

#### Edit the settings.

From the Tests & Quizzes tool home screen, choose the **Settings** option in the drop-down menu for the quiz you would like to publish.

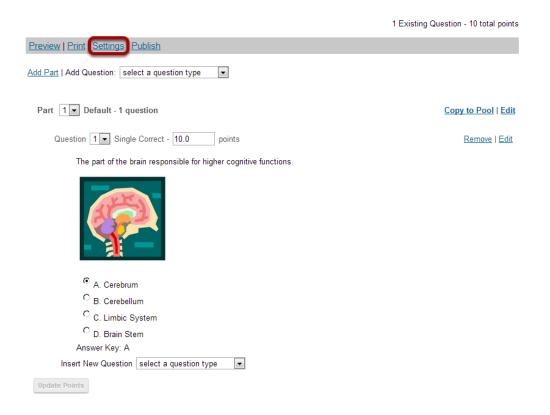

Be sure that you are in the **Working Copies** tab, otherwise, you won't see your unpublished items.

Sakai 10 Instructor Guide

Page 1116

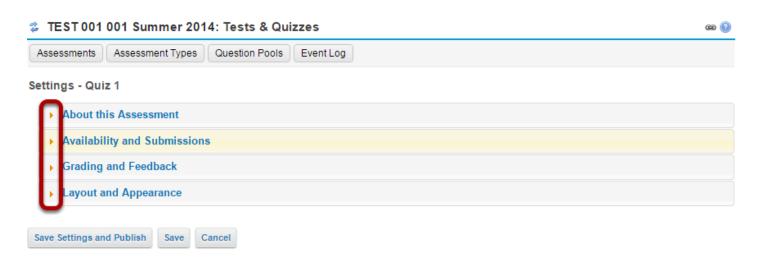

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# Alternately, you can access assessment settings from the edit assessment screen.

If you are currently editing the quiz in question, click the **Settings** link at the top of the assessment editing screen.

#### Settings options.

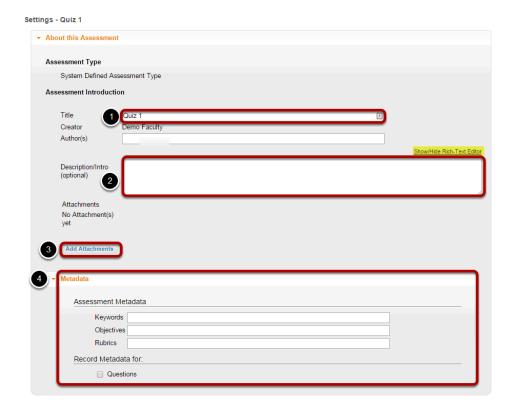

This is a list of the options available in the assessment settings. Click on the small triangle next to each section to expand/collapse that section.

Sakai 10 Instructor Guide

Page 1117

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### About this assessment.

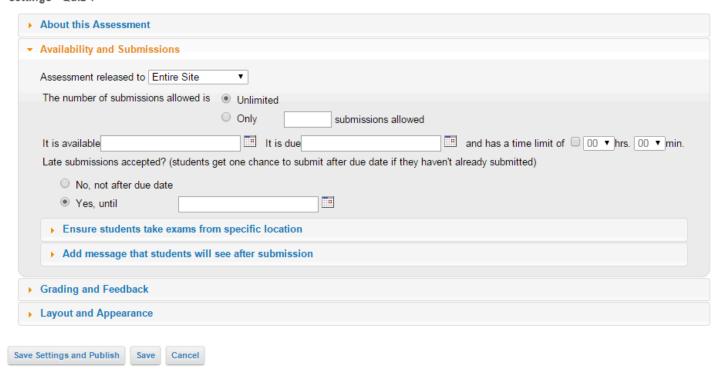

#### The first section is the **Assessment Introduction**.

- 1. This is where you can change the title of your assessment if desired, and add authors' names
- 2. Optionally, you may also add a description. Anything you enter into the description field will be visible to students before they begin the assessment. Notice that the <u>Rich Text Editor</u> is available in the description field.
- 3. You can attach a file if you like. The file could be a reference the students need to use during the test, or more detailed instructions on test taking requirements.
- 4. The Metadata section may be optionally expanded to enter additional information about the assessment.

#### **Availability and Submissions**

#### Settings - Quiz 1

The Availability and Submission section controls when your assessment is available and which users have access to it.

#### Availability and Submissions: Assessment Released to.

By default, the assessment will be released to the **Entire Site**. If you would like the assessment to be released to **Anonymous Users** (i.e. users outside the current course) or **Selected Groups** within your course, select the appropriate radio button. (The groups option is only available if there are existing groups in your site.)

Note: If you release an assessment to anonymous users, you must distribute its URL to participants; it will not be accessible from within your site's Tests & Quizzes tool. The URL will be presented when you publish the assessment.

Sakai 10 Instructor Guide

Page 1119

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

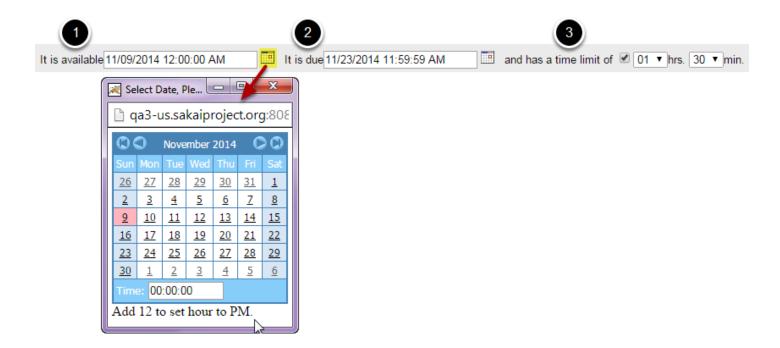

#### Availability and Submissions: Number of submissions.

Enter the number of times students are allowed to submit the assessment, or choose **Unlimited** to let them submit as many times as they like.

*Tip: Unlimited submissions are often used for self-assessment, practice tests, or drills.* 

#### **Availability and Submissions: Delivery Dates and Time Limit**

The delivery dates let you specify the availability window for your assessment. You may enter the dates into the fields provided, or use the date-picker (calendar window) to select a date and time.

- 1. The **Available Date** is the start date of the exam window. Students will not be able to see the assessment before this date.
- 2. The **Due Date** is the end date for the exam window. Students will not be able to submit after this date unless you allow late submissions. If late submissions are allowed, any submissions after the due date will be marked as late.
- If you would like a **Time Limit** on your assessment to be timed, select the check box for **has** a time limit of and select the desired time in hours and minutes from the drop-down menus.

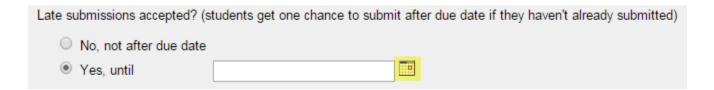

Tip: If you want an assessment to always be open, you may leave the date fields blank.

