

Accessibility Information

Sakai is a Learning Management System created to assist faculty and students by providing online tools for communication, assessment, content delivery, etc.

Sakai is composed of sites, and each site has a number of tools selected by the site creator. There is also a special site, My Workspace (private to you), where you can access personal information and change your settings.

This document is assistive technology agnostic and will briefly describe the different areas of the interface, point out how they are implemented for accessibility, and go into more depth where extra assistance may be needed.

If you need specific help with your assistive technology, please contact your institution's office for Disability Student Services and/or Information Technology Services.

For additional information visit the [Accessibility Working Group](#) on the Confluence Wiki.

Note: The content depicted in images on this page may differ from what you experience, due to your institution's customization of Sakai.

This article describes the following:

- [Desktop versus Mobile View in Sakai](#)
- [Organization of Sakai](#)
 - [Important Access Keys for Main Navigation](#)
 - [Quick Access \(Skip to...\) Links](#)
 - [Sites](#)
 - [Your Profile Picture and Name \(Use This Menu to Log Out\)](#)
 - [Favorite Sites List \(on Desktop View\)](#)
 - [Tool Menu for the Current Site](#)
 - [Expand/Collapse Tool Navigation \(for Sighted Users, on Desktop View\)](#)
 - [Content Area](#)
 - [Access Keys to Navigate the Content Area](#)
 - [Footer](#)
- [Rich-Text Editor Accessibility](#)
- [Instructions for Enlarging Screen Elements, Modifying Colors/Contrast](#)
- [How to Get More Help](#)

If you need specific help with your assistive technology, please refer to your local institution's website to find contact information for groups that can assist you with accessibility accommodations.

Desktop versus Mobile View

Sakai has a responsive design to adapt to different screen sizes, so certain elements only display when an internet browser window is larger than 770 pixels in width. In the descriptions that follow, **Desktop View** will be used to refer to the display when an internet browser window is larger than 770 pixels in width. **Mobile View** will refer to the display on smaller windows.

Organization of Sakai

Always present in Sakai are the following:

- Quick access **Skip to...** links
- One of the following two items, depending on whether or not you are logged into Sakai:
 1. Before logging in: **Login** links
 2. After logging in: the **View All Sites** menu and your profile picture and name (a menu you access to **Log Out**)
- List of favorite sites (on Desktop View)
- Tool Menu for the current site
- **Expand/Collapse Tool Navigation** feature (for sighted users on Desktop View)
- Content area
- Footer

Important Access Keys for Main Navigation

The major elements of a Sakai site can be accessed via **Access keys** (see note for more information on how to use **Access keys**):

Content - This access key takes you to the area that contains the site where you are working.

- **Landmark:** main ("Jump to Content")
- **Access key:** [C]

Tools - Every Sakai site has a Tool Menu with a list of links to the current site's tools.

- **Landmark:** navigation ("Tools")
- **Access key:** [L]

View All Sites menu - After you log in, you can use this menu to access your active sites.

- **Landmark:** navigation ("My Sites")
- **Access key:** [W]

Note: The exact keyboard commands to trigger an Access key depend on your computer operating system and internet browser. Commonly used browsers tend to use the following commands:

- Most Windows browsers: **Shift + Alt + [the Access key]**
- Most Mac browsers: **Ctrl + Option + [the Access key]**

The information on Access keys in this note provided by WebAIM.org (opens new window). You can learn more about Access keys on their website, [Keyboard Accessibility © WebAIM](http://KeyboardAccessibility.org) (opens new window).

Quick Access (Skip to...) Links

Location: The quick access links are the first three links on the page. They are announced by text-to-speech software after the page title.

These links enable the user to reach frequently used areas of Sakai.

Pictured above is how one of these (normally invisible) links displays on the page if you navigate using the **Tab** key on your keyboard in Chrome after logging in to Sakai.

