

How do I give specific students an assessment with different settings (e.g., extra time)?

Some students in your class may need different assessment settings from others, for example, a student could require accommodations for extra time on a timed assessment, or multiple rosters or sections in the same course site could be administered the same assessment on different dates. You can duplicate an assessment and edit the settings in the second copy of the assessment to tailor these settings to specific needs.

The following steps are needed to create an assessment copy with different settings (each step is linked to the relevant Help article):

1. [Have or create a group containing the student\(s\) who need the specific settings.](#) (Course rosters are automatically treated as groups).
2. [On the Working Copies tab of Tests & Quizzes, duplicate the assessment.](#)
3. [Edit the settings in the new copy of the assessment.](#)
4. [Publish the assessment.](#)

Illustrated steps to create a group can be found in the article [How do I create groups?](#)