Sakai 10 Instructor Guide

Page 1120

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

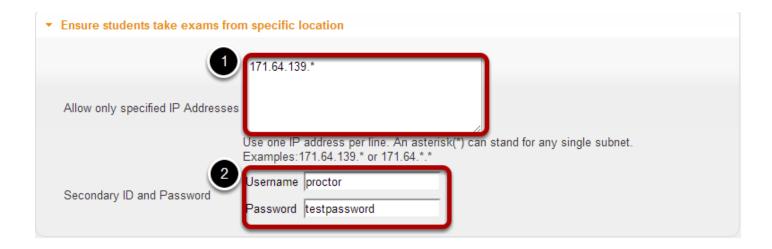

#### Availability and Submissions: Late handling.

Choose whether or not you will accept late submissions. If you do allow late submissions, they will be marked as late if they come in after the due date. Use the date picker to select a deadline for late submissions.

Note: Even if you allow multiple submissions, only one late submission is allowed after the due date, and it only applies to students who have not submitted at all.

# Availability and Submissions: Exam security by location or password.

For high stakes testing, you may want to provide additional security for your assessment. Click on the **Ensure students take exams from specific location** link to expand that section and display the following options.

- 1. You may restrict the assessment so that only connections from certain IP addresses are allowed, such as the testing center on campus. Enter one IP per line. Asterisks may be used to stand for any single subnet.
- 2. You may also specify an additional username and password for the assessment. This information is typically provided to a proctor who enters the information for the student at the testing center.

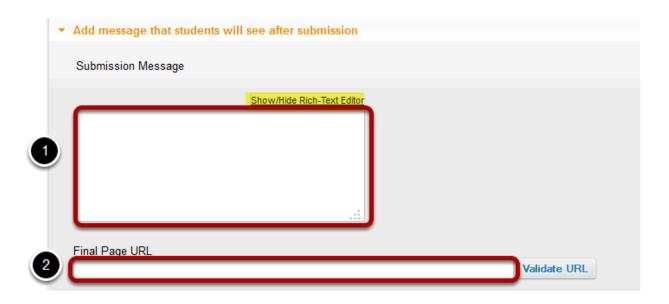

Note: The username and password here are for this specific assessment, and NOT the instructor's or the student's login information.

Sakai 10 Instructor Guide

Page 1121

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

#### Availability and Submissions: Submission message.

- 1. If you would like to enter a message that students see upon submitting their assessment, you may do so here. The rich-text editor is available if desired.
- 2. You may include a URL if you like. The URL link for this page will be displayed after the student submits the test.

#### Availability and Submissions: Automatic submission.

#### Automatic Submission

Saved assessments will be automatically submitted after the retract date passes.

This option forces the submission of saved assessments for students who have NO previous submissions.

Check this box if you want assessments to be auto-submitted after the retract date.

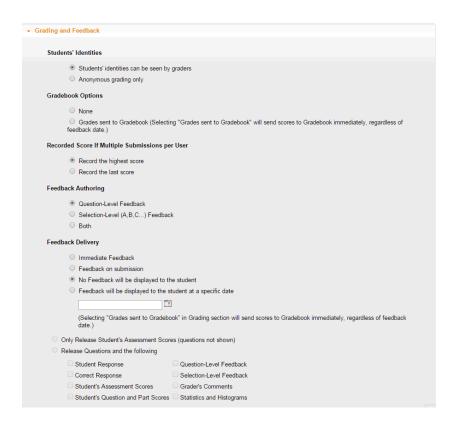

Note: You will only see this option if it is enabled on your instance. By default, it is not enabled.

Sakai 10 Instructor Guide

Page 1122

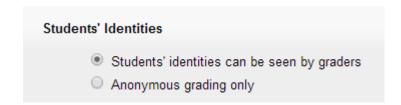

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **Grading and Feedback**

This section deals with the grading and feedback options for your assessment.

#### **Grading and Feedback: Student's identities.**

The default setting here is **Student identities can be seen by graders**. In most cases, you want to keep this setting, since there is no way to revert to student names once they have submitted the assessment anonymously.

However, if you are using the Tests & Quizzes tool to deliver a survey in your course, you may want to make the survey submissions anonymous by selecting **Anonymous grading only**.

Sakai 10 Instructor Guide

Page 1123

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **Grading and Feedback: Gradebook options.**

#### **Gradebook Options** None Grades sent to Gradebook (Selecting "Grades sent to Gradebook" will send scores to Gradebook immediately, regardless of feedback date.)

Gradebook Options include None (the default) or Grades sent to Gradebook. Select to send grades to gradebook if you want to be able to calculate them as part of the course grade.

#### **Grading and Feedback: Recorded Score.**

#### Recorded Score If Multiple Submissions per User Record the highest score Record the last score

Recorded Score options include either the highest or the last score submitted. If you allow multiple attempts, select the type of score that you want to be recorded in the gradebook for that assessment.

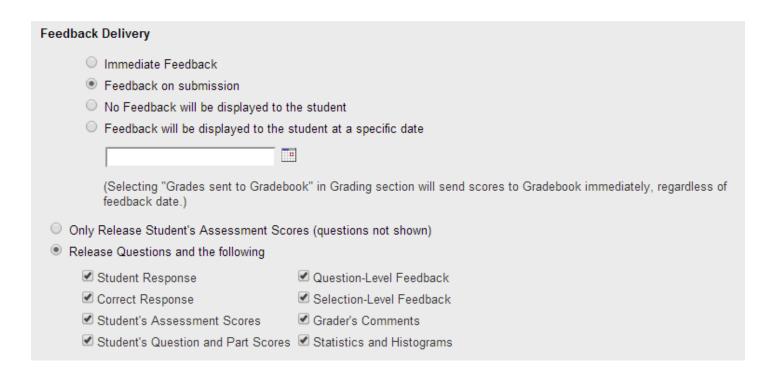

#### **Grading and Feedback: Feedback authoring.**

#### Feedback Authoring Question-Level Feedback Selection-Level (A,B,C...) Feedback Both

For Feedback Authoring, the default option is **Question-Level Feedback**. This allows the instructor to author feedback at the question level. You may also choose to display Selection-**Level Feedback** (i.e. feedback per answer choice), or **Both**.

Sakai 10 Instructor Guide Page 1124

#### **Grading and Feedback: Feedback delivery.**

Feedback Delivery controls if and when students are able see their submission results.

- **Immediate feedback** is recommended for self-tests only, as it will display the answers immediately PRIOR to the student submitting the assessment.
- **Feedback on submission** displays feedback to students as soon as they submit the assessment.
- **No Feedback** (the default setting) does not display any feedback to the student.
- Feedback on a specific date releases assessment feedback upon the date and time specified.

You can also decide how much feedback you want to release to students.

- You can choose to **Only Release Student's Assessment Scores** so that they only see their grade on the assessment, not individual questions.
- Or, you can choose to **Release Question and the following** and then select the items that you want students to see from the list below. Check the box next to any items you want students to see.