Sites

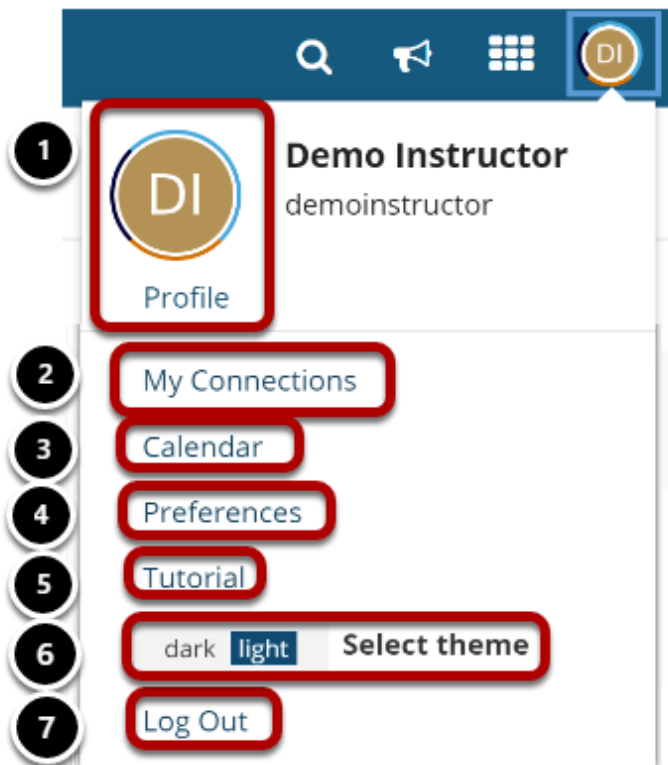

When logged in on Desktop View, the **Sites** menu follows the Academic alerts icon.

On Mobile View, the **Sites** menu appears below your profile icon (described next).

You can expand the **Sites** menu to access your active sites.

Your Profile Picture and Name (Use This Menu to Log Out)

When logged in on Desktop View, your profile picture (which displays as your initials) follows the **View All Sites** menu.

On Mobile View, your profile picture and is at the top right of the screen.

Selecting your profile picture opens a menu with the following options:

1. Your profile picture and a **Profile** link that you can select to edit your picture or profile
2. A **My Connections** link that will take you where you can search for, add, and manage your connections
3. A **Calendar** link that will take you to your aggregated calendar for all enrolled sites
4. A **Preferences** link that will take you to a page where you can edit your Sakai notifications, time zone, language, and active sites
5. A **Tutorial** link to start the Sakai introductory tutorial (this tutorial also appears the first time you log into Sakai)
6. You have the option to select a theme for your Sakai site--either dark or light view depending on your preference.
7. A **Log Out** link to log you out and take you to back to the *Gateway* page of Sakai

Favorite Sites List (on Desktop View)

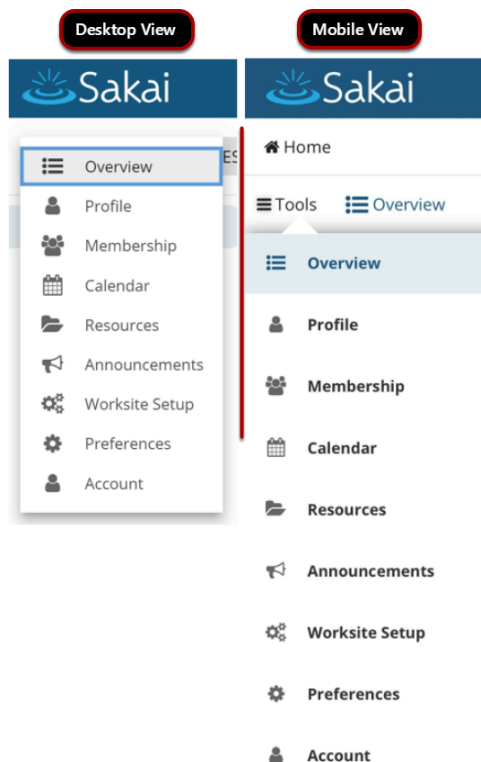

- **Location:** On Desktop View only, the favorite sites list appears after the Tool Menu.
- **Landmark:** Navigation ("Sites list begins here")
- **Heading:** Level 1 ("Sites list begins here")

This list contains the links to sites you most commonly use. You can select which sites appear in the list by selecting them as Favorites from the **View All Sites** menu. Each favorite site's tab will either take you to the site, or if you **Tab** to the menu and press the **Down** arrow key, it will supply you with a submenu of that site's tools so that you can go straight to that tool on the selected site.

Using the **Up** and **Down** arrow keys, you can navigate the submenu to the site specific tool links. These links can be activated using the **Enter** key.

If you have a large number of favorite sites, only the first 15 sites will display in this list.

