Select the archive file containing grades and feedback.

Upload All

Select an archive file to upload, choose options, and then click 'Upload' at the bottom. Required items marked with *
The archive file should contain a folder for each student. ([Download Template](#)) Each folder can contain a comments.txt file, the student's submission with instructor comments you have added, and/or other files you want to return with the student's submission.
The upload time needed is related to the zip file size and the connection speed. If you only need to upload a subset of the zip file, please limit your zip file size first by choosing options accordingly in the Download All process.

NOTICE: If you switch between languages in your preferences, for example English to Spanish, you will need to upload this archive in the same language as it was downloaded (or re-download and use a new archive).

Assignment 2...7172023.zip

i You have selected the archive file for uploading. Files contained in the archive will be uploaded to the corresponding student submission for the assignment.

Click the **Choose File** button to browse for and select the archive file on your local computer. You should have downloaded this archive using the **Download All** link previously. See [How do I download assignment submissions for grading offline?](#) for more information.

Note: The archive file needs to be in a specific format. It should contain a folder for the assignment and subfolders for each of the individual students. The easiest way to ensure that your file is in the correct format is to download the assignment submissions (or the template provided) directly from the Assignments tool in your site.

Create a zip file from the extracted folder on your computer.

If you have previously extracted the zip file on your computer, and then edited or added to the assignment grades or feedback, you will need to create a new archive or zip file for upload that includes your changes.

You can create a zip file from a folder in Windows by right-clicking on the folder, and then selecting **Send to** and **Compressed (zipped) folder**. The zip file will have the same name as the folder you selected.

Tip: You can either compress/zip all existing assignment folders at once for upload, or just one assignment folder at a time.

Select the desired upload and release options.