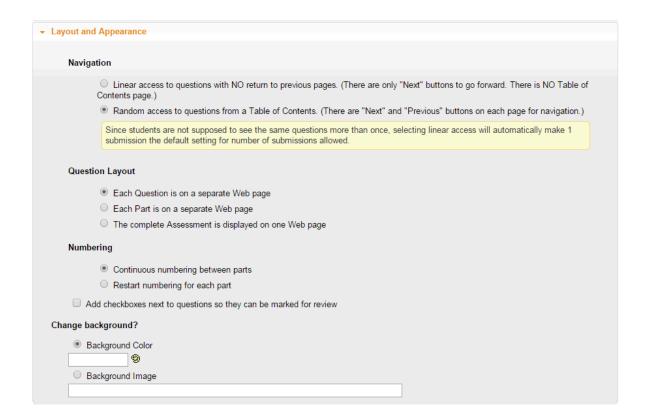

Tip: If you are concerned about students sharing their exam results with one another, you should choose either **No Feedback** or **Feedback on a specific date**. For the latter, selecting a date after the closing date for the assessment will prevent students from sharing feedback with other students who have not yet taken the test.

Sakai 10 Instructor Guide

Page 1125

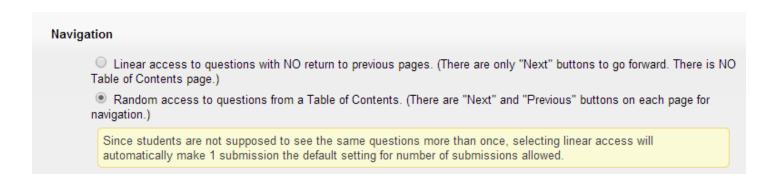

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **Layout and Appearance**

This section has to do with the appearance of the assessment and how students navigate through the test.

#### Layout and Appearance: Navigation.

Navigation controls how students proceed through the test. The default is **Random access** where students can navigate through the test with Next and Previous buttons, as well as a Table of Contents. You may change this to **Linear access** if you prefer, where students can only go forward using the Next button and cannot revisit earlier questions or access a Table of Contents to jump to a question.

Sakai 10 Instructor Guide

Page 1126

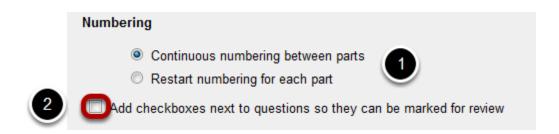

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### **Layout and Appearance: Question Layout.**

# Question Layout Each Question is on a separate Web page Each Part is on a separate Web page The complete Assessment is displayed on one Web page

You can control the presentation of the questions according to the options shown. To display the entire assessment on a single Web page, allowing students to scroll through it, click the third choice.

### Layout and Appearance: Numbering and allowing Mark for Review.

- 1. Choose the numbering pattern here. Numbering can be either **Continuous** throughout the test, or can **Restart** for each part. (For example, if you have multiple parts in the exam and the second part is for essay questions, you could have the numbering go back to 1 for the first essay question.) If you restart numbering for each part, questions are numbered with the part number, then the question number.
- 2. If you want to allow students to mark questions to go back to, check the box for this item. Students may use this option to mark questions that they aren't sure about, and then jump back to them via the Table of Contents to review before submitting.

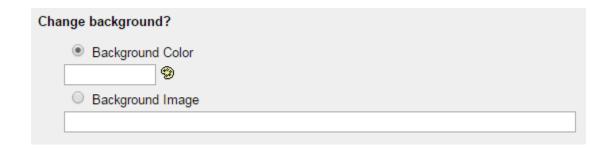

Note: You cannot allow **Mark for Review** if **Linear** access navigation is selected.

Sakai 10 Instructor Guide

Page 1127

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Layout and Appearance: Background color.

You can choose a color or image for the background here. To select the colors, click the palette icon. The image is given by a URL. An image smaller than the screen will be tiled for to cover the entire screen area.

Note: It is typically a best practice to leave the background of the assessment a solid color which provides good color contrast between text and background (e.g. a white background with black text) so that students can easily read the questions. Background images may make the assessment difficult to read if images compete with the text.

#### Effects of settings.

You can modify the settings, parts, and questions of any assessment listed under "Pending Assessments". When you publish an assessment, a copy is created and listed under "Published Assessments". For the published copy, you can make changes to all the settings except "Assessment Released To".

Note: After you've published an assessment, if you modify the unpublished version under "Pending Assessments", you'll have to alter the assessment's name before republishing it. When you publish it, you'll be creating another publication under "Published Assessments", not replacing the existing published copy. Also, if you modify the settings of a test while students are taking it, the changes will not affect testing sessions in progress. Students must exit the test and re-enter it in order to have the modified settings take effect.

#### Publish the assessment.

When the assessment settings are ready, and the questions are in place, publish the assessment so that your students can take it. See the article <u>How do I publish an assessment</u> (i.e. test or quiz)?

Sakai 10 Instructor Guide

Page 1128

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

# How do I publish an assessment (i.e. test or quiz)?

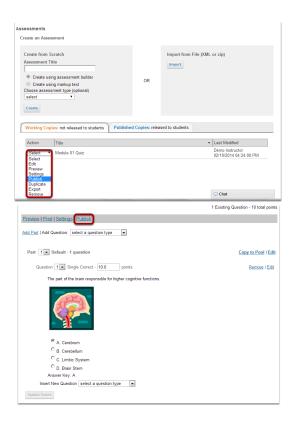

After you have created an assessment, you must publish it before students can view and submit it.

#### Go to Tests & Quizzes.

Select the **Tests & Quizzes** tool from the Tool Menu of your course.

#### Publish with current settings.

If you are sure that the default or current settings are appropriate, you can publish from either the action menu or the edit assessment screen.

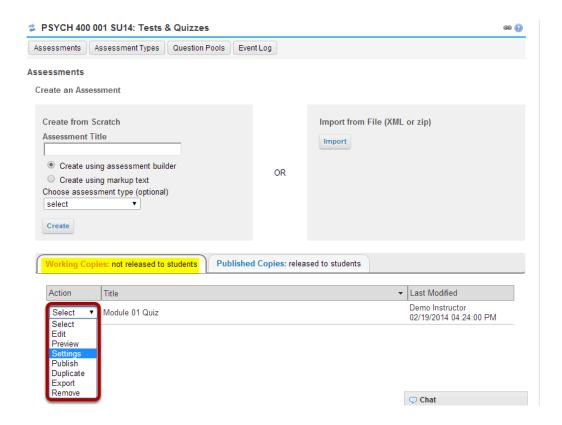

Sakai 10 Instructor Guide

Page 1129

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Edit the settings and then publish.

From the Tests & Quizzes tool home screen, choose the **Settings** option in the drop-down menu for the quiz you would like to publish.