Tool Menu for the Current Site

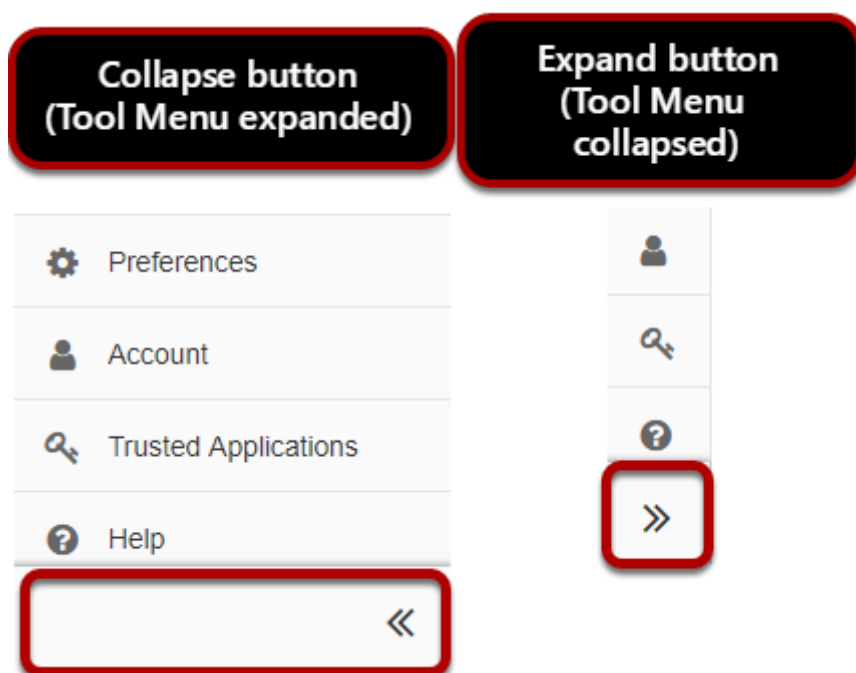

- **Location:** On Desktop View, the Tool Menu appears to the left of the screen. On Mobile View, it can be accessed by selecting **Tools** near the top of the screen.
- **Landmark:** Navigation (“Tools list begins here”)
- **Heading:** Level 1 (“Tools list begins here”)
- **Access key:** [L]

Pictured above is the Tool Menu of a **Home** site, in both Desktop View and Mobile View.

i Note: The *Help* tool will always be present as the last item in the Tool Menu no matter what site you are on. (More specifically, on the Mobile site, it will be the last option in the Tools drop-down menu. On the Desktop site, it is the last option in the Expand/collapse tool navigation menu to the left of the page.) This enables quick access to the Sakai help documentation.

Expand/Collapse Tool Navigation (for Sighted Users, on Desktop View)

Location: On Desktop View only, at the bottom of the screen underneath the Tool Menu is a button to collapse or expand the menu. When collapsed, the Tool Menu displays with icons only, no text.

The **Expand/Collapse Tool Navigation** button display switches between << (to collapse the Tool Menu) and >> (to expand the Tool Menu), depending on the state of the menu.

i Note: Using the **Expand/Collapse Tool Navigation** button will have no effect on page navigation for users of screen reading software as all tools will still be available and announced.

Content Area

The content comes after the Tool Menu.

- **Location:** On Desktop View, the content displays to the right of the Tool Menu. On Mobile View, the content appears underneath the **Tools** link.
- **Landmark:** Main
- **Heading:** Level 1 “Content begins here”
- **Access key:** [C]

At the top of the content area for most tools, you will find:

1. The **title of the tool** you are currently viewing. This is also a **Refresh Tool** link that returns you to the main page of the tool when clicked. Pictured above is an example of an **Assignments (Refresh Tool)** link.
2. The title will be followed by a **Help** button, which opens a new tab or window (depending on your internet browser preferences) with help documentation for the current tool.

Access Keys to Navigate the Content Area

Most content views use some or all of these Access keys:

- Delete, remove, or cancel - **Access key:** [X]
- Edit or revise - **Access key:** [E]
- Help - **Access key:** [0]
- Refresh - **Access key:** [U]
- Save - **Access key:** [S]
- View or preview - **Access key:** [V]

 Note: The exact keyboard commands to trigger an Access key depend on your computer operating system and internet browser. Commonly used browsers tend to use the following commands:

- Most Windows browsers: **Shift + Alt + [the Access key]**
- Most Mac browsers: **Ctrl + Option + [the Access key]**

The information on Access keys in this note provided by [WebAIM.org](https://webaim.org) (opens new window). You can learn more about Access keys on their website, [Keyboard Accessibility © WebAIM](#) (opens new window).

Rich-Text Editor Accessibility

In most areas of Sakai where text can be entered, you can use the **Rich-Text Editor** to edit and format your text, and to add links, images, or media.

Steps to access the Rich-Text Editor's toolbar with a keyboard are included in [What are some keyboard shortcuts for the Rich Text Editor?](#)

Instructions for Enlarging Screen Elements, Modifying Colors/Contrast

You can use the browser's zooming function to increase text size. Sakai will work well up to 200% zoom.

If you need a higher level of magnification, or if you need to have the cursor/pointer augmented, you may be more comfortable using a third-party magnifier such as [MAGic](#) (opens new window) or [ZoomText](#) (opens new window).

To change color and contrast settings, use the operating system settings, browser settings, or your preferred browser plug-ins.

Getting More Help

If you need further help, please contact your local institution's accessibility support resources.
