# How do I create two columns inside a block on a Lessons page?

Each of the blocks on a Lessons page can be broken into two columns inside its borders. To create two columns inside a block, follow the steps below.
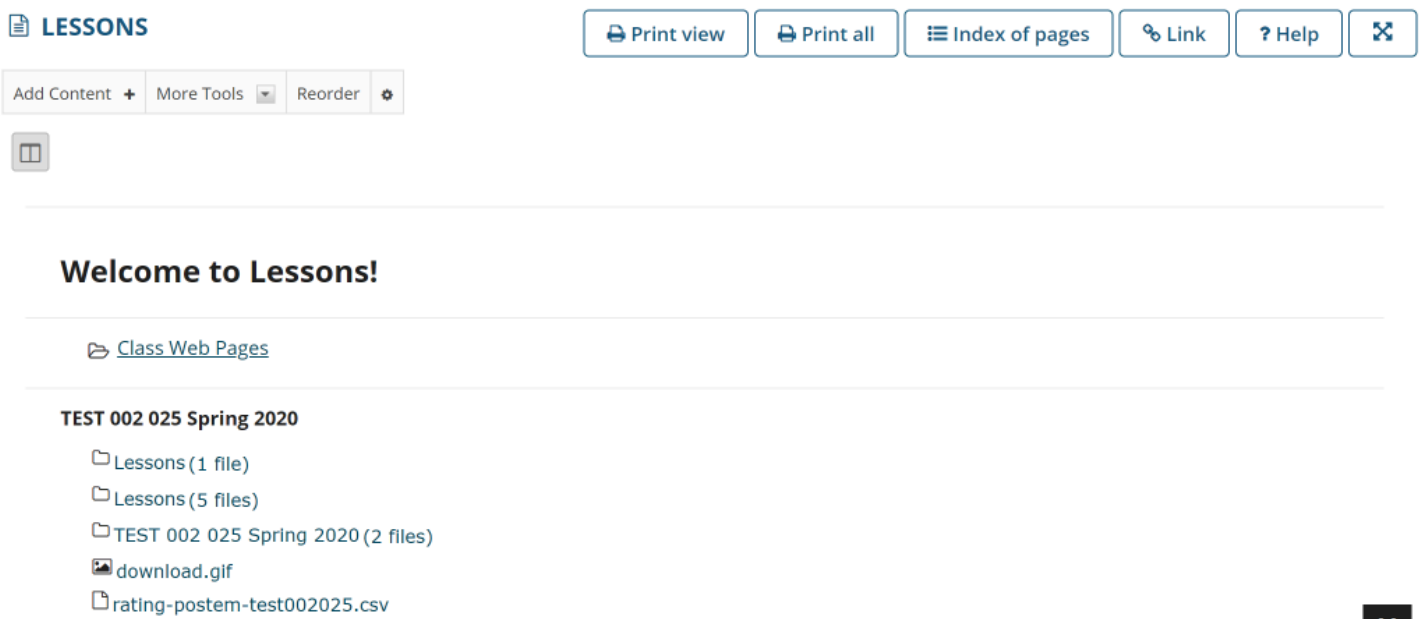

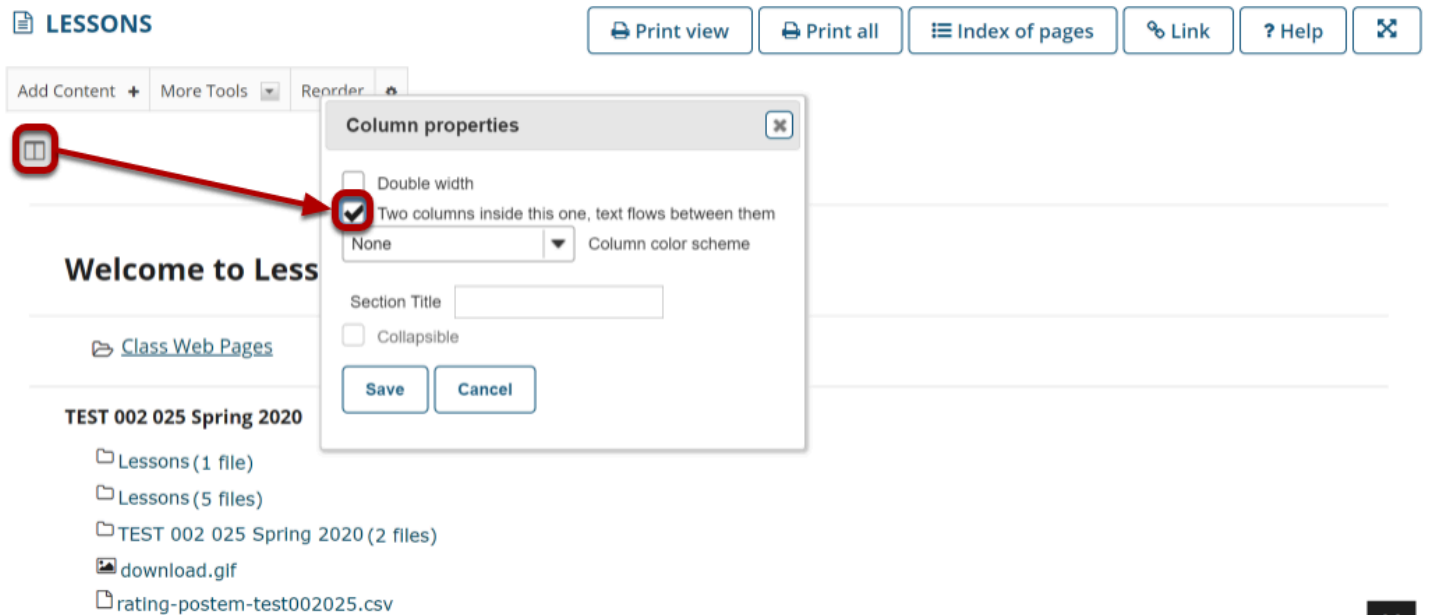

Go to Lessons.

Click on the Lessons tool in the Tool Menu to display the page.

Note: The Lesson page must already contain content before adding sections.

## Add at least two content items in one block.

Click the Column Properties button.

The Column Properties button is located in the top left of the content block.

In the Column Properties pop-up window, check the box for **Two columns inside this one, text flows between them**.

View two columns within the block.

You will now see two columns side-by-side inside a single content block.