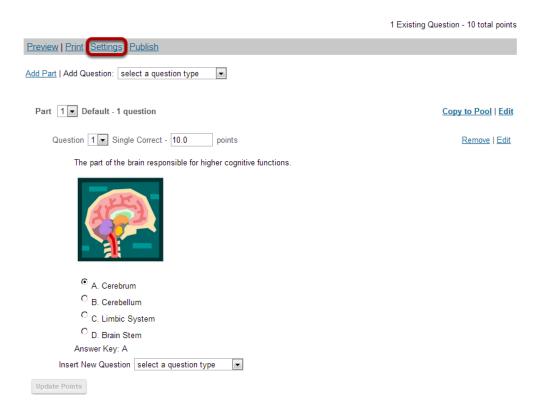

Be sure that you are in the **Working Copies** tab, otherwise, you won't see your unpublished items.

Sakai 10 Instructor Guide

Page 1130

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/hv/4.0/

# Alternately, you can access assessment settings from the edit assessment screen.

If you are currently editing the quiz in question, click the **Settings** link at the top of the assessment editing screen.

#### Adjust the settings as desired.

See the article How do I inspect and adjust the settings of an assessment?

Note: Settings are typically adjusted fully on the Working Copy before publishing.

#### Save settings and publish.

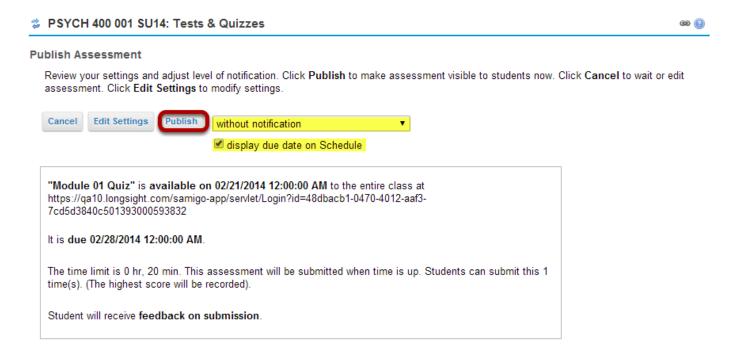

Once you have completed all of your settings selections, click the Save **Settings and Publish** button at the bottom of the screen.

Note: You may also choose to **Save** settings without publishing, or **Cancel** to cancel the assessment settings.

Sakai 10 Instructor Guide

Page 1131
This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Review and confirm publishing of assessment.

Your setting choices will be summarized for you on the confirmation screen. Review all of the information to make sure it is correct. (If you need to make changes, you can go back by clicking **Edit Settings**.)

You have the option to notify students when you publish the assessment. The default setting is **without notification**. Notifying students sends and email to their external email address to let them know the assessment has been published. It sends the message at the time of publication, NOT on the start date of the assessment.

If your assessment has an end date, you may select to **Display due date on Schedule**. This will post an event on the Schedule/Calendar for the course on the date the assessment is due.

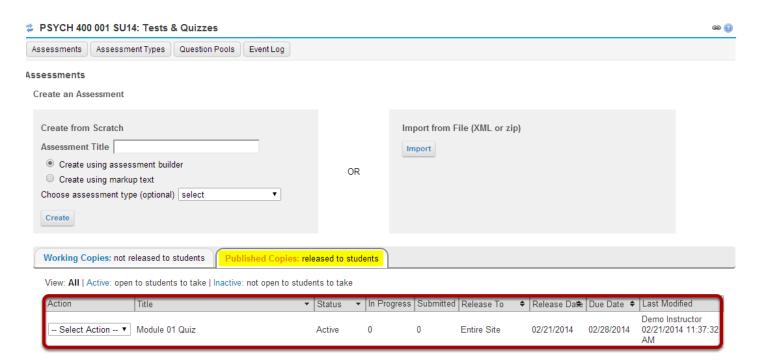

Click on **Publish** to make the assessment available to students.

Sakai 10 Instructor Guide

Page 1132

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### View published assessment.

Once you have published your assessment, it will be displayed in the list of published assessments, along with the status, submission and release information, and who last modified the item.

Notice that the assessment now appears on the **Published** tab, as opposed to the **Working** Copies tab.

Page 1133 Sakai 10 Instructor Guide This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

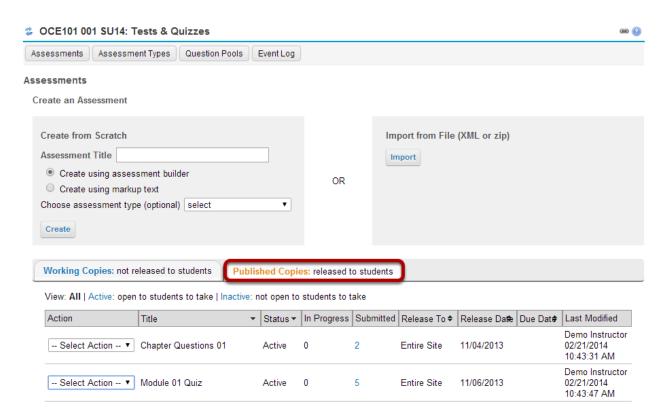

#### **How do I grade Tests & Quizzes?**

Most question types in Tests & Quizzes are automatically graded by the system. However, you will need to manually score short answer/essay items, file uploads, and audio recordings. You may also adjust the auto-graded scores, add comments, or give partial credit.

#### Go to Tests & Quizzes.

Select the **Tests & Quizzes** tool from the Tool Menu of your site.

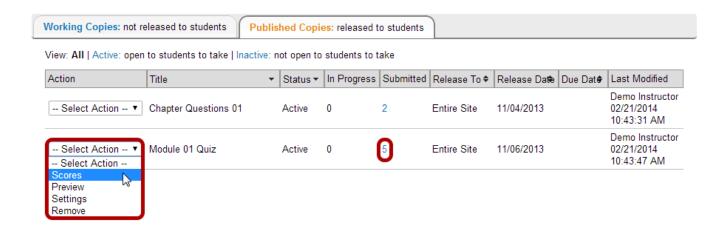

#### Select the Published Copies tab.

Click on the **Published Copies** tab to view the assessments that have been released to students in your site.

Sakai 10 Instructor Guide Page 1134

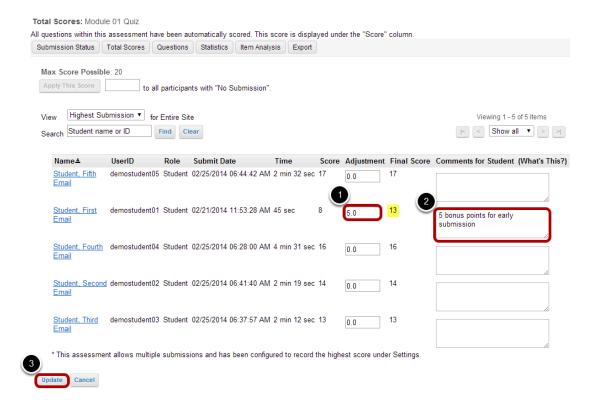

#### Go to the assessment submissions.

Select the **Scores** option from the drop-down menu for the assessment you would like to grade.

Alternately, you may also click on the number of student submissions in the **Submitted** column to view the submissions.

