# How do I add images to a wiki page?

Before you add an image, make sure that it is the correct size and shape for your web page, and that the file size is optimized for the web. If you put an image with a very large file size into a wiki page, it will take a long time for users to download it. Many image editing programs will allow you to compress images for the web.
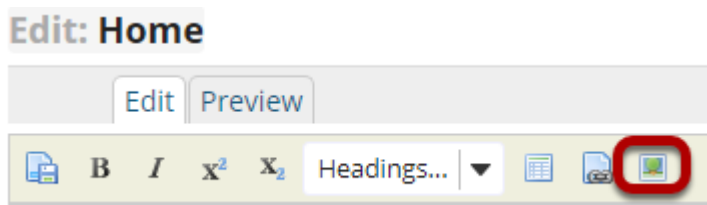

Go to Wiki.

Select the **Wiki** tool from the Tool Menu of your site.

Click Edit.

Select the Image icon in the editor toolbar.

Select the image from Resources.

Add Attachment

Select an existing item from Resources to attach OR add a new item to a folder to be attached.

Location: 📂 **Discussion 6 SMPL101 Resources**

↗ Title ⌄	Actions	
📂 Discussion 6 SMPL101	• Add ▾	
🖼 giraffe-2222908_640.jpg	Select	
▸ **Show other sites**		

[CONTINUE] [Cancel]

Click the **Select** link for the image file if it is already in Resources.

Or, upload the file.

Add Attachment

Select an existing item from Resources to attach OR add a new item to a folder to be attached.

Location: 📂 **Demo 001 002 Spring 2020 Resources**

↗ Title ⌄	Actions	

📁 Demo 001 002 Spring 2020	• Add ▾
	  ○ Upload Files
	  ○ Create Folders
	  ○ Add Web Links (URLs)
	  ○ Create Text Document
	  ○ Create HTML Page
	  ○ Create Citation List	

▸ **Show other sites**		

[CONTINUE] [Cancel]

If the image file is not already in Resources, click **Add > Upload Files** in the Add drop-down menu to drag and drop or browse for and select the file you want.

Click Continue.

Once you have selected the image file, click the **Continue** button.

Preview content. (Optional)

If you would like to preview your content before saving, click the **Preview** tab at the top of the editing area.

Click Save.

Once you have finishing editing the page, click **Save**.