#### Enter score adjustment and comments.

To make a grade adjustment to the overall assessment score:

Sakai 10 Instructor Guide

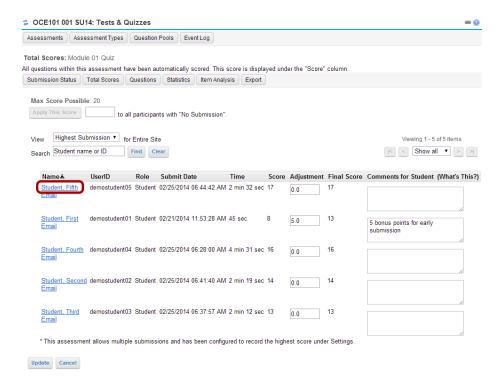

Page 1135

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

- 1. Enter a positive or negative score into the **Adjustment** column to add or subtract points from the student's overall score.
- 2. You may also enter comments in the **Comments for Student** column if you like. Students will see these comments when they view the assessment feedback.
- 3. Scroll down to the bottom of the list and click the **Update** button to save your changes.

Note: The Final Score column will display the adjusted score after you save your changes.

#### Grade by student.

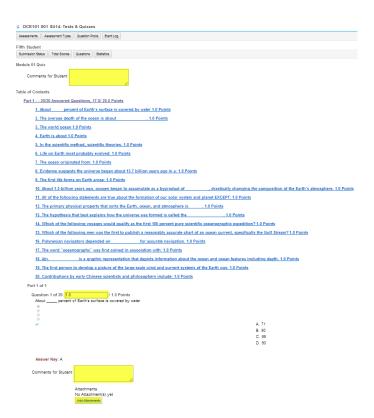

If you would like to grade an individual student submission, click on the student's name.

Sakai 10 Instructor Guide

Page 1136

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### View and enter grades/comments for the individual student.

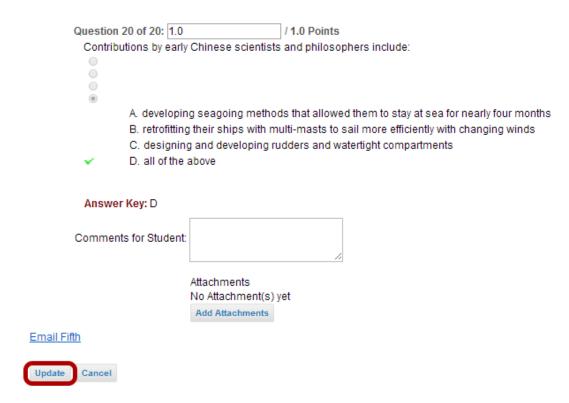

The individual student submission will be displayed, showing all of the questions and answers for that student. You may enter or modify comments and points for any of the questions in the assessments as needed. You may also add attachments to provide additional feedback for a particular question if desired.

Sakai 10 Instructor Guide

Page 1137

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

#### Save your changes.

Be sure to scroll down to the bottom and click **Update** to save your changes!

#### Grade by question.

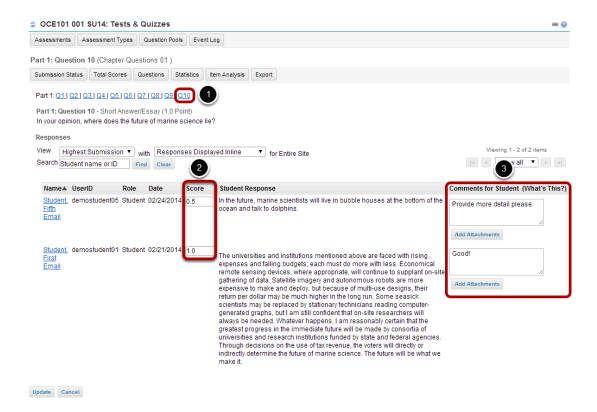

If you prefer to grade all of the student submissions for one question at a time, click on the **Questions** link in the assessment menu.

Sakai 10 Instructor Guide

Page 1138

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://greative.commons.org/licenses/by/4.0/

#### Select the question and enter grades/comments.

All of the student responses will be displayed by question. To grade by question:

- 1. Select the question number that you would like to grade from the list of question numbers at the top.
- 2. Enter the score for each student for the selected question.
- Enter comments and/or add an attachment in the Comments for Student column if desired.

#### Save your changes.

Be sure to scroll down to the bottom and click **Update** to save your changes!

#### What is the Tests & Quizzes Event Log?

The Event Log shows certain student activities for all Tests & Quizzes in the site. It is created and maintained automatically.

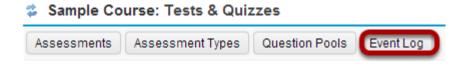

Events recorded include (for each participant), entry to the assessment (date and time), submission of the assessment (date and time), duration of the student session in minutes, errors (if any) detected by the T&Q system, and IP address of the submitter.

Note: There must be existing student submissions in order for data to appear in the event log.

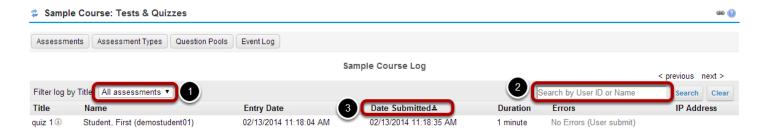

#### Go to Tests & Quizzes.

Select the **Test & Quizzes** tool from the Tool Menu in your site.

#### Click Event Log.

#### Viewing event data.

- 1. To view data for a certain test or quiz, use the "Filter" menu to choose its title, or use the default value, "All assessments."
- 2. You can also search the log data for a certain student by entering the user ID or name in the search field.
- 3. Click on a column heading (Title, Name, Entry Date, Date Submitted, IP Address) to sort the entries on that data field. Click again to switch between ascending and descending order.

### **Web Content**

#### What is the Web Content tool?

The Web Content tool allows Instructors to create a link to a web site in the Tool Menu of the site. By default, the link opens a re-direct page that allows the web site to be opened in a new window.

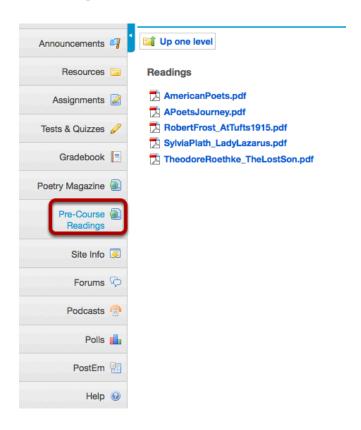

Instructors can also use the Web Content tool to create a tool link to a folder or a file in Resources.

#### **Example of a Web Content link to a website.**

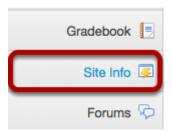

Sakai 10 Instructor Guide Page 1142 This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

#### Example of a Web Content link to a folder in Resources.

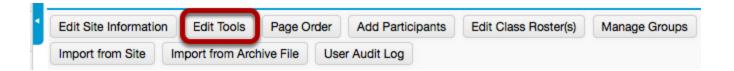

# How do I create a Web Content link to a web site?

#### Go to Site Info.

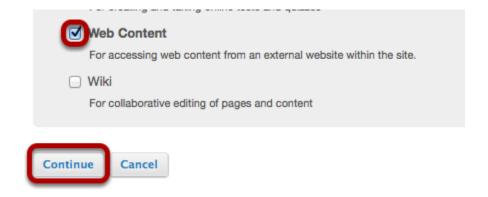

Select the **Site Info** tool from the Tool Menu of your site.

#### Click Edit Tools.

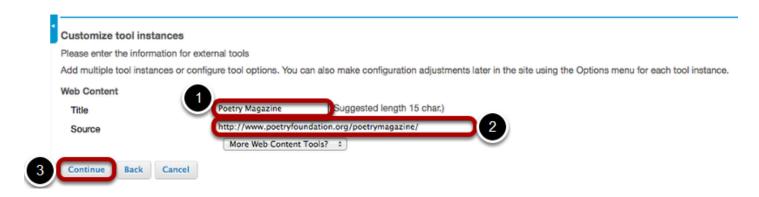

#### Select the Web Content tool.

Place a check mark in the box next to Web Content, and then click **Continue**.

#### Enter the web site information.

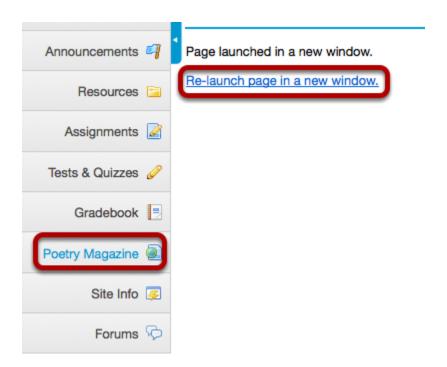

- 1. Enter a title for the Web Content tool (which will display in the Tool Menu).
- 2. Enter the URL for the web site.
- 3. Click Continue.

#### Click Finish.

#### View the new Web Content link.

Sakai 10 Instructor Guide

Page 1145

Edit any or all of the following:

- Tool Title
- Page Title
- Frame Height
- URL
- Open in new window
- · Launch Maximum Width

Then, click **Update Options** to save your changes.

#### View updated link.

The Web Content tool will now display the updated title and/or other settings.

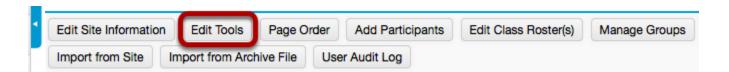

## How do I delete a Web Content link?

#### Go to Site Info.

Select **Site Info** from the Tool Menu in your site.

#### Click Edit Tools.

#### Un-check the Web Content tool link.

Remove the check mark next to the Web Content tool link that you want to delete.

#### Click Continue.

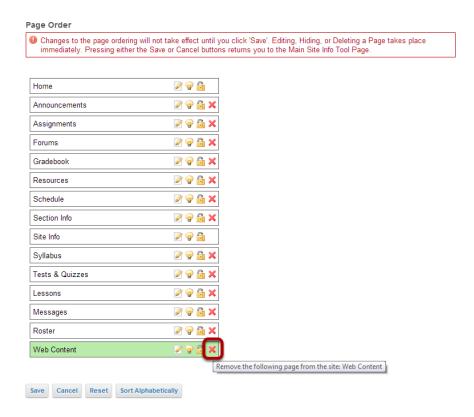

## Click Finish.

## Or, click Page Order.

#### Click the red X.

Click the red X next to the item you want to delete.

### Confirm deletion.

If you are sure you want to delete the item, click **OK**.

## **Click Save.**

# Wiki

## What is the Wiki tool?

The Wiki tool allows people to collaboratively author web pages, without the need for advanced web authoring skills. The Wiki tool was designed specifically for site participants to collaborate on documents, share information and create online materials within a course or project site. Users have the option to subscribe to the site Wiki and be notified about content updates. There is also the option to make wiki pages available to the outside world beyond the course if desired.

## To access this tool, select Wiki from the Tool Menu in your site.

# How do I view wiki pages?

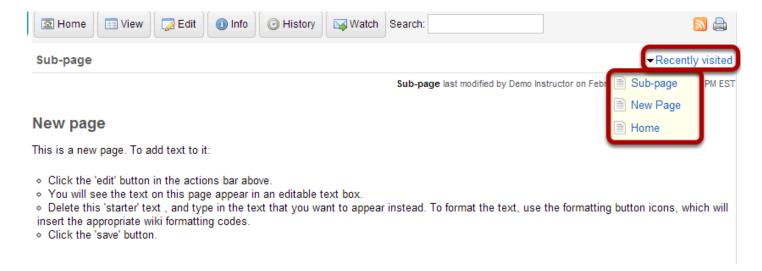

To move from page to page in Wiki, follow the links within each page. Links with a world icon beside them link to external websites or to attachments. These will open in a new window.

Unlike some wiki tools, Wiki does not have a separate menu to navigate through the pages. All navigation must be done through links on the pages.

#### Go to Wiki.

Select the Wiki tool from the Tool Menu of your site.

## Recently visited pages.

As you navigate around Wiki, your recently visited pages will appear in the drop-down list in the top right corner of the page. Click on the **Recently Visited** link to expand or collapse this list. You can use the links in this list to return to any page at any time.

Sakai 10 Instructor Guide

Page 1158

# How do I search wiki pages?

#### Go to Wiki.

Select the **Wiki** tool from the Tool Menu of your site.

#### Enter search terms.

Type your search term in the search box, and then press **Enter** on your keyboard.

All pages on that wiki site containing your search terms will be listed. This search will be recorded in your Recently Visited page list and you can return to your results page at any time.

Wiki will recognize the "and" operator but not "not" or "or". For example, searching for "children and dahlias" will find pages which contain both the word "children" and the word "dahlias" but not pages which contain only one of the words.

Note: Pages which are not in the wiki will not be searched. This includes other Sakai pages (e.g. Schedule, Syllabus, etc.) and attachments to the wiki.

# How do I edit wiki pages?

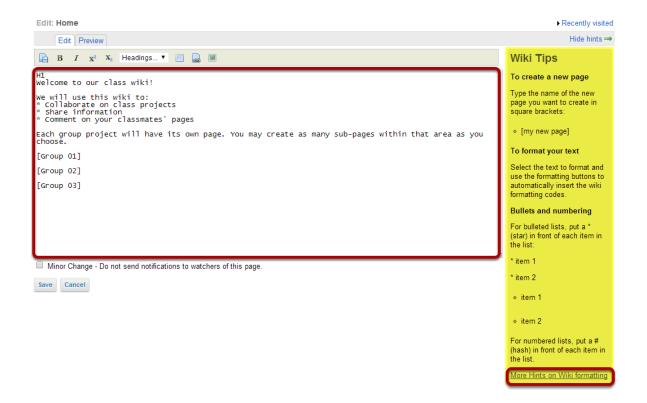

#### Go to Wiki.

Select the Wiki tool from the Tool Menu of your site.

#### Click Edit.

## Enter the page content.

Enter your content into the editing area provided.

Note: If you need some help formatting your text, refer to the Wiki Tips sidebar which contains information on how to use the appropriate mark-up to format text. You may also click on the **More Hints on Wiki formatting** link in the sidebar to view additional examples.

# Use editor icons to format text or add tables, links, images, and attachments. (Optional)

The wiki editor also has icons which allow you to:

- Save.
- Make text bold.
- · Make text italic.
- Add a superscript.
- · Add a subscript.
- · Choose heading level.
- · Add a table.
- · Add a link.
- Add an image or attachment.

## **Preview content. (Optional)**

#### Welcome to our class wiki!

We will use this wiki to:

- · Collaborate on class projects
- Share information
- · Comment on your classmates' pages

Each group project will have its own page. You may create as many sub-pages within that area as you choose.

Group 01?

Group 02?

Group 03?

If you would like to preview your content before saving, click the **Preview** tab at the top of the editing area.

## **Specify as minor change. (Optional)**

Minor Change - Do not send notifications to watchers of this page.

If your edits on the page are very minor (e.g. fixing a typo) and you do not want users to receive a notification about new content on this page, you may check the **Minor Change** box to not send notifications.

#### Click Save.

Once you have finishing editing the page, click **Save**.

# How do I create a new wiki page?

To create a new page, you will need to add it as a link from an existing page.

### Go to Wiki.

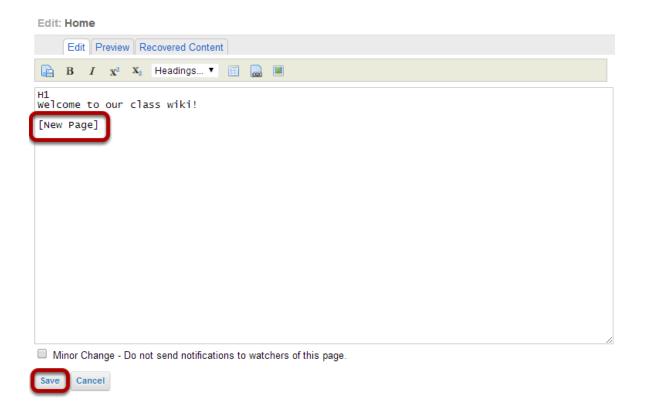

Select the **Wiki** tool from the Tool Menu of your site.

#### Click Edit.

While viewing an existing page, click the **Edit** button.

## Enter the page name.

Sakai 10 Instructor Guide

Page 1163

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

In the editing area, type the name of the page in brackets, and then click **Save**. For example, typing **[New Page]** will create a page titled "New Page".

Note: You can't use the following characters in an Wiki link or title:

: Colon

@ At

# Hash

| Pipe

\ Back-Slash

# How do I add images to a wiki page?

Before you add an image, make sure that it is the correct size and shape for your web page, and that the file size is optimized for the web. If you put an image with a very large file size into a wiki page, it will take a long time for users to download it. Many image editing programs will allow you to compress images for the web.

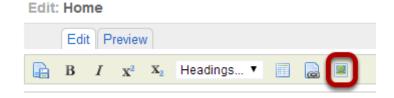

### Go to Wiki.

Select the **Wiki** tool from the Tool Menu of your site.

#### Click Edit.

## Select the Image icon in the editor toolbar.

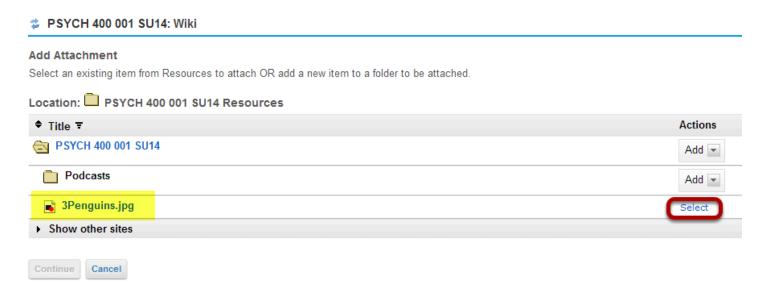

Sakai 10 Instructor Guide

Page 1165

This work is licensed under a Creative Commons Attribution 4.0 Intl. License, http://creative.commons.org/licenses/by/4.0/

## Select the image from Resources.

Click the **Select** link for the image file if it is already in Resources.

## Or, upload the file.

If the image file is not already in Resources, click **Upload Files** in the Add drop-down menu to browse for and select the file you want.

Sakai 10 Instructor Guide Page 1166

#### Click Continue.

Once you have selected the image file, click the **Continue** button.

## **Preview content. (Optional)**

If you would like to preview your content before saving, click the **Preview** tab at the top of the editing area.

## Click Save.

Once you have finishing editing the page, click **Save**.

# How do I add attachments to a wiki page?

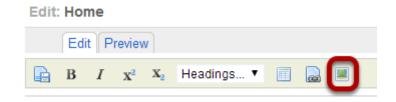

## Go to Wiki.

Select the Wiki tool from the Tool Menu of your site.

#### Click Edit.

## Select the Image/Attachment icon in the editor toolbar.

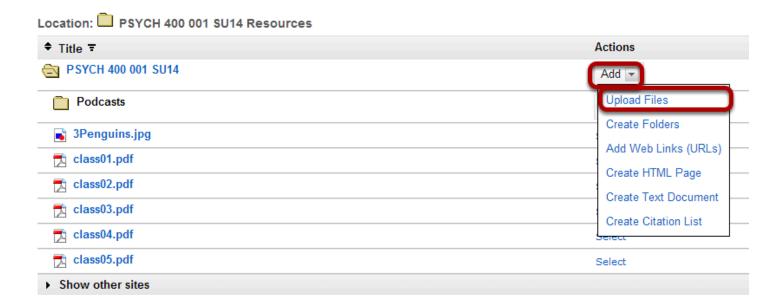

## Select the file from Resources.

Click the **Select** link for the file you want to attach if it is already in Resources.

## Or, upload the file.

If the file is not already in Resources, click **Upload Files** in the Add drop-down menu to browse for and select the file you want.

#### Click Continue.

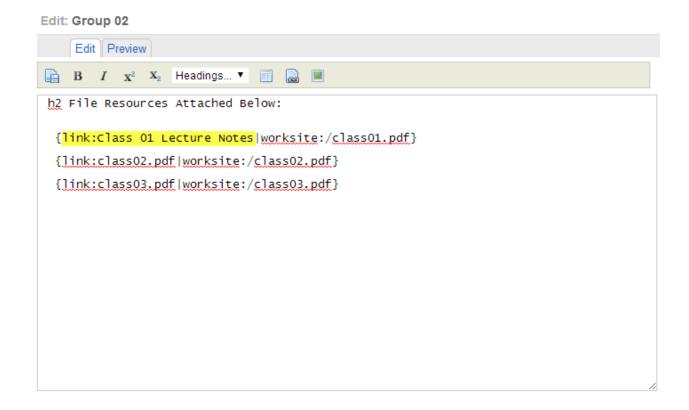

Once you have selected the image file, click the **Continue** button.

If you would like to preview your content before saving, click the **Preview** tab at the top of the editing area.

## Click Save.

Once you have finishing editing the page, click **Save**.

# How do I view wiki page info?

#### Go to Wiki.

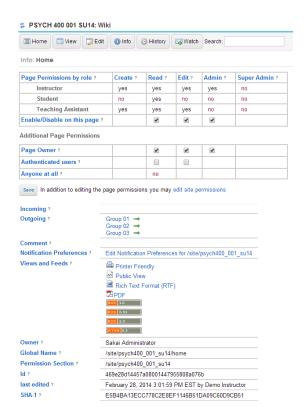

Select the Wiki tool from the Tool Menu of your site.

#### Click Info.

Select the **Info** button to view the information for the page you are currently viewing.

## View page information.

The following information will be displayed for this page:

- · Lists all pages the page links to
- · Lists all pages that link to this page
- Gives the page owner (usually the person who created it)
- Gives the global page name, to allow linking to it from outside the Wiki

- Gives the page permission details (the site you need to be a member of to see it)
- Gives details of when the page was last edited

The Info screen also allows you to open the following versions of the page:

- Printer friendly version
- Un-editable HTML version
- An open document format (.odf) version (which can be opened in Open Office, for example)
- An RSS feed of recent changes

## How do I watch or subscribe to a wiki?

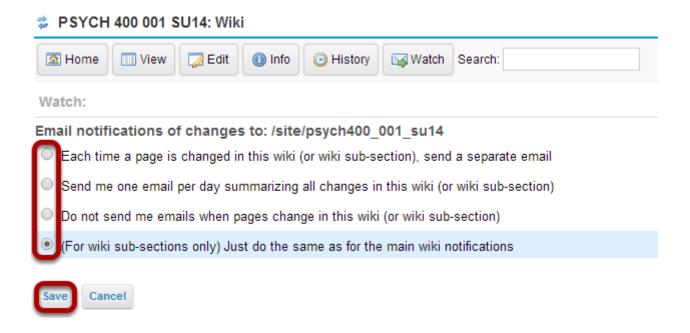

#### Go to Wiki.

Select the **Wiki** tool from the Tool Menu of your site.

#### Click Watch.

## Choose your notification preference.

You may choose from the following notification options:

- Each time a page is changed in this wiki (or wiki sub-section), send a separate email
- Send me one email per day summarizing all changes in this wiki (or wiki sub-section)
- Do not send me emails when pages change in this wiki (or wiki sub-section)
- (For wiki sub-sections only) Just do the same as for the main wiki notifications

Select the radio button for your desired notification level, and then click **Save**.

## How do I view wiki page history?

#### Go to Wiki.

Select the Wiki tool from the Tool Menu of your site.

## Click History.

Select the **History** button to view the history for the page you are currently viewing.

## View page history.

Page history displays the following information:

- Gives a list of all previous versions of that page, with the name of the user who altered it and the date.
- Allows you to view any previous version.
- Compare the contents of any version with the current version.
- Compare the contents of any version with the version immediately previous, to see what changes were made by each user.
- Allows you to revert to any previous version.

Tip: If you have accidentally deleted content from your page, you can use the "Revert to this version" option to revert to an earlier, correct version, for example.

## How do I set wiki permissions?

Wiki has two levels of permissions: site level and page level. Site level permissions are the default permissions for all wiki pages. However, permissions can be also changed for individual pages at the page level. For example, you can alter permissions so that the wiki is editable by everyone, except for one page which can only be edited by instructors.

There are 5 types of permissions within Wiki:

- Read (read pages)
- Create (create new pages; update must be enabled to allow this)
- Update (edit pages)
- Admin (alter site permissions)
- Super-admin (typically reserved for system administrators)

Note: Wiki permissions cascade downwards. For example, you cannot update a page if you cannot read it, so it makes no sense to enable "update" but dis-enable "read". If you enabled "create" or "update", Wiki will assume that you want "read" permission enabled as well.

#### Go to Wiki.

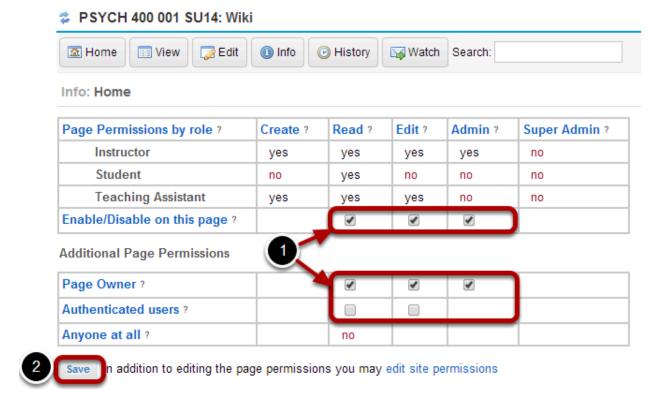

Select the **Wiki** tool from the Tool Menu of your site.

## Click Info.

Select the Info button to view the information for the page you are currently viewing.

## Edit page level permissions.

You may check or uncheck the boxes available on this page to enable/disable the associated permissions for each of the user roles shown.

Note: The permission options selected here will apply the the current page only.

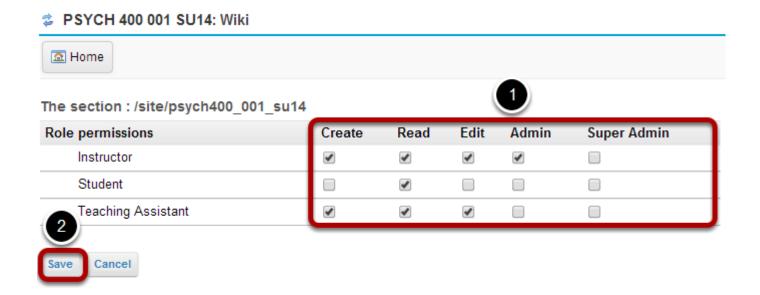

Sakai 10 Instructor Guide Page 1177 This work is licensed under a Creative Commons Attribution 4.0 Intl. License. http://creativecommons.org/licenses/by/4.0/

## Edit site level permissions.

Page Permissions by role?	Create ?	Read ?	Edit ?	Admin ?	Super Admin ?
Instructor	yes	yes	yes	yes	no
Student	no	yes	no	no	no
Teaching Assistant	yes	yes	yes	no	no
rodonnig riddiotant	,,,,,	, ,	,		
Enable/Disable on this page ?	700	•	•	•	
	,,,,	<u> </u>	-	•	
Enable/Disable on this page ?  Additional Page Permissions	,,,,		•		

In order to edit the default permissions for all wiki pages in the entire site, click on the **edit site permissions** link just below the page permissions grid.

## Select the site level permissions for each role.

- 1. Check the box next to each permission you would like to allow for a given role. (Deselecting a box will remove the corresponding permission.)
- 2. Click **Save** to save your changes.
